The National Park System is dedicated to conserving the scenic, scientific, and historic heritage of the United States for the benefit and enjoyment of its people.

UNITED STATES DEPARTMENT OF THE INTERIOR

Stewart L. Udall, *Secretary*
NATIONAL PARK SERVICE
Conrad L. Wirth, *Director*

CAMPING FACILITIES

IN AREAS ADMINISTERED BY THE NATIONAL PARK SERVICE

General Information

Outdoor camping in the undisturbed natural surroundings of the great scenic areas of the National Park System is a memorable experience enjoyed each year by thousands of visitors. This booklet is intended to help you plan a park camping trip.

Camping facilities are provided in National Parks (except Carlsbad Caverns), National Parkways, National Recreation Areas, and in many National Monuments in the West and Southwest. Camping is not permitted in historical areas, such as National Battlefield Parks.

No fees are levied for camping except for bathing and laundry facilities or where utility connections for trailers are provided. In some areas, an admission fee for each vehicle is collected at entrance stations. Fees are deposited in the United States Treasury and offset, in part, appropriations made for operating the National Park System.

RESERVATIONS

Individual campsite reservations cannot be made; they are assigned on a first-come, first-served basis. However, large groups can make advance reservations in areas which have special group camps. Stays are normally limited to 14 days to make campsites available to more people.

OUTDOOR PROGRAMS

In many parks, interpretive programs, consisting of nature walks, guided tours, and campfire talks, are conducted by park naturalists.

WILDERNESS CAMPING

Many parks and monuments contain true wilderness areas. In some of them, the self-sufficient camper may hike to a desert canyon or climb to a mountain lake where there are no facilities. This type of camping should not be attempted by the novice, for the end of the trail may be miles from water supply or human habitation. Since the dangers to the inexperienced or ill-equipped camper in such a venture are real and serious, it is necessary that the superintendent or a park ranger be informed of your plans for such a trip and have the opportunity to inspect your gear. Under certain circumstances, such as high fire danger or probability of extreme weather, you may be required to postpone your expedition until more favorable conditions prevail.

INFORMATION IN ADVANCE

No matter which type of camping you are contemplating, you may write to the superintendents of the areas that you plan to visit, requesting full information on facilities available and possibilities for a wilderness trip, if that is your goal. When you arrive at the park, consult with a park ranger, who will answer your questions and attempt to make your stay enjoyable.

EQUIPMENT

Some of the items you may want to take on your camping trip if you plan to stay in an established campground may include a tent, air mattresses or cots, sleeping bags or blankets, ground cloth, gasoline lantern, gasoline stove, cook kit and eating utensils, camp ice-box, flashlight, vacuum jug, and first-aid kit. For a wilderness camping trip, only a minimum of equipment should be taken, including such essentials as a lightweight tent or tarp, sleeping bags, ground cloth, cook kit, canteen, flashlight, hatchet, shovel, and rope.

REGULATIONS

Free campgrounds are provided by the National Park Service to encourage greater use of this very enjoyable and beneficial form of recreation. A few regulations have been established, and are enforced, for the protection of natural features and for your comfort and safety.

Natural Features. Every area of the National Park System is a museum of natural or human history; therefore, removal or destruction of any of the features is not allowed. This also applies to manmade facilities.

Fire. Confine your fire to fireplaces in established campgrounds and picnic areas. When you retire for the night, or leave your campfire unattended for any reason, make certain that it is entirely out. Where required, wilderness campers must obtain a fire permit.

Wildlife. Do not feed animals. Injuries to campers by bears or other animals are usually due to the campers' attempt to feed them. Observe them, but do not interfere with them. Food supplies should be locked up or hung out of reach.

Trash. Keep your camp clean by placing all garbage and trash in containers provided. All combustible material should be burned in the fireplaces. In wilderness camps, incombustible trash—including cans—should be carried out or disposed of as directed by signs.

Pets. Dogs, cats, and other pets are allowed in the parks if on leash or otherwise under physical restraint.

Noise. Common courtesy is the rule. Avoid noise especially late at night and early in the morning.

MISSION 66

MISSION 66 is a long-range conservation program for the National Park System. Begun in 1956, the program will reach its midpoint in 1961. It is designed to protect the basic resources of the parks, to raise the

standards of park use, to provide adequate staffing, and to furnish the physical facilities required to meet the needs of an expected 83,000,000 visitors in 1966, the 50th anniversary of the establishment of the National Park Service.

The first 5 years of MISSION 66 have seen many improvements for your comfort and for your greater enjoyment of the parks. About 20,000 campsites are now available and additional ones are planned; 45 visitor centers have been completed and more are under construction; about 650 miles of roads have been improved for your safety; and 288 miles of walks and trails have been built or rehabilitated. These are just a part of the many protection and development projects that have been accomplished. The ultimate objective is to strengthen and safeguard the National Park concept and to provide you with opportunities for enjoying our heritage in the National Park System.

National Parks and National Forests

Millions of people annually visit both National Parks and National Forests, or receive benefits of one kind or another from them, without realizing that there is a definite distinction between these two kinds of Federal reservations. Perhaps you are one of these people, and you would like to know what that distinction is.

The main distinction is that each is established under a different concept of land use. National Parks are units of Federal land that are preserved in a natural condition, insofar as is possible, and are used for recreation. National Forests are managed primarily to insure a continuous supply of forest products and to protect watersheds. In the course of this management, recreational and other benefits may be obtained.

Both the National Forests and the many kinds of areas that comprise the National Park System exemplify conservation—the wise use of our resources; and both play an important part in the lives of the people of our Nation.

Definitions of Categories of Camping Accommodations

CAMPGROUND

A campground is an area with an organized layout having well-defined roads, parking spaces, and campsites. Drinking water and sanitary facilities, including toilets and refuse cans, are furnished on a community basis. Each campground has a designed capacity based on the number of campsites therein.

A campground site, or campsite, is a clearly marked plot or location within a campground which provides accommodations for camping by an individual, family, or party. A typical campsite in a campground would include a parking space, fireplace, table and bench combination, and a tent space; however, in a walk-in campground or walk-in section of a campground, the parking space is provided but not as an integral part of each campsite.

CAMPING AREA

A camping area is an area (other than a campground) designated and regularly used for camping by individuals, families, or parties. Camping areas may be accessible by either road or trail. Facilities provided are minimum, generally being limited to access roads, basic sanitary facilities, and a limited number of fireplaces and tables. Trail camps fall within this category, and shelters of the Adirondack or fully enclosed type may be provided. Each camping area has an assigned, as differentiated from designed, capacity based on the number of camping spaces therein. Superintendents assign to each camping area a capacity figure, in terms of camping spaces, based on a realistic evaluation of acreage involved, topography, and facilities provided.

A camping space in a camping area is one which is normally occupied by an individual, family, or party.

GROUP CAMP

A group camp is an area designated for use by organized groups, such as Boy Scouts, school groups, or other large parties. It is comprised of one or more group sites or spaces, each of which is provided with a large fireplace, several tables, and parking space for buses or a number of cars. Capacity of group camps is rated on the basis of the number of group sites or spaces within the camp and the number of persons each can normally accommodate.

Camping Accommodations

[See opposite page for definitions of categories of camping accommodations used in this table. An asterisk (*) following the name of the camping accommodation in the table indicates that group sites or spaces are available.]

For information about camping in State parks and State forests, write to the following offices at the State capitals: State Park Department or Commission; State Forestry Department; State Chamber of Commerce.

Notes

Publications on Individual Areas of the National Park System

The National Park Service issues illustrated publications of general information for most of the areas of the National Park System. Copies are provided to visitors at entrance or information stations. They may also be purchased by mail from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. In addition, the Service issues a number of specialized publications which are obtainable by purchase only.

Price lists of National Park Service publications sold by the Superintendent of Documents may be obtained on request to that agency.

If you need information, or are in any difficulty,
see a park ranger.
