HAWAII NATIONAL PARK

The Hawaii National Park, in the Territory of Hawaii, was created by act of Congress August 1, 1916, and placed under the control of the National Park Service of the Interior Department. It is unique in that it consists of two separate tracts of land lying on different islands. The Kilauea-Mauna Loa area is located on the island of Hawaii, and the Haleakala section is on the island of Maui. The total area of the park is 245 square miles. Of this, 219 square miles are in the Kilauea-Mauna Loa section and 26 in the Haleakala area.

The park was created to conserve the most representative areas of volcanic interest in the United States. Its craters, active and dormant, are among the most important in the entire world and even the active ones may be visited with reasonable safety.

Each section of the park is named after the volcano that is its outstanding feature. Kilauea Crater, with a lake or lakes of molten lava, has been active almost continuously since its discovery. Mauna Loa, which erupts about once a decade, is the largest active volcanic mountain mass in the world and has poured out more lava during the last century than any other volcano on the globe. Haleakala, a dormant volcano, is a mountain mass 10,000 feet high, with a tremendous crater rift in its summit 5 miles across and 3,000 feet deep, containing many high lava cones.

LUXURIANT TROPICAL VEGETATION

The park is also noted for its luxuriant tropical vegetation, which forms a striking contrast to the volcanic craters and barren lava flows. Gorgeous tree ferns, sandalwood, and lei, or Hawaiian mahogany, vie with the flowering ohia trees in making the park forests unusually interesting to the visitor.

KILAUEA SECTION

The most spectacular portion of the park is that including the volcano of Kilauea, usually the most active. This volcano, probably older than towering Mauna Loa, its neighbor, creates the impression of being a crater in the side of the higher mountain, although in reality it is itself a mountain with an elevation of 4,000 feet. This illusion is the result of the broad depth of its gentle slopes, caused by lava flows from many lateral vents. Within the depression is a vast pit, Halemaumau, sometimes called the "House of Everlasting Fire," which for years has drawn travelers.
from the four quarters of the earth. This inner crater often contains a boiling, bubbling mass of molten lava whose surface fluctuates from bottom to rim. Activities averaging at least one outbreak a year have occurred since 1900. Its risings are accompanied by brilliant fountains and inflows of liquid lava, and its lowerings by tremendous avalanches which send up enormous dust clouds.

Nearly a century and a half ago Halemaumau became unusually active, and its violent blast of ash destroyed an Hawaiian army. From that time—1790—no rocks or ash were ejected until 1924. During the autumn of 1923 the lake of fire drained away, but gradually returned until the pit contained a 50-acre lake of seething lava. Lava geysers traveled across its surface, sending up incandescent sprays 150 feet into the air. Again the lake disappeared and crumbling masses of rock fell into the smoking pit, choking the vents through which the volcanic gases had escaped. A few months later, when steam blasts unexpectedly returned, the vents were cleared by tremendous explosions hurling ashes for miles into the air. The violent disturbance continued for three weeks, and at the end of that time the fire pit had been enlarged to four times its former size, the opening being 190 acres in area and 1,200 feet deep. A few weeks later, when all was quiet, a roaring jet of lava appeared at the bottom of the pit, sending up a steady spray 200 feet high, building up a small cinder cone and forming a 10-acre lava lake on the floor of the pit. After giving a brilliant display for a couple of weeks the fountain subsided and the volcano became dormant. In July, 1927, a similar display occurred, lasting for two weeks, and in January, 1928, the fire returned for one night only. Gas and vapor rise continually.

During 1929 spectacular lava inflows occurred in February and July, raising the floor with new material to depths of 55 and 45 feet, respectively. The pit depth in December, 1929, was 1,050 feet and the floor area 48 acres. On November 19, 1930, molten lava again appeared in Halemaumau. Activity continued until December 7. This activity raised the floor of the pit 70 feet; the surface area of the floor covers 62 acres. Further inflows are expected at more frequent intervals and for longer periods, and the permanent return of lava to the pit is not unlikely.

**COMMON TREES AND SHRUBS**

Animal life in Hawaii National Park is scarce, but the scarcity of fauna is more than offset by floral abundance, and the student of botany will find much to interest him from the coconut groves of the coast to the stunted ohia trees near the timber line of Mauna Loa. Particular attention is directed to the tropical vegetation in the Fern Jungle through which the road to the volcano passes; many of the giant ferns are 40 feet high, with single fronds 25 feet long arching gracefully over the highway. By walking only a few yards back into this jungle one easily gets the impression of being back in a prehistoric era when the entire earth was covered with plants of similar appearance. Thimbleberries and ohelo berries are plentiful along most of the trails and in Bird Park. To the amateur botanist the following list will be interesting:

**Ahupu’u Tree Fern (Cibotium chamissonis).** —Distinguished by its soft, yellow, glossy hair, or pulu used for stuffing pillows and mattresses.

**Hapu’u tree fern (Cibotium menziesii).** —The larger tree fern with stiff, long black hair on the leaf stems.

**Hiali, sandalwood (Santalum paniculatum).** —Attains a height of 25 feet; thin leaves overcast with a whitish bloom; the blossoms occur in densely flowered panicles; wood very light and fragrant.

**Koa, Hawaiian mahogany (Acacia koa).** —The statelyst tree in Hawaii; readily recognized by its sickle-shaped leaves and large symmetrical crown when growing in the open. The true compound leaf is found on the young trees and sprouts. Used by the natives in making dug-out canoes and surf boards; now used in making ukuleles and furniture on account of the beautiful grain. A magnificent specimen with trunk 10 feet in diameter was preserved when a lava flow stopped within 20 feet of it.

**Mamake, paper mulberry (Pipturus albidus).** —A small tree with rough leaves, usually with red veins and stalks. The Hawaiians make their tapa or paper cloth from the inner bark of this tree.

**Mamani (Edwardsia chrysophylla).** —A sturdy tree with compound leaves belonging to the pea family; bright yellow pealike blossoms; rough, corky pod, deeply constricted between the seeds; rough bark on the older trees; wood very durable, making excellent fence posts, but so hard that a special staple must be used.

**Ohelo, native huckleberry (Vaccinium reticulatum).** —Small shrub with inconspicuous flowers and red and yellow berries which are excellent for pies; very plentiful around Kilauea Crater.

**Ohia, Ohia Lehua (Metrosideros collina polymorpha).** —The most plentiful tree in the islands, varying greatly in size and character of its leaves. Has a scaly bark, and produces a very hard, close-grained wood suitable for beams and railroad ties. Easily identified by its brilliant scarlet pompom blossoms.

**Wawaeiole, Rats Foot (Lycopodium sp.).** —An interesting low-growing fernlike plant which has taken its common name from the manner in which its leaves resemble the grouped toes of a rat. Color is yellowish green and plant is found usually in the thickest of the undergrowth along the trail side in some sections of the park.

**Uluehe, Staghorn Fern (Dickranopteris emarginata).** —A comparatively small leaf fern of vine and bush character found all through the park as a tangled mass among the ohia trees and undergrowth; by itself as a thick bush.

**BIRD PARK**

Bird Park, a beautiful natural park also known as Kipuka Pu’u’ulo, is an interesting feature of the Kilauea area. This kipuka or oasis has escaped encircling lava flows, and its rich black soil supports a marvelous variety of vegetation. As many as 40 species of trees grow here. This favored spot of 66 acres is the haunt of many beautiful and rare native birds.
A volcano observatory is maintained at Kilauea by the Geological Survey of the Department of the Interior, and much valuable scientific data is obtained here concerning earthquakes and volcanoes. Dr. T. A. Jaggar is the volcanologist in charge.

**UWEKAHUNA OBSERVATORY AND MUSEUM**

The National Park Service maintains a museum at Uwekahuna Observatory, located on the high point of Uwekahuna Bluff, where it overlooks the entire Kilauea Crater and Kau Desert. Through the medium of lectures by staff members, demonstration maps and charts, motion pictures, lantern slides, exhibits of volcanic rock and formations, and an actually operating seismograph the visitor is enabled to secure a comprehensive knowledge of volcanic action and its history in this particular area. The motion picture shown to groups visiting the museum has proved to be of exceptional value to park guests; many have remarked that it is a feature of the park tour that visitors should not miss. The picture, "The Structure of the Earth," edited and titled by the department of geology of Harvard University, shows views of several volcanoes in various parts of the world during periods of activity. A large part of the picture is devoted to views of Kilauea and its firepit, Halemaunau, during eruptions. The views of Kilauea are so vivid that even though one does not have an opportunity to actually see the volcano in action, the picture gives one a very clear conception of Kilauea during a period of activity. The motion picture also shows diagrammatically how a great volcanic mountain is built up by the extruding of volcanic ash, cinders, and lava flows from the interior of the earth, and how the famous lava tubes of Hawaii have been formed in the ancient flows from Kilauea and Mauna Loa.

The observatory buildings, together with their scientific equipment, were donated by the Hawaiian Volcano Research Association, and the lecture hall is a donated structure erected from proceeds of Hui O Pele memberships.

**ROADS AND TRAILS**

Thirty-eight miles of highways lie within the park, one of the roads leading to the very brink of Halemaumau, the fire pit, a fact that establishes Kilauea as the most convenient and popular volcano in the world. The Chain-of-Craters Road, 7 miles in length, passes by nine craters that lie on the great Puna rift, and will eventually be met by a new territorial road from Kalapana on the Puna coast. Bird Park, the great 1920 chasm, Cone and Pit Craters, and other important sections, although remote from the highway, may be reached by the venturesome motorist by means of auto trails. There are 142 miles of trails in the park.

There are several interesting trails in the Kilauea section. One of the most interesting is known as the "World's weirdest walk," and leads from the hotel to the rim of the crater. Its first half mile winds through rich tropical vegetation; then for a mile it takes its way through fantastic lava formations, the result of the Kau flow of 1919, when Kilauea's lava overflowed. Another mile crosses the area bombarded by huge boulders and fragments of lava during the 1924 eruptions.

Below is a list of the most popular trails in the Kilauea section. All of them are well marked, with points of interest along the way identified.

<table>
<thead>
<tr>
<th>Trail</th>
<th>Description</th>
<th>One-way distance from hotel</th>
</tr>
</thead>
<tbody>
<tr>
<td>Halemaumau (World's Weirdest Walk)</td>
<td>Through beautiful forest growth to bare lava flows and across weird lava formations to fire pit. Return trip can be made over roads by car or by other trails.</td>
<td>3 miles by trail.</td>
</tr>
<tr>
<td>Kilauea Crater Circle</td>
<td>A combination of trails which encircles the volcano of Kilauea on the outer rim. Forest growth, lava, fire pit, fern jungles. Entire trip can be taken in several short sections.</td>
<td>8 miles total.</td>
</tr>
<tr>
<td>Steaming Bluff</td>
<td>Along edge of Kilauea crater past live steam cracks to Uwekahuna. Round trip on trail or one way by car and one way by trail.</td>
<td>2 miles by trail.</td>
</tr>
<tr>
<td>Sandalwood Trail</td>
<td>A short trail near the hotel. Passes through fern trees, ohia, and sandalwood and crosses many earthquake cracks. Return can be via upper portion of Halemaumau trail, or vice versa.</td>
<td>1/4 mile.</td>
</tr>
<tr>
<td>Mauna Loa and Footprints</td>
<td>6 miles by auto and 3 miles by trail ever lava to Mauna Loa, a lava hill built up in 1920, where sticks may still be ignited in hot cracks. Passing on route the 1,790 footprints.</td>
<td>9 miles by auto plus 3 miles by trail.</td>
</tr>
<tr>
<td>Napau Crater</td>
<td>A cool jungle trail through weird forest growth. Circles 1 large crater, crosses a hot steam area, and ends at Napau Crater. Possibility of seeing wild pigs.</td>
<td>11 miles by auto plus 2.6 miles by trail.</td>
</tr>
<tr>
<td>Kilauea Iki</td>
<td>Through fern and ohia forest and descends into one of the largest and most famous old craters.</td>
<td>1 mile by auto plus 2 miles by trail.</td>
</tr>
<tr>
<td>Summer Camp and Byron Lodge Trails</td>
<td>Utilizes approach of Kilauea Iki trail and continues along edge of main crater to summer camp, or leaves hotel by Halemaumau trail and turns off shortly on trail to Byron Lodge. Several interesting circle trips possible on Byron Lodge. Much bird life here.</td>
<td>4 miles total trail on lodge. 2.5 miles hotel to summer camp, 3 miles return by auto. 9 miles by auto plus 2 miles by trail.</td>
</tr>
<tr>
<td>Punahuhu</td>
<td>Across and through alternate lava flows and kipukas to the high pali overlooking miles of seacoast. Wild goats are seen frequently.</td>
<td>6 miles by auto plus 7 miles by trail.</td>
</tr>
<tr>
<td>Kau Desert</td>
<td>From Kilauea Crater bottom across a unique desert of pahoehoe lava streams, sand bottoms, and lava desert to cone and pit craters.</td>
<td>7 miles by auto plus 9 miles by trail.</td>
</tr>
<tr>
<td>Hiloia Pali</td>
<td>Across and through alternate lava flows and kipukas to the high pali overlooking miles of seacoast. Wild goats are seen frequently.</td>
<td>8 miles by auto plus 16 miles by trail.</td>
</tr>
<tr>
<td>Mauna Loa</td>
<td>Ascends a volcano 13,775 feet elevation and visits to the summit crater Makapuowee, which is 3 miles long by 154 miles wide and periodically active. This trip requires 2 nights out.</td>
<td>3 miles by auto, 38 miles by trail.</td>
</tr>
<tr>
<td>Old Keauhou Road</td>
<td>Through semilitholike boulders and fern jungles, passing lava tubes, earthquake cracks, and extinct craters. Cars can meet hikers at far end of trail.</td>
<td>1 mile by auto, 10 miles by trail.</td>
</tr>
</tbody>
</table>

On account of the absence of fresh-water sources, small shelters with barrels to catch the rain run-off from the roofs have been placed on trails at strategic points. Hikers on overnight trips should inform themselves as to these points, and in addition should always carry canteens of water.

**MAUNA LOA SECTION**

Not far from Kilauea is the Mauna Loa section, with its great volcano rising to an altitude of 13,675 feet. So closely connected are Mauna Loa and Kilauea that the latter appears to be a portion of the taller mountain's eastern slope. Mauna Loa is not only the second highest mountain in the islands but it is one of the world's
greatest volcanoes, steadily increasing its size as volcanic outbursts every 5 or 10 years add huge masses of new lava to its bulk.

Its summit crater, Mokuaweoweo, is almost as spectacular in action as Kilauea, although entirely different. Jets of steam continually rise from its great pit, 3 miles long and 1½ miles wide. Below the crater are many rifts, some brilliantly colored from which numerous lava flows have occurred in the past. In line with these rifts are many spatter cones and other peculiar volcanic phenomena.

One eruption of Mokuaweoweo Crater occurred on the night of April 6, 1888. James Jarves in his History of the Hawaiian Islands states:

On the night of the 6th, prior to the eruption, there was a shower of ashes and pumice stone, which came from the crater, and covered the country to the distance of 10 or 15 miles each way. Generally the ashes were not more than 1 or 2 inches in depth, but in some places were found to be 15. The pumice stone was very light and appears to have been carried by the wind a great distance. The shower of yellow pumice stone which preceded the lava flow was something unusual in Hawaiian eruptions.

The last great flow from Mauna Loa occurred in the spring of 1926, after a period of dormancy of seven years. The flow, which came from a rift about 5,000 feet below the summit, lasted for nearly two weeks. It was in type, about 1,500 feet wide, and 30 feet deep, and crept down the mountain flank like a colossal caterpillar tractor. It contained a central channel, crusted over, of rushing liquid lava. Jets of pebbles shot up from steam explosions and clouds of sand were thrown up. At first there was a hissing sound from the rushing lava, followed later by a roaring sound. As the lava rushed down the mountain slope into the sea the water seemed to become deep green in color and to be steaming in widening areas. It was a never-to-be-forgotten sight for those fortunate enough to witness it. Spectacular and violent as these outbreaks are they are not dangerous, for there is always plenty of time and opportunity for onlookers to get to places of safety. In fact, a volcanic eruption in Hawaii is cause for rejoicing rather than fear, as everyone rushes to the scene of the spectacle. Mauna Loa has averaged activities once in four years since 1900.

KILAUEA-MAUNA LOA TRIP

From the Kilauea section to the crater of Mauna Loa and return is a distance of about 75 miles, and the trip can be made in three days, either riding or hiking. It is customary to leave the hotel at Kilauea on horseback in the morning, riding about 25 miles over the lava to a rest house set in a cinder cone in Mauna Loa at the 10,000-foot elevation. The night is spent here and the next day the 25-mile walk or ride to the top and back is made. The second night is spent at the rest house and the next day the return to Kilauea is made. On this journey the air is rare and cool, the view superb and unrestricted for miles around. Wild goats are encountered on the trip. Beautiful lava specimens, with the sparkle of gold and silver and varicolored brilliants, may be seen on the way.
cottages and a central building, about 5 miles by road to the south on the crater rim, is operated from about July 1 to September 1. Arrangements may be made at the Volcano House for picnics or hikers’ lunches, automobiles, horseback trips in the vicinity of the crater, and motor trips around the island.

ARMY AND NAVY RECREATION CAMPS

In the Kilauea section also are two recreation camps established for the use of the officers and enlisted men of the United States Army and Navy. Each year thousands of service men spend their vacations at the Kilauea Military Camp or the Navy Recreation Camp.

FREE PUBLIC AUTOMOBILE CAMP

A free public automobile camp, where motorists may obtain wood and water, has been established in the Ohia Forest near Keamakakoi Crater, 5 miles from Volcano House and one-fourth mile from the summer cottage camp. As the demand grows other camps will be established in convenient places.

HOW TO REACH THE PARK

A TROPICAL GATEWAY

The gateway to Hawaii’s treasures, including the national park, is Honolulu, known as the “Crossroads of the Pacific.” Here the principal trans-Pacific steamship lines converge. It is the capital of the Territory of Hawaii, and is its largest city, with a population of over 130,000. It is a cosmopolitan place, with a western atmosphere and every modern improvement. Owing to a climate that varies but a few degrees the year around, there is always an abundance of beautiful tropical flowers to delight the visitor.

TRIP TO KILAUEA AND MAUNA LOA

The 200-mile trip from Honolulu to Kilauea Volcano on the island of Hawaii can be made by sea or air to the pretty city of Hilo. The cruise along the Hamakua coast, with its many waterfalls and deep gorges, is lovely and interesting. Hilo is the second city of the Territory and the county seat of the island of Hawaii. Before it spreads the placid waters of Hilo Bay, and for a background it has the island’s highest mountain, Mauna Kea, which is sometimes snow covered. From Hilo one may take a motor trip to the charming Puna district, where the scene of the “Bird of Paradise” was laid, or a thrilling railway trip along the precipices of the Hamakua coast.

A popular way to visit the park is in automobiles, which receive visitors at the foot of the steamer landing and an hour later deposit them at the edge of the crater of Kilauea. The ride is over smooth, paved roads, bordered by tropical flowers, bushes, and berries, and between fields of sugarcane and forests of lofty fern trees. Thirty-one miles from Hilo the first sight of Kilauea’s crater is obtained.

TRIP TO HALEAKALA SECTION

The trip to Haleakala on the island of Maui may be made separately or in conjunction with the trip to Kilauea and Mauna Loa either in going to or returning from Hilo. There are good hotel accommodations and transportation facilities on Maui. The combined auto and horseback trip to the 10,000-foot summit may be made from noon to noon from Wailuku, spending the night at the top.

Other spectacular points of interest on this island are Iao Valley, a green cleft of dizzy depths in the heart of tropical mountains near
Wailuku, and the scenic drives around the coast line. Arrangements for saddle-horse service may be made with E. J. Walsh, manager of the Grand Hotel, Wailuku, Maui, and others.

GENERAL INFORMATION

For information regarding trips to the Hawaiian Islands it is suggested that prospective visitors get in touch with the Hawaii Tourist Bureau, with offices in Honolulu, Hawaii; 225 Bush Street, San Francisco, Calif.; G. P. O. 1487, Wellington, New Zealand; G. P. O. 241-D, Sydney, Australia; and P. O. Box 296, Shanghai, China.

Tours of Hawaii National Park from Honolulu may be included in the weekly excursions from the mainland conducted by Matson Navigation Co., 215 Market Street, San Francisco, Calif., and 814 Second Avenue, Seattle, Wash.; Los Angeles Steamship Co., 505 South Spring Street and 730 South Broadway, Los Angeles, Calif.; and the Dollar Line, Robert Dollar Building, San Francisco, Calif., and 514 West Sixth Street, Los Angeles, Calif.

Steamers of the Inter-Island Steam Navigation Co., Honolulu, and of the Matson and Los Angeles Lines, offer all-expense tours of both sections of the Hawaii National Park. Sample schedules and rates follow.

**Kilauea section:**

- Leave Honolulu Tuesday at 4 p.m., spending Wednesday in Hawaii National Park; returning, arrive Honolulu Thursday at 6:30 a.m. $44.00
- Leave Honolulu Friday at 4 p.m., spending Saturday night at Volcano House; returning, arrive Honolulu Monday at 7 a.m. 56.50

**Haleakala section:**

- Leave Honolulu Tuesday at 4 p.m., spending Thursday night at Rest House on summit of crater; returning, arrive Honolulu Friday 6:30 a.m. 71.00

If one arrives at Hilo without previous arrangements, he may rent an automobile with or without driver for the trip through the Kilauea section and around the island of Hawaii. The island is encircled by an automobile road crossing recent lava flows, and it may be negotiated easily in three days. Retail stores, garages, post offices, and comfortable wayside inns with good meals and lodging for visitors are to be found at convenient intervals on the route.

Travelers from the United States and Canada can easily reach Hawaii in a four and one-half to six day ocean voyage on steamers of the Matson Navigation Co., leaving San Francisco for Hawaiian ports every Wednesday and an additional fast steamer leaving San Francisco every other Saturday; on steamers leaving for Honolulu every three weeks en route to the Antipodes; on steamers of the N. Y. K. Line, leaving for Hawaii en route to the Orient every two weeks (only lay-over passengers can use this foreign line between two American ports); on steamers of the Admiral Line, or the Dollar Steamship Line's Trans-Pacific and Round-the-World services, one of which leaves every Saturday for Honolulu en route to the Orient; on steamers of the Los Angeles Steamship Co., leaving Los Angeles direct for Honolulu three Saturdays out of every four; on steamers of the Canadian-Australasian Royal Mail Line and Canadian Pacific Co. from Vancouver direct to Honolulu every four weeks.
Travelers from New Zealand may reach Hawaii on steamers of the Canadian-Australasian Line, leaving Auckland every four weeks; from Australia and New Zealand on steamers of the Matson Steamship Co., leaving Sydney every three weeks; and on those of the Canadian-Australasian Line, leaving the same port every month. Travelers from the Orient may go direct to Hawaii on steamers of the Dollar Line and Oriental Mail Line, leaving oriental ports for Honolulu every two weeks; on steamers of the N. Y. K. Line, leaving at the same intervals and on Canadian Pacific liners during certain seasons of the year.

OUTDOOR LIFE IN HAWAIIAN ISLANDS

Not considering their beauty, the greatest appeal of the Hawaiian Islands is their all-year fitness for outdoor life—hiking, swimming, tennis, golf, hunting, fishing, and surfing on great boards or in outrigger canoes.

Between Honolulu and the island of Hawaii, which is the largest of all, Molokai is passed. Here Hawaiians are homesteading successfully. Maui, passed en route, is known as the Valley Island. The island of Kauai, 100 miles northwest of Honolulu, is known as the Garden Island. Besides enchanting scenery, Kauai has a number of other natural attractions, such as the Barking Sands of Nohili, Waimea Canyon, the Spouting Horn, Haena Caves, and numerous beaches and bays, waterfalls, and canyons.

As long as the average visitor has made a trip of 2,000 miles or more to reach the islands, it is urged that he extend his stay from the usual one week to two weeks if possible. It will be time profitably spent. The national park comprises but a small part of the islands, and the entire Territory is of great interest. For instance, a tour of the island of Hawaii, where the Kilauea-Mauna Loa section of the park is located, displays many attractions. There are lava flows of the last and the present century with the individual characteristics all plainly signed. The Riviera-like slopes of Kona are clothed for miles with coffee bushes and dotted with quaint villages. On the coast one finds ancient Hawaiian temples and fishing villages. The bays offer the most exciting sport with heavy line and reel to be had in any waters. On the upland ranges of North Kona and Kohala immense herds of cattle, sheep, hogs, and horses, raised for island use, may be seen. Along the Hamakua coast for 50 miles the lower slopes are covered with sugarcane and the rugged coast line is marked by sugar mills and villages.
RULES AND REGULATIONS

(Approved January 14, 1932, to continue in force and effect until otherwise directed by the Secretary of the Interior)

GENERAL REGULATIONS

The following rules and regulations for the government of the Hawaii National Park are hereby established and made public, pursuant to authority conferred by the acts of Congress approved August 1, 1916 (39 Stat. 432), May 1, 1922 (42 Stat. 503), February 12, 1927 (45 Stat. 424), April 11, 1928 (44 Stat. 1087), and the act of August 25, 1916 (39 Stat. 533), as amended June 2, 1920 (41 Stat. 732), and March 7, 1928 (45 Stat. 200-235), and the act of April 19, 1930 (46 Stat. 227), and shall supersede and cancel all previous rules and regulations for this park heretofore promulgated, which are hereby rescinded.

1. Preservation of natural features and curiosities.—It is forbidden to remove or injure the stalactites and other phenomena of crystallization or incrustation in any lava tube, cave, steam vent, or spatter cone, or other repository of fragile products of volcanic action whether recently formed or ancient; or to deface the same by written inscription or otherwise; or to throw any object or substance into said lava tubes, caves, steam vents, or spatter cones; or to injure or disturb in any manner or to carry off any of the mineral deposits, specimens, natural curiosities, or wonders within the park.

The destruction, injury, defacement, or disturbance in any way of the public buildings, signs, equipment, or other property, or of the trees, flowers, vegetation, rocks, minerals, animal, or bird, or other life is prohibited; Provided, That flowers may be gathered in small quantities, when in the judgment of the superintendent, their removal will not impair the beauty of the park; but before any flowers are picked, permit must be secured from this officer: and Provided further, That the superintendent of the park may issue permits for the destruction of wild goats and pigs when said animals are likely to be injurious or destructive of flowers or other vegetation.

2. Camping.—In order to preserve the natural beauty of the park and to provide facilities for keeping the park clean, camp sites have been set apart for visitors touring the park and no camping is permitted outside the specially designated areas.

Keep the camp grounds clean. Combustible rubbish shall be burned on camp fires and all other garbage or refuse of all kinds shall be placed in garbage cans or pits provided for the purpose. When camps are made in new or unfrequented localities, garbage shall be burned or buried.

Campers may use only dead or fallen timber for fuel.

3. Fires.—Fires constitute one of the greatest perils to the park. They shall not be kindled near trees, dead wood, moss, dry leaves, forest mold, or other vegetable refuse, but in some open space on rocks or earth. Should camp be made in a locality where no such open space exists or is provided, the dead wood, moss, dry leaves, etc., shall be scraped away to the rock or earth over an area considerably larger than that required for the fire.

Fires shall be lighted only when necessary, and when no longer needed shall be completely extinguished, and all embers and beds smothered with earth or water, so that there remains no possibility of reignition.

Permission to burn on any clean-up operation within the park must be first secured from the superintendent’s office, and in such cases as is deemed advisable such burning will be under Government supervision. All costs of suppression and damage caused by reason of loss of control of such burning operations shall be paid by the person or persons to whom such permit has been granted.

ESPECIAL CARE SHALL BE TAKEN THAT NO LIGHTED CIGAR OR CIGARETTE IS DROPPED IN ANY GRASS, TWIGS, LEAVES, OR TREE MOLD

Smoking or the building of fires on any lands within the park may be prohibited by the superintendent when, in his judgment, the hazard makes such action necessary.

The use of fireworks or firecrackers in the park is prohibited, except with the written permission of the superintendent.

4. Hunting.—The park is a sanctuary for wild life of every sort, and the hunting or the killing, wounding, frightening, or capturing at any time of any wild bird or animal, except wild goats and pigs as provided in Rule 1, is prohibited within the limits of the park.

The outfits, including guns, traps, teams, horses or means of transportation of every nature or description used by any person or persons engaged in hunting, killing, ensnaring, or capturing birds or wild animals within the limits of the park, shall be taken up by the superintendent and held subject to the order of the Director of the National Park Service. Possession within said park of the dead bodies or any part thereof of any wild bird or animal shall be prima facie evidence that the person or persons having the same are guilty of violating this regulation.

During the hunting season arrangements may be made at entrance stations to identify and transport through the park carcasses of birds or animals killed outside of the park.

Firearms are prohibited within the park, except upon written permission of the superintendent. Visitors entering or traveling through the park to places beyond shall, at entrance, report and surrender all firearms, traps, seines, nets, or explosives in their possession to the first park officer, and in proper cases may obtain his written permission to carry them through the park sealed. The Government assumes no responsibility for the loss or damage to any firearms, traps, nets, or other property so surrendered to any park officer, nor are park officers authorized to accept the responsibility of custody of any property for the convenience of visitors.

NOTE.—The foregoing regulation is in effect a declaration of the law on this subject as contained in sections 4 and 5 of the act of Congress approved April 19, 1930 (46 Stat. 227), to provide for the exercise of sole and exclusive jurisdiction by the United States over the Hawaii National Park in the Territory of Hawaii, and for other purposes.
The act by its terms applies to all lands within said park, whether in public or private ownership.

5. Fishing.—Fishing by the use of drugs or explosives, or with nets, seines, or traps, or in any other way than with hook and line, or for merchandise or profit is prohibited. Fishing in particular water may be suspended, or the number of fish that may be taken by one person in one day may be regulated by the superintendent. Fish retained shall be killed. All fish hooked less than 6 inches long shall be carefully handled with moist hands and returned at once to the water, if not seriously injured. The possession of more than two days' catch by any person at any one time shall be construed as a violation of this regulation.

6. Private operations.—No person, firm, or corporation shall reside permanently, engage in any business, or erect buildings in the park without permission in writing from the Director of the National Park Service, Washington, D. C. Applications for such permission may be addressed to the director through the superintendent of the park.

7. Cameras.—Still and motion picture cameras may be freely used in the park for general scenic purposes. For the filming of motion pictures or sound pictures requiring the use of artificial settings, or special equipment, or involving the performance of a professional cast, permission must first be obtained from the superintendent of the park.

8. Gambling.—Gambling in any form or the operation of gambling devices, whether for merchandise or otherwise, is prohibited.

9. Advertisements.—Private notices or advertisements shall not be posted or displayed in the park, excepting such notices as the park superintendent deems necessary for the convenience and guidance of the public.

10. Private lands.—Owners of private lands within the park limits are entitled to the full use and enjoyment thereof. The boundaries of such lands, however, shall be determined and marked and defined, so that they may be readily distinguished from the park lands. While no limitations or conditions are imposed upon the use of private lands so long as such use does not interfere with or injure the park, private owners shall provide against trespass by their livestock upon the park lands, and all trespasses committed will be punished to the full extent of the law. Stock may be taken over the park lands to private lands with the written permission and under the supervision of the superintendent, but such permission and supervision are not required when access to such private lands is had wholly over roads or lands not owned or controlled by the United States.

11. Grazing.—The running at large, herding, or grazing of livestock of any kind on the Government lands in the park, as well as the driving of livestock over same, is prohibited, except where authority therefor has been granted by the superintendent. Livestock found improperly on the park lands may be impounded and held until claimed by the owner and the trespass adjusted.

12. Authorized operators.—All persons, firms, or corporations holding franchises in the park shall keep the grounds used by them properly policed and shall maintain the premises in a sanitary condition to the satisfaction of the superintendent. No operator shall retain in his employment a person whose presence in the park may be deemed by the superintendent subversive of good order and management of the park.

All operators shall require each of their employees to wear a metal badge, with a number thereon, or other mark of identification, the name and number corresponding therewith, or the identification mark being registered in the superintendent's office. These badges must be worn in plain sight.

13. Dogs and cats.—Dogs and cats are prohibited on the Government lands in the park, except that upon written permission of the superintendent, secured upon entrance, they may be transported over through roads by persons passing directly through the park, provided they are kept under leash, crated, or otherwise under restrictive control of the owner at all times while in the park: Provided, however, That employees and others may be authorized by the superintendent to keep dogs in the park administrative area or areas on condition that they are kept within the confines of these areas, and subject to such further conditions in the interest of good park administration as may be determined by the superintendent.

14. Dead animals.—All domestic or grazed animals that may die on Government lands in the park, at any tourist camp, or along any of the public thoroughfares, shall be buried immediately by the owner or person in charge of such animals at least 2 feet beneath the ground, and in no case less than one-fourth mile from any camp or thoroughfare.

15. Travel on trails.—Pedestrians on trails, when saddle or pack animals are passing, shall remain quiet until the animals have passed.

Persons traveling on the trails of the park, either on foot or on saddle animals, shall not take short cuts, but shall confine themselves to the main trails.

Any and all roads and trails in the park may be closed to public use by order of the superintendent when, in his judgment, such action is necessary to protect the park.

16. Travel, general.—(a) Saddle horses, pack trains, and horse-drawn vehicles have right of way over motor-propelled vehicles at all times.

(b) Load and weight limitations shall be those prescribed from time to time by the superintendent of the park and shall be complied with by the operators of all vehicles using the park roads. Schedules showing weight limitations for different roads in the park may be seen at the office of the superintendent at ranger stations at the park entrances.

(c) All vehicles shall be equipped with lights for night travel. At least one light must be carried on the left front side of all horse-drawn vehicles in a position such as to be visible from both front and rear.

17. Miscellaneous.—No pack train or saddle horse party shall be allowed in the park unless in charge of a guide. Guides may be required to pass an examination prescribed by and in a manner satisfactory to the superintendent. At the discretion of the superintendent, guides will be permitted to carry unsealed firearms.
As the only water supply in the park is rain water gathered from roofs of buildings and stored in tanks, visitors are cautioned against wilful waste or pollution of such water supply. Visitors may pick and eat any fruit found in the park, but may not carry it away unless they have a permit from the park superintendent.

18. Fines and penalties.—Persons who render themselves obnoxious by disorderly conduct or bad behavior shall be subjected to the punishment hereinafter prescribed for violation of the foregoing regulation, and, if they may be summarily removed from the park by the superintendent.

Any person who violates any of the foregoing regulations shall be deemed guilty of a misdemeanor and shall be subject to a fine of not more than $500, or imprisonment not exceeding six months, or both, and be adjudged to pay all costs of the proceedings.

Notes.—All complaints by tourists and others as to service, etc., rendered in the park should be made to the superintendent, in writing, before the complainant leaves the park. Oral complaints will be heard daily during office hours. Persons finding lost articles should deposit them at the Government headquarters or at the nearest ranger station, leaving their own names and addresses so that if not claimed by the owners within 60 days, articles may be turned over to those who found them.

AUTOMOBILE AND MOTOR CYCLE REGULATIONS

(The provisions of the county of Hawaii traffic ordinances are hereby adopted for the government of motor vehicles in the Hawaii National Park, in so far as they are applicable and not inconsistent with special park regulations.)

1. Entrances and roads.—The park roads are open throughout the year to automobiles, trucks, and motor cycles. No person may operate a motor vehicle over any of the park roads unless he holds a chauffeur's certificate or operator's license, which must be carried at all times and presented to park rangers on demand. Careful driving is demanded of all persons using the park roads. The Government is in no way responsible for any kind of accident. Travel over any park road may be restricted or prohibited when, in the judgment of the superintendent, road conditions are unsuitable for travel, or for administrative reasons.

2. Speeds.—Automobiles and other vehicles shall be so operated as to be under the safe control of the driver at all times. The speed shall be kept within such limits as may be necessary to avoid accident. Cautionary and speed limit signs must be strictly observed. The maximum speed limit is 35 miles per hour. Reckless driving will be prosecuted.

3. Horns.—The horn shall be sounded on approaching curves or stretches of road concealed for considerable distance by slopes, overhanging trees, or other obstacles, and before meeting or passing other automobiles, motor cycles, riding or driving animals, or pedestrians.

4. Lights.—All automobiles shall be equipped with head and tail lights, the headlights to be of sufficient brilliancy to insure safety in driving at night, and all lights shall be kept lighted after sunset when automobile is on the road. Blinding lights or lights out of focus or adjustment are prohibited. If necessary, headlights shall be dimmed when meeting other automobiles or motor cycles.

5. Muffler cut-outs.—Muffler cut-outs shall be closed at all times within the park area.

6. Teams.—Teams have the right of way, and automobiles shall be backed or otherwise handled as may be necessary to enable teams to pass with safety.

7. Overtaking vehicles.—Any vehicle traveling slowly upon any of the park roads shall, when overtaken by a faster-moving vehicle and upon suitable signal from such overtaking vehicle, give way to the right, allowing the overtaking vehicle reasonably free passage, provided the overtaking vehicle does not exceed the speed limits specified for the road in question.

8. Parking.—It is unlawful to park any automobile on the paved or travelable section of the highway. Shoulders must be used for this purpose.

9. Accidents: Stop-overs.—If, because of accident, or stop for any reason, automobiles are unable to keep going, they shall be immediately parked off the road, or where this is impossible, on the outer edge of the road.

The driver of any motor-driven vehicle who meets with an accident shall report the same at the nearest ranger station or to the superintendent of the park.

10. Intoxication.—No person who is under the influence of intoxicating liquor, and no person who is addicted to the use of narcotic drugs, shall operate or drive a motor-driven vehicle of any kind on the park roads.

11. Fines and penalties.—Any person who violates any of the foregoing regulations shall be deemed guilty of a misdemeanor and shall be subject to a fine of not more than $500, or imprisonment not exceeding six months, or both, and be adjudged to pay all costs of the proceedings, and/or by immediate ejectment from the park.
LITERATURE

GOVERNMENT PUBLICATIONS

Government publications on Hawaii National Park may be obtained as indicated below. Separate communications should be addressed to the officers mentioned.

DISTRIBUTED FREE BY THE NATIONAL PARK SERVICE

The following publications may be obtained free on written application to the Director of the National Park Service:

Map of National Parks and National Monuments. Shows location of all of the national parks and monuments administered by the National Park Service and all railroad routes to these reservations.

Map of National Parks and National Monuments. Shows the National Park-to-Park Highway and other roads.

Glimpses of Our National Parks. 86 pages, including illustrations. Contains descriptions of the most important features of the principal national parks.

OTHER NATIONAL PARKS

Circulars of general information similar to this for national parks listed below may be obtained free of charge by writing to the Director of the National Park Service, Washington, D. C.:

Acadia National Park.
Crater Lake National Park.
Glacier National Park.
Grand Canyon National Park.
Grand Teton National Park.
Hot Springs National Park.
Lassen Volcanic National Park.
Mesa Verde National Park.
Mount McKinley National Park.
Mount Rainier National Park.
Rocky Mountain National Park.
Sequoia and General Grant National Parks.
Wind Cave National Park.
Yellowstone National Park.
Yosemite National Park.
Zion and Bryce Canyon National Parks.

NATIONAL MONUMENTS

Glimpses of Our National Monuments, 74 pages, including 33 illustrations. Contains brief descriptions of all the national monuments administered by the Department of the Interior.

SOLD BY THE SUPERINTENDENT OF DOCUMENTS

The following publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at the price indicated, postage prepaid. Remittance should be made by money order or in cash.

Contains nine chapters, each descriptive of a national park, and one larger chapter devoted to other parks and monuments.

AUTHORIZED RATES FOR PUBLIC UTILITIES, 1932

All the rates of the authorized public utilities for services within the park are approved by the Government. Employees of the hotels, camps, and transportation lines are not Government employees and discourteous treatment by them should be reported to the management.

VOLCANO HOUSE AND KILAUEA CAMP

The Kilauea Volcano House Co. operates the Volcano House on the outer rim of the crater. This is a modern hotel of 100 rooms. The hotel provides steam and sulphur baths, using live steam and heat from the volcano. Arrangements may be made at the hotel for picnic or hikers' lunches, automobiles, horseback trips in the vicinity of the crater and the 3-day trip to the summit of Mauna Loa, and motor trips around the island. A camp is also maintained by the company in the Kilauea section.

AUTHORIZED RATES—AMERICAN PLAN

Transient meal rates: Breakfast, $1.50; lunch, $1.50; dinner, $2.

SPECIAL SUMMER RATES

(June 1 to September 1)

| Per person, per day, for period of not less than 7 days: $4.50. |
| Children 6 to 12 years of age: Three-fourths above rate. |
| Children 2 to 6 years: One-half above rate. |

KILAUEA SUMMER CAMP

(July 1 to September 1)

Accommodations in the camp at Kilauea are in comfortably furnished cottages. The rate, American plan, is $3 per person, per day. This camp is open from June 20 to September 1.

VOLCANO STUDIO

The Volcano Studio, operated by K. Maehara, and located adjacent to the hotel, carries a complete line of photographic supplies and equipment, including kodaks, cameras, projectors, movie cameras, roll films, pack films, and souvenirs. A modern laboratory is in operation at all times for developing, printing, enlarging, coloring, and framing of pictures or lantern slides.

Pictures and snapshots, both framed and unframed, of National Park and island scenes and in all sizes and styles are on sale at the studio.

SCHEDULE OF RATES

PICTURES

| Snapshots | $0.03-0.25 |
| Post cards, black and white | $0.05 |
| Hand-colored post cards | $0.10 |
| Pictures, 4 by 10 to 20 by 20 | $0.25-10.00 |
| Hand-colored pictures, 8 by 10 to 20 by 20 | $1.00-20.00 |
| Panorama volcano pictures, hand-colored | $2.00-5.00 |
| Sepia photographs, 5 by 7 to 16 by 20 | $0.50-10.00 |
| Lantern slides, hand-painted | $1.00 |
| Set of 15 souvenir post cards, in color | $0.25 |

DEVELOPING

6 and 8 exposures—roll films, 1½ by 2½ to 5 by 7 | $0.15-0.90 |

10 and 12 exposures—roll films, 2½ by 3½ to 4½ by 6½ | $0.25-1.25 |

12 exposures—film packs, 1½ by 2½ to 5 by 7 | $0.40-0.60 |

PRINTING

1½ by 2½ | $0.03 |
| 2½ by 3½ | $0.04 |
| 3½ by 4½ to 8½ by 11 | $0.06 |
| 4½ by 5½ to 10 by 15 | $0.07 |
| 12½ by 18½ by 24½ | $0.15 |

REPAIR SERVICE

On kodaks, cameras, and equipment, per hour: $1.00
The National Parks Portfolio
(SIXTH EDITION)

Bound securely in cloth
One dollar

A PRESENTATION of the national parks and national monuments in pictures. The selection is from the best work of many photographers, professional and amateur. It contains nine chapters each descriptive of a national park, and one larger chapter devoted to other parks and monuments. 274 pages, including 312 illustrations.
