

I DIDN'T KNOW THAT!

Planting for Pollinators

We need pollinators.

Pollinators are responsible for 1 out of 3 bites of food we take each day.

Native plants support pollinators.

Pollinators and native plants have evolved together and they need each other to survive.

Pollinators need our help.

Worldwide pollinator populations are declining due to habitat loss and pesticides.

You can help pollinators!

1
Plant a Native Pollinator Garden

2
Reduce or eliminate your use of pesticides.

3
Buy local and buy organic.
