

I DIDN'T KNOW THAT!

Rock Cairns

Cairns are stacks of rocks that can be used to mark trails.

But not all parks use cairns as trail guides.

Check a park's website and trail map to see if they use and maintain rock cairns before you rely on them to guide your hike.

What you can do!

1
Do not tamper with cairns.

2
Don't build your own cairns.

3
Do not add to existing cairns.

LEAVE NO TRACE
