

fishing

in the national park system

As the Nation's principal conservation agency, the Department of the Interior has basic responsibilities for water, fish, wildlife, mineral, land, park, and recreational resources. Indian and Territorial affairs are other major concerns of America's "Department of Natural Resources."

The Department works to assure the wisest choice in managing all our resources so each will make its full contribution to a better United States—now and in the future.

U.S. DEPARTMENT of the INTERIOR
NATIONAL PARK SERVICE

fishing in the national park system

To fish amid the wild and scenic grandeur of America's outdoor heritage is an exhilarating experience. Alaska to Florida, Hawaii to the Virgin Islands, these areas present to you an angler's choice from trout to tarpon.

The National Park Service emphasizes the conservation of native fishes and the preservation of high-quality angling for wild fishes. We also encourage you to put more importance on the pleasure of fishing than you do on filling your creel with fish.

Where to fish. Although you may fish in many areas near the roadsides, the most rewarding fishing adventures are almost always in the remote park wilderness. Thousands of miles of maintained trails make such regions accessible.

Special programs. In some waters, conditions limit the potential size of wild trout populations. To protect these, we frequently initiate special programs to limit the catch.

On selected waters in Great Smoky Mountains, Shenandoah, Yosemite, Sequoia, and Kings Canyon National Parks, fishing-for-fun programs have been established on an experimental basis. Fishing with artificial flies and lures, you can fish to your heart's content but must return all to the stream. (In Great Smoky Mountains on fishing-for-fun streams, fish measuring more than 16 inches may be kept.) As a result, you can catch many more fish, without depleting the streams.

Freshwater fishes and fishing. You will discover natural freshwater lakes and streams in many National Parks and Monuments, and huge manmade lakes, created by gigantic dams, in several National Recreation Areas. In the cold, clear waters live trout, salmon, grayling, and whitefish; while in the warmer waters are northern pike, perch, bass, sunfish, crappie, or channel catfish.

Saltwater fishes and fishing. From the surf, shore, pier, or boat, the variety of saltwater fish is sufficient to match any particular interest. Tarpon, snook, bonefish, grouper, snapper, barracuda, yellowtail, bonita, tuna—these are but a few of the species found in salt waters bordering many of the areas of the National Park System.

Regulations. State and Federal fishing regulations usually agree with regard to seasons, limits, and methods. To handle local situations, some special regulations are enforced. Contact the park superintendent for special regulations.

Fishing licenses. The National Park Service charges no fee for recreational fishing. However, a State freshwater license is required in all but the following National Parks: Big Bend, Crater Lake, Glacier, Isle Royale, Mammoth Cave, Mount McKinley, Mount Rainier, Olympic, Platt, and Yellowstone.

A State saltwater license is required for marine fishing in Texas, California, and Alaska.

Boating. Boating regulations can be obtained from the park superintendents or write for *Boating Regulations in the National Park System*, Superintendent of Documents, Washington, D.C. 20402. Price 30 cents.

Camping and overnight accommodations. Campgrounds and overnight accommodations are conveniently located within most parks, or in the vicinity. Write for *Camping in the National Park System*, Superintendent of Documents, Washington, D.C. 20402. Price 25 cents.

Supplies, services, boat rentals, guides, rental stock. These services are available in specific parks according to the local requirements and conditions.

Management of fishing. In National Parks and Monuments, the National Park Service administers and manages the recreational fishery resources with the cooperation of the U.S. Bureau of Sport Fisheries and Wildlife and the State Fish and Game Departments. State agencies cooperate with the management of the fishery resources within National Recreation Areas and the National Park Service administers the recreational facilities.

park-by-park review of fishing opportunities

Acadia National Park, Box 338, Bar Harbor, Maine 04609.

Brook trout, lake trout, landlocked Atlantic salmon, pickerel, perch, and bass are caught in Acadia's many lakes. Ice fishing can be enjoyed in winter. Shore fishing produces a variety of saltwater fish.

Arbuckle Recreation Area, % Platt National Park, Box 201, Sulphur, Okla. 73086.

Arbuckle Reservoir, completed in 1966, provides fishing for largemouth bass, channel catfish, and an assortment of pan fishes.

Assateague Island National Seashore, Route 2, Box 111, Berlin, Md. 21811.

A variety of saltwater fish live in the waters of this National Seashore.

Bandelier National Monument, Los Alamos, N. Mex. 87544.

There are wild brook and rainbow trout in Frijoles Creek near park headquarters, and brown trout in remote Capulin Creek.

Big Bend National Park, Big Bend National Park, Tex. 79834.

The Rio Grande, which serves as the International boundary, provides fishing for catfish.

Bighorn Canyon National Recreation Area, Box 458 YRS, Hardin, Mont. 59035.

Yellowtail Reservoir is planted with lake trout, rainbow trout, and walleye pike, and the Afterbay area below the dam is stocked with walleye pike and rainbow trout.

Black Canyon of the Gunnison National Monument, % Curecanti Recreation Area, 334 South 10th St., Montrose, Colo. 81401.

Several species of trout live in the Gunnison River, at the bottom of the Black Canyon.

Blue Ridge Parkway, Box 1710, Roanoke, Va. 24008.

Streams contain brook, rainbow, and brown trout; some waters are managed as “native trout” streams and reduced limits are enforced. Price and Trout Lakes contain rainbow trout, and bass and bluegills are found in Bass Lake.

Buck Island Reef National Monument, Box 160, Christiansted, St. Croix, V.I. 00820.

Although saltwater anglers fish in the waters surrounding this tiny monument, the primary features are the underwater coral formations and the associated variety of marine life observed by skin-diving.

Canyonlands National Park, Post Office Bldg., Moab, Utah 84532.

Ninety miles of the Colorado and Green Rivers flow through the park and contain channel catfish and other warm-water sport species. The waters are inaccessible except by boat.

Cape Cod National Seashore, South Wellfleet, Mass. 02663.

Rainbow and brook trout and warm-water sport fish live in a number of freshwater ponds within the seashore area; marine fish are taken by surf fishing or deep-sea trolling in adjacent waters.

Cape Hatteras National Seashore, Box 457, Manteo, N.C. 27954.

A variety of saltwater fish are taken from the surf, the piers, and deep-sea fishing charter boats: channel bass, mullet, striped bass, bluefish, spot, marlin, sailfish, dolphin, and amberjack. A few freshwater ponds contain bass and bluegills.

Cape Lookout National Seashore, Box 177, Beaufort, N.C. 28516.

A variety of saltwater fish are taken from the surf and from deep-sea chartered boats: channel bass, mullet, striped bass, bluefish, spot, marlin, sailfish, dolphin, and amberjack.

Catoctin Mountain Park, Thurmont, Md. 21788.

Trout live in Big Hunting Creek (fly-fishing only) and wild brook and brown trout are caught in Little Owens Creek.

Channel Islands National Monument, Box 1388, Oxnard, Calif. 93030.

Sea bass, barracuda, bonito, yellowtail, and others live in the surrounding Pacific waters.

Chesapeake and Ohio Canal National Monument, Box 158, Sharpsburg, Md. 21782.

Bass, sunfish, and a number of other species live in Big Pool near Fort Frederick, Little Pool at Hancock, and Battie Mixon Pond at Oldtown. Also, you may fish in the Potomac River which borders the monument lands.

City of Refuge National Historical Park, Honaunau, Kona, Hawaii 96726.

Saltwater fishing from the shores of this Hawaiian park.

Coulee Dam Recreation Area, Box 37, Coulee Dam, Wash. 99116.

Kamloops, rainbow trout, and kokanee are the principal sport fish in Roosevelt Lake, created by Grand Coulee Dam.

Crater Lake National Park, Box 7, Crater Lake, Oreg. 97604.

Rainbow trout and kokanee were introduced years ago into Crater Lake and are fairly common. Fishing deep within the crater rim is a unique experience. The lake is accessible by Cleetwood Trail, 1.1 miles long. Rainbow and brook trout are found in the small streams.

Curecanti Recreation Area, 334 South 10th St., Montrose, Colo. 81401.

Rainbow and brown trout are the main quest of the angler in Blue Mesa and Morrow Point Reservoirs. Kokanee have also been stocked.

Delaware Water Gap National Recreation Area, 265 South Courtland St., East Stroudsburg, Pa. 18301.

Within the authorized recreation area, smallmouth bass and walleye are the most important sport species in the Delaware River. Also, many fish for the American shad in spring when they migrate up the river in great numbers.

De Soto National Memorial, Box 1377, Bradenton, Fla. 33505.

From boats and from shore, fishermen catch a variety of saltwater fish in Tampa Bay.

Devils Postpile National Monument, Box 577 (Yosemite Village), Yosemite National Park, Calif. 95389.

The Middle Fork of the San Joaquin River contains rainbow, brook, and brown trout.

Dinosaur National Monument, Box 101, Dinosaur, Colo. 81610.

Jones Hole Creek contains rainbow and brown trout; channel catfish live in the Green and Yampa Rivers.

Everglades National Park, Box 279, Homestead, Fla. 33030.

In bays and estuarine waters, tarpon, snook, and bonefish are prized fish; but the spotted seatrout, mangrove snapper, and redfish receive the most attention of saltwater fishermen. Largemouth bass, bluegills, and other species live in the freshwater streams, ponds, and pools.

Fire Island National Seashore, Conklin Bldg., 8 West Main St., Patchogue, N.Y. 11772.

Fishermen catch bluefish, fluke, and winter flounders in Great South Bay and Moriches Bay, and striped bass and other species in the ocean.

Fort Jefferson National Monument, % Everglades National Park, Box 279, Homestead, Fla. 33030.

Waters within and surrounding the monument contain fine saltwater fishing areas.

Fort Pulaski National Monument, Box 98, Savannah Beach, Ga. 31328.

There is saltwater fishing from the bridges over the south channel of the Savannah River, and in the moat which surrounds the historic fort.

Glacier Bay National Monument, Box 1089, Juneau, Alaska 99801.

The fishery resources of Glacier Bay consists of salmon, rainbow trout, grayling, and Dolly Varden.

Glacier National Park, West Glacier, Mont. 59936.

Cutthroat, brook, and rainbow trout, Dolly Varden, and kokanee live in the lakes and streams of the park. Grayling live in a few waters in the Belly River country. Lake St. Mary, Crossley, and Waterton Lakes also contain lake trout.

Glen Canyon Recreation Area, Box 1507, Page, Ariz. 86040.

Lake Powell and the Colorado River below the dam are intensively managed for rainbow trout, largemouth bass, kokanee, and black crappie. Channel catfish and sunfish can also be taken from these waters.

Grand Canyon National Park, Box 129, Grand Canyon, Ariz. 86023.

Brown and rainbow trout live in the bottom of the canyon in Bright Angel Creek near Phantom Ranch. Channel catfish are taken from the nearby Colorado River and rainbows from Thunder River and Tapeats Creek.

Grand Teton National Park, Box 67, Moose, Wyo. 83012.

Jackson Lake is open for fishing all year (except during the brief autumn spawning season), including ice fishing in winter. Here you can fish for cutthroat and lake trout. A number of other lakes and many streams contain whitefish, and cutthroat, brook, and rainbow trout.

Great Smoky Mountains National Park, Gatlinburg, Tenn. 37738.

Bass, and brook and rainbow trout live in the 600 miles of fishing streams in the park. Bass live at lower elevations. Sections of four streams are managed as fishing-for-fun waters; on them you may use artificial flies only but all fish except those measuring more than 16 inches must be returned to the stream unharmed.

Hawaii Volcanoes National Park, Hawaii Volcanoes National Park, Hawaii 96718.

Limited surf fishing along the southern coast.

Horseshoe Bend National Military Park, Route 1, Box 63, Daviston, Ala. 36256.

You may fish for catfish, crappie, sunfish, and bass in the Tallapoosa River which flows through the park for 3 miles.

Isle Royale National Park, Box 27, Houghton, Mich. 49931.

Northern pike live in 28 inland lakes and in the waters of Lake Superior. Lake trout live in Lake Superior and in Siskiwit Lake. (Michigan laws apply for fishing in Lake Superior waters.) Other waters contain rainbow and brook trout, perch, walleye, and whitefish.

Katmai National Monument, % Mount McKinley National Park, Box 2252, Anchorage, Alaska 99501.

Grayling, whitefish, northern pike, Pacific salmon, Dolly Varden, and lake and rainbow trout live in the waters of the monument.

Lake Mead National Recreation Area, 601 Nevada Highway, Boulder City, Nev. 89005.

Two huge lakes, Lake Mead and Lake Mohave, created by Hoover and Davis Dams, provide the main fishing waters. Lake Mead is especially noted for its largemouth bass and channel catfish. Lake Mohave contains rainbow trout in the upper end and largemouth bass farther down the lake. Sunfish and crappie are also taken in these lakes.

Lassen Volcanic National Park, Mineral, Calif. 96063.

A number of roadside waters and back-country lakes and streams furnish fishing for rainbow, brook, and brown trout.

Mammoth Cave National Park, Mammoth Cave, Ky. 42259.

Sauger, walleye, catfish, and bass live in the Green and Nolin Rivers, and in several small ponds.

Mount McKinley National Park, McKinley Park, Alaska 99755.

Lake trout live in Wonder Lake, grayling and Dolly Varden live in the small ponds and streams.

Mount Rainier National Park, Longmire, Wash. 98397.

Alpine lakes and streams contain cutthroat, rainbow, brown, and brook trout.

Olympic National Park, 600 East Park Ave., Port Angeles, Wash. 98362.

Olympic's streams and lakes contain cutthroat, rainbow, and brook trout, Dolly Varden, and several species of salmon. Large rivers are noted for steelhead (sea-run rainbow trout).

Ozark National Scenic Riverways, Box 448, Van Buren, Mo. 63965.

One hundred sixty miles of the Current River and Jacks Fork are included within this area. In a wilderness setting of outstanding scenery, float fishing has an especial appeal. Rock bass and smallmouth bass are the most abundant fishes caught; but largemouth bass, walleye, and chain pickerel are fairly common.

Padre Island National Seashore, Box 8560, Corpus Christi, Tex. 78412.

Anglers take a variety of marine fish in waters adjacent to Padre Island.

Pictured Rocks National Lakeshore, Box 32, Munising, Mich. 49862.

Fine for lake trout, whitefish, coho salmon in Lake Superior. Inland lakes have sunfish, perch, bass, and pike. Streams and river have brook and rainbow trout.

Platt National Park, Box 201, Sulphur, Okla. 73086.

Streams contain sunfish, crappie, and warmouth, largemouth, and white bass.

Point Reyes National Seashore, Point Reyes, Calif. 94956.

A variety of fish are caught in the Pacific Ocean from shore or from boats. There is some freshwater fishing in several small ponds.

Prince William Forest Park, Box 208, Triangle, Va. 22172.

Three small lakes contain bass and bluegill.

Rocky Mountain National Park, Estes Park, Colo. 80517.

Cutthroat, rainbow, brown, and brook trout live in park lakes and streams.

Sanford Recreation Area, Box 325, Sanford, Tex. 79078.

Lake Meredith, on the Canadian River, provides opportunities to fish for walleye, largemouth bass, channel catfish, white crappie, and blue catfish.

Sequoia and Kings Canyon National Parks, Three Rivers, Calif. 93271.

A multitude of wilderness lakes and streams contain California golden, rainbow, brook, and brown trout. You must pack in or hike into many of the remote park waters. Sections of two streams are managed as fishing-for-fun waters.

Shadow Mountain Recreation Area, % Rocky Mountain National Park, Estes Park, Colo. 80517.

Year-round fishing is provided on two manmade lakes—Shadow Mountain Lake and Lake Granby—created by the Colorado-Big Thompson Project. Principal fish are rainbow trout and kokanee, although lake, brown, and cutthroat trout are present. Ice fishing in winter.

Shenandoah National Park, Luray, Va. 22835.

More than 100 miles of streams contain wild and colorful native brook trout. High quality fishing has developed on the Rapidan and Staunton Rivers—fishing-for-fun only.

Theodore Roosevelt National Memorial Park, Medora, N. Dak. 58645.

The Little Missouri River contains sauger, channel catfish, goldeye, and bullheads. Stretches of the river are accessible by road.

Virgin Islands National Park, Box 1707, Charlotte Amalie, St. Thomas, V.I. 00801.

Waters surrounding the islands contain such salt-water sport fish as tarpon, barracuda, jack, bonito, and bonefish. Fishing includes deep-sea trolling, and angling in shallower reef and inshore waters.

Whiskeytown-Shasta-Trinity National Recreation Area, Box 188, Whiskeytown, Calif. 96095.

Rainbow trout and kokanee are attractions.

Yellowstone National Park, Yellowstone National Park, Wyo. 83020.

Yellowstone Lake is noted for its native Yellowstone cutthroat trout. Other park streams and lakes contain rainbow, brook, brown, cutthroat, and lake trout, grayling and whitefish.

Yosemite National Park, Box 577 (Yosemite Village), Yosemite National Park, Calif. 95389.

Rainbow, golden, brook, and brown trout live in the more than 200 lakes and 550 miles of streams. The majority of the waters are away from the roadside and you must hike or ride horseback to reach them.

Zion National Park, Springdale, Utah 84767.

A short section of the Virgin River supports a limited amount of fishing for rainbow trout.

National Parks of the United States

A packet of 8 maps covering all National Parks

Large 3-color maps of the National Park System by regions of the country: Northeast, Southeast, Midwest, Southwest, West; including separate maps for the parks of Washington, D.C. and New York City; and a large 4-color map of the United States locating all parks and interstate highway systems. Description and address of each park; chart of facilities, activities, and park accommodations; illustrations; envelope convenient for mailing. Order direct from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. \$1.50 per packet.

Interpretive and informational folders

The National Park Service issues illustrated publications of general information for most of the areas of the National Park System. Copies are available at entrance or information stations. Some may also be purchased by mail from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. In addition, the Service issues a number of specialized publications which are obtainable by purchase only. Price lists of National Park Service publications sold may be obtained on request to the Superintendent of Documents.

State parks and forests

Information on State parks or forests can be obtained by writing to the State Park or Forestry Department in the capital of the State in which you are interested.
