

# Space Invader.

Picnic trash and food scraps are  
a harmful and habit-forming  
diet for wildlife.

Dependent  
animals  
can become  
a dangerous  
nuisance.

Keep wildlife  
wild and  
picnic areas  
clean.

Leave No Trace Principles of  
**Respect Wildlife**

- Observe wildlife from a distance. Do not follow or approach them.
- Never feed animals. Feeding wildlife damages their health, alters natural behaviors, and separates them from predators and other dangers.
- Protect wildlife and your food by storing refuse and food securely.
