

STATUE OF LIBERTY

LIGHT HOUSE SERIES 1^{TO} 50

STATUE OF LIBERTY.

On Liberty Island (Bedloe's Island), north-western end of upper New York Bay. Total height above low water mark 305 feet 11 inches. Has a fixed white electric light. Presented by the people of France to the people of the United States to commemorate the good will which exists between the two nations. The Statue is of copper. The pedestal was built through means of popular subscription by the school children of the United States and is of concrete and granite. The designer and builder was the celebrated sculptor Bartholdi.
