NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

1. Name of Property
   historic name: Under-the-Rim Trail
   other names/site number: Includes Sheep Creek Connecting Trail, Swamp Canyon Connecting Trail, Whiteman Connecting Trail and Agua Canyon Connecting Trail

2. Location
   street & number: Bryce Canyon National Park
   city/town: Bryce Canyon
   state: Utah code: UT county: Garfield and Kane code: 017, 025 zip code: 84717

3. State/Federal Agency Certification
   As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide.

   Signature of certifying official:
   National Park Service
   State or Federal agency or bureau

4. National Park Service Certification
   I, hereby certify that this property is:
   • entered in the National Register
   • determined eligible for the National Register
   • removed from the National Register
   • other (explain):
   
   Signature of the Keeper: Date of Action: 4/25/95

In my opinion, the property meets does not meet the National Register criteria.

Signature of commenting or other official: Date: 3-7-95

Utah State Historic Preservation Office
State or Federal agency and bureau

Narrative Description

The Under-the-Rim trail is an unpaved graded trail, approximately 32 miles in length and between two feet and five feet in width. This trail bisects a variety of vegetative zones. Where it descends from the plateau, it is located on open, unvegetated landforms. Mid-slope and in drainage bottoms it bisects pine and oak scrub forests. In general, this trail follows the path of least resistance across the landscape. The Under-the-Rim Trail has been subject to the same types of changes as the scenic trails within the park, namely rerouting and reconstruction due to the adverse impacts from natural erosion. However, it also appears that the level of maintenance committed to this trail is less than that received by scenic trails. In some areas the original grade has been destroyed (especially in drainage bottoms). Re-establishment of the pathway has occurred through use rather than through engineering design and reconstruction. However, for the most part, the alignment of this trail appears to be as originally constructed.
8. Statement of Significance

Certifying official has considered the significance of this property in relation to other properties:

Applicable National Register Criteria: A
Criteria Considerations (Exceptional): N/A
Significant Person(s): N/A
Cultural Affiliation: N/A

Architect/Builder: NFS (CCC)

The Under-the-Rim Fire Trail (including the Swamp Canyon Connecting Trail, the Whiteman Connecting Trail, and the Agua Canyon Connecting Trail) has local significance under National Register Criterion A for its association with the development of National Park Service (NPS) infrastructure in Bryce Canyon National Park (BRCA), and the involvement of the Civilian Conservation Corps (CCC) in such undertakings. (The Sheep Creek Connecting Trail is not counted as a contributing resource.) National Register areas of significance include government and recreation. The period of significance dates from the first year of construction (1935) through the end of the historical period as defined by the National Register. This resource is included in the property type that includes resources associated with NPS administrative development, and this nomination is part of the Bryce Canyon National Park Multiple Property Submission.

The Under-the-Rim Trail was constructed specifically for administrative purposes, namely to provide access to the timbered areas of the park located below the rim of the plateau. Although planned as early as 1932 (as indicated on a 1932 Trail Program Map prepared in the Office of the Chief Engineer, San Francisco, California), construction of this fire trail was not undertaken until the combination of the availability of Emergency Conservation Work funding and CCC labor made the project feasible. CCC enrollees from camp NP-3 constructed the main trail and the connecting trails during 1934 and 1935.

The north portion of the trail, between Bryce Point and the Swamp Canyon Connecting Trail, was constructed in 1934. A trails map drawn in December of 1934, shows the status of this segment as "light" construction (i.e., not graded trail). The southern half of the trail, including the Whiteman Connecting Trail (referred to in historical documents as the connecting trail near the head of Willis Creek) and the Agua Canyon Connecting Trail, was completed in 1935. During the 1935 field season a crew of 25 CCC enrollees and one foreman, working from a spike camp in the canyon bottom below the rim, completed trail construction to Rainbow Point (A. E. Cowell, Park Engineer. Report on Public Works & Emergency Conservation Work, Zion & Bryce Canyon National Parks, Cedar Breaks & Lehman Caves National Monuments. May 1935).

The only component of the Under-the-Rim Trail that was not part of the administrative plan for fire control within the park is the "Sheep Creek Connecting Trail." This connecting trail represents a relatively small segment of an old roadway that connected the East Fork of the Sevier River drainage (on the west side of the park) with the vicinity of Georgetown (a small community on the east side of the park). This pathway existed prior to the time of the initial withdrawal from the public domain of the lands that would be included in the original monument and later BRCA. After establishment of the park, the pathway was recognized as one of the approved park stock driveways. (Indeed, segments of this connecting trail retain the appearance of a wagon road rather than a pedestrian or stock trail.) This connecting trail is not counted as a contributing resource.

A second administrative trail, currently referred to as the Riggs Spring Loop Trail was constructed in 1936, and completed the system of fire protection access trails within the park.

Verbal Boundary Description

The boundary of the trail is indicated as a dashed line on the accompanying USGS topographic maps.

Boundary Justification

The boundary of the trail includes the tread and 10 feet on either side of the trail.
