Basic Terms

Cultural practice: a pattern of behavior associated with a particular way of life. Cultural practices are often associated with the use of natural resources and the use or production of sites, structures, objects, and landscape features.1

Cultural resource: an aspect of a cultural system that is valued by or significantly representative of a culture or that contains significant information about a culture. A cultural resource may be a tangible entity or a cultural practice. Tangible cultural resources are categorized as districts, sites, buildings, structures, and objects for the National Register of Historic Places and as archeological resources, cultural landscapes, structures, museum objects, and ethnographic resources for National Park Service management purposes.1

Cultural resource management: the range of activities aimed at understanding, preserving, and providing for the enjoyment of cultural resources. It includes research related to cultural resources, planning for actions affecting them, and stewardship of them. It also includes support for the appreciation and perpetuation of related cultural practices.1

Basic Resources

CRM is a professional magazine published by the National Park Service to promote and maintain high standards for preserving and managing cultural resources. CRM is published at least 6 times a year and is available without charge to preservation professionals, resource managers, training and educational institutions, government officials, and others on a limited basis. To receive a sample copy, contact Editor, CRM (400), National Park Service, PO Box 37127, Washington, D.C. 20013-7127, or telephone 202-343-3395.

The Catalog of Historic Preservation Publications provides information on the cultural resource programs of the National Park Service, Washington, DC, their publications, and how to request or order copies. While supplies last, a copy may be requested from the Preservation Assistance Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127, or telephone 202-343-9578, Fax: 202-343-3803.

Does the Past Hold A Future For You? is a 24-page booklet that introduces students to historic preservation and lists occupations related to this diverse field. Single copies may be purchased from the Center for Historic Preservation, Middle Tennessee State University, PO Box 80, Murfreesboro, TN 37132, telephone 615-898-2947; the cost of $3.50 per copy includes shipping; special bulk rates are available.

The National Park Service plays a role in preserving the cultural heritage of the United States through its work as caretaker of the historic structures and cultural landscapes, as well as the archeological, curatorial, and ethnographic resources found in the National Park System. The National Park Service is also responsible for maintaining the National Register of Historic Places, designating National Historic Landmarks, and in developing standards, guidelines and other technical information. During the several decades of work in these areas, numerous publications have been developed to assist professionals and the public in understanding the resource and the care needed to preserve and maintain it. Many of these publications are used by faculty throughout the United States and in other countries, and constitute only one aspect of a long term support and interest in educational development.

The Directory of Cultural Resource Education Programs at Colleges, Universities, Craft and Trade Schools in the United States provides information about training programs or education programs that last from 6 months to several years. The key to the directory may be found in Section I. This section defines groups of related terms, identifies the schools or colleges that offer them (described in more detail in Section 2), and refers the reader to some additional directories (described in Section 3) or resources. Just as the disciplines that comprise the care and management of cultural resources vary, so do the programs in this directory. Each program description in Section 2 includes a mailing address and the type of program offered. Beyond that, there may be a narrative paragraph or a listing of preservation-related courses. Many program department heads were able to provide more extensive information.

This directory is intended for students at the high school or undergraduate level (and their counselors and advisors) who are looking for advanced training relating to the preservation and management of cultural resources and cultural heritage in the United States. Preservation professionals may find this a useful reference in locating new contacts and possible partners in new preservation endeavors.

This publication is a joint project of the National Park Service and the National Council for Preservation Education (NCPE), a private non-profit organization primarily composed of colleges and universities with historic preservation programs. It is intended to complement and expand on the Preservation Education Supplement prepared by the National Council and printed each October in the National Trust for Historic Preservation newsletter Historic Preservation News. Copies of this supplement may be requested from Michael Tomlan, Chair, NCPE, 210 West Sibley Hall, Cornell University, Ithaca, NY 14853-6701.

The National Park Service also produces a Cultural Resource Training Directory [formerly titled A Directory of Training Opportunities in Cultural Resources Management (Short Term)] that is available as a special issue of the CRM and covers training for shorter periods of time from a few days to several weeks. To obtain a copy contact Emogene Bevitt, Preservation Assistance Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127, or telephone 202-343-9561, Fax: 202-343-3803.

Comments on the usefulness of this information are welcome and may be sent to Ms. Bevitt or Professor Tomlan.

Listing in this directory does not imply endorsement of the curriculum content, the faculty, or the program sponsor by the National Park Service, U.S. Department of the Interior, or the National Council for Preservation Education.
Funding for the design and printing was made possible through the National Park Service Partnerships in Cultural Resource Training [formerly called the Cultural Resource Training Initiative] with additional funding from the National Council for Preservation Education towards the salary of an intern, Ms. Heather Minor.

Mailing lists were researched and developed and survey materials were sent to 900 universities, colleges, and organizations.

Particular thanks goes to those who responded to the survey; to those who gave their time and patience to answer questions and offer advice; to those who, through their efforts, contributed to the whole — many of whom are named here.

ANTHROPOLOGY AND ITS SPECIALTIES

ANTHROPOLOGY

The scientific study of the human condition, including cultural, biological and physical adaptations over time and in various natural and social environments. Anthropology includes the specializations of archeology, cultural anthropology (including ethnography, ethnology, and applied anthropology), linguistics, and physical anthropology. An anthropologist is a scientist with advanced training in any of these sub-disciplines.1

ARCHEOLOGY

The scientific study, interpretation, and reconstruction of past human cultures from an anthropological perspective based on the investigation of the surviving physical evidence of human activity and the reconstruction of related past environments. Historic archeology uses historic documents as additional sources of information. An archeologist is a scientist professionally trained to conduct such studies.1

CULTURAL ANTHROPOLOGY

The scientific description (ethnography) and analysis (ethnology) of cultural systems, i.e., systems of behavior (including economic, religious, and social), values, ideologies, and social arrangements. It focuses on the lifeways of contemporary peoples but also deals with the past (ethnohistory).1

ETHNOGRAPHY

Part of the discipline of anthropology concerned with the systematic description of lifeways, such as hunting, agriculture, fishing, other food procurement strategies, family life festivals and other religious celebrations. Ethnographic studies of contemporary cultures rely heavily on participant observation as well as interviews, oral histories, and review of relevant documents. Applied ethnography uses ethnographic data and concepts to identify contemporary issues and design feasible solutions.1

ETHNOHISTORY

The study of sociocultural systems through the use of written records... such as published books and articles, newspapers, archival documents, diaries, journals, maps, drawings, photographs and other materials [by members of other societies].2

Federal Archeology Report

National Archeological Database (NADB) and NADB-Network
**Applied Technology Specialties**

**Geographic Information System (GIS)**

Uses a computer to link a database management system to a number of spatially distributed features that can be represented on a map. A GIS combines the database management system's power to store, retrieve, and analyze information with the ability to produce and manipulate the graphic elements of a map.  

**Global Positioning Systems (GPS)**

A method of locating points on Earth based on signals from several satellites. GPS is just becoming cost competitive with traditional survey techniques. 

**Information Resources Management**

The planning, budgeting, organizing, directing, training and administrative control associated with government information. The term encompasses both information itself and the related resources, such as personnel, equipment, funds, and technology. The term 'information' means any communication or representation of knowledge such as facts, data, or opinions in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual forms. The term 'government information' means information created, collected, processed, disseminated, or disposed of by the Federal Government.  

While information management is a recognized activity in cultural resources management, its application to cultural resources is evolving and, the development of related coursework is limited. Relevant courses may be found in departments offering library science or archival education degree programs.

**Programs**

**Crafts, Trades, and Apprenticeships**

**Apprenticeship**

An employer or joint employer and labor sponsored work-based learning program in which an apprentice, as an employee, receives supervised structured on-the-job training combined with technical related instruction (usually classroom study) in a specific occupation.

The on-the-job training, related classroom instruction and the apprenticeship program operating procedures are included in a set of Apprenticeship Standards. The Apprenticeship Standards are registered by the apprenticeship sponsor with a Federal or State Apprenticeship Agency/Bureau as meeting the Department of Labor's "Standards of Apprenticeship" (29 CFR Part 29).

Apprentices are employed and then registered to the sponsor's approved Apprenticeship Standards. At the completion of the apprenticeship of one to five years, depending on the occupation, the apprentices receive a Federal and/or State Apprenticeship Completion Certificate. The holder of an Apprenticeship Certificate for an apprenticeable occupation is recognized throughout the United States as a qualified journeyman.

**Craft Programs**

Provide, through course work and hands-on training, a framework that combines manual dexterity with knowledge in planning, making and executing to
produce a product that exhibits artistry and individuality.8

**Trades Programs**

Teach the practice and theory of skilled trades which require manual or mechanical skill and training.8

---

**FOLKLIFE, ORAL HISTORY, TRADITIONAL ARTS AND CULTURAL TRADITIONS**

**FOLKLIFE**

The traditional expressive culture shared within the various groups in the United States: familial, ethnic, occupational, religious, regional; expressive culture includes a wide range of creative and symbolic forms such as custom, belief, technical skill, language, literature, art, architecture, music, play, dance, drama, ritual, pageantry, handicraft; these expressions are mainly learned orally, by imitation, or in performance and are generally maintained without benefit of formal instruction or institutional direction.11

**Oral History**

The tape-recording of reminiscences about which the narrator can speak from first-hand knowledge. Through pre-planned interviews, the information is captured in question and answer form by oral history interviewers. The interviewer must have some background knowledge of the subject and considerable social skill in knowing how to draw the narrator out. Oral history is not the tape-recording of speeches or other community events, although this should be another part of the historical society's collection program. Oral history interviews differ from journalistic or specific historical research interviews in that they are intended for use in the future by a wide variety of researchers; therefore their scope should be broader than what would be covered for immediate or specific use. A plan for preservation and use is essential to oral history.12

The Oral History Association promotes oral history as a method of gathering and preserving historical information through recorded interviews with participants in past events and ways of life. It encourages those who produce and use oral history to recognize certain principles, rights, and obligations for the creation of source material that is authentic, useful, and reliable. These include obligations to the interviewee, to the profession, and to the public, as well as mutual obligations between sponsoring organizations and interviewers.13

Oral history interviews are conducted by people with a range of affiliations and sponsorship for a variety of purposes: to create archival records, for individual research, for community and institutional
projects, and for publications and media productions. While these principles and standards provide a general framework for guiding professional conduct, their application may vary according to the nature of specific oral history projects. Regardless of the purpose of the interviews, oral history should be conducted in the spirit of critical inquiry and social responsibility, and with a recognition of the interactive and subject nature of the enterprise.  

Traditional Cultural Property

A property associated with cultural practices or beliefs of a living community that are rooted in that community's history or are important in maintaining its cultural identity.

Culture

A system of behaviors, values, ideologies, and social arrangements. These features, in addition to tools and expressive elements such as graphic arts, help humans interpret their universe as well as deal with features of their environments, natural and social. Culture is learned, transmitted in a social context, and modifiable. Synonyms for culture include 'lifeways,' 'customs,' 'traditions,' 'social practices,' and 'folkways.' The terms 'folk culture' and 'folklife' might be used to describe aspects of the system that are unwritten, learned without formal instruction, and deal with expressive elements such as dance, song, music and graphic arts as well as storytelling.

Additional Resources

For more information see page 16.

Folklife and Fieldwork: A Layman's Introduction to Field Techniques

Historic Building Related Specialties

Architectural Conservation

The science of preserving a historic structure's materials by observing and analyzing their deterioration, determining causes of and solutions to problems, and directing remedial interventions. [An] architectural conservator is a specialist in the scientific analysis of historic materials.

Architectural History

The study of architecture through written records and the examination of structures in order to determine their relationship to preceding, contemporary, and subsequent architecture and events. A[na] architectural historian is a historian with advanced training in this specialty.

Conservation

Encompasses: examination procedures to determine the nature, methods of manufacture, or properties of objects and the causes and extent of deterioration or alteration. Scientific analysis and research on artifacts, to identify historic and artistic methods and materials, and on procedures and materials, to evaluate potential use in the care and conservation of artifacts. Documentation procedures to record the condition of an object before, during, and after treatment and to outline treatment methods and materials in detail. Preventive measures taken to minimize deterioration or damage of cultural property by providing controlled environments. Treatment or interventive measures to stabilize artifacts or retard their deterioration. Restoration actions to bring a deteriorated or damaged object closer to its original appearance or its appearance at a particular time with minimal sacrifice of aesthetic and historic integrity.
**Historic Architecture**

The science and art of architecture with specialized advanced training in the principles, theories, concepts, methods, and techniques of preserving prehistoric and historic structures.

**Historic Preservation**

The activities that promote the protection and continued use of the built environment. The scale of problems considered within this field may be large (e.g., a plan for preserving an agricultural region, an island, or a city), or they may be small (e.g., the disassembly, storage, and reuse of an architectural detail). The range of disciplines with which the preservationist should become familiar includes archeology, architecture, architectural history, planning, landscape architecture, art conservation, history, cultural geography, law, economics, real estate and development, tax accounting, public administration, sociology, personnel management, and political science.

**Historic Preservation Education**

The interdisciplinary nature of the field is generally recognized by graduate preservation programs and, indeed, permits a great variety of emphases among them. Some programs attempt to synthesize most, if not all, of these disciplines, leading to a graduate degree in historic preservation per se. Other programs are rooted in one of the disciplines, from which vantage point the others may be considered. Obviously contributions may be made by both the 'preservation generalist' and the 'preservation specialist.'

**Preservation**

The act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic property. Work may include preliminary measures to protect and stabilize the property, but generally focuses upon the ongoing maintenance and repair of historic materials. Extensive change in the form of alterations and additions is not within the scope of this treatment.

**Interior Design**

Involves identifying, researching, and creatively solving problems pertaining to the function and quality of the interior environment; performing services relative to interior spaces, including programming, design analysis, space planning and aesthetics, using specialized knowledge of interior construction, building codes, equipment, materials and furnishings; and preparing drawings and documents relative to the design of interior spaces in order to enhance and protect the health, safety, and welfare of the public.

**Preservation Maintenance**

Action to mitigate wear and deterioration of a historic property without altering its historic character by protecting its condition, repairing when its condition warrants with the least degree of intervention including limited replacement in-kind, replacing an entire feature in-kind when the level of deterioration or damage of materials precludes repair, and stabilization to protect damaged materials or features from additional damage. For archeological sites it includes work to moderate, prevent, or arrest erosion. For museum objects it includes actions to prevent damage and to minimize deterioration by practicing preventive conservation or by performing suitable treatments on objects themselves. Types of preservation maintenance are:

- **Housekeeping**: the removal of undesirable deposits of soil in ways that minimize harm to the surfaces treated, repeated at short intervals so that the gentlest and least radical methods can be used.
- **Routine maintenance**: usually consists of service activities such as tightening, adjusting, oiling, pruning, etc.
- **Cyclic maintenance**: maintenance performed less frequently than annually; usually involves replacement or at least mending of material.
- **Stabilization**: action to render an unsafe, damaged, or deteriorated property stable while retaining its present form.

**Programs**

History, Public History

History
Study of the past through written records, oral history, and material culture. Evidence from these is compared, judged for veracity, placed in chronological or topical sequence, and interpreted in light of preceding, contemporary, and subsequent events.¹

Public History
Deals with nonacademic history. History is brought to the public rather than the classroom through museum work, public displays, and federal, local, and corporate historians.²⁴

**History of Science, Technology and Engineering**

**History of Science**
A branch of history [that studies] the evolution of science and of its influence on...society... and [also studies the scientists and how their discoveries were influenced by society].

**History of Technology**
The study of the development of technology and its relations with society and culture... [It includes] the history of technological devices and processes as well as the relationship of technology to science, politics, social change, the arts and humanities, and economics.

**Historic Engineering or History of Engineering or Period Engineering**
If engineering is “the art of the practical application of scientific and empirical knowledge to the design and production or accomplishment of various sorts of constructive projects, machines and materials of use or value to man,” which includes developing “(a) systems for material handling, including transformation of and conservation of raw and processed materials; (b) systems for energy handling, including its transformation, transmission, and control; and (c) systems for data on information handling, involving its collection, transmission, and processing,” which leads to “engineering research, design and development, construction, operation, and management,” then historic engineering is the study of engineering and technology with relation to public policy, economics, labor, business, the environment, the arts and science.

**Industrial Heritage or Industrial Archeology**
A field of study concerned with investigating, surveying, recording and, in some cases, with preserving industrial monuments. It aims, moreover, at assessing the significance of these monuments in the context of social and technological history.

**INTERPRETATION**

The art of providing information to aid visitors in understanding and appreciating the significance and values of the resources and to minimize the visitor's impact on the resource. Interpretive presentations can range from a personally conducted service to an exhibit, audiovisual presentation, self-guided tour, publications, onsite radio and television and other appropriate media. Through interpretation, the visitor can better achieve a safe and pleasant visit; participate in a variety of thoughtful, minimum-impact uses of the site's natural and cultural resources; and return home with a clearer understanding of the significance of these resources, the management policies and programs necessary to preserve them; and an individual awareness of his/her dependency upon and responsibility for environmental quality.33

CULTURAL Landscape
A geographic area, including both cultural and natural resources and the wildlife or domestic animals therein, associated with a historic event, activity, or person or exhibiting other cultural or aesthetic values.1

HISTORIC DESIGNED Landscape
A landscape that was consciously designed or laid out by a landscape architect, master gardener, architect, or horticulturist according to design principles, or an amateur gardener working in a recognized style or tradition. The landscape may be associated with a significant person(s), trend, or event in landscape architecture; or illustrate an important development in the theory and practice of landscape architecture. Designed landscapes evolved because of aesthetic objectives. Examples may include parks, campuses, and estates.35

HISTORIC VERNACULAR Landscape
A landscape that evolved through use by the people, whose activities or occupancy shaped that landscape. Through social or cultural attitudes of an individual, family or a community, the landscape reflects the physical, biological, and cultural character of those everyday lives. Vernacular historic landscapes evolved because of functional requirements. They can be a single property or a collection of individual ones. Examples include rural villages, battlefields, industrial complexes, and agricultural landscapes.35

America's Landscape Legacy35
LANGUAGE RETENTION
AND ETHNIC STUDIES

LANGUAGE RETENTION

The traditional languages of Native Americans are an integral part of their cultures and identities and form the basic medium for the transmission, and thus survival, of Native American cultures, literatures, histories, religions, political institutions and values; languages are the means of communication for the full range of human experiences and are critical to the survival of cultural and political integrity of any people; and language provides a direct and powerful means of promoting international communication by people who share languages. It is the policy of the United States to preserve, protect, and promote the rights and freedom of Native Americans to use, practice, and develop Native American languages; [and to] encourage and support the use of Native American languages as a medium of instruction in order to encourage and support Native American language survival, [and] increased student awareness and knowledge of their culture and history.  

The above definition acknowledges the importance of language to the cultures of the 550+ federally recognized tribes and groups of American Indians, Alaska Natives and Native Hawaiians and, by inference, to all people.

ETHNIC STUDIES

Studies relating to the racial, linguistic, and cultural ties of a group of people as a product of common heredity and cultural tradition.  

For the purposes of this directory, colleges likely to offer African-American Studies, Alaska Native Studies, American Indian Studies, Asian-American Studies, Hispanic-American Studies, and Native Hawaiian Studies were contacted.

Please note also the definitions for Cultural practice, Cultural resource, and Cultural resource management, from the inside cover. The field of cultural resource management continues to expand beyond a Euro-centric focus for the cultural resources within the United States.

PROGRAMS

AK  University of Alaska, Fairbanks
HI  University of Hawaii at Manoa

Note: information pertinent to language retention may be available from the disciplines of Ethnohistory (cultural information) and Linguistics (the study of languages).

The College Blue Book

Cultural Heritage Programs and Projects: Federal Sources of Assistance for American Indians, Alaska Natives and Native Hawaiians

International Native American Language Issues (NALI Institute)

Moorland-Spingarn Research Center
**Archives**

The noncurrent records of individuals, groups, institutions, and governments that contain information of enduring value. Formats represented in the modern archival repository include photographs, films, video and sound recordings, computer tapes, and video and optical disks, as well as the more traditional unpublished letters, diaries, and other manuscripts. Archival records are the products of everyday activity.41

**Conservation**

Encompasses: examination procedures to determine the nature, methods of manufacture, or properties of objects and the causes and extent of deterioration or alteration. Scientific analysis and research on artifacts, to identify historic and artistic methods and materials, and on procedures and materials, to evaluate potential use in the care and conservation of artifacts. Documentation procedures to record the condition of an object before, during, and after treatment and to outline treatment methods and materials in detail. Preventive measures taken to minimize deterioration or damage of cultural property by providing controlled environments. Treatment or interventive measures to stabilize artifacts or retard their deterioration. Restoration actions to bring a deteriorated or damaged object closer to its original appearance or its appearance at a particular time with minimal sacrifice of aesthetic and historic integrity.16

**Museum**

A non-profit making, permanent institution in the service of society and of its development, and open to the public which acquires, conserves, researches, communicates, and exhibits, for the purposes of study, education, and enjoyment, material evidence of people and their environment.92

**Museology**

The branch of knowledge conceived with the study of the theories, procedures, concepts, ... organization [and practices] of museums.43

**Museography**

The application of that thinking [theory and practices] in the museum.43

**Museum Studies or Museum Training Programs**

Refer to any or all of the following: 1) those instructional or educational activities designed to advance knowledge and understanding of the nature, functions, and role of museums in the service of society and of its development; 2) those programs organized to prepare individuals for professional museum careers; 3) those programs that provide training based on courses of instruction relative to the needs and requirements of the museum profession and are responsive to the changing expectations of that profession; and 4) those programs that provide the appropriate museum related training in concert with one or more museums.43

PLANNING, PRESERVATION PLANNING AND RELATED SPECIALTIES

URBAN AND REGIONAL PLANNERS

Often called community or city planners, develop programs to provide for future growth and revitalization of urban, suburban, and rural communities and their regions. They help local officials make decisions on social, economic, and environmental problems.46

CITY AND REGIONAL PLANNING

The formal process with which cities and regions determine what needs to be done for their physical growth and welfare and how they must proceed in implementing the plans and programs they choose. ... City and regional planning has evolved from the early parts of the 20th century primarily in response to what were perceived to be the crucial problems of the urban areas in each period. From its early emphasis on low-income housing, the field moved to an emphasis on parks and playgrounds, to another emphasis on efficient streets and utility systems, and then to an emphasis on producing a master plan of all the needs of urbanized areas. Comprehensiveness in considering the needs and all the pertinent factors and cooperation in considering all the actors involved became the trademark of American city and regional planning after World War II.47

PRESERVATION PLANNING

The practice of integrating historic built and historic natural resources into the process of city and regional planning.

**Preservation Law**

Includes *at a minimum* the careful study of federal and state constitutions; federal and state statutes and local ordinances pertaining to the identification, designation, protection and taxation of historic resources; Presidential or gubernatorial executive orders; opinions of state attorneys general; reported or unreported court decisions; appropriate administrative regulations and agency guidelines; and relevant materials pertaining to the creation and enforcement of preservation easements. Much valuable information is contained in law review articles, and arguments in litigation documents in pending or decided cases can often suggest where political and legal forces are driving preservation law.

ANTHROPOLOGY AND ITS SPECIALTIES

3. Federal Archeology Report (FAR) is a quarterly publication of the Archeological Assistance Division, National Park Service. In addition to featuring articles on Federal and State archeological activities, FAR offers regular updates on archeology worldwide, archeological protection, Native American Graves Protection and Repatriation Act (NAGPRA), conferences and publications. FAR is available at no cost by writing Federal Archeology Report, Archeological Assistance Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127.

4. National Archeological Database (NADB) is a database of databases with an interrelated set of data modules; the NADB-Network cites over 100,000 reports of archeological investigations. For a brochure describing this network and how to access the system via modem or via Internet, write for NADB Access, Archeological Assistance Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127.

APPLIED TECHNOLOGY SPECIALTIES

CRAFTS, TRADES, AND APPRENTICESHIPS

7. Definition provided by the Bureau of Apprenticeship and Training, U.S. Department of Labor, 7/1/92.

9. Traditional Building: The Professional’s Source for Historical Products is published bimonthly. Each issue features charts called “SourceLists” that identify companies (with full address and telephone number), specialties, whether literature is available from the company, and other information on the type of product or service and the type of materials each has to offer. For more information contact: Traditional Building, 69A Seventh Avenue, Brooklyn, NY 11217, telephone 718-636-0788; Fax: 718-636-0750.

10. The Old-House Journal is published bi-monthly and features practical information about historic structures, historic construction practices and treatment options. For further information and a publications list contact The Old House Journal, 2 Main Street, Gloucester, MA 01930, telephone 508-281-8803.

FOLKLIFE, ORAL HISTORY, TRADITIONAL ARTS AND CULTURAL TRADITIONS

II. Public Law 94-201, January 6, 1976, which established the American Folklife Center in the Library of Congress. This was the definition given for “American folklife.”

13. Guidelines and Principles of the Oral History Association, Pamphlet Number 3, Oral History Association, 1992, first 2 paragraphs of “Principles and Standards of the Oral History Association,” page 1. More detailed information is offered regarding the responsibility to interviewees, responsibility to the public and to the
profession, responsibility for sponsoring and archival institutions, oral history evaluation guidelines, and a bibliography. This pamphlet is available from the Oral History Association, 1093 Broxton Ave., #720, Los Angeles, CA 90024.

15. Folklife and Fieldwork: A Layman's Introduction to Field Techniques, 2nd edition, 1990, 36 pages, provides information on what to collect, whom to interview, how to prepare for sound recording, still photography, and video documentation, the consent form, what to do with the results, recommended reading and model forms for fieldwork data, tape and photo logs, and consent forms. To request a copy, a list of other publications, or for information on the Folklife Center News, write to the American Folklife Center, Library of Congress, Washington, D.C. 20540.

HISTORIC BUILDING RELATED SPECIALTIES

20. Vernacular Architecture Forum is an organization that encourages the study and preservation of all aspects of vernacular architecture and landscapes through interdisciplinary and multidisciplinary methods. Vernacular Architecture Newsletter, published 4 times a year, is available to members. For further information on the newsletter, a list of publications, and the annual conference, contact Peter Kurtze, 109 Brandon Road, Baltimore, MD 21212.

21. Association for Preservation Technology International (APT) is an organization that encourages the application of knowledge of methods and materials to the maintenance, conservation, and protection of our historic buildings, sites and artifacts. For further information on the newsletter, journal, a list of publications, and the annual conference, contact APT, PO Box 8178, Fredericksburg, VA 22404, telephone 703-373-1621; Fax: 703-373-6050.

22. Buildings of the United States (BUS) is a new series of the Society of Architectural Historians. The first four BUS books, published in 1993, cover Alaska, the District of Columbia, Iowa, and Michigan. For information about the BUS series, the upcoming Guide to Graduate Degree Programs in Architectural History, the Committee on Preservation, a publications list or about the annual conference contact the Society of Architectural Historians, 1232 Pine Street, Philadelphia, PA 19107-5944, telephone 215-735-0224; Fax: 215-735-2590.

23. National Trust for Historic Preservation produces a magazine and a newspaper on a bi-monthly basis, as well as numerous publications including the Landmark Yellow Pages, a very helpful compilation of names, addresses, facts and figures. For further information about these periodicals, a publications list and the annual conference, contact the National Trust for Historic Preservation, 1785 Massachusetts Avenue NW, Washington, D.C. 20036, telephone 202-673-4000.
HISTORY, PUBLIC HISTORY

25. The following organizations can be contacted for publications lists and for further information regarding annual meetings:

- American Historical Association (AHA), 400 A St. SE., Washington, D.C. 20003, telephone 202-544-2422.

- American Association for State and Local History (AASLH), 530 Church Street, Suite 600, Nashville, TN 37219, telephone 615-255-2971.

- Organization of American Historians (OAH), 112 North Bryan Street, Bloomington, IN 47408, telephone 812-855-7311.

- National Council on Public History (NCPH), 327 Cavanaugh Hall - IUPUI, 442 University Blvd., Indianapolis, IN 46202, telephone 317-274-2716.

- Organization of American Historians (OAH), I12 North Bryan Street, Bloomington, IN 47408, telephone 812-855-7311.

- National Council on Public History (NCPH), 327 Cavanaugh Hall - IUPUI, 442 University Blvd., Indianapolis, IN 46202, telephone 317-274-2716.

27. History of Science A Guide for Undergraduates, Michael J. Crowe, History of Science Society, 1991, pages 1-2. For a copy of this publication contact Michael Sokal, Executive Secretary, History of Science Society, 35 Dean St., Worcester, MA 01609; $1.00 for single copies, $0.75 each for multiple copies of 10 or more.

32. For more information, contact Ms. Kelly Cunningham, American Society of Civil Engineers, 1015 Fifteenth St., NW, Suite 600, Washington, DC 20005; Telephone: 202-789-2200; Fax: 202-289-6797.

INTERPRETATION

34. National Association for Interpretation (NAI), publishes the Journal of Interpretation, and Legacy, as well as the proceedings from its annual meetings. For more information and a publications list contact NAI, PO Box 1892, Fort Collins, CO 80522, telephone 303-491-6434.

LANDSCAPE PRESERVATION

35. America's Landscape Legacy, definitions are on page 2 of a 14-page folded leaflet, Preservation Assistance Division, National Park Service, 1993. This leaflet provides a selected bibliography, and addresses and telephone numbers for 13 organizations that may have additional information. For a copy of the leaflet write to Preservation Assistance Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127, telephone 202-343-9578; Fax: 202-343-3803.

LANGUAGE RETENTION AND ETHNIC STUDIES

36. Native American Languages Act Public Law 101-477, October 30, 1990: Findings, Section 102, paragraphs (3), (9), and (10); Declaration of Policy, Section 104, paragraph (1) and (3), parts A and D.

38. *Cultural Heritage Programs and Projects: Federal Sources of Assistance for American Indians, Alaska Natives and Native Hawaiians*, is a booklet that provides information about Federal agencies and the technical assistance, workshops, internships, direct grants, and funding levels in support of archives, cultural centers, libraries, museums, historic preservation offices, language retention, heritage education, oral history, preservation of historic properties, cultural events and folklife festivals, intertribal coordination, folk artists, and policy studies and pilot projects each provides. Also included is a name, complete mailing address, telephone number and narrative description for the major Federal agencies and offices. To obtain a copy of the booklet write to Tribal Preservation Programs, Interagency Resources Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127.

39. *International Native American Language Issues (NALI Institute)* serves to examine native language and cultural concerns and to exchange information on related education and research. For more information contact NALI Institute, PO Box 963, Choctaw, OK 73020, telephone 405-454-3681 or 454-2158; Fax: 405-454-3688.

40. Moorland-Spingarn Research Center at Howard University, with more than 175,000 books, microforms, etc., is one of the world's largest and most comprehensive repositories for the documentation of the history and culture of people of African descent. Organized in 4 departments—manuscripts, prints and photographs, oral history, and music—it is accessible for research and has a *Guide to Processed Collections in the Manuscript Division* to the more than 160 collections. For more information and a publications list write to the Moorland-Spingarn Research Center, Howard University 500 Howard Place NW, Washington, D.C. 20059; telephone 202-806-7239; Fax: 202-806-6405.

### MUSEUM RELATED SPECIALTIES

42. Statutes of the International Council of Museums, Article 2, paragraph 1.

44. American Association of Museums publishes a magazine, a technical information series, and other publications, as well as offering continuing education courses and an annual meeting. For more information and a publications list contact the American Association for Museums, 1225 Eye Street NW, Suite 200, Washington, D.C. 20005, telephone 202-289-9127; Fax: 202-289-6578.

45. “Conserve O Grams,” a series of technical leaflets, and the *Manual for Museums*, Part I, an 850-page binder, were both developed by the National Park Service. The leaflets are intended to supplement the manual. For a flier describing these two publications write to the Curatorial Services Division, National Park Service, PO Box 37127, Washington, D.C. 20013-7127.

### PLANNING, PRESERVATION PLANNING AND RELATED SPECIALTIES

48. American Planning Association (APA) publishes several magazines and other publications. For more information about its annual meeting, technical
reports, and to request a publications catalog contact the American Planning Association, 1313 East 60th Street, Chicago, IL 60637-2891, telephone 312-955-9100; Fax: 312-955-8312.

**Preservation Law**

49. Definition by Stephen N. Dennis, Executive Director, National Center for Preservation Law, 1992. For more information and a publications list contact the National Center for Preservation Law, 1333 Connecticut Ave NW, Suite 300, Washington, D.C. 20036, telephone 202-338-0392.

50. *Federal Historic Preservation Laws*, a 96-page booklet that lists the key laws enacted by Congress to conserve our cultural resources, is a standard reference for preservationists. It is available from the Superintendent of Documents, PO Box 371954, Pittsburgh, PA 15250-7954, or telephone 202-783-3238, Fax: 202-512-2250; Stock Number 024-005-01138-2; price $3.00 includes postage and handling.

- LING Intermediate Phonetics and Phonology
There are 20 different Alaska Native languages: Aleut, Alutiiq (also called Aleut or Sugpiaq), Central Yupik Eskimo, St. Lawrence Island Eskimo, Inupiaq Eskimo, Tsimshian, Haida, Tlingit, Eyak, and I I Athabaskan languages. These languages are becoming recognized as the priceless heritage they truly are. Since the passage of the Alaska Bilingual Education Law in 1972 there has been a demand for teachers who can speak and teach these languages in the schools throughout the state where there are Native children. Professional opportunities for those skilled in these languages exist in teaching, research, and cultural, educational, and political development.

Central Yupik Eskimo is spoken by the largest number of people, and Inupiaq by the next largest. In these two languages major and minor curricula are now offered. Courses are also regularly offered in Kutchin Athabaskan. For work in all other languages, individual or small-group instruction is offered under special topics. Thus there have frequently been instruction, seminars, and workshops also in Tlingit, Haida, St. Lawrence Island Eskimo, Aleut and Kutchin, comparative Eskimo and comparative Athabaskan.

UAF is unique in offering this curriculum, which benefits also from the research staff and library of the Alaska Native Language Center. The Alaska Native studies program seeks to provide the student with (1) a keen awareness of the scope, richness, and variety of Alaskan Native cultural heritages, and (2) a series of critical perspectives on the contemporary Native experience in the plural society of North America. The Students academic program will be interdisciplinary as it is built upon a combination of appropriate courses currently offered in other specialized disciplines and of an integrated set of core courses offered by the Alaska Native studies program.

Historic Landscapes Emphasis Course Offering:
  History and Theory
  Seminar: Contemporary Landscape Architecture
  Colloquium: Historic Landscapes of the Southwest—Documentation and Assessment
  Introduction to the Conservation of Cultural Resources (College or Architecture)

The Program of Landscape Architecture emphasizes landscape ecology, socio-cultural and behavioral factors as well as landscape esthetics and artistic principles in a variety of design and planning applications. Students have the opportunity to work within interdisciplinary studios which explore broad cross-sections of outdoor environment types and scales. The context in which design and planning studios operate closely simulates the breadth of the profession and includes wilderness, rural, urban, and historic landscapes. Special attention is given to the ecology, culture, and history of the arid southwest. Close proximity to Mexico also provides an often utilized cross-cultural experience.

There is a Cultural Resource Management option in the archaeology program, offered in conjunction with the Arkansas Archeological Survey. A two-semester internship is required. During the first semester, the student spends a couple of weeks in each area of the Arkansas Archeological Survey: computing, registration, curation, as well as working with the state archeologist. The second semester's work involves an individual project with some aspect of the Arkansas Archeological Survey: collections, excavations, public education. The finished product must be of publication quality and is prepared in lieu of a thesis.

PART-TIME FACULTY
Allan Lonnberg, MA, U of NM 1981; sociocultural anthropology; ethnicity and stereotypes, archaeology, native peoples of California; Europe
Charles Smith, MA, U of AZ 1971; ethnography, sociocultural anthropology; archaeology, native peoples of California; North and Central America, Southwest Asia, Africa

CURRICULUM
Certificate:
Anthro 2 (Cultural) - every semester
Anthro 3 (Intro to Arche) - every semester
Arche 2 Advanced Archaeological Survey - Summer
Arche 3 Archaeological Data Management - Spring
Arche 4 Archaeological Excavation - Summer
Arche 5 Archaeological Laboratory - Fall
Anthro 6 California Native Cultures - Fall
Anthro 7 N American Native Cultures - Spring
Arche 113 Planning for the Past
Arche 113a - Federal - Fall
Arche 113b - State - Fall
Arche 113c - Curation/Data Standards - Spring
English IA Composition - Every Semester

A.S. Degree
English ID Research Report Writing and a choice of others recommended for the A.S. degree

Cabrillo has extensive regional archaeological site records and an archive of archaeological and cultural resource reports. Cabrillo is in the process of transferring this data into a Geographic Information System (GIS). The Program also has Global Positioning System (GPS) receiver technology. There are several scholarships available after the first year of study.
including one specifically for students of Native American ancestry.

We are training entry level workers for Cultural Resource Management firms or agencies who deal directly with both historic and prehistoric sites and landscapes. We also prepare students to transfer or more likely take a career ladder of work and further education.

A vocational training program in archeology technology is offered with a 31-unit certificate or a 62-unit AS in Archeology option. The certificate/AS degree program focuses on scientific observation and note-taking, as well as emphasis on new technologies. Graduates of this program will be well prepared either to work at entry level CRM positions and/or to continue in upper division course work.

The program was designed by asking CRM practitioners what they wanted new employees to know. Discussions led to a curriculum which includes writing courses, computer courses, a data management course, three readings courses focusing on federal and state laws and regulations, and curation practices. The program was designed as a career ladder, with the option of immediately joining the work force, or continuing formal education, usually at a cooperative university such as UC-Santa Cruz or Sonoma State.

The university offers a Public Archaeology Option in the Master of Arts degree. The program is a specific course of study designed to prepare students for cultural resource management positions. Students are required to do fieldwork, an internship and prepare a thesis. The Northridge Center for Public Archaeology provides training in excavation and environmental archeology.

Sonoma State University

Department of Anthropology
1801 East Cotati Ave.
Rohnert Park, CA 94928
707-664-2312
Adrian C. Praetzellis

The university offers a Master's Degree in Cultural Resource Management with specializations in natural resource management, interpretation, or historic preservation. The curriculum is oriented toward the practical with two years of formal course work and a thesis. The goal of the program is to produce mid-level Cultural Resource Managers, not academic archeologists. An important research facility, the Anthropological Studies Center, allows students to work through an apprenticeship program. The apprenticeship is not mandatory, but most students participate, gaining experience in all aspects of mid-level cultural resource management.

Specialty courses supplement the three areas of concentration

HISTORICAL MUSEUM CURATORSHIP SUBSPECIALTY

Historical Museum work is distinguished by the variety of skills required. This program is oriented toward preparing the student for employment in the middle-sized and small museum, where the variety of tasks and skills is greatest, rather than at the large museum, where specialization is possible. The program must include core training as a historian, with introduction to museum interpretation and practice. Since most career mobility in museums is in the direction of administration, the program includes a major preparation in the fiscal, decision-making, and personnel aspects of management. Historical museum curators typically are involved, in daily work, with archaeologist and art/architecture historians. Students are consequently requested to obtain preparation in at least on these two areas.

HISTORIC PRESERVATION MANAGEMENT SUBSPECIALTY

Historic preservation now involves three components. In descending order of importance, these are historical research and evaluation of sites and monuments, land-use and urban planning, and architectural conservation. In planning your program you should be sure that you have thorough introduction to the latter two components, as well as your mandatory training as an historian.

ARCHIVAL MANAGEMENT SUBSPECIALTY

Archival management remains close to historical research, and is indeed a profession created by historians earlier this century. Archivists consequently need strong training in academic history, since most of their daily work will be for academic historians patrons and for genealogists. In addition, archivists should have a thorough understanding of the institution and setting in which records are generated. Graduates of the program now working as professional archivists have repeatedly testified to the great importance of preparation in political science.

Museum Research & Education
Folklore Theory
Seminar in American Folklife

The program affords numerous opportunities for fieldwork
and advanced research in the region, including historic
resource surveys and other projects devoted to analysis of the built environment and to preservation planning. The University's Institute for Urban Development Research undertakes numerous projects in which preservation is an important component. Funded positions are available for students involved in this work. The Center for Washington Area Studies sponsors student fellowships as well as scholarly publications. Monographs prepared by students or former students include such topics as the evolution of two Washington neighborhoods, the city's municipal lighting system, the gentrification of an in-town district, and the literature of the Greenbelt communities. Alexandria Archaeology — a program of the Office of Historic Alexandria in cooperation with city agencies and local groups — provides a comprehensive laboratory for developing and applying techniques of data gathering, organization, and analysis. Students in the program have secured paying internships, and often subsequent employment, from numerous public- and private-sector offices in the metropolitan area, including the National Park Service, National Trust for Historic Preservation, Maryland Historical Trust, Octagon Museum of the American Institute of Architects, and local planning agencies. The library collections available to students in the program are among the most extensive in the United States. Augmenting the holdings at the University's Gelman Library are those of the Library of Congress and major collections of federal agencies and museums, the National Trust, American Institute of Architects, and Historical Society of Washington, D.C.

Contact the College for information on the Ph. D. curriculum.

Architectural preservation involves the analysis, maintenance, and appropriate development of culturally significant buildings, urban spaces, and landscapes. The subject matter is taught as an aspect of contemporary architectural practice and investigates the theories and methods of dealing with the built environment.

An established program in research and documentation offers hands-on field experience. Students seeking the M. Arch. professional architectural degree, the M. S. in Architectural Studies research degree, and the Ph. D. can emphasize preservation by selecting from a wide range of electives and special studies courses offered on campus and in the Preservation Institute: Caribbean, Preservation Institute: Nantucket, and Vicenza Institute of Architecture programs. In addition, the College maintains a studio in Miami Beach, Florida. The College of Architecture includes the Departments of Architecture, Building Construction, Interior Design, Landscape Architecture, and Urban and Regional Planning, and interdisciplinary studies are encouraged within and outside the College.

The Master's Degree in Historical Archeology is offered through the department of history with equal courses in history and archeology. The program prepares students for Cultural Resource Management and Historic Preservation employment. Field school and internships are an important part of the program.

The program is comprised of 15 hours of history and 15 hours of archeology, which includes course work in academic theory, archeological methods and cultural resource management. Field work and a thesis are required. In addition to coursework, students have access to employment opportunities through the Archeological Institute. The program includes a specialty in underwater archeology, and a maritime archeology course is a required component.

Historic Preservation at the Savannah College of Art and Design is oriented toward students seeking professional careers addressing the preservation of historic architectural resources. The dual nature of professional practice, balancing generalist and specialist competencies, is the basis of the curriculum. The mission of the program is to provide the aspiring professional with a solid foundation in the interdisciplinary issues of preservation, while focusing the individual student's pursuit of a particular specialization. Primary emphasis is given to two integrated areas: the first concerns historic architectural resources as artifacts; the second addresses design issues raised in their preservation.

HP Thesis Writing (core)

One of a limited number of programs offering a professional preservation degree, the focus is upon preservation in its broadest context and the preparation of individuals who can develop strategies for the perpetuation of historic resources. An historic campus, and a community and area characterized by historic resources, all provide the setting for an intensive, community oriented, practical educational experience which effects a balance between academic and professional training. In addition to the field experiences which are a part of almost all classes, there are study/travel opportunities as well as a studies abroad program in Italy. A Student Handbook on the Masters in Historic Preservation program is available.

Historic Preservation Practicum

The University of Hawai'i prides itself on its strong international orientation and wide range of peoples and cultures reflected in its faculty and student body, departments and courses. This is reflected strongly in the Historic Preservation Program, including the Summer Field School, which attracts students and faculty from around the world. The program's courses reflect this international orientation and give special emphasis to problems and examples of universal concern. The University is committed to the recognition of the cultures and values of indigenous peoples, especially native Hawaiians. This commitment is manifested in course offerings and programs throughout the University.

The Pacific Preservation Consortium, headed by Dr. William Murtagh, is an integral component of the Historic
Preservation Program. It serves as an umbrella organization for the development of special domestic and international historic preservation programs, especially in the Pacific area, in which the resources of the University may be utilized. Current activities under development include preservation training and educational programs in Indonesia, Cambodia, the independent nations of Micronesia, and Fiji.

The Historic Preservation Program also has a close working relationship with the East-West Center, an organization founded by the U.S. Government in 1960 to promote cultural and technical exchange among peoples of the Asia-Pacific region. The Center provides a neutral meeting ground where people with a wide range of perspectives exchange views on topics of contemporary significance, including historic preservation and cultural resource management.

Preservation Law (3)
History of Interiors and Decorative Arts (3)

Spring II
Surface Conservation Lab (3)
History of Residential Design (3)
Thesis (3)
Elective (3)

The program offers sixteen specialized restoration and preservation classes that cover the four main areas of historic preservation - history, conservation, restoration design, and preservation planning. Every semester, students take at least one class from each of the four areas so they have a comprehensive background that will enable them to find a position in one of the many specialties in historic preservation. The faculty are practicing professionals, so the students have access to all the major restoration work going on in the Chicago area, often taking part in the preservation planning aspects of the job. Field trips are taken every week to historic sites in the Chicago area.

The M.Arch. degree at BSU requires the first professional degree (Bachelor of Architecture) from an accredited institution for admission. It is the objective of the program to provide advanced professional education in those areas in which the College of Architecture and Planning pursues excellence, including historic preservation. The program serves an international mix of students, and enjoys the benefits of the fine facilities and programs, and the multidisciplinary context (Architecture, Landscape Architecture, and Urban and Regional Planning), that the College provides.

The MSHP program at BSU provides individuals from diverse undergraduate backgrounds with a solid academic foundation and the preparation necessary to undertake professional careers in historic preservation. Emphasis is on the study and preservation of built environments, and on community relations in pursuit of those ends, within the context of an environmental design school devoted to the professions of Architecture, Landscape Architecture, and Urban and Regional Planning. The excellent facilities and programs of the College of Architecture and Planning considerably enhance the value of the MSHP.

DEGREE Master of Landscape Architecture, with preservation thesis

ESTABLISHED Department of Landscape Architecture was established in name in the 1920s, though the program had been in place since the 1870s. The preservation option thesis was established in the 1980s, although available earlier.

TIME Four semesters of study for students with a bachelor's degree in Landscape Architecture.
M.L.A. Degree is granted upon completion of 36 credits and the acceptance of a thesis.
3 1/2 years-4 years for students who do not hold a bachelor's degree in Landscape Architecture.
B.L.A. and M.L.A. Degrees are granted upon completion of 68 credits and the acceptance of a thesis.

INTERNSHIPS Assistantships are available, based on academic qualifications. Internships in professional offices or at historic sites are sometimes available.

REQUIRED No

THESIS Yes

ENROLLMENT 1 to 3 is the current average. 3 are currently enrolled in preservation thesis option.

GRADUATES 3 with preservation thesis option; 5 currently enrolled

TUITION PER SEMESTER (9 credit hours) Resident: $1,360
Non-resident: $3,936

FACULTY Fulltime: 8 [2 in Dept. of Landscape Architecture; 6 in Allied Departments]
Part-time/Adjunct: 0

FulTime Faculty The following faculty have been actively involved in the preservation emphasis in Landscape Architecture:

COLLEGE OF ART AND DESIGN, DEPARTMENT OF LANDSCAPE ARCHITECTURE
J. Timothy Keller, FASLA, Professor and Chair; community planning and community preservation, cultural resource analysis, historic landscape preservation and rural preservation
Robert R. Harvey; landscape history and landscape architectural history, historic research methods, historic landscape preservation theory and methodology

COLLEGE OF DESIGN, DEPARTMENT OF ARCHITECTURE
Dr. Arvid E. Osterberg; architectural preservation, historic preservation theory, adaptive reuse of existing structures, accessibility and universal design

COLLEGE OF DESIGN, DEPARTMENT OF COMMUNITY AND REGIONAL PLANNING
Dr. Patricia Burgess; urban history, land use controls, community planning, community preservation and historic preservation
COLLEGE OF LIBERAL ARTS AND SCIENCES, DEPARTMENT OF HISTORY

Dr. Gail E.H. Evans; historical methods and North American environmental history
Dr. R. Douglas Hurt; historical methods and American agricultural history and rural studies
Dr. Alan I. Marcus; historical methods, American agricultural history, history of science/history of technology, and history of medicine
Dr. Andrejes Plakans; historical methods, European agricultural history, and statistical evidence and analysis

CURRICULUM

The M.L.A. degree, with preservation emphasis, is granted upon completion of 36 credits and the acceptance of a thesis on a preservation topic. 12 of the 36 credits must be taken from a selection of historical methods courses taught within the Graduate Program of the Department of History, College of Liberal Arts and Science. If the student wishes to continue for a Masters or Ph.D. in history, these 12 credits may also be applied to that degree. All professional electives beyond those directed within the core M.L.A. requirement must be taken from courses concerned with preservation methodology. The thesis topic has to address a problem, issue or specific site in a preservation context.

Iowa State University is located in Ames, a city with a population of 50,000. Ames was ranked as one of the top ten best "micropolitan" areas in the United States in the 1990 "Rating Guide to Life in America's Small Cities." The university is comfortably situated on 1,000-acre central campus. The heart of the campus possesses a large ornamental lawn, following the design aesthetic of Andrew Jackson Downing. This historic landscape was originally laid out in the 1870's by Adjoniah Welch the first President of Iowa State and his class in landscape gardening. Approximately 2,500 foreign nationals representing more than 115 countries are enrolled at ISU, greatly enriching the university. The College of Design has 75 undergraduate and 30 graduate students enrolled from 26 countries. The College provides a number of opportunities for students to study abroad. ISU has been classified as a "Research I" University by The Carnegie Foundation for the Advancement of Teaching. The Parks Library is nationally recognized for its collections that total more than 4.7 million items. The Library has major strengths in the design arts and agriculture. The Warren H. Manning collection of 1600 original drawings is located within the Parks Library and is available for individuals pursuing scholarly work. The faculty from the College of Design that teach in Historic Preservation emphasis within the M.L.A. Program consult, maintain professional practices, and publish in the field of historic landscape preservation. These activities often provide opportunities for the student to gain practical experience in the field. The faculty from the History department also have extensive publication records within their areas of expertise. Iowa and the midwest offers a number of historic sites and historic resources which enrich the students experience. The Amana Colonies, Living History Farms, Taliesin, The Clearing, Seed Savers, Galena, IL, are a few examples. The spring of 1994 graduates from the Department of Landscape Architecture had a high success rate for placement. Over 50% of the class had been placed two weeks prior to graduation which exceeds the national rate for placement and is the highest within the College of Design.

Introduction to Public History
Interpreting History to the Public
Historic Preservation
Museum Administration
Introduction to Archives
Advanced Historical Methods
Internship in Public History
Thesis Research/Writing

The public history concentration requires 35 credit hours, which includes 4 credit hours of internship experience (two semesters) and 4 hours of thesis research and writing. A reading knowledge of one foreign language also is required. Students receive rigorous instruction in research methods and U.S. history (European option available), with specialized training in one or more professional career fields. Through seminars and internships, students may specialize in museum studies, historic resource protection, archival studies, and administrative history. Students have served internships with the National Park Service, planning departments in Wichita and Hutchinson, several area museums, Old Cowtown (a living history museum), private corporations, community organizations, and the university archives. Internships typically are paid positions and may be completed during the summer. The department also awards a limited number of assistantships that carry an annual stipend of approximately $5500 plus reduced tuition.

Tourism Planning and Preservation
Comparative Urban Planning Study Tour

The City of New Orleans provides a vibrant setting in which to study and practice the principles of cultural resource management. Faculty at UNO's College of Urban and Public Affairs actively pursue the college's mission of teaching, research, and service by working in the city, region, and state on projects dealing with many aspects of preservation and planning. Students have the opportunity to support these efforts and apply their learning through formal assistantships, internships, and part-time work experience. The Urban Studies Student Association (USSA) provides both social and educational activities for students. A 15-credit hour Historic Preservation Certificate Program is also available on a credit or non-credit basis. The College also operates the following programs: The Division of Urban Research and Policy Studies (DURPS); Louisiana Urban Technical Assistance Center (LUTAC); the International Program for Port Planning and Management (IPPPM); and the national Center for the Revitalization of Central Cities.

DEGREE Certificate in Preservation Maintenance
ESTABLISHED 1992
TIME 2 years
ENROLLMENT 20
GRADUATES 20
TUITION Costs are shared by National Park Service regional offices and PAST Program.

FACULTY Mentors will be selected with the new class. They are highly skilled National Park Service craftsmen with experience in preservation. Each mentor is matched with two trainees.
This 2-year program for National Park Service maintenance workers offers individualized training in historic preservation and historic craft skills. Each trainee is matched with a skilled mentor. Trainees and mentors attend 2 2-week group training sessions each year which focus on historic preservation philosophy and particular skills needed to carry out carpentry, masonry and painting on historic structures to give students a common understanding. Mentors visit trainees in their parks to teach new skills and to supervise the trainees in hands-on preservation maintenance for 2 days each month. The second class of 10 mentors and 20 trainees will begin during FY 1995. Selection is based on the needs of the parks and regions as well as on the interest and qualifications of the applicants.

TUITION
No Tuition. Participants in our program are hired as employees of the Federal Government.

FACULTY
Fulltime: 8 Part-time/Adjunct: 0

FULLTIME FACULTY
H. Thomas McGrath, Chief, architect; lighthouses, ships, historic structures reports
Earl Gillespie, supervisory exhibits specialist; masonry, carpentry
Douglas Hicks, assistant chief; epoxy repair and use of epoxy, lead-based paint, historic preservation
William Hose, supervisory exhibits specialist; carpentry, historic tools

Chris McGuigan, exhibits specialist; architecture, painting
Paul Neidinger, historical architect; masonry, historic structures reports, drawing, design
Roderick Rohrer, exhibits specialist; carpentry, lead-based paint, safety/hazardous materials
Thomas Vitanza, historical architect; preservation standards and regulations, documentation, stabilization

CURRICULUM
Each trainee follows a course of study that includes the following subjects:
- preservation philosophy based on National Park Service policies, standards, and guidelines; historic structure identification, evaluation, and documentation;
- historic building technologies, materials, and craftsmanship;
- causes of and treatments for decay in materials and structures;
- estimates and specifications for decay in materials and structures;
- project supervision; and contract administration.

The Training Center offers a three-year "apprenticeship" program for individuals whose career goals are directed towards positions that involve responsibility for the treatment of historic structures. The Training Center is a part of the National Park Service, a Federal Government agency. Only employees of the Federal Government are eligible to apply for the training program. Trainees perform and direct preservation work on the thousands of historic structures in the National Park System. This program is designed to give trainees a solid background in historic preservation. The primary focus of the program is on-the-job training through project work on historic structures of the early 18th to early 20th centuries. To provide a diversity of experiences, Williamsport trainees are assigned to a variety of preservation or construction projects throughout the National Park system. The faculty of the training center is available to instruct in all areas of historic preservation.

Books: $100 (approx.)

FACULTY
Full-time Faculty: 2
Part-time/Adjunct Faculty: Consists of visiting or guest lecturers/preservation practitioners from non-profit organizations or historic house museums; private consultants; technical specialists; and contractors.

FULL-TIME FACULTY
Robert Adam, preservation carpenter; 18th and early 19th century architecture; traditional building/woodworking tools and techniques; period hardware
Denis Semprebon, carpenter; pre-20th century woodworking; woodworking machinery; project planning and management; 20th century architecture and design

CURRICULUM
Fundamentals of carpentry practice
Code compliance
Hand and power tool technique
Principles and procedures in building construction
Repair and reconstruction to existing structures and details (interior & exterior)
Ancillary trades (masonry, plumbing, decorative painting)
Incorporation of modern systems into historic buildings
Preservation practice and applications
Training within the Preservation Carpentry Program includes techniques used by conservators in museum settings.
Because program graduates work in the greater community, as well as with museum property, they must be able to work to the highest standards of preservation practice. They must also be proficient with other courses of intervention appropriate to historic buildings and communities, such as replication and restoration.

Employment Opportunity: Graduates of this course will be prepared to work with contractors who specialize in preservation and conservation work; they are qualified to work on historic buildings within a museum setting; and they will be able to perform advanced millwork and interior finish for buildings of traditional style. Some graduates become self-employed in preservation/restoration fields. Other employment settings pursued by program graduates include: museum interpretation, antique furniture restoration, preservation trade training, and sustainable design and construction.

North Bennet Street School currently offers eight full time programs, all of which touch on areas related to cultural resource management. They are: Bookbinding, Cabinet and Furniture Making, Carpentry, Preservation Carpentry, Jewelry Making and Repair, Locksmithing, Piano Technology, Violin Making and Restoration. The school offers hands-on training in trades and fine crafts, with a focus on understanding of tools, materials, methods, and problem-solving techniques. The programs carry on the tradition of learning at the bench under the supervision of accomplished members of the trade. Students are assigned to increasingly difficult projects within the context of a curriculum that emphasizes both traditional technique and contemporary technology.
Although classes are small and informal, the course work is demanding. Working in the shop or on the project site is analogous to being on the job for a full day; projects are
typical of those encountered in the student's chosen field. Classes are made up of people of many ages, with diverse educational backgrounds and work experience, encouraging energetic exchange of ideas and approaches.

Graduate Research

The Master's degree in Industrial Archaeology (IA) relies on departmental faculty with teaching and research interests in the areas of historical archaeology, history of technology, and anthropology of industry. It draws on their diverse perspectives to train students in the discovery, recording, interpretation, and preservation of the physical remains of industrial artifacts, sites, and systems within their social contexts. This graduate program is one of the few in the world to focus explicitly on the archaeology of industry and to fuse the perspectives of archaeology, history of technology, and anthropology.

Michigan Technological University was established in 1885 as the Michigan Mining School, in the heart of a significant copper mining area that operated from the 1840's until 1970. The university is surrounded by industrial sites, creating a man-made laboratory for the study of IA. Two National Parks—Isle Royale and the new Keweenaw National Historical Park—contain industrial sites to be interpreted for the public. The university library, in addition to its extensive holdings related to industrial history, maintains the Copper Country Archives. These archives contain an important collection of original materials concerning the history of the Keweenaw region, including the records of many of the copper mining companies. The Department of Social Sciences also has an Archaeology Laboratory that is actively involved in local and regional archaeological field projects. Financial support for graduate students is provided by both the university and on-going research projects. During the 1994-95 academic year all full time students will receive support from research or teaching assistantships. Interested students are encouraged to apply for internships, and the department maintains close ties with the U.S. Forest Service and the Michigan Bureau of History.

Problems in Cultural Resource Management

The University recently initiated a Master's program in Cultural Resource Management. It is the Interdisciplinary Archeology Studies (IAS) program, which consists of two fields, one of which must include archeology. Course work is only available at the Master's level, there are no courses at the doctoral level.

Minnesota

University of Minnesota, Duluth

American Material Culture (graduate only)
Heritage Tourism (graduate only)
The Bachelor of Science in Historic Preservation degree is a specialized program administered through the Department of History, but it is an interdisciplinary program requiring course work in a broad spectrum of academic subjects which enhance and enrich a student's overall experience in the program. All undergraduate majors take a required core of courses focusing on the built environment; then students may choose to concentrate their training in museum studies, archives and special collections, or site administration. Students and faculty work together on a wide range of practical, hands-on projects to study, understand, and preserve our past. Problems courses utilize projects throughout the region to practice classroom theory, refine professional skills, and determine areas of professional interest. Using the program's computer stations to do desktop publishing and computer assisted design (CAD) work, students prepare professional quality reports and planning projects. Graduates of the bachelor's degree program have gone on to work from coast to coast in highly competitive positions such as museum director, site administrator, records analyst, and material culture specialist. Our graduates are making a difference in their fields. Others continue their education in graduate school; some enter our own graduate program. The Masters of Arts degree in History with an emphasis in Historic Preservation allows students to work in the areas of heritage education and heritage tourism; it also provides students without an undergraduate degree in preservation the opportunity to study basic skills and techniques that will enable them to practice in the profession. Students become acquainted with professional preservationists and current issues facing preservation at local, regional, and national conferences, meetings, and workshops. In addition, a student organized lecture series brings regionally or nationally known preservation professionals to campus. The program's goal is to instill in students a life-long desire to protect and share historic and cultural resources.

Ph.D.: the equivalent of the M.A., in historic preservation planning, plus at least one additional year of residency.

INTERNSHIPS
No, although the program, college and university post dozens of internships each year.
REQUIRED
No, although they are highly recommended. The student is expected to make the maximum use of the summer for professional development.

THESIS
Yes. A written thesis is required and is the norm; projects require special petition a priori.

ENROLLMENT
M.A.: 11-12
Ph.D.: 1-2

GRADUATES
165

TUITION PER YEAR
$19,000 + $6,300 to $9,900 (living expenses)
Fellowships and scholarships are available on a competitive basis, depending upon academic merit. Minority scholarships exist.

FACULTY
Fulltime: 8 Part-time/Adjunct: 1

FULLTIME FACULTY
Sherene Baugher, Ph.D.; historic preservation, American Indians and planners, urban planning history, urban archeology, Canada and Mexico
Richard S. Booth J.D., (on leave fall 1994 only), Director of the Undergraduate Program in Urban and Regional Studies; land use and environmental law, critical area preservation, historic preservation law, environmental politics, regional land-use planning
Jeffery W. Cody, Ph.D.; historic preservation, environmental planning, international development, historic preservation, urban planning, history, China
Barclay G. Jones, Ph.D.; urban and regional theory, quantitative analysis, urbanization theory, planning theory, environmental health planning, Eastern Europe, the Caribbean, Africa, the Middle East, Asia
Kermit C. Parsons, M.R.R; urban land-use planning, large-scale urban development planning, urban growth policy in developing countries, Mexico, Korea, Venezuela, the Philippines
Stuart W. Stein, M.C.R Professor Emeritus; urban land use, planning design, housing, historic preservation, local government, community development, urban planning practice, Venezuela, Puerto Rico
Michael A. Tomlan, Ph.D., Director of the Historic Preservation Planning Program; building conservation technology, documentation methods for preservation, history of the preservation movement, China, Canada
Mary N. Woods, Ph.D., history of American architecture, urban development

PART-TIME/ADJUNCT FACULTY
Barbara E. Ebert M.A.; historic preservation planning program at Cornell
Additional faculty, not involved with the program on a day-to-day basis, have been omitted, as have a number of other courses in such fields as housing, landscape architecture and real estate management

CURRICULUM

FIRST YEAR, FALL TERM
American Architecture (3) M. Woods
Perspectives on Preservation (3) J. Cody
Documentation for Preservation (3) M. Tomlan
Historic Preservation Planning Workshop (4) B. Ebert
Economics of Neighborhood Preservation (3) B. Jones

FIRST YEAR, SPRING TERM
American Architecture II (3) M. Woods
Built Environment Education (4) B. Ebert
Building Materials Conservation (3) M. Tomlan
Building Materials Conservation Lab (3) M. Tomlan
Archaeology in Historic Preservation Planning (3) S. Baugher

SECOND YEAR, FALL TERM
Problems in Contemporary Preservation Practice (1) B. Ebert
Small Town Community Design Workshop (4) S. Stein
Historic Preservation Law (3) R. Booth
Master’s Thesis in Historic Preservation Planning (6)
TOTAL: 60 semester credit hours

The Graduate Program in Historic Preservation Planning provides students with professional training through a combination of course work, research and community service. About a dozen students enroll in the program at the master’s level each year. The entering and continuing master’s degree candidates and the three or four doctoral students form a cohort in this field that is large enough to provide meaningful interaction and small enough to enjoy direct access to the nine faculty members who are centrally involved. Options also exist to join students and faculty in other locations: the College of Architecture, Art and Planning maintains classroom and studio space in the Palazzo Massimo in Rome, Italy, and the University maintains an interdisciplinary center in Washington, D.C.

Students who complete the program are prepared to engage in a variety of careers in the continually developing preservation field. Those careers may be with private firms, nonprofit organizations, teaching and research institutions, or public agencies. Alumni of the program reside in over half the states in this country and in Europe, South America, and Asia. To further their professional development and to support students in the program, in 1985 the alumni formed a
private, not-for-profit organization, Historic Preservation Planning Alumni, Inc., that sponsors annual conferences and events; provides awards; and introduces students to the challenges and opportunities in the field.

The Ph.D. student must demonstrate reading proficiency in two languages in addition to English before taking the admission to candidacy examinations, and the completion of the dissertation. A candidate for the Ph.D. degree must complete a program of study approved by the candidate's Special Committee, composed of a chairperson, representing the major concentration, and two other members of the university's Graduate Faculty, each representing a minor subject. At least one minor must be in another graduate field, and both may be.

Community Development and Planning Process
Ecology in Landscape Design and Planning
Professional Practice
Proposal for Thesis/Project or Internship
Design Studio V-Integrative Studio
Thesis or Project
Directed Electives

The final year of the MLA program provides students the opportunity to specialize. Since 1990 of the 31 Theses/Projects that have been produced, 14 have been directly related to historic preservation. In 1991 the College signed a cooperative agreement with the North Atlantic Regional Office of the National Park Service. Six students have been supported to assist in developing Cultural Landscape Reports and the Cultural Landscape Inventory Program. The campus is located adjacent to Syracuse University and students have free access to all courses. Thus preservation related courses taught in Architecture, Fine Arts, Law and Public Policy, Geography and History are available to the students. Faculty from Syracuse University also serve on graduate student committees. The Faculty of Landscape Architecture provides a variety of opportunities in the area of preservation. Nine full-time and part-time faculty are involved with research and/or consulting on preservation issues. A number of preservation summer internships are available. These internships have been with Federal, State, and Local Governments, not-for-profit association and private firms both in the United States and Europe.

General Education elective

Students in Building Preservation Technology are expected to develop an appreciation of traditional craftsmanship, a sensitivity toward the environment (both natural and built) and the ability to apply preservation theory in real-life situations. The Belmont Technical College approach to preservation provides that kind of "hands-on" approach through: the restoration of two historic homes operated by the college as field labs, experimentation in the Preservation Workshop and traditional academic class work and research. Knowledge of construction materials and methods is not a prerequisite for admission. Students are taught to identify, evaluate, plan and repair historic structures within the guidelines set forth by the Secretary of the Interior. The 18-month curriculum is a rigorous examination of preservation theory balanced with practical applications of specialized construction and craft techniques.

Applied History Internship
Applied History Report

A firm belief that the discipline of History has value and applicability to all of society lies at the heart of the Applied History program. While specializing in either historic preservation or museum studies, students receive a graduate degree in History. This enables them to acquire the research, writing, and analytical skills which accompany a course of study centered on the historical method. Yet, the term "Applied History" also implies the ability to use these skills in a setting transcending academia. Thus, we require sound historical training, thorough theoretical training in the student's chosen emphasis of Applied History, and the acquisition of meaningful practical experience through an internship. This combination prepares students for successful and productive careers in the public sector. Graduates of the program are currently working in State Historic Preservation Offices; state historical societies, state, county, and local
museums, and preservation planning offices. Institutions hosting internships have included the Oklahoma State Historic Preservation Office, Oklahoma Historical Society, National Cowboy Hall of Fame, Gilcrease Museum, Fort Smith National Historic Site, Colonial Williamsburg, Smithsonian Institution, Indiana Department of Natural Resources, Southwestern Pennsylvania Heritage Preservation Alliance, and the New Jersey Historic Preservation Office. During their course of study, students also have volunteered and worked with local museums and preservation groups.

The Historic Preservation Program is an interdisciplinary program within the School of Architecture and Allied Arts. Its courses, faculty and administration are interdepartmental. The program’s flexibility encourages its majors to develop individualized programs which include a background of historic preservation course requirements. Some students take advantage of other departments within the school by pursuing a second master’s degree. The emphasis of the Program is upon historic places, buildings and landscapes in terms of their specific forms, materials, and construction; the cultural and theoretical context in which they are developed; the impacts of time upon their materials, meanings, and needs; and the technologies, interpretations, and means for sustaining the presence of historic places into the future. Extensive instructional use of the region takes place through emphasis on the cultural and technical aspects of vernacular studies, field trips, and participation in the projects of university and local community groups. Involvement with the region’s professionals, officials, and agencies concerned with historic resources has become increasingly important in the Program. For example, during the 1993-94 school year, students became involved with the U.S. Forest Service and the National Park Service on specific projects through courses and contract work.

The program is designed to provide a balance between professional education and liberal arts education. It is fully accredited by the American Society of Landscape Architects. It also maintains a strong alliance with Natural Resources and Community Planning programs. Internship credit may be earned by summer work experience in offices of landscape architects, architects or engineers. Credit may also be earned by field work experience in actual construction or restoration projects. Graduates have been employed in private firms, public agencies and the design-build industry. Others have gone on to various graduate programs.

Supporting course work outside the major field of study is recommended and in some cases required. Subject to approval by the student’s Graduate Advisory Committee courses are available in Anthropology, Archeology, Civil Engineering, Geography, History, Mechanical Engineering, Park Recreation and Tourism Science, and Philosophy. A number of research centers and laboratories offer opportunities for basic research and application studies.

Nancy J. Volkman, Associate Professor

DEGREE
Cultural Resources Planning and Historic Preservation is a designated Emphasis Area of the Department under the following degrees:
Bachelor of Landscape Architecture (BLA)
Master of Landscape Architecture (MLA)
Master of Urban Planning (MUP)
Master of Science in Land Development (MSLD)
Doctor of Philosophy (PhD)

ESTABLISHED
Landscape Architecture 1934
Urban Planning 1968; combined in 1991

TIME
BLA 5 years
MLA 2 to 3 years
MUP 2 years
MSLD 1.5 years
PhD 3 to 5 years

INTERNSHIPS No

REQUIRED
for BLA, MLA and MUP

Thesis
Equivalent:
final project required for MLA;
professional paper for MUP;
dissertation for PhD

ENROLLMENT
250 total with 12 graduate students per year specializing in Cultural Resources Management

GRADUATES
1700

TUITION PER SEMESTER FOR 15 HOURS
Resident: $774
Non-resident: $2814

FACULTY
Fulltime: 26, 4 specialize in CRM
Part-time/Adjunct: 4    Sabbatical: 1

Fulltime Faculty
Gordon Echols, architect and urban planner; Spanish colonial planning, civil war battlefields
David Pugh, urban planner; historic preservation law, land use law
Arthur Sullivan, environmental planner; cultural resources planning, ecotourism, cultural tourism

Nancy J. Volkman, landscape architect; national register process, local preservation, landscape architectural history and cultural landscape studies

CURRICULUM
varies by degree program, please write for information. Cultural Resource related courses to be offer in the College of Architecture during 1994-1995 include:

History of Landscape Architecture
Development of Landscape Architecture in North America
Special Topics in Cultural Resources Management: The National Register
Preservation Planning for Historic Landscapes
Preservation Law
Plan Implementation
Historic Building Preservation
Recording Historic Buildings
Building Preservation Technology

Students are encouraged to take support courses in departments such as Geography and Anthropology. The College of Architecture has a number of centers and laboratories with specialized research facilities, including the Historic Resources Imaging Laboratory (David Woodcock, Director), the Visualization Laboratory (Donald House, Director), and the Psychophysics Laboratory (Lou Tassinary, Director). The Department has a comprehensive graduate student computer facility for GIS and Autocad. Foreign study and exchange programs are available in Castiglion Fiorentino, Italy and Monterrey, Mexico.

American Architectural History (lecture and seminar)
Pro seminar in American Cultural History
Historic Preservation: Development Economics
Historic Preservation Law
Historic Preservation Contemporary Practice
Advanced Architectural Conservation
Community Preservation Advocacy Project
Electives & Continuing Education

Students may also take electives offered by other departments in such areas as history, design, environmental policy, geography, etc., along with summer courses offered by the Program in its Historic Preservation Summer Institute. Many historic preservation courses are open to non-enrolled students through the VUM Division for Continuing Education in the evenings and in the summer. Recent summer courses include Barns: History & Conservation, History of American Building Technology, and Teaching with Architecture. Call 800-659-3210 for current Continuing Education course information.

The Historic Preservation Program focuses comprehensively on the stewardship of above-ground historic resources, both high style and vernacular. Admitting highly-qualified students from a range of backgrounds, the Program seeks to provide the profession with small numbers of broad-minded, talented historic preservation generalists who can communicate with other disciplines, professions and the general public to effect the long-term stewardship of the nation’s and the world’s tangible cultural inheritance. Alumni of the program have helped to create and administer innovative programs and strategies for conserving everything from historic main streets and barns to churches, urban and rural low-cost housing, native American settlements, and historic landscapes. Graduate students participate in extensive nation-
al and international field seminars with expenses subsidized in part by the Historic Preservation Program’s Endowment. Another important source of program enrichment is the Program’s Architectural Conservation and Education Service through which select graduate students have had the opportunity to work on actual building conservation and community preservation projects.

  - Recording Vernacular Structure

Historic preservation focuses on the maintenance, conservation, and interpretation of historic sites and structures, and on cultural resource management. Historic preservation provides opportunities for students to gain a deeper and richer understanding of America’s cultural and ethnic diversity and the ramifications of technological innovation and social...
change on the quality of life. Mary Washington College was one of the first academic institutions in America to establish an undergraduate curriculum in historic preservation and the first to establish an independent Department of Historic Preservation - now the largest undergraduate program of its kind in the nation. The department offers an interdisciplinary major which acquaints students with a broad range of activities, methods, and theoretical perspectives. Students in the program may emphasize historic architecture, architectural conservation, folklore, historical archaeology, material culture and history museums in their course work. Historic preservation majors explore the theoretical, ethical, and philosophical issues that surround preservation practice. The acquisition of research and analytical skills is stressed and substantial fieldwork, laboratory or research assignments are woven into most courses. The academic program of the Department of Historic Preservation is strongly enhanced by the research, fieldwork and public education programs of the Mary Washington College Center for Historic Preservation. The historic preservation program is also enhanced by the location of the College in Fredericksburg, a city with an exceptionally rich history. Intellectual and professional skills are developed through intensive, hands-on involvement in preservation activities in the United States and abroad. The Master’s program offers a combined natural and cultural resource management track.

Environmental History

The History Department offers an MA option in public history. This option is intended to provide enhanced employment opportunities to graduate students interested in using their education in history in a profession other than teaching. Extensive resources of the state are used for interpretation and preservation. The public history option consists of 15 hours of public history courses, including introduction to public history, two of three methods courses in historical editing, archival management, historic site interpretation and preservation, and a 6-hour supervised internship. Special topics courses are occasionally offered in historic preservation and may be taken in lieu of courses outside the History Department. A special field in the History of Science and Technology exists as part of the regular MA and PhD programs in history. This field is also suitable as an outside field for students in engineering, the sciences or education. Its purpose is to stimulate the development of a comprehensive and integrated approach to liberal education and to encourage the wider use of the resources of the University. Students are expected to take introductory colloquia in the history of science and/or technology. The department has close ties to the Institute for the History of Technology and Industrial Archaeology, and students have the opportunity to practice the direct application of knowledge by working as research assistants and interns on projects undertaken by the IHTIA. Internships are available in a number of fields and offered in both the public and private sector. Bi-annually a summer field school is conducted in HABS/HAER recordation activities.

Graduate Colloquium
History Management
Research Methods
Methods of Landscape Planning and Design
Survey of Cultural Resource Preservation & Landscape History
Seminar in Historic Preservation & Cultural Resource Management
Methods in Historic Preservation

In addition, students may take, as electives, a wide array of relevant courses in the following departments: Anthropology, Business, Folklore, Geography, History, Law, and Urban and Regional Planning.

The University of Wisconsin-Madison's historic preservation program emphasizes the role of the landscape in historic preservation. It strives to develop leadership in the field of historic preservation and landscape history by focusing on a broad landscape and environmental perspective for heritage conservation. Academic activities focus upon the landscape as the basis for understanding the evolution of our past, and stress the identification and evaluation of cultural features and the application of effective preservation planning and management. At the national level, scholarly attention to research in this area has emerged only recently. In the Department at the University of Wisconsin, which has contributed to national awareness in this area, research activity has been undertaken in the following areas: studies of landscape and community planning history, ethnic settlement and material culture studies, assessments of material culture and preservation activity in foreign settings, preservation master planning, formulation of legislation and policy, cultural resource surveys and inventories, biographical assessments of major figures in landscape architectural history, interpretive background surveys for the National Park Service, and theoretical and methodological contributions to preservation and landscape history. Students graduating from this area of expertise have been employed in a variety of positions in the public and private sector. Most who work with public programs include, for example, employment with various federal agencies, state preservation offices, and county or municipal planning and revitalization efforts such as the National Trust Main Street program. Graduates have also joined university faculties and worked in several capacities for private consulting offices, which others have developed their own consulting firms.

Historical Research Methods

The Certificate in Preservation Studies is designed to provide a formal program of Studies for the Master of Architecture students who wish to pursue careers in historic preservation in professional architectural practice or in governmental preservation agencies. Students wishing to earn the Certificate must be enrolled in the Master of Architecture program at the university and complete a minimum of 21 semester credits from a list of required and elective courses. The Certificate is awarded simultaneously with the Master of Architecture degree. In the past 1 1/2 years that the Certificate Program has been in place, students have undertaken major course projects in two Wisconsin communities, preparing a historic structures report and design proposals for a historically and architecturally significant hotel in the southwestern portion of the state and completing a survey of a historic small town facing suburban expansion in the Milwaukee area. The Summer 1994 program will be based at Taliesin, the Wisconsin home of Frank Lloyd Wright, where students will participate in the preparation of measured drawings of the buildings. Plans are underway with the Historic Preservation Office of the City of Milwaukee for a Fall 1994 city-wide survey of corner taverns, a unique Milwaukee building type and social institution. The Certificate Program is strengthened through the activities of the Preservation Institute, a separate entity established within the School of Architecture and Urban Planning which secures grants from public and private sources for community-related preservation projects, such as preservation planning, building evaluations, and preservation design recommendations. The Institute sponsors speakers, offers continuing education courses for members of the architectural profession, and has initiated the publication of a newsletter.

CURRICULUM

Effective Heritage Planning for Communities [Kerr]
Heritage Area Conservation [Oberlander]
Public Programming [Kurylo]
Curatorial Care of Artifacts [Florian]
Caring for Totem Poles [Todd & Webster]
Caring for Textiles Collections [Hutchins]
Exploring the Internet [Quinn]
GIS Uses in Cultural Resource Management [Keller]
Planning in Heritage Organizations [Lord]
Information Management in Heritage Agencies [Blackaby]

There are two core courses, 6 electives [from the 24 courses offered] and a directed studies course or internship needed to complete diploma requirements. Prerequisites for enrollment include a bachelor's degree and an active involvement in related professional activities. The two core courses are: Introduction to Museum Studies; and Introduction to Heritage Conservation. Both are available through distance education [correspondence courses].
Section iii.

Additional Education Directories

- Directory Title, Organization, Year Published or Year Covered, Number of Pages, Editor.

**Education Contents** — The Number of Pages in the Directory Devoted To Education Programs and The Number of Programs Described

**Entry** — The Information Provided In An Entry From That Directory

**Date** — The Year the Directory Was Printed

**Cost** — How Much Buying A Copy Will Cost

**Available From** — Who To Write or Telephone To Request or Purchase A Copy

**Additional Contents** — The Non-Education Information the Directory Contains

**Education Contents:** 244 pages on colleges and universities: 386 programs in U.S., 12 programs in Canada, 9 programs in other countries & territories.

**Entry:** Arranged alphabetically by the name of the University, each entry has the name of the department, degrees offered, a listing of the fulltime faculty — name, type of degree, name of university and year degree received, title and a list of that person’s interests/expertise. For many entries, there is information regarding the other faculty and staff. Also often included are the number of students in residence, male and female; the graduate student support available; degrees granted in anthropology; requirements for MA; requirements for PhD. The special programs category will often convey information regarding the emphasis offered by the department. Special resources and facilities will draw attention to museums in the university or the area, to special equipment, etc. In addition to the complete mailing address and telephone number, a point of contact is identified to obtain a catalog or for further information.

**Cost:** $35 for AAA Members; $50 Nonmembers

**Available From:**
American Anthropological Association
4350 North Fairfax Drive, Suite 640
Arlington, VA 22203
703-528-1902

**Additional Contents:** Index of Departments; Departments—museums (69), research institutions (42), governmental agencies (11) who employ AAA members; Directories of—members, unit members, life members; statistics regarding—degree source, degrees held, individuals and positions, highest degree offered, number of students enrolled; for previous academic year—total degrees granted, PhDs granted, PhD dissertations in anthropology; Indexes on—individuals in departments, departments grouped by state.

Accredited Programs in Architecture

**Education Contents:** lists the department chair/dean/director, address and telephone numbers, the dates of the current term of accreditation and the degree offered (B.Arch or M.Arch), for 100 programs in the United States plus 6 programs seeking initial accreditation.

**Cost:** none.

**Available From:**
NAAB, Inc.
1735 New York Ave NW
Washington, D.C. 20006
202-783-2007; Fax: 202-783-2822

**Additional Contents:** the names and titles of the 1993-1994 NAAB board of directors.

Accredited University Planning Programs

Association of Collegiate Schools of Planning (ACSP), effective December to December, 6 pages, compiled by the Planning Accreditation Board.

**Education Contents:** lists the 74 currently accredited planning programs in U.S. and Canada and provides the department chair/director, address and telephone numbers, and date of most recent accreditation.

**Cost:** none.

**Available From:**
Planning Accreditation Board
2501 North Loop Dr., Suite 800
Ames, IA 50010
515-296-7030; Fax: 515-296-9910
**ADDITIONAL EDUCATION DIRECTORIES**

---

**CONSERVATION TRAINING IN THE UNITED STATES**

**EDUCATION CONTENTS:** 2 pages on Conservation Degree & Internship Training Programs: 14 programs—12 in U.S., 2 in Canada.

**ENTRY:** Arranged alphabetically by name of program, department or university, an entry lists the complete mailing address and telephone number, and indicates by code whether it offers undergraduate, post graduate, internships, graduate, degree, and/or courses.

**DATE:** 1994

**COST:** none.

**AVAILABLE FROM:**

American Institute for Conservation of Historic and Artistic Works  
1717 K St NW Suite 301  
Washington, D.C. 20006  
202-452-9545; Fax: 202-452-9328

**ADDITIONAL CONTENTS:** Conservation training in the U.S., the focus of conservation, the role of the conservator, knowledge and ethos, conservation practice, approaching conservation education and training, apprenticeship, graduate academic programs [general narrative information], study abroad, financial aid, training evaluation, towards professional maturity, continued professional training, new directions in conservation, resources — selected bibliography, organizations and agencies [provides complete mailing address, telephone and fax numbers for 17], regional conservation associations [provides complete mailing address, telephone and fax numbers for 9].

**ADDITIONAL CONTENTS:** Four articles on the United Kingdom conservation training system including: United Kingdom conservation training—a national overview by Richard Davies, director of COTAC; vocational and educational training over the centuries, a perspective from the city and guilds of London Institute; training for conservation at York University by Peter Burman, director of conservation studies, Institute of Advanced Architectural Studies, University of York; and the joint centre of heritage conservation and management by John Ashurst, B.P. Professor of heritage conservation, department of tourism and heritage conservation, Bournemouth University.

**NOTE:** This periodical announced [page 27] that a European Directory of Training Courses in Heritage Skills and Crafts was due to be published in 1993 and cites the address above to contact for further information.
ADDITIONAL EDUCATION DIRECTORIES

**Directory of History Departments and Organizations in the United States and Canada**

**Education Contents:** 520 pages

**Entry:** Arranged alphabetically ignoring “university of,” an entry lists university name, full mailing address, telephone number and fax number; contact name for department chair; addresses for admissions and financial aid, degrees offered, academic year system, up to 5 areas of specialization within the department, tuition, application deadlines, enrollment statistics, faculty profiles (name, degree information, rank, and up to 5 areas of specialization); profiles of recent doctoral recipients (previous degree information and dissertation title).

**Date:** 1993, being revised; 20th edition, 1994-95, available in October 1994.

**Cost:** For 1994-95 edition is $45.00 for AHA individual and Institutional Service Program (ISP) subscribers; $60.00 for nonmembers and other institutions. Please add $1.00 handling fee per order. Airmail service per individual issue is available for $10 to Canada, $30 to Europe, and $40 to all other foreign locations. All orders must be prepaid.

**Available From:**

American Historical Association
400 A Street SE
Washington, D.C. 20003-3889
202-544-2422; fax 202-544-8307

**Additional Contents:** Historical organization entries contain contact addresses; detailed descriptions of collections, libraries, educational programs, publications, awards, and fellowships; as well as profiles of the historians on the professional staff (degree information, position, and specializations). The historical organizations are indexed by state and province. The index of historians lists more than 14,000 names. A separate index lists the PhDs awarded for each volume. Among the indices in this directory is an index by state or province showing the highest degree awarded at each institution.

**Directory of Private Accredited Career Schools and Colleges of Technology**

Accrediting Commission of Career Schools and Colleges of Technology (ACCSCT), 1993, 158 pages.

**Education Contents:** 86 pages in the state-by-state listing of approximately 800 accredited schools; 63 pages in the guide to career education which is arranged alphabetically by topic, each topic is defined, the work described and the list of colleges that offer a program in that topic is arranged by state.

**Entry:** Arranged alphabetically by state, then alphabetically by name of college, school, etc. An entry lists name of school or college, complete mailing address, and whether this is the main school or a branch campus. By code, information is given regarding the credentials offered—certificate or diploma, associate degree, baccalaureate degree; programs offered by that school; the year the institution was first accredited; the name, telephone and fax numbers of a contact. Such programs that provide skill training in: air-conditioning/heating/ventilation (69), architectural engineering technician (28), boat design (2), brickmason (1), building maintenance technician (20), cabinetmaker (5), carpenter (10), civil engineering technician (10), computer-aided drafting (96), construction technologist (7), drafting (74), electrician (29), maintenance (5), painter (1), paperhanger (1); photographer (25), surveyor (2), and welder (27), may include information on cultural resources, or, once acquired, may have application to cultural resources with additional training.

**Date:** 1993.

**Cost:** No cost for single copies.

**Available From:**

ACCSCT
750 First Street NE, Suite 905
Washington, D.C. 20002-4242
202-336-6850; Fax: 202-842-2585

**Additional Contents:** accrediting commission and staff [names, titles, telephone numbers], how to use this directory, how to choose a private career school
FOLKLIFE SOURCEBOOK, A DIRECTORY OF FOLKLIFE RESOURCES IN THE UNITED STATES

EDUCATION CONTENTS: 6 pages on Higher Education Programs in Folklore and Folklife; 14 degree granting programs; 73 programs with Minors and Concentrations.

ENTRY: Arranged alphabetically by name of University, an entry lists mailing address, contact, telephone number, degree offered in which department for those degree granting programs. Similar entry without name and telephone number for minors and concentrations.

DATE: 1994

GUIDE TO ACADEMIC GIS [GEOGRAPHIC INFORMATION SYSTEMS] PROGRAMS, 1994

compiled by John M. Morgan III.

EDUCATION CONTENTS: In production as of August 1994; should include information on GIS departments, courses offered, contact name, address, and telephone number, and the hardware and software in use at that department.

DATE: December 1994 (projected)

COST: inquire for cost and availability

AVAILABLE FROM:
Dr. John M. Morgan III
Department of Geography and Environmental Planning
Towson State University
Baltimore, MD 21204-7097
410-830-2964; Fax: 410-830-3888
EMAIL: E7G4MOR@TOE.Towson.edu
GUIDE TO ARCHITECTURE SCHOOLS

EDUCATION CONTENTS: descriptions of schools, colleges, and departments of architecture—238 pages on member schools and 23 pages on affiliate schools, 22 pages on schools of architecture worldwide.

ENTRY: Arranged alphabetically, an entry lists university name, full mailing address, telephone and fax numbers, telephone and fax for admissions committee, application deadline; tuition and fees; private, public, state, etc. financial support. Type of degree, minimum number of years for degree, accreditation, requirements for admission, number of full-time students, part-time students, percentage of applications accepted, number of students in first year of program, number of degrees conferred.

School demographics [all degree programs] include: Numbers of full-time faculty, part-time faculty, full-time students, part-time students, percentages of foreign students, out-of-state U.S. students, women students, minority students. Library telephone number, type of library, number of volumes, number of slides. Narrative information includes student opportunities and resources, special activities and programs, facilities, scholarships/aid, undergraduate program—philosophy statement and program description, graduate program—philosophy statement and program description, faculty in administration, professors, associate professors, assistant professors, part-time faculty, adjunct faculty. Often includes three small illustrations per university.

DATE: 1994. [See Accredited Programs in Architecture]

COST: $19.95 plus postage & handling ($3.00 for U.S. & Canada)

AVAILABLE FROM:

ADDITIONAL CONTENTS: architecture education—a brief history; high school preparation; selecting a school; architectural practice; accreditation; location of schools; list of ACSA affiliate members; appendix; index of degree types [45 undergraduate pre-professional, 75 undergraduate professional, 8 ASCA candidate schools, 54 graduate professional with undergraduate architecture degree, 50 graduate professional with non-architecture degree, 54 graduate non-professional architecture programs, 2 doctor of architecture programs, 15 PhD Architecture programs]; specializations within an architecture degree—architectural design (4), art (6), art history (3), building construction/ science (3), business (2), community preservation (1), computer-aided design (36), construction management (16), cultural interventions/issues (2), energy (23), environment (21), environment/behavior (2), health and hospital facilities design (5), history/theory (43), housing, (2), human factors (1), interior architecture (15), international (1), land development (1), landscape architecture (3), lighting (2), management (1), planning (3), preservation (32), professional planning and programming (1), professional practice (3), regional/cultural environment (1), representation (1), research (1), social factors (1), solar design (1), structures (3), technology (28), third world design (1), urban design (40), visual studies (2). Related degree programs—architectural design (3), architectural engineering (9), architectural history (2), architectural illustration (1), art (1), business administration (4), civil engineering (3), computer science (1), construction science/management (26), criticism (1), energy (regional design) (2), environmental design/science (4), facilities management (1), finance (1), fine arts (2), graphic design (2), heritage conservation (1), history/theory/criticism (3), housing (2), industrial design (12), interior design/architecture (25), landscape architecture (38), lighting (1), management (2), planning (42), preservation (14), product design (1), real estate development (1), technology (4), urban design (21), wood use and design (1). Scholarships; organizations in architecture and related fields; abbreviations used; index of schools.
**ADDITIONAL EDUCATION DIRECTORIES**

**GUIDE TO GRADUATE EDUCATION IN URBAN AND REGIONAL PLANNING AND RELATED FIELDS**

**EDUCATION CONTENTS:** 87 pages on Master's Programs: 75 in U.S., 12 in Canada and other countries.

**ENTRY:** arranged alphabetically ignoring "university of", an entry lists complete mailing address, telephone number, name and title of department head. Each entry provides a grid of information: number of faculty, full-time equivalent number of faculty, type of degree offered, year program was initiated, Planning Accreditation Board accredited yes or no, number of degrees granted as of 8/31/92, number of degrees granted between 9/1/90 and 8/31/91, application deadline, application fee, tuition and fees for in-state and out-of-state, financial aid [in 1991/1992], number of applications submitted for which degree program (Masters or PhD); number offered admission, number entered, mean undergraduate grade point average on a 4 point scale, number of students, whether male, female, full time, part time; for U.S. students: white, black, Native American, Asian American, Hispanic, other; and number of Foreign students. Admission requirements, minimum grade point average, whether graduate records examination (GRE) is recommended, required or not; prerequisites, formal degree requirements, program length of program/required courses, specializations available. Also provide the name, membership, title, degree, college, date, and interest or emphasis for those faculty spending 50% time or more in undergraduate Planning; lists other affiliated faculty.

**DATE:** 1992 [See Accredited University Planning Programs]

**COST:** $19.95

**AVAILABLE FROM:**

Planners Bookstore
American Planning Association
1313 East 60th St.
Chicago, IL 60637-2891
312-955-9100; Fax: 312-955-8312

**ADDITIONAL CONTENTS:** about the guide, careers in urban and regional planning, what is urban and regional planning?, What should planners know?, What do planners do? Land use planning, environmental planning, economic development planning, housing and community development, health and human services planning, policy planning and management, urban design, transportation planning, historic preservation planning, international development planning, and planning information systems. Who hires planners?, Opportunities for minorities and women in the profession, salaries of planners, choosing planning as a career, learning more about planning, choosing a graduate planning program, how to use the guide to evaluate programs: program content, program orientation, tuition level, financial aid offered, faculty and student body size, faculty qualities, student quality, alumni numbers, quality and loyalty, university qualities, geographic setting, program accreditation. Appendix A: list of Association of Collegiate Schools of Planning (ACSP) member roster; Appendix B: school faculty.
**Additional Education Directories**

**A Guide to Graduate Programs in Public History**

**Education Contents:**
106 pages on graduate programs: 54 in U.S., 3 in Canada.

**Entry:** arranged alphabetically ignoring "university of", an entry lists complete mailing address, Director name and telephone number, narrative paragraph about the type of degree, how many students are admitted, how old the program is. Curriculum: course titles, how frequently offered (e.g. annually), whether the courses and a thesis are required or not, how many course hours are needed to graduate. Internships: are they required, will the student receive credit or pay? Includes a list of recent interning institutions, admissions requirements and financial aid, placement and where recent graduates have found work. Lists Public History faculty, participating faculty, and adjunct faculty; identifies what to do to get further information (e.g. if brochures, flyers or application packets are available).

Appendix: List of Concentrations: Administration (15); Archives (34); Business (7); Editing and Publishing (14); Historical Archeology (4); Living History (1); Local/Community History (24); Media (Nonprint) (3); Museum Studies (31); Oral History (18); Policy Studies (11); Preservation/CRM (29).

**Date:** 1990

**Cost:** $8.00 members; $10.00 non-members

**Available From:**
Executive Secretariat
National Council on Public History
Indiana University / Purdue University,
Indianapolis
425 University Boulevard
Indianapolis, IN 46202

---

**Guide to Museum Studies and Training in the United States**

**Education Contents:** there are 300 entries that are cross indexed by the name of the organization under the following categories: undergraduate, certificate or graduate museum studies program, internships and fellowships, mid-career training opportunities, historic preservation, conservation training, and arts management programs. Also listed are professional museum organizations and other entities that provide training relevant to museum work.

**Entry:** arranged alphabetically by state and by city. An entry provides complete mailing address, telephone and fax numbers, date founded, and a description of the program.

**Date:** 1994

**Cost:** $10.00 for AAM members; $12.00 Nonmembers; plus shipping and handling of $4.00 in U.S./$8.00 Intl for purchase of up to $10; $6.00 in U.S./$10.00 Intl for $10.01-49.99 purchase

**Available From:**
American Association of Museums
Department 4002
Washington, D.C. 20042-4002
202-289-9127; Fax: 202-289-6578
**Guide to the History of Science**

**Education Contents:**
39 pages on institutions for graduate study: 66 in U.S., 114 in other countries.

**Entry:** complete mailing address, telephone number, fax number, electronic mail address (if available), degrees offered, a brief statement on emphases available and on special resources or projects, number of graduate students, program head, names of regular faculty and their areas of interest, names of associated faculty and professional staff, date of information for this entry.

**Date:** 1992

**Cost:** $26 paperback, $39 cloth + $2.00 shipping

**Available From:**
Journals Division
University of Chicago Press
P.O. Box 37005
Chicago, IL 60637
312-753-3347, Customer Service

**Additional Contents:** preface, the History of Science Society, statutes of the Society, directory of members institutions for research (34 in U.S., 38 in other countries), societies and organizations (58 in U.S., 131 in other countries), journals (36) and newsletters (47), indexes on: institutions, societies and organizations; members' subject interests; members' national culture interests; members' locations.

**Note:** generally speaking, the history of technology can be considered a subset of the history of science. At present, there is no separate guide to history of technology programs. Programs in history of science that focus on technology and/or engineering are more likely to have application to cultural resources.

Daniel W. Harrison
U.S. Department of the Interior
1849 E Street NW, Room 3410
Washington, D.C. 20240
202-208-5475

**Additional Contents:** One chart also identifies the following: public institution, private institution, 2 year program, 4 year program, 4 year + grad program, grad/professional program, student enrollment: 9,000+, 8,000-8,999, etc. [45 of the colleges have an enrollment of less than 1,000].
The International Directory of Training in Conservation of Cultural Property

Education Contents: 156 pages

Entry: are arranged by country and, within each country, alphabetically by name of college, university, institute, etc. Each entry provide a complete mailing address, program description, subjects included, certificate or degree granted, duration of training, admission requirements, language of instruction, financial information, additional information; name, title, telephone and fax number, and the year that information was current.

Cost: $15.00 + $3.00 for shipping and handling

Available From:
Getty Trust Publications
PO Box 2112
Santa Monica, CA 90407-2112
310-453-5352 or 800-223-3431; Fax: 310-453-7966

Additional Contents: preface, how to use the directory, subject index, country codes.

Interpretation: A Resource and Curricula Guide for the United States and Canada

Education Contents: colleges and universities with interpretive courses: 112 pages on 79 programs in U.S., 78 pages on 56 programs in Canada.

Entry: Arranged alphabetically by state or province, an entry lists type of degree [ranging from Associates to Doctorate]; indicates whether a degree, a minor, an emphasis in interpretation is offered or if only courses are offered or if an individual program can be tailored. Contact name, mailing address, telephone number. Curriculum lists information on the number of hours in which topics are required. Description of some of the interpretive facilities and equipment available for student use, as well as information about some of the interpretive sites, both on and off campus, which provide field labs and tour sites; descriptions of the interpretive courses offered.

Date: 1991

Cost: $10.00 + 3.5% sales tax for Colorado residents; price includes U.S. or Canadian postage. Other countries, indicate preference for air or surface rates; NAI will bill you.

Available From:
National Association for Interpretation
PO Box 1892
Ft. Collins, CO 80522
303-491-6434; Fax: 303-491-2255

Additional Contents: A day in the life of; [What does an interpreter do?]; Rumblings of resurgence: expanding roles and techniques in interpretation; non-university interpretive training opportunities (9 programs); references and resources for interpreters; update forms for resource and curricula guide.
**A List of Interior Design and Related Graduate Programs**

Graduate Education Network of the Interior Design Educator's Council (IDEC), 1994, 6 pages.

**Education Contents:** 6 pages in chart form on 44 programs.

**Entry:** arranged alphabetically by name of institution, an entry includes mailing address, provides information on the year program began, type of degree (e.g. M.A., M.S., M.P.S., M.F.A., etc.), which college sponsors the program, program emphasis and whether geared for post-professional or first-professional; number of credit hours needed; time needed, e.g. 4 semesters, 1 year, 2-3 years, etc.; thesis required, how many are enrolled; name of contact, department and telephone number.

**Date:** September 1994; revised annually.

**Cost:** none.

**Available From:**
Dr. Robert Meden, AIA, ASID
Chair, IDEC Graduate Education Network
Marymount University
2807 North Glebe Rd.
Arlington, VA 22207-4299
703-284-1574; Fax 703-284-3859

**Additional Contents:** addresses and telephone numbers for 4 organizations in related fields.

---

**The Murray Resource Directory to the Nation's Historically Black Colleges and Universities (HBCU)**

**Education Contents:** 232 undergraduate and graduate programs, 103 in the United States.

**Entry:** arranged alphabetically by state. An entry lists complete mailing address and telephone number, date of establishment, calendar system, whether public or private, the total enrollment broken into male/female, graduate/undergraduate, and in state/out of state, as well as cost of room and board. Succinct paragraphs describe the history and mission, curriculum (schools and available majors) and special programs, campus environment, geographical attributes, admission requirements, and financial assistance opportunities.

**Date:** 1994

**Cost:** $67.29 for individuals, $59.75 for Federal agencies and tax exempt non-profit organizations (10% discount for orders of 5 or more)

**Available From:**
L.E.D. Publications
1730 M Street
Suite 407
Washington, D.C. 20036
202-429-6920; Fax: 202-429-6075

**Additional Contents:** HBCU History; Executive Order 12856, November 1, 1993; HBCU-international, supporting organizations, Congressional support, Federal government programs, corporate programs, financial resources, appendix: scholarships and grants for minority students from the Library of Congress, Division of Science and Technology.
**National Apprenticeship Program**

**Education Contents:** National Apprenticeship Act, describes the National Apprenticeship Program, Apprenticeship, what the bureau provides, the list of apprenticeable occupations, addresses for the 10 regions [also provided in this listing], the state offices of the bureau, and the state and territorial apprenticeship agencies. The U.S. Department of Labor, Bureau of Apprenticeship and Training, in cooperation with employers, unions, private organizations, community colleges and adult education, have developed and registered apprenticeship programs throughout the United States. Contact one of the Bureau of Apprenticeship and Training Regional or State offices for further information.

Apprenticeship programs may exist in the following occupations: Boatbuilder; Bricklayer; Cabinetmaker; Carpenter; Cement Mason; Drafter, Architectural; Drafter, Mechanical; Electrician; Electrical Repairer; Electronic Technician; Glazier; Maintenance Machinist; Maintenance Mechanic; Millwright; Ornamental Ironworker; Painter; Patternmaker, Wood; Plumber; Sheet Metal worker; HVAC [heating, ventilation and air conditioning]. Note: Such programs may include information on cultural resources, or, once acquired, may have application to cultural resources with additional training.

**Date:** 1991  
**Cost:** none.

**Available from:**

Bureau of Apprenticeship and Training Regional or State offices. The following is a list of the regional offices and the states they serve.

**Bureau of Apprenticeship and Training, Region I**

Seattle, WA 98101-3212  
206-553-5286; Fax: 206-553-1689  
Serves: AK, ID, OR, WA
ADDITIONAL EDUCATION DIRECTORIES

**Peterson’s Guide to Graduate Programs in Engineering and Applied Sciences 1994**

**Note:** There are many aspects of engineering that can be applied to the preservation and understanding of historic structures and other cultural resources. Those most likely to have application are Architectural Engineering (Section 3; 6 pages, 12 programs), Civil and Environmental Engineering (Section 6; 120 pages, 505 programs) and Materials Sciences and Engineering (Section 15; 58 pages, 251 programs).

**Entry:** Program Directories, arranged alphabetically by major, provide a one-paragraph synopsis of information about a college or university. Included in this is the mailing address, degrees offered in which areas, number of faculty for both full time and part time, number of students both full time and part time and how many are women, minority or foreign, average age, number of applicants and percentage of those accepted, for 1992 how many masters and/or doctorates awarded, degree requirements, entrance requirements, application deadline, expenses including tuition and fees, financial aid, faculty research, total annual research budget, name, title and telephone number of program head. Full Descriptions are two pages of text per program and provide information in the following categories: programs of study, research facilities, financial aid, cost of study, living and housing costs, student group, location, the university, applying, correspondence and information, the faculty and their research, current research interests and, space permitting, a photograph.

**Date:** 1995 edition available November 1994

**Cost:** $34.95 + $6.75 for shipping and handling [for 1995 edition]
