Winter Activities — page 3

Winter Trails — page 4

Mushing Trails — page 5
Welcome to Denali

Let’s get outdoors and play! The Denali landscape is cloaked in a sparkling blanket of snow, creating great conditions for a variety of recreational opportunities from cross-country skiing and snowshoeing, to skijoring and dog mushing. Come experience Denali now, as we enjoy the multihued winter sky, dusky vistas, sundogs and northern lights, and you will discover why locals call winter their favorite time of the year.

The Alpenglow and the park website www.nps.gov/dena are wonderful tools for planning your winter (or summer) visit to Denali. Check out the Winter Trails section on pages 4 and 5, with expanded details for mushers and helpful trip-planning tips. We are particularly pleased with the new parking lots at park headquarters, as they now have plug-ins for vehicle heaters, which will make it easier for winter visitors to access and use the winter trails in the area. After your outdoor adventure in the often below zero temperatures, the stove in the Murie Science and Learning Center, the park’s winter visitor center, is a great spot to warm up.

Charles Sheldon, the east coast hunter-naturalist largely responsible for the establishment of the park, once said that while traveling the wilderness of Denali in winter, he felt “no cold in motion.” That’s encouraging and appropriate advice for a day out in the park during its magical season. Gear up and we’ll see you on the trail!

Paul R. Anderson, Superintendent
What to do in the Winter

Late Fall/Early Winter (mid-September to mid-October)
Depending on snowfall, the Park Road generally remains open to the Teklanika Rest Area at Mile 29, then to Savage River at Mile 15, then the gate at Savage Cabin at Mile 12.8, and finally to a gate at Park Headquarters near Mile 3. Be prepared for winter’s arrival anytime and for extreme cold after mid-October.

Winter (October through March)

View the Aurora. The Northern Lights occur when charged particles from the sun interact with a magnetic field 50 to 100 miles above the Earth’s surface. The best time to watch is from 10 pm to 2 am.

Watch for Wildlife. Although many creatures are dormant in winter, most of Denali’s resident animals remain active. Watch for tracks in snow. Moose frequent rivers and stream beds to browse willow, and Dall sheep search for food on high ridges where the wind blows away snow cover. While minimum distance restrictions still apply in winter, any distance that alters the behavior of a wild animal is too close.

Get Out and Go. Enjoy skiing, snowshoeing, snowboarding, dog mushing, and skijoring. Ranger-guided snowshoe hikes are often scheduled on weekends after the New Year. Check at the center or the park website. Snowshoes are available for visitors to borrow at the Winter Visitor Center. Snowmachines are allowed in the 1980 park additions for traditional activities such as hunting and trapping per current park regulations. Snowmachine use is not allowed in the original area of Mount McKinley National Park, which includes the Park Road. Please contact the park for more information.

Tour the Wilderness from Above. Flightseers can get a bird’s eye view of the quiet, snowy stillness of Denali in winter. From a small aircraft, visitors can take in the enormity of the remote park landscape from its gentle foothills, along meandering glaciers, up to the steep, rugged peaks of the Alaska Range. Several commercial flightseeing services based in Talkeetna, Anchorage, and Fairbanks offer winter flight tours of Denali.

Break-Up (April to mid-May)
Mushers and skijorers generally hang up the harnesses until next winter. River ice is breaking up, rendering rivers and creeks impassable, and snow can be too mushy for travel. Hikers and bicyclists can enjoy portions of the Park Road while it is being plowed in mid-March and not yet open for motor vehicle traffic. More favorable snow conditions may yet be found at higher elevations, particularly once the road opens to Savage River or Teklanika Rest Area.

Murie Science and Learning Center
Winter Visitor Center
Open 9 am to 4 pm daily, except major holidays, the center offers exhibits, bookstore items, restrooms, comfortable seating by a fireplace, and screenings of the award-winning park film, Heartbeats of Denali. Rangers can provide information about current conditions, trip planning, and interpretive activities for all ages.

The MSLC provides science-based education offerings for the public. The popular summer field seminars open for registration in early January. Register early before they fill by visiting www.murieslc.org.
Winter Trails

Front-Country Trails (Hiking/Snowshoeing): Easy to moderate wooded terrain with some hills. Packed snow with occasional drifts. Roadside, Meadow View, Rock Creek, Taiga, Horseshoe Lake, and McKinley Station trails.

Mount Healy (Hiking/Snowshoeing): Moderate on packed snow to a set of trailside benches. At higher elevations expect deep snow drifts, exposed loose rock, ice accumulation, and high winds.

Riley/Hines Creeks (Backcountry XC Skiing): Non-maintained wilderness trails. May encounter shelf ice and open water that will require route finding.

Park Road (Mushing/Snowshoeing/Hiking/Skate and Backcountry XC Skiing/Skijoring): One lane cleared to Mile 7, suitable for skate skiing. Expect to encounter dog teams. May encounter overflow ice.

Riley Creek Campground: Open, level ground and loop roads well-suited to family activities and beginner skiing.

Triple Lakes Trail (Backcountry XC Skiing/Snowshoeing): Moderate to strenuous. From the trailhead at McKinley Village, travel north across the three lakes then over the low divide to Riley Creek. Advanced skills required.

Please avoid walking or snowshoeing on ski tracks – footprints decrease grip and glide.

While one may encounter trails of previous users, no trail or creek is maintained or groomed.

For Extended Trips

- Obtain a free backcountry permit at the Winter Visitor Center.
- Consult with park rangers for an update on conditions.
- Straw is not allowed within the wilderness boundaries. Cedar chips and foam pads are acceptable.
- Dogs must always be in harness or staked out to minimize wildlife disturbance.
- All cabins are for ranger patrol use only.
- Practice standard trail etiquette when passing other teams.
- Leave No Trace: Scatter feces away from structures, camps, and water sites. Pack out all used dog bedding material.
Winter Mushing Trails

Mushing Trails

Trails within the wilderness boundary of the park are put in and maintained by dog team only. They are narrow and have potentially soft, deep snow. Trails are not marked. Be prepared and able to put in your own trail and safely navigate the terrain without a trail to guide you. You may encounter willow and alder thickets. Trail clearing or cutting is NOT allowed within the park. For additional information on rivers, overflow ice, aufeis, glaciers, and avalanches, go to www.nps.gov/dena and see the dog mushing section.

Spring Trail: Difficult to Moderate.
Steep and narrow. Winding through large trees with several stream crossings. Snow cover may not be adequate for travel until spring.

Park Road: Easy to Moderate.
Wide, open travel. Prepare for aufeis, side hilling, and windswept bare areas. West of Savage River the trail is mainly OFF the Park Road. Heavy equipment can be on the road from Miles 3-7.

Wonder Lake/Kantishna Area: Easy to Difficult.
Trail opportunities are highly varied. Please speak with a kennels staff member for details.

Windy Creek: Easy.
Cantwell entry trails are frequented by snowmachine and dog team. Beyond the Denali wilderness boundary the trail may be less traveled or nonexistent.

Riley Creek: Moderate from Park Headquarters to Riley; Expert over the pass to Windy.
Riley Creek/Park Headquarters area trails are frequented by skiers and snowshoers. Prepare for shelf ice, jumble ice, holes, and open water in the narrow Riley Canyon. Avalanche terrain.

North Boundary/Stampede Road: Easy.
Traveled, packed trail used by snowmachines and dog teams. Several side trails cross the main trail. Trapline trails exist with traps in the trail.

A new parking area located at Park Headquarters now provides easier access to winter trails including additional amenities like vehicle plug-ins.
Backcountry Planning

**Backcountry Permits** for overnight use are available at the Winter Visitor Center from 9 am to 4 pm seven days a week, excluding holidays. Backcountry permits are free and required for all overnight use.

**Leave No Trace** practices should be followed at all times within the park.

- Camp at least 100 feet from summer water sources and developed areas.
- Although winter fires (October 1 - March 31) are permitted using dead and downed wood, camp stoves are recommended as downed wood is scarce. Cutting green boughs for bedding is not allowed.
- Dispose of human waste at least 100 feet from summer water sources and developed areas. Scatter waste into available brush.
- Pack out all trash, including toilet paper.

**Safety Concerns**

**Traveling alone** increases risk. Any incident that immobilizes a solo traveler can easily become fatal. Traveling in groups is always recommended.

**Hypothermia** occurs when the body’s core temperature lowers to a critical level. Avoid hypothermia by eating high calorie foods, drinking water, and staying dry. (Symptoms: shivering, numbness, slurred speech, loss of coordination, drowsiness, and exhaustion.)

**Frostbite** occurs quickly at temperatures below freezing. Drink plenty of water and protect skin from exposure.

**Overflow, thin ice, and weak snow bridges** along waterways can cause an unexpected icy plunge. Carry dry socks, clothes, and emergency fire starter in a waterproof container.

**Overconfidence** increases risk. Be aware of the exertion required to travel in snow. Do not count on going more than a few miles each day.

**Moose** may fiercely guard winter trails. Please give moose the right-of-way.

**Avalanches** do occur. Be aware of snow conditions and know how to avoid higher danger areas. If traveling on or near steep slopes, or in gullies, carry avalanche rescue gear and know how to use it.

**What to Bring**

The level of self-reliance required of winter travelers sets Denali’s visitors apart from adventurers elsewhere. Visitors should take the cold seriously and arrive prepared with quality gear and the knowledge of how to use it.

**Clothing**
- Wind gear and neck gaiter
- Cold-weather parka with hood
- Wool/fleece pants and shirt
- Wool/fleece jacket and hat
- Balaclava or other face mask
- Wool/fleece mittens and gloves
- Long underwear
- Wool/synthetic socks (plus extras)
- Cold-weather boots and gaiters

**Camping**
- Four-season tent
- Winter sleeping bag and sleeping pad
- Stove and enough fuel to melt all your water
- Snow shovel and snow saw

**Off Trail**
- Plenty of high-calorie food
- Ski gear, snowshoes, or other travel gear
- Pack with water-resistant cover
- Map and compass
- Headlamp with extra batteries and bulb
- Water bottles and insulator
- Chemical hand warmers
- Sunscreen and sunglasses

**Emergency Items**
- Lighter, matches (waterproof container)
- First-aid kit
- Repair kit
- Avalanche beacon, probe, and shovel, if traveling on steep terrain
- Waterproof bag

**Emergencies**
- Dial 911.
- Be prepared to give your location as Denali National Park and Preserve.
- There are no phones west of Park Headquarters and cell phone service is unreliable. Notify someone of your planned itinerary and expected time of return.
- Self-reliance and ability to self-rescue are essential.
As the primary nonprofit education partner of Denali National Park and Preserve, Alaska Geographic connects people to Alaska’s magnificent wildlands through experiential education, award-winning books and maps, and by directly supporting the state’s parks, forests, and refuges. Since 1959, Alaska Geographic has donated more than $20 million to help fund educational and interpretive programs throughout Alaska’s public lands.

To find out more, become a member, or browse our selection of Alaska books, maps, and films, stop by any Alaska Geographic bookstore or visit our website at www.alaskageographic.org

Alaska Geographic also supports the education and research programs of the Murie Science and Learning Center. Located at the park entrance, the MSLC offers hands-on learning opportunities and works with the park and other partners to enhance science-based education, scientific research, and science-informed management decisions. Learn more at www.murieslc.org

The Denali Education Center partners with the National Park Service through the Murie Science and Learning Center on educational programs for adults and children. Visit www.denali.org

Doyon/ARAMARK Joint Venture is Denali’s concessioner and provides its support to many park programs and events.

The Denali Borough School District provides technical support and equipment to Denali and is a frequent partner in grant writing opportunities that make many park programs possible. Visit http://denali.ak.schoolwebpages.com

The University of Alaska partners with Denali in research and educational activities. For information visit www.uaf.edu

The National Park Foundation provides support to parks throughout the United States, including Alaska. For more information visit www.nationalparks.org

Visit the bookstore in the Winter Visitor Center to find these useful guides. In addition to books, visitors will also find maps, journals, posters, field bags, and more.

Denali National Park and Preserve
By Andromeda Romano-Lax
The lyrical writing and stunning photographs in this book reveal the timeless connections between the geological movements and the daily and seasonal movements of wildlife. $14.95

Heartbeats of Denali
Narrated by Terry Tempest Williams
View one of America’s wildest landscapes and experience nature undisturbed. DVD 28 minutes $14.95

Sled Dogs of Denali
By Karen Fortier
Experience the fascinating history of Denali’s dogs and the park’s pioneering rangers as you head out on patrol with the team in this award-winning book. $8.00

Denali Walks
By Kris Capps
A comprehensive guide to the established year-round trails in the park, from short strolls to adventurous excursions by ski or snowshoe. With full-color maps, photos, and illustrations. $6.95

Also available online at www.alaskageographic.org
Where to Stay

Riley Creek Campground, located at the park entrance, is open for primitive camping in the Bear Loop area all winter. Registration is not required. Toilets are provided and barrels are on-site to dispose of dog feces. Snow can be melted or creek water boiled for drinking. Water is also available at the Winter Visitor Center/Murie Science and Learning Center (Mile 1.3 on the Park Road). While the park still has an entrance fee, there is no charge for camping in winter.

Local Accommodations are offered year-round in Healy, 12 miles north, and Cantwell, 27 miles south of the park entrance. For more information on Healy area facilities, call the Denali Chamber of Commerce at 907 683-4636. The nearest large grocery store is in Fairbanks, but both Healy and Cantwell have small convenience markets and gas stations. There is no rental equipment available in the Denali area.

The park entrance fee and backcountry camping permits are required year-round.

How to Get Here

By Car
Take Alaska Highway 3 south from Fairbanks or north from Anchorage to the park entrance at Mile 237.

By Train
The Alaska Railroad arrives at the Denali Depot northbound on Saturdays and southbound on Sundays throughout the winter. Contact 800 544-0552 or 907 265-2494 in Anchorage, or visit www.akrr.com

By Plane
The Denali Park Airstrip is open for private, non-commercial planes on skis or wheels during the winter, although weather conditions and limited plow availability may mean that the airstrip is not plowed for wheeled landings at times. Parking is minimal. Please phone ahead to check on current conditions.

The Kantishna Airstrip at the west end of the Park Road is available for ski-equipped planes, but the strip is not maintained.
