6. Function or Use

Historic Functions: Recreation and Culture (hotel; generator house; pier)

Current Function: Recreation and Culture (employee housing; generator house; pier)

7. Description

Architectural Classification: Other: modified Swiss; modern

Materials:
- foundation: concrete block; stone pier
- walls: concrete block; log; lapped 12" siding
- roof: composition sheeting
- other: decorative verge board

Narrative Description

Piers #902 and #903, ca. 1985

Although in the approximate location of one of the two historic Two Medicine piers, Two Medicine boat concessioners report that current pier #902 was constructed ca. 1985. It is a simple "I-shaped" pier, constructed of dimensional lumber planks, bordered with a simple post-and-cord-railing, and buoyed by submerged tires. The smaller neighboring pier (#903) located adjacent to boathouse #897, is of similar construction yet does not feature a railing. It was also constructed recently.

Generator House (#1016), construction date unknown

The modern generator house is located immediately adjacent to the east shore of Two Medicine Lake, in an area partially screened by coniferous trees and shrubs. This is a small one-story concrete block building with a simple square footprint. The flat roof is constructed of poured concrete. Features are limited to a pair of double metal doors within the east elevation, a metal vent within the west elevation, and a metal flue at the north extreme of the roof.
Historically, the Two Medicine concession complex, located along the southeast shores of Two Medicine Lake with commanding views of the surrounding mountains, consisted of the Glacier Park Hotel Company’s large chalet complex, the Park Saddle Horse Company’s corral and barn, two boathouses, and two historic piers. Of these resources, only the chalet dining room (NHL #891), Chalet C (#1030), and one of the two boathouses (#897) are extant. Due to the loss of one of the primary concession components (the pack horse facilities) and to dramatic modifications to the chalet complex, the area does not meet the registration requirements established for the property type "World Class Accommodations" in the Glacier National Park Multiple Property Listing, and is not eligible to the National Register of Historic Places (NRHP) as an historic district. (The extant boathouse [#897] has been nominated to the NRHP as an individual resource.)

Piers (#902 and #903)
Historically, two piers (#902 and #903) served the Two Medicine complex, providing dock space for the cruiser Sinopah and for the small rowboats available for rent. Pier #903 was located between boathouses #896 and #897; larger pier #902 was located due west of the Two Medicine Chalets. These piers have been frequently replaced, most recently in the 1980s. The current piers are not historic, do not meet National Register criteria consideration G, and are ineligible for listing in the NRHP.

Generator House (#1016)
This building is not listed in historic maintenance files and does not appear on historic maps (the original Two Medicine generator house was located approximately 150' east of the Two Medicine dining room [#891]).

Building #1016 is not yet 50 years old and does not possess exceptional historical or architectural significance (as per National Register criteria consideration G). It is ineligible for listing in the NRHP.

Two Medicine Chalet C (#1030)
Current boat concessioner Art Burch reports that residence #1030 was constructed as part of the Glacier Park Hotel Company’s Two Medicine Chalet complex. The building conforms in location to Chalet C as presented on the NPS’s 1933 Master Plan map of the Two Medicine area; it does not conform in footprint: the original chalet was historically a small four-square building. Two large front-elevation additions have left the building with an irregular (roughly U-shaped) floorplan. These additions were constructed after 1959, when the remainder of the Two Medicine Chalets were razed, and render the building ineligible for inclusion in the National Register of Historic Places.
9. Major Bibliographic References

Previous documentation on file (NPS):
- preliminary determination of individual listing (38 CFR 67) has been requested.
- previously listed in the National Register
- previously determined eligible by the National Register
- designated a National Historic Landmark
- recorded by Historic American Buildings Survey #
- recorded by Historic American Engineering Record #

7. Narrative Description, continued

Chalet C (#1030), 1912

Building #1030 is oriented toward Two Medicine Lake, near the National Landmark Two Medicine Campstore (originally the Two Medicine Chalets dining room) and adjacent to the historic Swanson boathouse (building #897). This is a one-story log building with an irregular footprint created by shed roof extensions flanking a central gable component. The gable end of the central component extends to the front elevation of both shed-roof components, creating a covered central porch along the front (west) elevation. The roof extension is supported by extended purlins and log braces. The north shed-roof component does not run the full length of the central component, creating an irregular rear elevation. Twelve-inch lapped horizontal siding (10" to weather) covers all exterior walls. Composition sheeting covers all roof surfaces; this sheeting extends beyond the eave line and is cut in a scalloped pattern intended to resemble verge board.

Features within the center porch include a vertical board door within the south (side) elevation and a six-light casement window flanked to either side by a pair of six-light windows (front elevation). The front elevation of each shed-roof component contains a centered six-light casement window. Both side elevations contain two symmetrically placed six-light casement windows. The north-side "ell" at the junction of the shed-roof and central components also contains a single window within the north (side) elevation. Rear (east) elevation features are limited to two six-light casement windows and a vertical-plank door. The building is painted brown, with alternating white and brown window/door surrounds and decorative "gingerboard" trim. Current residents denied survey crews access to the interior; it has not been evaluated.

The two additions and the new porch, windows, and roofing material dramatically alter the building's original scale, mass, and design. The building retains little physical integrity and thus little integrity of association or feeling. The removal of much of the Two Medicine Chalet complex has also adversely affected integrity of setting.
