Chief, MAC

Report on Archeological Excavations at Grand Portage National Monument

We are enclosing a copy of Alan B. Woolworth's report entitled "Archeological Excavations at Grand Portage National Monument 1963-1964 Field Season." This report is in fulfillment of Contract No. 14-10-0232-731 issued to the Minnesota Historical Society.

    Regional Director, MWR

Excavations were conducted at this location from June 10-August 16, 1963, and June 8-July 10, 1964. Trenches five feet in width were dug around the exterior and interior perimeters of the Northwest Company depot. Testing was also done west of the depot. In 1964, tests were made north and east of the main gate of the depot. These excavations provided a sound basis for the rebuilding of the palisades and gatehouse on their original locations.

Indications of perhaps fifteen buildings were found on the palisade interior in 1963. Further excavation is needed to establish their true identities. New evidence was found on a palisade adjacent to Lake Superior which had probably been moved inward well before 1803. Two previously unknown log structures were found and excavated which were of the fur trade era.

In 1963, the reconstructed depot was mapped by a professional engineer and a permanent base point established for future archaeological work. Permanent map points were encased in concrete.

A discussion of the 1963-64 excavations and descriptions of significant artifacts are provided in the present report. A series of twenty-seven plates, thirteen figures and four large maps are provided to illustrate the textual materials.
Recommendations are made that "construction oriented" archaeology be abandoned at this site. Consideration is urged for a three year plan to excavate much of the interior of the depot. This would provide a sound basis for future reconstruction and interpretation. It would also prevent future damage to the site by modern installations.

ARCHAEOLOGICAL EXCAVATIONS AT GRAND PORTAGE NATIONAL MONUMENT

1963-1964 FIELD SEASONS

BY

Alan R. Woolworth, Chief Archaeologist

Minnesota Historical Society

December, 1969
INTRODUCTION

Purpose, Objectives and Presentation

The purpose of this report is to describe the archaeological remains, both structural and artifactual, found during the excavations in and around the reconstructed Northwest Company post at the Grand Portage National Monument in 1963 and 1964. These excavations were sponsored by the National Park Service and conducted under contract by the Minnesota Historical Society. Funds were provided by an Accelerated Public Works Program grant to the National Park Service, and in turn to the Minnesota Historical Society by Contract No. 14-10-0232-731, dated May 2, 1963.

Monthly progress reports and a summary report at the close of the 1963 field season were submitted to Regional Director Baker in accordance with the contract terms. Similar reports were submitted concerning the 1964 field season.

Objectives for excavations at this site were set forth as follows:

1. Salvage archaeology accompanying Northwest Company stockade reconstruction including a thorough excavation of supposed gate areas.

2. Exploratory testing in the area west of the Northwest Company stockade reconstruction.

4. Further exploration of area marked "D" on Woolworth's map.

5. Exploratory trenching in area marked "E" on Woolworth's map.

6. Thorough excavation of the prehistoric aboriginal site marked Area "B" on Woolworth's map.

7. Exploratory excavation of area marked "F" on Woolworth's map. In the event construction is planned here, excavations should be extended.

All of the foregoing was to be accomplished by September 15, 1963, unless the time for completion was extended by the Service in writing. Special attention was to be paid to prehistoric or early historic remains.

By the terms of this contract, the Society was committed to provide the qualified personnel and facilities to conduct the excavations, and to process and study materials and data from these excavations. Provisions were made for the preparation of a final report on this work, and the ultimate return of all artifacts to Grand Portage National Monument upon completion of the study. A stipulation was also made that the Society was required to submit a summary statement and map to the Regional Director by September 30, 1963, which would describe and locate structures predating 1850, which were found. Lastly, the Society agreed to submit to the Service on or before June 30, 1964, a detailed report of its work at this site in 1963.

After the summer of 1963 was well advanced, it became evident that the objectives set forth in this contract had
been overly ambitious and that it would be impossible to do much aside from concentrating on the perimeters of the re-
stored North West Company stockade and the area west of it. Thus, the 1963-64 excavations concentrated on these portions of the Monument. The impending plans for the restoration of the stockade demanded that primary attention be given to those areas which would be affected by such construction. This was necessary to prevent the loss of archaeological in-
formation through construction activities, and also to make new data available which would correct past reconstruction errors and provide a sound basis for the contemplated rebuilding of the entire stockade and gates leading into this important fur trade depot.

In the present report, the site is described, archaeological field work summarized, structural remains described, and an analysis of the most significant artifacts is presented. A narrative form of presentation is used, and conclusions are drawn wherever the data is adequate for such statements. Efforts have been made to provide as complete interpretations as possible. It is hoped that they will provide some further guidance to future archaeological excavations at the site, the future development of the site, and place on record pertinent data relating to both structural and artifactual remains. Enough excavation has now been done at this site to demonstrate its major attributes in many
areas. Obviously, some future excavations should be done, and these will be submitted in the Conclusions to this report.

Grand Portage was well known in its day, but as there are really no adequate written descriptions of the site, no contemporary plans, nor illustrations, the archaeological evidence must bear most of the burden of providing data for interpretative purposes.

The Site Described

Location and Topography

The following data are a condensation of a similar portion of the report on the Society's 1936-37 excavations at Grand Portage. The reconstructed North West Company post or depot is located in the Southwest 1/4 of Section 4, Township 63 North, Range 6 East, Cook County, extreme northeastern Minnesota. It is a few hundred yards south of the modern community of Grand Portage and fronting immediately on the shore of Lake Superior.

In geographical terms, the fur post is situated in the western portion of Grand Portage Bay which is one of the finest natural harbors on the northern shore of Lake Superior. The eastern portion of the bay is enclosed by Hat Point, a prominent and elevated peninsula which juts out into the lake. The western border of the bay is shaped by Raspberry or
Tamarack Point which rises only about twenty feet above the lake. In the center of the lake and about midway between these two points of land is Grand Portage Island. The arms of the bay and the island act as buffers to prevent high waves from sweeping into shore. Hence, the bay is quite sheltered and not much exposed to severe wave action. The bay is approximately 1-3/4 miles across and more than a mile in depth. (Figure 1).

The North West Company post is situated in the western portion of the bay. The shoreline in front of it is steep and rocky and about five feet above the lake elevation of 602 feet above sea level. Grand Portage Creek is immediately to the east of the post, and Mount Rose, a local landmark, rises to a height of about 920 feet above sea level to the rear of the post. The stockaded enclosure has an elevation of 608 feet in its southeastern corner and slopes gradually upward toward Mount Rose to an elevation of 626 feet in its northwestern corner. Most of the stockaded post lies between elevations of 610 to 620 feet above sea level. A relatively prominent glacial beach runs east-west through the center of the southern portion of the enclosure. The reconstructed Great Hall is on this beach which has an elevation of 614 feet.

Thus, the land surface slopes upward gently from Lake Superior toward Mount Rose. It breaks off relatively sharply

GRAND PORTAGE, MINNESOTA
SCALE: 1" = 50'
on the eastern bank of Grand Portage Creek which is only a few feet eastward of the stockade's eastern facade. Surface drainage is reasonably good within the enclosure except for its northeastern portion which lies behind the Great Hall. A thin mantle of humus mixed with sand and gravel overlies the entire enclosure. The subsoil near the lake is composed of fine beach sands for a distance, of about 150 feet northward from the lake shore. A heavy brown clay thereafter extends northward for about 100 feet across the central portion of the enclosure. About 250 feet northwards from the southwest corner of the enclosure is found a layer of slate which is close to the ground surface and extends across most of the northwestern portion of the site. Large subsurface boulders are present over the entire area of the northern portion of the enclosure. The heavy clay and slate which underlie the central and northern sections of the enclosure retain water. Consequently, the northern portion of the enclosure and the area immediately west of it are marshy in some spots and wet after rains. These geological features had an important bearing on the post and continue to do so now and will into the future.

The area in the southern portion of the enclosure and immediately to the west of it were occupied intermittently by Indians from about 1840 to 1936. Usage was also made of the region along the west bank of Grand Portage Creek for

many years by the local Indian and white populations. Lastly, the section now utilized as a parking lot, and immediately north of the enclosure was used in a similar manner for an unknown number of years by the same people.

Historical Sketch of the Site

The Grand Portage had undoubtedly been used by Indians for centuries prior to the coming of white men to the north shore of Lake Superior. The first known mention of this route dates from 1722 (Nagry, 6:51, 1886). La Verendrye landed there in the fall of 1731 and used the Grand Portage Trail, but it is doubtful if the French had an extensive establishment at this location. With the fall of New France in 1760, a new group of traders shortly began to make a more extensive utilization of the site of Grand Portage and the Trail itself.

British traders who came here about 1762 remained for many years and soon commenced the development of an extensive fur-trade depot. John Askin is the first trader about whom much is known at this location. In about 1768, he cleared a portion of the site with which we are concerned and erected a few buildings (Nute, 1940, p. 134). By 1778, a merger of competing traders had formed a concern called "The North West Company" and Grand Portage became the great entrepot for a vast region to the north and west. At about this time,
a more elaborate post was commenced at the site. Thereafter, Grand Portage grew in importance up to about 1800. It was abandoned in 1803, when the Northwest Company moved to Fort William on Canadian soil. The structures at this site in 1803 represented the accretion of many years and had most probably been erected by many traders over a span of about 30 years, and in a variety of construction styles.

During its heyday, from around 1785 to 1800, Grand Portage was the point at which all furs, all supplies, and hundreds of employees gathered for an annual rendezvous in the month of July. Its function as a depot for outgoing supplies and incoming furs led to a specialization in the functions of buildings at the site. A description dating from 1793 states that the enclosure had three gates in its palisades over which stood two guard houses. Sixteen buildings of slight construction stood within the enclosure. They were made of whip-sawn cedar and spruce boards. Their roofs were covered with cedar and pine shingles. Of these buildings, six were storehouses, one a counting house, one a mess hall, and the remaining eight were dwellings and shops. (Gates, 1933, pp. 92-94). At this time, the palisade pickets were from 15 to 20 paces from the waters of Lake Superior. Another account of Grand Portage dated 1803, mentions that "bastions" stood at the four corners of the stockade. (Quaife, War on the Detroit, 1940, pp. 10-12).
By 1822, the palisades along with the numerous structures had vanished and David Thompson found only red clover blooming where they had stood. (Smith, Lake Superior, 1944, p. 307).

In the mid-1830's the American Fur Company had a fishing station at Grand Portage which may have stood on or near the site of the reconstructed North West Company post, but as yet nothing has been found which would show this probable occupancy of the site.

**History of the Excavations in 1963-1964**

A considerable amount of correspondence took place between NPS staff members of the Midwest Region office and members of the Minnesota Historical Society staff in early 1963, relating to a large-scale excavation at the site. The most pressing priorities related to the excavation of a trench or series of squares around the exterior and interior perimeters of the reconstructed stockade. This work was necessary to check on a number of matters which had been left unresolved at the close of the 1936-37 excavations which related to the exact source of the stockade outline, and to the location of the gates leading into it.

As there were no really adequate aerial photographs of the site, plans were made to take some in hope that subsurface features, etc., would be thus revealed. Therefore,
Alan R. Woolworth and Loren C. Johnson from the Society went to Grand Portage on May 30, with M. Allan Nicholson, a professional photographer. A float plane was hired, and a number of aerial photos taken of the site.

The Archaeologist drove to Grand Portage on June 8, and began setting up field quarters. A meeting was held on Monday, June 10, with Superintendent Elliott Davis and Archaeologist Wilfred D. Logan to plan excavations and establish excavation priorities. A crew of local residents were hired on June 11, and operations commenced; they continued until August 16.

During the initial operations, a total of forty man days were spent in test excavations at a tentative well site in the southwest corner of the monument. Nothing of significance was found in this area. Base lines to control this and future excavations around the stockade enclosure were set up by June 15. From June 10, to the 20th, operations were hampered by heavy rains which made it necessary to establish an elaborate series of drainage trenches in the area west of the enclosure. Vegetation was removed from this area and around the exterior perimeter of the stockade. Bracing was also placed along many sections of the palisade to prevent their collapse while excavations were underway. Further drainage work was necessary around the northern, northeastern, and western portions of the palisade. Thus, most of the
first three weeks of the field season were devoted to survey work and work of a construction nature.

Trenches five feet in width were laid out and excavated along the exterior and interior perimeters of the stockade during the remainder of the field season. Trenches 15' in width, were laid out at intervals of fifteen feet apart, and running north-south, in the region west of the stockade enclosure. One seventy-foot section was situated from the northwestern blockhouse north of the Great Hall to the north-eastern stockade corner which abuts on Grand Portage Creek. This area was deliberately left undisturbed because of the complexity of the area, and reserved for work in 1964.

Painstaking excavations were made from the south-western corner of the restored palisade (Corner B) eastward along the lakeshore to Corner E, and for about ten feet further. Unmistakable evidences were found here of a palisade trench which continued without a break. Thus, the entire course of this portion of the palisade was revealed for the first time. Strong evidence exists to show that this trench had continued on for an indefinite distance to the east past Corner B. Hence, it is very probable that the stockade outline once extended eastward for an indefinite length toward Corner I. Beach erosion at a time when the post was occupied, must have been extensive enough to require a relocation of the palisade northwards about twenty feet.
A number of exploratory trenches were laid out to Grand Portage Creek from the eastern face of the restored palisade line which here runs roughly parallel to the creek. They served to show that the original course of the stockade here had been destroyed.

During the season's excavations, the true course of the stockade outline was definitely established except for a 70-foot section north and east of the Great Hall. Aside from this area, trenches 5' in width were excavated carefully around the entire exterior and interior perimeters of the restored stockade. Structural remains or evidences of them, were found at several locations within the stockade enclosure, and recommendations submitted for their preservation. The remains of a log cabin were found about 50-75' northwest of the restored stockade, and after initial explorations were left for further excavations in 1964.

In July of this year, a Civil Engineer was hired to make a plane table survey of the reconstructed North West Company stockade and the area immediately around it. His map compared in most details with that prepared in 1936 by S. S. Walker, and was based on permanent NPS survey markers set up in 1962, and placed in concrete in 1964.

A series of recommendations for the rebuilding of the stockade and future archaeological excavations at the site were submitted to Regional Director Baker on September 7, 1963.
The excavations in 1964 were essentially a continuation
and completion of those commenced in 1963. The field season
was begun on June 8, 1964, and concluded on July 10. As the
objectives were of a limited nature and funds were limited,
a small crew was used.

The most significant discovery of this field season
was undoubtedly the clarification of the puzzling "East Gate
area" which had remained unresolved since 1937. Excavations
made in this location in 1963 showed the remains of four
large post butts 16" in diameter. They formed a square which
was 12' on a side, and were undoubtedly the remains of a large
gatehouse which had once stood in this location. Figure 10 of
the report on the 1934-37 excavations at this site was some-
what conjectural, but now was confirmed as a valid assumption.

Excavations were also made along the entire exterior
perimeter of the palisade between Corners 9 and 10. Little of
importance was found here, though some minor corrections were
made in the original course of the palisade and marked for
reconstruction.

On the hill northwest of the reconstructed stockade,
the excavation was completed on a log structure which had
been commenced toward the close of the 1963 season. This
building probably dates from the 1780's or 1790's and served
as a trader's warehouse, as no fireplace was found. Hence,
it was most probably used only for the storage of trade goods.
and furs by an independent trader. This building measured 18.5' in width and 52' in length. A limited quantity of artifacts were found here which will aid in dating it. Its corners were marked with 5" cedar posts at the conclusion of the season.

Portions of a log cabin of the fur trade era were excavated immediately north of the reconstructed blockhouse at Corner Q. The evidence would indicate that this building predates the northeastern palisade line which runs between corners F and G. Many artifacts were found here which will aid in dating it. This unit could not be completely excavated as an AFS office trailer was located over a portion of it.

(Figure 7)

On the completion of the excavations on the cabin located north of the blockhouse at Corner Q, the excavations were closed and the project terminated.

During the 1963-64 field seasons, it was possible to completely excavate a series of trenches or squares 5 feet in width around the entire exterior and interior parameters of the reconstructed stockade. This was a considerable achievement in itself when one considers the fact that the enclosure measures 1,345 feet around its perimeter. It was also possible to find the entire course of the original stockade. Some portions of it, notably around the lake front and between Corners G and H, had not previously been determined. Also any deviations from the course were marked to guide the reconstruction work. The true situation at the "East Gate
area" at Corner 0, near the Great Hall, was finally determined and marked for reconstruction purposes. Further, a hitherto unknown log structure was found in this area. At some future date, it should be more completely delineated to cast further light on the earliest occupancy of the site, and the complex series of remains which are still not fully understood in this portion of the enclosure. Lastly, the remains of a previously unknown warehouse were found northwest of the reconstructed stockade, and completely excavated. This structure presumably belonged to a trader who operated independently of the Northwest Company.

Acknowledgements

During the 1963 field season, I was capably assisted by Loren G. Johnson, and my wife, Nancy L. Woolworth. Joan Johnson made many of the field drawings in this same season. In 1964, my wife, Nancy, continued to assist me in supervising field excavations, and record-keeping. During both years, crews of hard-working local inhabitants from the Grand Portage Reservations were engaged. Their substantial contribution toward unravelling the history of the fur-trade era at Grand Portage is gratefully acknowledged. Both excavations were of course sponsored by the National Park Service and the Minnesota Historical Society. The latter institution has made my services available to the National Park Service for
this fascinating project, and has continued to provide storage and laboratory space and many other facilities for the processing of artifacts and report preparation.

Mention must also be made of the contributions of David Beaulieu, who has assisted with artifact processing, and their description, and to Carla Lindeman who has also worked at this tedious, but essential, task. David W. Nystuen has assisted in many ways with the preparation of this report. Lastly, Loren C. Johnson, and Charles O. Dissan have both done much toward completion of the cataloging of the numerous artifacts from this site over the years. My wife, Nancy L. Woolworth, also put in long hours in the field in 1963 and 1964 working on the specimens.

ARCHAEOLOGICAL FIELD WORK

Reconnaissance of the Site in 1963

An advance party consisting of Alan H. Woolworth, Loren C. Johnson, and M. Allan Nicholson, drove to Grand Portage on May 30, 1963, to conduct an aerial reconnaissance of the reconstructed North West Company Stockade. This was done so it was my hope that aerial photography might reveal some traces of structural remains which were not visible from the ground surface. A private airplane was rented on June 1, 1963, and a flight made over the site for photography. A number of high quality photographs were made, but they did not reveal any new evidence. They are, however, a valuable record of the appearance and condition of the enclosure during the year prior to its complete reconstruction.

Surveying Methods and Excavation Controls

A major problem dating from the period of 1936-37 lay in that no permanent survey marks existed on which to base a complete mapping of the site. And it was readily evident that all or most of the survey marks from these years had vanished since that time. Fortunately, in 1962, the National Park Service had its own staff members conduct a professional survey of the monument, and they did place brass pins or steel rods in the ground to mark their 100-foot grid points.
Their markers around the perimeter of the enclosure were relocated in 1963, and utilized as a basis for a permanent grid system. (See Map A, which locates HF2, 1962 survey markers around stockade).

The base lines established for the control of archaeological work at the site in 1963 were set up as follows:

A line was drawn between 1962 HF2 points 7b and 3b with a theodolite. Point 7b is located approximately 10' south and 47' west of Corner G of the stockade, situated about 10' southeast of the Corner X of the stockade. It is at the point where the Lake shore and Grand Portage Creek merge, or on the west bank of Grand Portage creek. This line was extended westward a distance of 37' from point 7b. At this location, a steel stake was driven into the ground and encased in concrete, and marked, now 1963 0/0 Point. All subsequent measurements and grids as well as exploratory trenches were based on this permanent point.

From the 0/0 Point, a chalk line was laid out and stakes inserted into the ground at 10' intervals eastward from it to the southeast corner of the enclosure, or Corner X. The stakes in this sequence were designated 0 North/10 East and so on to 0 North/350 East which coincided with the 1962 HF2 point 3b at the mouth of Grand Portage Creek.
A similar sequence of stakes were placed into the ground northward from the 0/0 Point roughly parallel to the western wall of the enclosure to 380N/0 West. Stakes in this sequence were numbered 0 West/10 North and so on.

Similar lines of stakes were established around the entire exterior perimeter of the enclosure. A theodolite was used to "line up" all stakes as they were driven into the soil. This method of survey worked out well during the 1963 and 1964 seasons, though it was readily evident that the western wall of the stockade deviated approximately 10° from the 0 North/0 West line. Here, measurements were made eastward to the trench line being excavated along the exterior of the west wall of the enclosure, and adjustments made for this deviation. Fortunately, the other walls of the stockade were approximately parallel to these base lines with the exception of the palisades between Corners A and X.

During the course of the 1964 field season Monument personnel encased in concrete MPS base points 3b, 7b, 2b, 11b and _b. Thus, these vitally important survey markers are last of a relatively permanent nature. During the 1964 field season, excavations were made at the site of the warehouse northwest of the restored stockade. These operations were controlled by the 1963 baselines which were merely reestablished.
The work in the "East Gate area" created special problems as it was impossible to establish a line of sight from the O/O point to this area. The palisades and the Great Hall of course intervened. Controls for this work were therefore based on a line laid between the 1962 NPS point 2b and the northeastern corner of the foundation of the reconstructed blockhouse. The distance between these two points was 85'. A mapping point was set up on this line at a distance of 40' Northeast of the blockhouse corner, and a plane table used to plot in the excavations in this area.

1963 Map of the Enclosure by John Wilkinson, P. E.

At the suggestion of Superintendent Davis, a licensed surveyor, John Wilkinson, was engaged to make a modern plan of the site and the reconstructed stockade. Mr. Wilkinson based his map on the 1962 NPS Survey points which have been previously discussed, and it has served very well as a basis for depicting the excavation work done at this site in 1963 and 1964. Copies of this important map have been deposited with the Monument Superintendent and the Regional Office. Wilkinson's original notes and map are on file at the Minnesota Historical Society, in my custody. (Map 2, in pocket at end of report)

All areas to be excavated were staked out prior to excavation. First priority was given to the excavation of a continuous line of trenches which were five feet in width and ten feet in length. Such trenches of "halves of squares" were laid out around the entire exterior and interior perimeters of the enclosure. Each section thus measured 5' wide by 10' in length with the long axis being parallel to the palisades. In some instances, test pits were excavated in advance of formal excavation to study soil and moisture conditions. Bails of undisturbed soil were also left at approximately 10' intervals along the exterior of the enclosure and at approximate 20' intervals along the interior of the enclosure.

Once the staking of these trenches had been completed and the necessary test pitting done, actual excavation began with the removal of sod over the entire area to be excavated. The sod was carefully piled for relaying at the close of the field season. Thereafter the soil was removed in 6" levels with any artifacts being sacked according to their respective levels, and another level begun. When structural evidence or indications of any significant finds were made, both horizontal and profile drawings were made of the respective features. Such drawings were recorded on standard feature forms, and pertinent data noted concerning them. Field notes
and measurements were also made concerning the general course of the field work and especially important features. Many photographs were also made of the excavations as they progressed and of matters of special interest. A field map was also made of the general excavations which depicted the trenches around the exterior and interior of the enclosure and the extensive series of exploratory trenches situated west of the enclosure. (1963-1964 maps in pocket at end of report).

Extensive test trenching was done in the area lying west of the reconstructed Northwest Company post in an effort to find structural or other remains associated with the fur-trade era. A series of trenches 10" in width were laid out along a North-South axis from the base lines previously discussed. These trenches were separated by 15' intervals. Most of them were laid out northward from the 30 North stake and continued northward until structural remains were found or until the topography made it impossible to continue farther. Service roads made it necessary in a few instances to commence some trenches farther northward than the 30 North stake. In all instances, these trenches were excavated by 6" levels and artifacts segregated accordingly. These excavations were made to sterile soil in all instances and were completed mostly in the 1963 field season although a few of them were finished in 1964.
A glance at the large scale map accompanying this report will show the locations and extent of all trenches in this area. Trenches were excavated westward from Stake 0 West / 30 North as follows:

15 West; 30 West; 45 West; 60 West; 75 West; 90 West; 105 West; 120 West; 135 West; and 150 West. The location of a small service road made it necessary to commence the southern ends of trenches 165 West; 180 West; and 195 West, at more northerly points than Stake 30 West.

During the 1964 field season, major attention was given to the completion of the excavation of the log warehouse situated northwest of the reconstructed stockade, and to the completion of a few exploratory trenches in this general area.
THE ARCHAEOLOGY OF THE SITE

Southwestern Portion of the Monument

Excavations at the site commenced on June 11, 1963, with a series of test trenches which were made at the request of Superintendent Davis and Archaeologist Wilfred D. Logan in the southwestern portion of the Monument near NPS 1962 survey stakes No. B-32. This site had been selected as a possible sewerage filtration point. Although not specified in the contract, exploratory trenches totaling 368 feet in length and 30 inches in width were excavated. An additional area measuring 25 by 30 feet was also excavated. Nothing of significance was found in this region which was covered with coniferous trees and a mantle of glacial boulders. A total of forty man-days were spent on this project.

At the same time, another crew was occupied in surveying operations, in cutting a dense growth of tall grass northwest of the stockade enclosure, and in making drainage trenches in this same area. Drainage operations were of a vital nature, as the glacial beach levels in this portion of the monument held up to four inches of water which had to be drained before digging could start. A drainage tile was placed under a NPS service road and drained off a large volume of water for about two weeks.

SCALE: 1" = 50'

LAKE SUPERIOR

FIGURE 4
While waiting for this area to dry, braces were erected along the western, northern and northeastern palisades to prevent their collapse while trenches were being excavated parallel to them. Eventually braces were erected along all remaining palisades for the same reason. Snow fencing was also erected in areas where excavations were to be made to protect the public, and to prevent people from entering areas where work was in progress. Thus, most of the first three weeks of this field season were spent in surveys and work of a construction nature.

**Excavations Around the Palisade Exterior and Interior**

During late June and into July, sod was removed and trenches five feet in width and ten feet in length, were excavated along the western, northern, and northeastern exterior perimeters of the enclosure. No significant structural remains were found in these areas. Numerous artifacts were found along the southern portion of the exterior western palisade, but the vast majority of them date from around 1880 or later. Soil was removed from these trenches in 3" levels, and when water conditions permitted, this soil was screened for a complete recovery of artifacts.

Weather conditions during July and August were much more favorable, and the work of completing trenches around the stockade exterior continued. During this period, trenches

five feet in width were excavated into undisturbed soil
around most of the remainder of the enclosure, with the excep-
tion of a seventy-foot section from Corner C to Corner H.
No significant structural remains were found along the ex-
terior of the enclosure during the 1963 field season. In a
few instances, notably along the eastern palisade near Grand
Portage Creek, test trenches were excavated almost to the
creek bank. They revealed extensive filling operations which
dated from the CCC period and random deposits of materials
from about the period of World War I. These materials un-
doubtedly were left by local Indians who then lived near this
stream. A mantle of modern gravel fill was found around
the entire exterior of the enclosure; it was placed there
about 1939-40. This had been done to landscape and to cover
areas which had eroded.

Excavations from Corner C to E, Exterior of Palisade

This area extends from the Southwestern corner of the
enclosure to the Northwestern corner, and approximately from
10 East/30 North to 10 East/373 North. Generally speaking,
little of significance was found during work in this area.
Modern gravel fill was removed, and the soil beneath it was
removed in 3" levels. All artifacts found were sacked by
levels. The soil conditions varied considerably along the
course of this excavation trench. Fine sand and gravel were
found from 30 North to about 160 North; from there to about 260 North a heavy brown clay was encountered underneath a layer of sand. This held water effectively and was a considerable problem to the excavators. From 260 North to 373 North, shale was encountered at decreasing depths beneath the sod. Near 373 North it was at surface. It was merely cleaned off to be sure that it was in an undisturbed condition. At many locations along this palisade, the outline of the palisade trench could be clearly seen (Figure 5; Feature 9)

Excavations from Corner E to F, Exterior of Palisade

Native, undisturbed shale was found at a shallow depth beneath the sod at Corner E. As the excavations progressed, Northeast toward Corner F, this stone was found at increasingly greater depths. No significant structural evidence or specimens were found along the course of this trench which extended to 260 East at Corner F.

Excavations along the Palisade Exterior from Corner F to Corner G and G to H

Standard trenches, 5' wide and 10' in length were excavated along the exterior of this portion of the palisade, but nothing of significance was found until the excavations had progressed southward to 268 North. This area was still
Excavations along the Palisade Exterior from Corner X to Corner I

Excavations were begun at Corner X and carried northward. Approximately 10\(^{\circ}\) of a coarse gravel and sand fill were found at Corner I. This was obviously modern and resulted from the CCC activities for the reconstruction of the palisades ca. 1938-40. No significant structural evidence was found here despite intensive explorations. It was apparent that archaeological work here in 1936 had destroyed any remains which had once existed. Fortunately, G. Rupert Smith left notes and a map which interpret this area. These have been discussed in the report on the 1936-37 excavations at the site.

A few structural remains which probably relate to the original palisade were found as excavations progressed northward along the palisade. At 70 North/350 East, three burned beams were found which run parallel with the reconstructed palisade. Presumably, they had been associated with the original palisade. A considerable amount of modern fill consisting of gravel with random shale fragments were found all along the course of this palisade. Again, they were from landscaping activities during the late 1930's. It is
apparent that much erosion had taken place in this area since
the abandonment of the post about 1803, and that filling had
been done here when the palisades were reconstructed.

Four test trenches were excavated Northeastward from
the palisade exterior toward the banks of Grand Portage Creek
during the course of work in this area. Again, nothing of
significance was uncovered. (Figure 6) In a few locations,
minor evidences of burning were found which may have
been from the burning of the post after its abandonment by
the Northwest Company. At 180 North/350 East, minor
evidences of the original course of the palisade were found
and marked on the excavation maps, but the "jog" in the
palisade which once existed here had been destroyed by the
c. 1930 rebuilding and subsequent landscaping. This portion
of the palisade was rebuilt according to data on the S. S.
Walker Map of 1936 which is discussed in the 1936-37 site
report.

Excavations along the Palisade Exterior from Corner G to
Corner B

The Southwestern corner of the enclosure (Corner G)
was located beyond doubt at 0 North/10 East and marked with
a 4" diameter cedar post. Thereafter, a series of 10' squares
were excavated to Corner B in a painstaking manner. A well
defined trenchline was found to extend from this corner Southeastward to 0 North/70 East. Post buttes were found in Squares 0 North/20 East to 0 North/40 East. Square 0 North/40 East had been badly disturbed by modern activities such as the installation of a water line from Lake Superior, a meander corner, etc. Special care was taken while excavating across the front of the dock, but a well-defined trenchline was found here. No evidence of a gate was discovered.

From Square 0 North/70 East to Square 0 North/120 East, the trench line was more indefinite. Horizontal excavations did, however, show a dark trench fill once the overburden had been removed to a depth of about 16". The northern face of this trench was clear and distinct; the southern wall was somewhat indistinct. Therefore, a series of profile trenches were excavated on a North-South axis across the course of this trench at 10' intervals. In vertical profile, the northern face of the trench and its bottom were clearly depicted. The southern portion of the trench was lost in modern fill. Numerous artifacts were found within the trench fill during excavation. Heavy deposits of "slag" perhaps from a blacksmith shop, were found along the trench in Squares 0 North/40 East and 0 North/30 East.

This trenchline was followed to Corner B and continued onward for about 10' past this point. Shore erosion had apparently destroyed it beyond about 0 North/130 East as the
beach curves in sharply. It is quite possible that this palisade had once continued southeastward in a relatively straight line to the vicinity of Corner X, the Southeastern corner of the enclosure. (Figure 7.)

This discovery raised the distinct possibility that the palisade line from Corner A to Corner B is more recent in time than the palisade line just discussed. A further point to support this argument is the fact that the trench line from Corner A to Corner B is about two feet higher than the bottom of the trench line which extends from Corner C to Corner B.

Still another trench line was found in this area. It extends from about 16 North/120 East to 16 North/130 East. This trench may have been excavated in 1937, but it must be investigated more fully before any definite conclusions concerning it can be reached. This trench was found at the same level as the trench which ran North-South from Corner A to Corner B, so it could well be contemporaneous. It is quite possible that the original palisade was destroyed or damaged by wave action, and that the palisade was then reset about two feet further inland from the lake.

These excavations definitely located the entire extent course of the palisade line between Corners C and B, which had not previously been accomplished; disclosed the true location of Corner B, which was about 10' farther south than
hitherto imagined, and revealed the courses of two other
palisade lines which as yet are not definitely explained.
The true Corner B was marked with a ¾" cedar post to guide
future reconstruction.

Excavations along the Palisade Exterior from Corner B to
Corner A

Nothing of significance aside from a ca. 1940 log-
covered dry well stone mound was found in this area. This
feature proved to be an overflow for waste water from the
Great Hall kitchen area.

Excavations along the Palisade Exterior from Corner A to
Corner X

A few random post butts, two possible native fire pits,
and numerous artifacts were found in the course of these
excavations. It was evident that there had been some occupa-
tion and use of this area by local Indians after the
abandonment of the post ca. 1803. These remains were, how-
ever, of a casual nature and of no special significance.

Excavations along the Palisade Exterior from Corner X to
Corner B

Little structural evidence or artifacts was found in
this area aside from that which follows. From 85 to 90
North/5 East, a number of shale slabs lay along the interior face of the palisade. In the same general area, three fragmentary logs were found which lay roughly parallel to the palisade, but were from two to three feet in from it. They occurred at an average depth of one foot, and may have once been used as braces in the palisade trench or perhaps as parts of a structure. At 180 North/5 East what appeared to be a boulder wall was encountered. It ran northwards for a distance of about 100', and was two feet in width and parallel to the palisade. Minor testing was done to delimit the eastern extremity of this feature at several points, and more boulders were discovered. This may of course be a natural feature, but it should be more fully explored in the future.

From 270 to 282 North/5 East the line of boulders was replaced by a shale block area which stopped abruptly at a large boulder found at 283 North/5 East. These remains are most probably those of Structure No. 7 which is discussed in the report on the 1936-37 excavations at the site. No further structural remains were found in the course of this excavation.

Large quantities of glacial boulders were found over much of this area. At approximately 330 North/5 East, native undisturbed shale was found, and it continued to the end of this trench.
Excavations along the Palisade Interior from Corner E to Corner F

Native undisturbed shale was found near the surface at Corner E. This exposure continued to 370 North/265 East where it was supplanted by sterile clay which had many large boulders lying on top of it. Only one artifact was found in this entire trench. Obviously, it was a portion of the enclosure which was little used during the fur-trade era. A good reason for this lies in the wet nature of the soil in this section of the enclosure.

Excavations along the Palisade Interior from Corner F to Corner G

No structural remains nor artifacts were found in the area lying between these two corners until work had progressed southward to about 268 North/250 East. This area was wet and difficult to screen for artifacts. A considerable number of beads and nails were found here, indicating a possible structure site or at least human occupation of the location. An area about 10' in width was left unexcavated between the end of the palisade here, and the Northern face of the blockhouse as it was excessively damp and had been repeatedly excavated for drainage trenches, etc.
Excavations along the Palisade Interior from Corner G to Corner H

A knowledge of the complexity of the structural remains in this region precluded excavation in the short time remaining for the field season. Excavations were made, however, between the chain link fence which surrounded the propane gas tank and the inner face of the palisade to Corner H. Here, a trench 30" in width was excavated to a depth of about 2'. This entire area was remarkably sterile, and was apparently the area mentioned by Ralph D. Brown as having been screened for artifacts in 1937.

Excavations along the Palisade Interior from Corner H to Corner X

Nothing of significance was found until work had progressed to 157 North/350 East. Here, a large deposit of waste shale was found overlying modern gravel fill. This was apparently waste from the Great Wall foundation and used to level the land at this location. A possible building foundation was located at 157 North/350 East. This consisted of slate fragments and small boulders. A somewhat similar grouping of small boulders was found at 57 North/350 East. It may represent a building foundation or be natural in origin. Another jumbled line of small boulders was found at 38 to 47 North/350 East. It may also represent a building foundation or be natural. Associated with these stones were two small post butts which
were 3" in diameter. Still another grouping of small boulders was revealed at 27 North/350 East. Associated with them were three horizontal timbers which protruded from the west face of the trench and at a level with the top of the boulders. Two more timbers were found in a similar position about 5' northward. These remains should be explored more thoroughly in the future as they may well represent a structure.

Excavations along the Paliudge Interior from Corner A to Corner X

Nothing was found along the course of this exploratory trench until 30 North/160 East where two horizontal logs were found. From 30 North/165 to 170 East were found a number of slate slabs set on edge. Associated with them were a number of cast-iron stove fragments, a small iron kettle, and what may be an ice cream freezer. Obviously, these materials relate to an Indian occupation of around 1900 or later.

The remains of what may be a log cabin floor were encountered at 127 North/180-190 East. This consisted of two layers of charcoal located at 14" below the surface. It may well represent a board floor laid on timber joists. At 25 North/200 East were uncovered the remains of a stone fireplace base. This feature consisted of shale slabs laid in an arc approximately 6' across in an East-West direction and
of unknown depth. The hearth floor was of bright burned
earth, and was filled with from three to five inches of gray-
white ash which contained charcoal, bits of clay pipe stems,
and rosehead nails. The ash fill was removed for study, and
the other remains left for future excavation. This feature
was also carefully marked to preserve it with metal stakes.
There can be little question but that a cabin is associated
with this fireplace. Future excavations will reveal more of
its nature. (Plate 5A; Figure 83).

At 23 North/220 East were uncovered a possible building
location which consisted of tumbled boulders and shale blocks.
East of them was a group of three shale blocks. At 18 North/
259 East were found a few rotted logs which may be associated
with a building. From 256 East to 260 east were found two
rotted posts of modern origins which are said to mark the lo-
cation of a building fireplace. This would be the remains
of Structure No. 3, which was located in September or October,
1936. Reportedly, it is a fireplace about six feet square
and would undoubtedly have a structure associated with it.
This fireplace, however, was outside of the area to be exca-
vated, and was not located in 1963.

At 15 North/330 East was found a parallel line of
boulders which ran almost East-West. The lines were situated
2' apart, and a wooden pole was associated with them. These
remains may represent a structure site.
Limited excavations were conducted on the interior of Corner X, where the southeastern corner of the stockade is situated. Some rotten wood and stains in the soil showed that a structure or passageway had once stood here, but there was not enough time to work out these remains fully. Further, only parts of a structure would have been dealt with. A decision was made to leave this area for future and more detailed study.

**Excavations along the Palisade Interior from Corner C to Corner B**

The major discovery made in this area was the precise location of the original southeastern corner of the stockade. It was near a large post, placed as a marker in about 1937. This is Brown's Corner C. No structural evidence was found along this trench line to its end at Corner B.

**Excavations along the Palisade Interior from Corner B to Corner A**

No significant structural remains nor artifacts were found here.

**Excavations along the NPS fence west of Corner A**

For many years, a wire fence supported by metal fence posts had run westward from Corner A to the western palisade
line. Its function was to close this portion of the stockade which had never been reconstructed. At this time, this fence was removed and two large metal pipe posts set in concrete were sawed off flush with the ground. At Ranger Buckmell’s request, a test trench was started along the course of this fence. In a short time, several slate slabs were found embedded in the ground. They were photographed and left in situ as they seemed to mark a building foundation. The NFS staff was asked to leave the gate posts butts intact as serious disturbances might be made to a building site. This marked the close of excavations around the rebuilt palisades. (Plate 75).

Structural Remains Found on the Palisade Interior in 1963.

Remains which may represent 15 structure sites were found while excavating the 5' trench along the palisade interior in 1963. It was of course impossible to examine them in detail at this time. They are listed here merely to pull together information that is scattered in the immediately preceding pages of this report. It must be understood that these are merely probable locations of structures, not positive locations. They are given below:

Shale slabs at 85-90W/5E; boulders at 180W/5E; shale slabs at 270-280W/5E (Structure No. 71); shale slabs at 157W/350E; boulders at 57W/350E; boulders at 33-47W/350E; boulders
WAREHOUSE NORTHWEST OF THE NORTHWEST COMPANY POST

FIGURE 9
and timbers at 27H/35OR; timber at 27H/180-190ER; stone fireplace at 25H/200ER; boulders and shale at 23H/220ER; logs at 18H/253ER; post marking a fireplace at 18H/256-260ER, (Structure 37); boulders at 15H/330ER; wood at corner X; shale slabs along MFB fence line.

Warehouse Northwest of the Reconstructed Stockade

Toward the close of excavations in 1963, work was begun on a series of exploratory trenches in the area northwest of the reconstructed stockade and to the south of Cook County Highway No. 17. In a short time, evidences of a log structure were found at 230 North/275 West. Artifacts found in this location indicated that the building dated from the fur-trade era. Therefore, exceptional pains were taken to delimit these remains with care. The southern one-third of this building were uncovered in 1963, but with a halt to operations on August 18, 1963, the site was covered with plastic sheeting, and left for completion in 1964.

In 1964, the structure site was cleaned off, boulders hauled off the site, and the southern portion of the building cleaned down to the plastic sheeting which had been placed over it the previous year. In 1963, a considerable number of coniferous trees had been removed from the area. They had been planted there in a CCC project about 1938. Unfortunately, they were on top of our building site. After this cleaning,
the entire area was staked out on a 5' grid basis for the
precise location of structural remains and artifacts. Next,
a 5' strip was excavated around the perimeter of the struc-
ture. As some signs of flooring were found, trowels were
used to carefully uncover it.

The entire structure was excavated during the remainder
of the 1964 season. It proved to be approximately 18.5' in
width and 52' in length. Considerable amounts of flooring
were found in the southern half of the building, and some
flooring was found in one area about two-thirds of its length
from the southern end. Artifacts were found over most of the
area, but were concentrated in the southern half of the
structure. No traces of a chimney base or fireplace were
found despite a diligent search. Therefore, it seems obvious,
because of the building size and lack of heating facilities
that it was not used for living quarters except possibly
during warm spring or summer months. In all probability, it had
served as a warehouse for the storage of trade goods and furs.
Perhaps a guard was stationed there at times when consign-
ments of goods or furs were in it. A more detailed discussion
of this structure is given below. (Map 3)

This structure was situated on glacial beach level at
approximately 520 feet elevation. The site chosen for it had
a considerable change in elevation during the 52-foot length
of the building. The building was oriented approximately
North-South, and approximately parallel with the western palisade of the reconstructed post. A line level was placed on a string held by a stake at the Northeast corner of the building and run down to the Southeast corner. With the line level, a measurement of 3.48 was made at the Southeast corner, from the line to the ground. This is a considerable difference in elevation for the 52' building length. Of course this would have necessitated the building being placed on posts or piles, and these posts were found.

It is obvious that the building had been erected by setting a series of posts approximately 6" in diameter into the ground along the building's perimeter. Then, the posts would have been sawn off level with each other, and a series of sills spiked to their tops. Thereafter, the building could have been built in a conventional log cabin style of corner notched logs. It is more likely, however, that this structure was built in the familiar fur trade era style of "notched upright posts, nave horizontal timbers." Here, it is most probable that the notched upright posts were set into mortices on top of the sills which were placed onto the logs or piers.

The posts which supported the structure measured from 6" to 8" in diameter, but the majority of them were 6" in diameter. Along much of the course of the building outline, these posts were situated from 6 to 9 feet apart, but the
average distance between them was about 7'. A trench was found at the southern end of the building which measured approximately 8' in width and 19' in length. It held a series of small post butts which had served to support the southern end of the structure which was approximately 4' in height at this point, above the ground level.

A large slate outcrop projected to the surface near the southern end of the structure. One face of it had been cut off, probably with an axe, perhaps to level it in advance of construction. Hewn or sawn flooring measuring from 5" to 6" in width was found over much of the southern half of the structure. In some areas it was laid across the short axis of the building, and in others, parallel to it. This is a puzzling feature, as the entire structure must have had flooring because of its elevated height above ground. At the same time, modern building practice is to lay flooring either diagonally or at right angles to the floor joists. This is, of course, only common sense and a practical matter. The joists would, of course, have been laid across the short axis of the building. One or two stringers may well have been laid through the center of the structure and parallel to its long axis. There would have thus been a central support to keep the joists from sagging. Stringers of this nature would require supports themselves, but no evidence of posts or stones were found down the center of the structure on a North-
South axis. The remains of what may have been one floor joint were found in the southern portion of the building and ran over the large shale boulder mentioned earlier. A line of small posts were found in a shallow trench between stakes 2651/65W and 2653/70W, but their significance could not be determined. The building itself was not truly rectangular as its ends were not square, but only approximately so. Many fragments of flooring were found in the southern portion of the structure. An isolated section of it was uncovered just north of the 260 north line which ran through the center of the building. It ranged from 5" to 6" in width and was in such poor condition that no positive study could be made to show if it was beam or sawn. Generally, it was about 1" in thickness. Numerous pieces of stone were found as the excavations progressed, but they appeared to be natural in origin and not associated with the building. (Plate 8).

A close watch was kept for nails and other artifacts during the course of the excavation, and much of the fill was screened. Generally, there was not much soil in this area, and most of the building was found only a few inches beneath the soil. Rosehead nails of a variety of sizes were found over the entire area. Almost every square produced a few of them. This was to be expected as nails had been used to fasten the flooring to the joists, to hold door and window trim, and perhaps the roof. It was evident, however, that not many
nails were found in the proportions in which they were expected. The structure had burned, and it is quite possible that some materials such as sound flooring, doors, and windows had been salvaged prior to its destruction. Many of the nails had been clinched at lengths of from 2½" to 3". These had, of course, been used in window or door casings, or perhaps on partitions. The more significant objects from this structure are illustrated in Plates 21 to 23, inclusive.

A discussion of them follows:

A few random artifacts were found which related to the building. These consisted of a large steel padlock (Plate 21); a staple, a forged piece of steel with a rounded eye and a sharp point; and two pintals. They served as hinges to support either a door or window. No window glass was found here, hence the building apparently had no glazed windows or they were removed. Wooden shutters. Other artifacts, common to fur-trade sites such as seed beads, clay pipe stem fragments, gun flints, gun parts, a scissors, a jawsharp, a knife handle, a musket ball, bird shot, a cork screw, buttons, a knife handle, a key handle, buckles, and two files. These materials are all from the late 18th century and apparently British in origin. The more significant ones are illustrated in Plates 21-23. The majority of these materials came from the Southeastern portion of the building, and it is reasonable to conclude that a guard or clerk perhaps lived in this

portion of the structure or that the smaller trade goods were stored there.

At this date, no conclusions can be drawn concerning the ownership or occupancy of this building. It was, however, built on a poor site when plenty of land was available within the Northwest Company depot about 100 feet to the east. Therefore, we might assume that it had belonged to an independent trader and not someone who belonged to the great company. It was occupied for only a few years as there was no evidence of rebuilding and was then burned. Some materials such as doors, windows, shutters, and boards may have been salvaged from it as little evidence of them was found during the excavations. The artifacts all seem to be British in origin, particularly the gun flints and the brass buttons. The buttons are the best indicator of time, and they date from the period of 1760-1800. We know that British occupancy of the site was most extensive from about 1785 to 1803 and can safely assume that the building dates from this period.

Excavation of Squares A to G, Between Corners G and H

Major efforts were also made to completing the excavations on the exterior of the palisade between corners G and H. Here, a series of seven squares measuring 10' on a side, were laid out parallel to the course of the existing palisade. They were designated Squares A to G (Figure 5). A square
labeled A' was laid out immediately northwest of Square A, and two partial squares were laid out immediately north of the reconstructed blockhouse at Corner C.

These squares were excavated by 6" levels to sterile soil with the exception of Square A' and the two squares north of the blockhouse. They were excavated in 3" levels. The squares north of the blockhouse contained a dark fill with charcoal, stones, ash, and artifacts. Therefore, they were given more attention.

Little of interest was found immediately north of the palisade between Corners G and H with the exception of a dry laid stone wall which is discussed elsewhere in this report, Gate Post No. 4, which was found in Square A, and the true course of the original palisade. This highly important gate post is discussed elsewhere.

The original palisade ran parallel to and immediately adjacent of the standing palisade. It was from 20" to 30" in width and varied in depth from 35" to 39". The dark fill of this trench was unmistakable. In Squares E and F, a line of charred post butts was found which averaged 6"-8" in diameter. Slabs of local shale were jammed into the earth alongside them to act as braces. A charred horizontal log was also found adjacent to these post butts. It had served as an additional brace to hold them in the trench. At the time of the initial excavation of this area in 1936-37, Squares E and F...
had been overlain by a gravel road, and hence were not excavated. In 1964, the original palisade trench course was marked with 4" cedar posts to guide its reconstruction in 1965. (Plate 7A, Map 4).

**Building North of the Blockhouse**

While engaged in excavating along the course of the palisade north of the blockhouse, many small, beads and other artifacts were found. A detailed search here produced unmistakable evidence of a wooden structure which had once stood in this location. Unfortunately, the reconstruction of the palisade and the installation of a drain trench, plus the erection of the blockhouse, had destroyed much of this building. It was possible, however, to recover information to indicate that a log building dating from perhaps 1780 had once stood here. Due to the short length of the field season and the presence of an EPS office trailer, it was not feasible to complete excavation of this feature.

Though data were found to show that a log structure measuring at least 10' in E-W width and more than 12.5" in N-S length had existed here. At a depth of 17" below ground surface, flooring of this building was uncovered. It consisted of white cedar boards which ran in a North-South direction. They were about 6" in width, and in poor condition. The fill in this area was a mixture of dark soil, small stones,
charcoal and many artifacts, (Plate 9B) (Figure 11; Map 4). The artifacts from this structure are illustrated in Plates 24-27. The flooring was carefully covered with plastic sheeting and back-filled for its future complete excavation.

There is a strong possibility that this structure predates the erection of the northeastern palisade line which runs between Corners F and G. It may well be earlier than the gate structure also. A complex series of remains also lies north of and under the ca. 1740 blockhouse which was erroneously built to the south of this building. At some future date, the stone blockhouse foundations should be removed and a complete investigation made of this portion of the fort.

The numerous artifacts from this structure appear to be of exclusive British manufacture. Collectively, they tell much about the daily lives of those people who lived there, but are generally indistinguishable from other fur-trade-era artifacts found at the site. The buttons are the best time indicators and would suggest an occupation date of from 1765-1800. We do know, however, that the first substantial British occupation took place about 1768 with the coming of John Askin to Grand Portage. By about 1780 or 1785 there was a need to greatly enlarge the depot. Thus, there is some logic in assuming that the gatehouse was built about that date, and that the building discussed here was abandoned about that time.
Stone Wall North of the Palisade, near Corner G.

Another puzzling feature was the dry laid stone wall which was found 20" north of and parallel to the palisade immediately east of the blockhouse, in Squares A and B. On the south, it bordered the course of the original palisade trench which probably dates from about 1785. The wall itself was 12' long and 1' wide. At its eastern end, it had a right angle extension 1' in length. It was impossible to determine the original western end of it as a modern sewer and water extension from the eastern end of the Great Hall to the NPS office trailer in about 1961 had destroyed a considerable amount of archaeological evidence. A considerable amount of loose stone was found over this modern sewer line and had presumably come from a part of the wall.

In its western portion, the wall consisted of seven well-laid courses of local shale. It was 10" in height at this point. In its center, the wall was 22" in height and was formed by four courses of shale laid over large round stones. At its eastern end, there were eight well-laid courses of shale to a height of 13". (Plate 10; Map 4).

It is impossible to be precise about the age of this feature, but a few speculations may be in order. There is a possibility that it was built after the palisade was raised in the trench immediately south of it. At that date, it could have served to support a building which stood outside of the
CONJECTURAL PLAN, MAIN GATE, 1963

FIGURE 12
"East Gate"
June, 1964
Scale: $\frac{3}{10}'' = 1'0''$

Figure 13
palisade. Far more probable, however, is the possibility that this wall had been erected before the nearby palisade, and that a building which rested on it was removed when the palisade and the nearby gatehouse were built. Obviously, this wall and a structure on it would have been immediately in the path of the gateway. It will be noted that the wall runs east-west through the approximate center of the square formed by the four large posts which supported the gatehouse. In all probability, it precedes them in time.

New Evidence on the Main Gate and Gatehouse

Excavations in 1964 finally clarified the "East Gate Problem" which had existed since 1937. At that date, two large post butts had been found; they were designated Posts 1 and 2 in the report on the 1936-37 excavations. About 1940, a blockhouse was erroneously reconstructed over them and to the west for a distance of 13'. The discovery of Posts 3 and 4 in 1964 demonstrated that a gatehouse or gateway measuring 12' on a side had been erected about 1785 in this area to serve as the main gate into the depot. It had, however, been built about 12' eastward of the reconstruction.

The gatehouse posts found by Ralph D. Brown in 1937 lay under the northeast and southeast corners of the reconstructed blockhouse; they were called Posts 1 and 2. Post 3 was found 12' east of Post 2, and Post 4 was found a like
distance east of Post 1. These four posts formed a square 12' on a side. All of them averaged 15" in diameter and were sunk into the ground to a depth of about 30". Two of them had been placed in square holes and were then braced with shale and natural boulders that were tamped in around them. Post 4 had a sawn butt as did the others.

A fifth large post butt, or rather the mold in which it had once stood, was found adjacent to Post 2. It had later been removed, but the mold was unmistakable. Therefore, there is a strong possibility that the gatehouse had been rebuilt at least once in the fur trade days. Only further careful excavation will answer this question (Plate 2A, Figure 13; Map 4).

It is of considerable interest to note that both the reconstructed palisade and a trench from an earlier palisade ran across the gateway to Corner 0. This is prime evidence that the gatehouse was of a later date than the original palisade.

**Trenchline in Square A’.**

A puzzling trenchline measuring 2' in width was found running diagonally across a portion of Square A’. It was encountered at a depth of about 21" and was bordered by sterile clay. The trench itself has a dark fill and must be old. Unfortunately, its southern end has been destroyed
by a drainage trench which runs north of the blockhouse and
to the creek. In all probability, this trench was associated
with an earlier stockade which may have been built before
the massive gatehouse that is directly south of it. In the
future, efforts must be made to explain this feature and to
trace its course fully. Most probably, it relates to other
disturbed remains that are adjacent to the northern end of
the reconstructed blockhouse. Only minor excavations were
made here, but it is essential to complete them.
ARTIFACT ANALYSIS

The following descriptions are of highly selected objects found during the 1963-64 excavations at the site. They are, in a sense, supplementary to the catalogs which are a portion of this report.

Thousands of artifacts were recovered during these two seasons. It is doubtful that any spot in the enclosure south of the Great Hall is devoid of its nails, beads, or clay pipe stems. Many of these things are of a relatively recent date and were deposited by the local Chippewa Indians who have lived in this area since perhaps the early 1800's. Also, most of the artifacts could be readily duplicated from materials previously described in the 1936-37 report on this site. This portion of the report therefore deals only with items which are of more than casual significance or which came from sites of structures. Only the illustrated materials are discussed in this report.

The entries which follow provide specimen catalog numbers, an identification or description of the object, its material, shape or design, size or dimensions, decorations and marks, and some general historical notes. Measurements are given in English terms as most of these materials were undoubtedly manufactured in Great Britain or America.
Plate II. Personal Possessions.

Trade Clay Pipes and Glazed Ceramics.

A, (No. 111-5), clay pipestem fragment marked "MONTREAL."
Similar specimens were found in 1962 and date from 1850.

B, (No. 352-1), clay pipestem fragment marked "FREER / DORN."
It is of Dutch origin and dates from 1860. On the stem are a series of parallel ribbed lines.

C, (No. 49-2), clay pipe bowl fragment with the letters "TD" within a circular wreath.

D, (No. 504-2), clay pipestem fragment with a portion of the bowl. A small segment of a wreath shows and probably bore markings similar to C above.

E, (No. 437-1), clay pipestem fragment with a broad, low heel or spur which is unmarked.

F, (No. 401-2), clay pipestem fragment which bears the letters "GW."

G, (No. 389-2), clay pipestem and bowl fragment. The bowl is 1-1/2" in height and the spur bears the letters "TD."

H, (No. 349-7), clay pipestem fragment with the letters "TD" on the spur.

I, (No. 231-1), clay pipestem fragment with the letters "TD" on the spur.

J, (No. 94-1), clay pipestem and bowl fragment. It has an elaborate cross hatched design with the letters "TD."

...
within a circular frame. The letters are surrounded by a border of 14 stars. Bowl height is 1-3/8" and the spur is small.

K, (No. 616-2), clay pipe bowl with small undamaged spur. The bowl is 1-5/8" in height and the bowl diameter is 7/8".

L, (No. 46-1), portion of a clay pipe bowl with a raised median ridge. It is 1-1/2" in height and 3/4" in diameter.

M, (No. 550-2), portion of a clay pipe bowl which has a small blurred design stamped in it. Bowl diameter is 3/4".

N, (No. 275-1), small sherd of blue underglaze "china."

O, (No. 612-4), small sherd of blue underglaze "china" with a floral pattern.

P, (No. 9-5), small sherd of "china" with a leaf brown underglaze leaf pattern.

Q, (No. 615-8), one-half of an unglazed porcelain disk. It may have served as a cover for a small jar and is 1-1/2" in diameter.

R, (No. 437-8), fragment of porcelain with a blue underglaze decoration. The outside of the vessel has a floral pattern. This is most probably a part of a tea cup.

S, (No. 667-27), sherd of blue under glazed ceramics with what may be the well known "willow ware" pattern.

T, (No. 704-3), portion of a modern container bearing the letters "OXO" on a raised shield. This is a British or Canadian bullion serving container and modern.
U, (No. 194-1), rim fragment of a piece of "feather edged ware." The decoration is in blue.

V, (No. 99-1), rim sherd of white ironstone ware with a blue under glaze "flowing ribbon pattern." This piece was probably made by William Ridgway in England for the American market between 1830 and 1850.

All of the above pieces of ceramics are of a post-1800 date, and would not have been associated with the Northwest Company occupation of the site.

Plate 12. Personal Possessions.

Uniform and Shoe Buckles, Clothing

A, (No. 482-1), iron belt or strap buckle with catch. It measures 1-1/2" by 1-3/4" and has no diagnostic attributes.

B, (No. 437-5), portion of an iron uniform buckle which may date from the Revolutionary War era. A number of similar buckles are illustrated on Plate 19 of the 1936-37 report on the site and in Plate VIII, item 4, of History Written with Pick and Shovel, 1950. Here, this object is identified as a portion of a knee buckle, but almost identical ones were used to hold uniform straps, etc.

C, (No. 571-8), iron strap buckle measuring 1-3/8" by 1-1/4".

D, (No. 158-1), portion of a small copper brooch that is 7/8" by 1-1/8".
E, (No. 76-1), one-half of a light weight knee buckle made of copper which is 1-1/4" by 2".

F, (No. 123-1), small gilded buckle which is of the knee buckle size. It is 1-3/4" wide by 1-1/4" long and originally would have measured about 2-1/2" in length. This specimen bears a ribbed design of parallel lines around its interior and at the center is a rosette and scroll pattern.

d, (No. 183-3), small iron strap buckle that is 1-3/8" square.

H, (Nos. 593-4 & 5), two portions of an oval buckle that has floral decorations on its outer border and a series of parallel lines on its interior. There are also two slits in the larger portion of the object. It measured about 1-7/8" wide when complete and about 2-1/2" in length. Perhaps it served as a knee buckle.

I, (No. 437-7), two pieces of an oval brass buckle that is 2-1/2" long and 1-3/4" wide. Although the central bar is missing, it may be a small shoe buckle or a knee buckle.

J, (No. 204-4), circular brass buckle with a high arch and ornamented with a floral pattern, lines of dots on its outer and inner faces, and parallel lines on the inner portion. It would have been used as a knee buckle as it measures 1-7/8" in diameter.
K, (No. 593-3), heavy cast brass buckle with holes for insertion of a central pin for fastening a shoe tongue. It measures 1-7/8" wide by 1-7/8" long and would have once been about 3" long. There is an elaborate decoration of raised dots which form an X in each corner and "Figure Eights" around the rest of it.

L, (No. 601-5), one-half of a brass shoe buckle which is 2-1/4" long. It has a pattern of raised dots on its outer and inner perimeters and three raised lines which run along the interior. These are separated by 1/8" of space.

M, (412-1), large brass shoe buckle that is 2-1/2" wide and originally 4" long. It is plain and without any ornamentation. On the rear is a cast ridge which bears two holes that are opposite to each other and for the insertion of a fastening pin. The band of this buckle is 3/8" in width.

The specimens illustrated on this plate fall into these classes: uniform or strap buckles, knee buckles, and shoe buckles. The uniform buckles are iron and square or rectangular with rounded corners. The knee buckles are brass and oval in form. The shoe buckles are the largest and rectangular with rounded corners. Both the knee and shoe buckles are arched to fit over breeches or shoes.
Plate 13. Building Hardware—Nails,
Hinges, Lock Parts and Pintles.

A, (No. 627-3), hinge leaf that is 12" long, 1-1/4" wide at
its widest part and which tapers from 1/4" thick to 1/8" thick. A rosehead nail is still in situ in one of the
fastening holes. Three holes, spaced from 2-1/2" to 3"
apart were used to fasten the hinge to a door. They are
1/4" in diameter. One end of this object has a curved
portion for insertion of a pin or bolt, the other has a
flattened portion.

B, (No. 54-2), iron spike 3-3/8" long with a square head 5/8"
on a side, and a shank that is rectangular. This large
chisel-pointed spike may have been used in fastening
timbers together or in a boat.

C, (No. 282-1), iron door key with a rounded shank and two
slots in the blade. It is 2-3/4" long though the loop
is broken. The blade is 3/8" by 7/8".

D, (No. 330-2), iron spike with a large, square head, rec-
tangular shank and chisel point. It is 3-1/4" long, has
a head that is 1" square and is 1/4" by 1/2" in cross
section. Similar to B above.

E, (No. 305-1), door lock bolt that is 2-1/2" by 3/4", and
relatively modern in appearance.

F, (No. 348-2) wrought iron staple which is 1" across the
head and has legs 2" long.
Q, (No. 432-1), ornamental iron hinge part with two crescent shaped tails. An eye 1/4" in diameter is at one end. This hinge is 3-1/2" long and 4" wide at its widest portion. It was apparently never used as there are no nail or screw holes in it. Such a hinge would have been used on a small shutter or perhaps a cupboard door.

H, (No. 90-1), hand-forged latch staple catch that measures 3" long by 1-1/2" wide, and 1/4" thick. Such an item would have been driven into a door casing to serve as a catch for a latch bar.

I, (No. 86-2), small pintle with rounded bar for suspension of a door or shutter. It is 3-1/2" long, has an arm or bar 1-1/4" high, and 3/8" in diameter.

J, (No. 173-3), small pintle much similar to I above. It is 2-3/4" long by 2-1/3" high, and apparently was never used as the bearing surface has never been filed down to a smooth face.

K, (No. 568-1), hinge leaf 8" long and 1-3/4" wide. It has four fastening holes which are 1/4" in diameter. They are spaced 2" apart. A rounded portion 1/4" in diameter provided a space for a pin or bolt around which the hinge could revolve. This hinge leaf would have been too light for a large door and most probably was used on a closet.
All of the artifacts illustrated on this plate with the exception of E, are of the fur trade era.

Plate 14. Tools, Files, Chisels, Hammer and Hardy.

A, (No. 106-1), half round file with rat tail tang. It is 4-1/2" long and 13/16" wide. The maker's name, "HIM-ILL-" cannot be deciphered. Preceding this lettering is a dagger or fleur de lis design. This file has fine, regular teeth and is machine-made. It would have been used for gun-smithing or other delicate work.

B, (No. 94-8), modified triangular file that has flattened ends. It is 4-1/4" long and 7/16" across each face. It has regular, machine-cut teeth and would have been used for sharpening saws or fine metal work.

C, (No. 659-3), fragment of a flat bastard file. It is 4-1/2" long, 11/16" wide and 5/32" thick. The narrower end has been hammered flat to a chisel point. Apparently this piece of steel had been reworked partially into a chisel.

D, (No. 532-7), broken half round rasp with raised teeth. It is a wood rasp and measures 4-1/4" long by 13/16" wide and is 1/4" thick.

E, (No. 29-1), broken coarse mill bastard file that is 4-3/4" long and 7/8" wide by 1/4" thick.

F, (No. 564-5), triangular file measuring 6" long and 5/32" wide. It has fine, regular teeth and was used for saw sharpening or delicate metal work.
G, (No. 607-7), a section of channel gouge steel that is 5" long and 3/4" wide. One end is battered from hammering while the other is broken. It may have well been a gouge for woodworking.

H, (432-1), a light-weight quarter round gouge with tang. It is 4-5/8" long and 3/4" wide. The tang end is bent over for fitting into a handle and the other end is broken.

I, (No. 318-1), hand-forged rocker that is 2-1/4" long and 1-1/4" wide. It bears a series of nine teeth on its working face. The other end has a tang for attachment to a handle. This tool would have been used for incising indentations into soft metals such as brass or copper and perhaps into leather.

J, (No. 358-3), broken iron wedge. This tool is 5" long and 2-3/16" wide at its widest portion. The broken shank is roughly square and 1/2" on a side. Use of this object is problematical. It may have been used for splitting wood as a wedge, but is light weight for use on metal. Similar tools are sold today for dressing brick and soft stone.

K, (No. 660-1), fragment of a triangular file that has coarse teeth of the bastard form. It is 3" long and 5/8" on a face.

L, (No. 41-4), small blacksmith's hammer which is 4-1/4" long and 1-1/8" by 1-1/4". This hammer has a square head, but
on the opposite end is a prow of tapered form. The handle socket is rectangular and measures 1" by 1/2". A small piece of the handle had been preserved by rust and a wedge-shaped piece of steel had been driven into the handle to fasten it firmly into the socket. Such a hammer no doubt served for many uses around a blacksmith shop, but it may not date from the fur trade era.

K, (No. 643-1), blacksmith's anvil hardy. It is a wedge-shaped, with a square shank and measures 3-1/2" in overall length. The wedge is 1-7/8" long by 1-1/4" wide. The shank is 1-5/8" long and 7/8" on a side. This specimen is relatively modern.

Plate 15. Miscellaneous Metal Objects

I, (No. 236-4), perforated copper disk that is 1/2" in diameter, and 1/16" thick. The perforation was made with a punch and is 1/4" in diameter. Use is unknown though it could have served as part of a necklace or a washer.

II, (No. 236-2), portion of a lead bale seal that is 7/8" in diameter. A large perforation in its center has destroyed many stamped letters. The letters, "LON . . ." are yet visible and probably once spelled, "LONDON." Such seals were used to secure bales against pilfering and provided the manufacturer's stamp.
C, (No. 578-18), lead disk that is circular in form and 5/8" in diameter by 1/32" thick.

D, (No. 168-2), copper keyhole escutcheon plate made from a fragment of kettle copper. It is 1" by 1-3/4" and crudely made. Two holes served to tack it to a door, cupboard, or chest.

E, (No. 710-10), kettle chain made of five "dog bone" shaped links. Link dimensions vary, but most of them are about 5" long and 1" wide at the loop ends. The individual links were made from square bar stock about 1/4" on a side. Chains of this type were used to suspend kettles over fires and could be raised or lowered by fastening the links together.

F, (No. 674-2), double end offset awl that is 9" long and has a shank with a square form that is 1/4" on a side. Such an awl was used in the manufacture of canoes to punch holes in the birch bark for lashings.

G, (No. 407-2), "dog bone" shaped piece of brass with four staggered lines of machine-punched holes. It is 3-1/2" long and 7/16" wide. The general outlines of this object is that of a capital letter "I." Its use is problematical though it could have been decorative or for attachment to a uniform hat. It could also have been a spice grater as the perforations on the rear are raised as in a grater.
H, (No. 260-6), steel sail maker's or sacking needle. It is 3-3/8" long and has a square shank that is 1/8" on a side. One end bears an eye; \\

I, (No. 248-2), double end offset awl that is 3-3/4" in length. Such awls were common trade items and were used for punching holes in leather, etc.

K, (No. 425-3), broken iron kettle or dipper hook that is 2-5/8" long and has a loop 1-1/4" in diameter. This piece is hand-made and could well date from the fur trade era.

Plate 16. Miscellaneous Metal Objects

A, (No. 546-5), light iron fish or frog spear that is 3/16" in diameter and 5" long. It is made from round steel wire and is pointed with two barbs which are on opposite sides of the object.

B, (No. 166-3) broken fire steel which is 1" wide by 1-3/4" high and 3/16" thick. At one end is a small loop which may have been merely ornamental or perhaps for suspension.
4. (No. 532-6), broken oval fire steel that is 2-3/8" long by 1-1/4" wide.

D, (No. 710-9), iron ball clapper that is 3-3/8" long and with a clapper that is 5/5" in diameter. It would have fitted a small hand bell.

E, (No. 199-10), a broken "D" shaped fire steel which is 3-1/4" long, 1-1/2" across the loop, 9/16" wide on the striking edge, and 1/8" thick.

F, (No. 126-1), a broken "O" shaped fire steel that is 3-1/4" long, 1-1/2" wide, and 7/16" across the striking edge. The thickness of the iron is 3/16".

G, (No. 178-2), large iron fishhook that is 8-1/2" long and made of round wire 3/16" in diameter. One barb is at the end. It is hand made.

H, (No. 4-1), ice creaper which is 5-1/4" long, 1-7/16" wide and 1/4" thick. Such items were of great utility around fur posts for walking on ice in the winter months.

I, (54-5), home-made net sinker made from heavy sheet lead. It is 3-3/8" long, 5/8" in diameter, and has an attachment hole that is 1/8" in diameter. This item is probably of no great antiquity.

J, (No. 6-1), large iron fish or muskrat spear. It is 13" long, and made of round bar stock that is 7/16" in diameter. There are opposing barbs near the end and a bent hook for attachment to a shaft on the opposite end.
K, (No. 448-1), broken trap spring that is 6-1/2" long, 1-9/16" wide, and 3/16" thick. Traps were common around fur posts, but this one may date from the post-1800 Indian occupation of the site.

Plate 17. Cutlery, Knife Handles, Razor, and Knife Blades

A, (No. 219-3), ornamental open work brass knife handle. It measures 5/8" in width and 2-1/4" in length.

B, (No. 549-39), portion of an ornamental open work brass knife handle. It is 1-1/8" long and 1/2" wide. On this specimen a part which may be the rounded butt is present. Plate 32 of the 1936-37 report on excavations at Grand Portage shows a knife handle that is almost identical to items A and B above.

C, (No. 384-13), bone handled pocket knife of modern origins. It is 2-3/4" long and 7/16" on a side.

D, (No. 249-2), small hand-forged knife blade or razor. It is 4" long and 5/8" wide at its widest portion. A curved tail for fastening is present at one end. This blade has a triangular cross-section and may have been used as a razor.

E, (No. 535-1), bone knife handle measuring 3-1/8" long and 3/4" wide. It has cross-checking and two small holes for attachment to the blade and other half of the handle.
F, (No. 215-1), iron jack knife or pocket knife handle. It is 4" long and 5/8" wide by 1/4" thick.

G, (No. 356-2), symmetrical table knife blade that is 6" long and 3/4" wide. Only one face is sharpened. The other is dull. A forged bolster is present at the handle end.

H, (No. 585-1), clasp knife blade that is 5-1/8" long and 15/16" wide. Blades of this type are thought to be of French origin and are illustrated on p. 106 of Excavation at Fort Michilimackinac, Mackinac City, Michigan, 1959 Season, 1961.

I, (No. 158-4), knife blade, blade made of a portion of a barrel hoop. It is 7-3/4" long, 1" wide and bears a series of rip saw teeth marks on the cutting face. Presumably, the knife was homemade and then converted to a crude saw.

J, (No. 526-3), knife blade measuring 8-3/4" long by 1-3/8" wide. It has three holes for attachment of a handle.

Plate 18. Container Parts, Kettle Lugs

A, (No. 32-2), copper kettle lug or "ear" made of a piece of metal which is turned over and crimped. The corners are rounded for strength and to prevent cuts to users. Two rivets hold the lug to a rolled kettle rim. Such lugs were found on late 18th century kettles recovered during the Society's Underwater Search Program. The hole
punched through the lug for attachment of a handle is 1/2" in diameter.

B, (No. 217-2), kettle cover lifting device. It consists of a ring that is 1-3/4" in diameter and a "dog bone" shaped fastener. The latter is attached by two rivets to a piece of the kettle cover. It would date from the late 18th century well into the 19th century. The dog bone is 1" by 1-7/8".

C, (No. 50-2), cast iron kettle lug measuring 2-7/16" wide by 2-3/16" high. The hole for the handle is 3/8" in diameter.

D, (No. 433-1), modern stamped steel kettle lug. It is 1-7/8" wide by 2-3/8" high. There are 3 holes in it. The hole for attachment of a handle is 5/16" in diameter, and the two rivet holes for attachment to the kettle are 3/16" in diameter. Lugs of this nature are illustrated in a St. Paul hardware catalog dating from 1892.

E, (No. 309-6), relatively modern kettle or pail ear made of cast iron that is 2-1/4" high by 2-1/4" wide. It is shaped to provide an offset so that the lug is offset a distance of 1" from the container wall.

F, (No. 692-3), elaborate hand-made kettle lug or ear. It is of iron and 2-1/4" wide by 2-1/2" high. An offset of about 3/8" sets the lug out from the container wall. This specimen is probably quite old and from the fur trade era.
G, (No. 572-2), cast copper kettle lug that has a flat lunate or hemispherical-shaped section with three rivets for attachment to a kettle rim. A disc-shaped pivot projects outward from this basal portion. It is 1/2" in diameter and projects outward for a distance of 1/2" from the basal segment. A rounded washer is formed over the projection's shaft to hold in place a kettle handle. It is 1" in diameter and peened down over the projection.

Lastly, a portion of an iron handle is rusted on the circular shaft. This well made object dates from the fur trade era.

H, (No. 424-1), cast copper kettle lug which has the form of a rectangle, but with beveled corners. It is 1" high by 2-3/4" long and has a centrally located shaft that is 3/8" in diameter and which projects outward a distance of 1/2". This item is functionally much similar to G above, but lacks a peened rivet over its shaft end to hold on a handle.

I, (No. 425-1), cast copper kettle lug much similar to H above. It is 2-1/2" long by 1" high and has rounded ends, and also lacks the washer to fasten the handle.

J, (No. 425-2), hand-made iron kettle lug. It has a loop which forms a slot to hold a kettle handle and measures 1-5/8" by 2-1/2".
K, (No. 671-4), rectangular iron kettle lug with a tail. It is 1-3/8" by 2-1/2" and at one time the tail had a rivet hole at one end of it. The lug itself has two rivet holes in its body for attachment to a kettle.

L, (No. 121-1), a heavy cast iron kettle lug with welded tail. It measures 1-3/4" by 2-3/4" and is 1/4" thick. The tail is 2-1/2" long, and was not riveted to the kettle wall. It has two rivet holes 3/8" in diameter for fastening to the kettle.

M, (No. 526-1), cast copper kettle lug of lunate form which is similar to G above. It is 1-5/8" wide by 2-7/8" long, was fastened to the kettle with 3 rivets and has a central shaft around which the kettle handle revolved. The shaft lacks a washer.

N, (No. 32-1), cast copper kettle lug which formerly had a tail attached to it. This object has rounded sides and is 1-7/8" high by 2-5/16" wide. It has two rivets still fastening it to a portion of a kettle wall.

Plate 12. Trade Goods, Beads, Rings, Cross Fragments and Jay's Harp.

A, (No. 262-1), two amber faceted beads that are 3/16" by 7/32", 1 green faceted bead measuring 3/16" by 3/15", 1 dark blue faceted bead that is 5/32" by 1/4", 1 black flat bead of hexagonal form which is laterally pierced
with two sets of holes, 1 hexagonal gold metallic appearing bead 5/16" by 3/32", 1 translucent blue cane bead of 1/4" in diameter and 5/8" long, 1 pear shaped bead of frosted glass is 3/8" by 5/32", 1 globular bead 3/16" by 7/32", 1 tear drop shaped bead 1/2" by 7/32", 1 wire wound white barrel bead 1/4" by 5/32", and 3 small green seed beads. All of the above beads are from the Victorian era with the possible exception of the barrel bead.

B, (No.556-1), 3 small cane beads, 18 turquoise seed beads, 6 white seed beads with red and green stripes, 5 red seed beads, and 1 black cane bead.

C, (No. 134-1), 2 white cane beads 1/4" by 5/32", 4 black cane beads 5/32" by 1/8", 2 translucent blue cane beads 1/8" by 1/8", 22 white globular opaque beads of seed bead size, 14 blue seed beads, 8 blue-green seed beads, 23 red seed beads, and one barrel bead of white color with green inserts. It is 3/8" long by 1/4" in diameter.

D, (No. 389-1), 2 white seed beads, 1 green seed bead.

E, (No. 556-1), 27 white cane beads which range from 1/4" to 1/8" long and average 1/8" in diameter, 3 translucent blue cane beads 1/8" by 3/16", 13 white globular beads 1/8" by 1/8", 3 white opaque barrel beads 5/16" by 3/16", 1 white opaque globular bead which is 3/16" on a side, 5 globular blue-green beads 3/32" on a side, and 1 opaque
Yellow ceramic bead with a sprigged green design on it. It is round and 3/8" in diameter.

F, (No. 401-1), white opaque globular bead with a blue glass spiral inlay on it. It is 3/8" in diameter.

G, (No. 20-4), a brown glass bead with rounded ends and a yellow zig-zag inlay over it. It is 1/4" in diameter.

H, (No. 401-7), brown glass cane bead with a lavender core. It is 1/4" in diameter and 13/16" long.

I, (No. 69-2), turquoise colored barrel bead 3/16" diameter by 3/8" long.

J, (No. 403-4), copper two shell bell that is 7/16" in diameter and 7/16" in height. It has a round loop for attachment.

K, (No. 408-2), copper bell 1/2" in diameter by 5/16" in height. It has a round loop for attachment.

L, (No. 172-2), 7/16" in diameter by 5/16" in height. It has a rounded loop for attachment and a clapper still in it.

M, (No. 654-1), clear glass barrel-shaped bead with an inlaid floral design of red, white, blue, and yellow. It measures 1/2" in diameter by 27/32" in length.

N, (No. 527-2), oval ring bezel that is 11/16" wide by 7/8". It is made of copper and once held a glass or stone set.

O, (No. 191-6), brass trade ring with a green glass set which is bordered by 2 smaller blue glass sets. The central green set is faceted and the ring is 9/16" in diameter.
P, (No. 561-4), brass trade ring with a clear glass faceted central set and 2 smaller blue glass sets on each side of it. The ring is 9/16" in diameter.

Q, (No. 578-14), brass trade ring with green glass center set and 2 small blue sets. The ring is 9/16" in diameter.

R, (No. 127-4), top half of a brass jeweled cross pendant. A square clear glass set is in the center and round unfaceted clear glass sets are present on each arm of the cross. A loop is on the back for suspension, and it is 1" wide by 7/8" high.

S, (No. 301-2), a cast brass cross identical with R, above.

T, (No. 262-2), small cast lead cross that is 1" in height, 1/2" across and 1/8" thick.

U, (No. 403-3), triangular silver pendant that is 3/4" on a side. Thickness is 1/64" and a suspension ring is at the top.

V, (No. 581-2), cast iron jew's harp that is 2-5/8" long and 1-1/8" wide. The blade is missing.

W, (No. 578-15), cast brass jew's harp which is broken at the ends. It is 1-3/4" long and 1-1/8" wide. The tongue or blade is missing.

X, (No. 219-9), leather washer 1-3/8" in diameter and 1/8" thick.
Plate 20. Firearms Components, Gun Flints, Springs, Sears, Plates and Balls

A (No. 261-8a), honey-colored gun flint that is 1-1/16" high and 1-3/16" wide. Thickness is 3/16". This flint is of a British form in that it is rectangular and without the rounded heel, but the flint is supposedly of French origin.

B, (No. 215-13), beeswax brown rectangular gun flint that measures 1-1/2" wide and 1-1/16" high. It is 5/16" thick, and is of British form with a prism-shaped cross section.

C, (No. 192-2), dark grey or black British gun flint which is 13/16" wide and 1-1/8" high and 1/4" thick.

D, (No. 234-6), honey-colored gun flint that is 1" wide and 1-5/16" high and 5/16" thick. It has the form and color of French gun flints and also has the rounded heel characteristic of flints from this country.

E, (No. 654-2), small black flint gun spell that is 3/4" on a side and 1/4" thick. Its small size would indicate that it had been used in a pistol. It is British in form and color.

F, (No. 607-6), flint lock frizzen spring that is 1-7/8" long and 3/4" wide with a leaf width of 7/16".

G, (No. 385-1), tumbler bridle from a flintlock. It is 1-3/16" long by 7/8" wide.
H, (No. 301-1), tumbler bridle from a flintlock. It measures
1" across in each direction.
I, (No. 26-2), lead ball that is .53 in diameter.
J, (No. 374-1), flintlock mainspring. It is 3-3/16" long
and the leaves are 1/2" in width.
K, (No. 416-3), flintlock mainspring that measures 3-3/16"
long and has leaves that are 1/2" wide at their widest
portion.
L, (No. 217-1), lead ball that is .50 in diameter.
M, (No. 173-1), broken brass side plate from a flintlock
musket which is engraved with a stand of arms. A much
similar side plate is illustrated as Item f, Plate VI,
of Excavation at Fort Michilimackinac Mackinac City,
N, (No. 37-1), head end of a brass serpent or dragon side
plate that once was used on a flintlock musket. It is
1-5/8" long and 1/2" wide. On the rear are the Roman
Numerals, "XXXI."
O, (No. 453-1), fragment of a brass serpent side plate that
is 1-3/4" long and 15/16" across the large loop.
P, (No. 234-7), lead ball that is .58 in diameter.
Q, (No. 405-3), flintlock cock that is missing the jaws and
locking screw. It is 3-3/8" long and 1-3/8" across the
rounded end.
R, (No. 238-2), upper jaw from a flintlock cock. It measures
1" by 1-1/8".
S, (No. 173-5), iron cork screw or gun worm that is 2" long and 3/8" in diameter.

T, (No. 202-6), trigger from a flintlock gun that is 1-13/16" long by 1-3/8" wide.

U, (No. 234-7), lead ball that is .49 in diameter.

V, (No. 305-2), flintlock cock screw that was used to hold the jaws of the vise over a gun flint. It is 1-1/2" long and 3/8" in diameter at its largest end.

W, (No. 335-1), sear from a flintlock gun. Each arm is 1-1/8" long.

X, (No. 63-2), frizzen from a flintlock gun. It is 1-7/8" long by 7/8" wide.

Y, (No. 564-1), lead ball that is .55 in diameter.

Z, (No. 550-49), lead ball that is .54 in diameter.

AA, (No. 127-1), breech tang from a trade or military flintlock gun. It is 2-1/2" long with a tang of 5/8" width and a rounded portion that is 1-3/8" in diameter. A rectangular slot 3/8" by 5/8" is present in the center of the rounded portion.

BB, (No. 548-9), musket barrel section that is 3" long and 3/4" in diameter. The inside bore diameter measures .55 and would have taken a lead ball of a slightly smaller diameter.
Plates 21. Miscellaneous Metal Objects,
from Warehouse Northwest of Stockade

A, (No. 649), hand-forged rectangular staple that is 2-3/8" long, 2-1/8" wide, and 3/8" in width on its arms. It shows signs of having been hammered into wood and may have served as a door catch or on a chest.

B, (No. 702), iron ring which is 2" in outside diameter, has walls 3/16" thick, and is 7/16" in width. Rings of this nature were often used around wooden handles on chisels to keep them from splitting.

C, (No. 878), hand forged "nail eye" that is 3-3/8" long with a sharp point. It may have been used as a bolt keeper on a door or closet.

D, (No. 955), hand-forged pintle with a tapering shank. It is 4-3/4" long and served as a hinge for a small door. The upright portion of it is rounded. The lower portion shows signs of slight wear.

E, (No. 701), half of a small hinge that measures 2-7/8" in length and 1" in width at its widest portion. A hinge of this type would have been used on a small cupboard or chest.

F, (No. 848), small pintle that is 1-7/8" in height and 2-1/8" long. It has a rounded upper portion and a tapered and pointed lower portion. Undoubtedly it was used to support a small cupboard, closet, or shutter door.
0, (No. 671), a piece of wrought iron bar stock which is rectangular in cross section. It was forged into the form of a right angle and measures 5/8" wide, 7/16" thick, and 4-1/2" in length. One end is flattened and may have once been pointed. The function of this item is an open question. It may have been used as a door stop, or to retain a massive door bolt.

H, (No. 671), small pintle that is 2-3/4" long and 1-1/4" in height. It has a rounded upper portion, but is broken at the opposite end where a point once existed. Its usage is identical to F above.

I, (No. 724), heavy iron pin which is 6-3/8" long and 11/16" in diameter. It bears an eye at one end which is 1-1/2" in outside diameter. Pins of this nature were used with wagons, and shackles in logging operations. Its use during the fur trade era is questionable.

J, (No. 638), iron ring which measures 2-3/4" by 2-1/4" and had a wall 3/16" thick and 3/4" in height. Its use is similar to item B above.

K, large hand made steel padlock. It bears no maker's marks, but was obviously made by a professional lock maker. The general form is heart-shaped with a heavy arched loop which slipped through a hasp to lock a door. It is made of two identical sheets of steel which were riveted together over a rounded piece of steel which is 1" in
width. A key hole cover plate is riveted to pivot over the key hole. Measurements are: Width, 3-1/2", height, 4-3/4", and thickness 1-1/8". The age of this specimen is a question, but as it is entirely handmade, it could date from the fur trade period.

**Plate 22. Miscellaneous Metal Objects.**

*From Warehouse Northwest of Stockade*

A-E (Nos. 714 & 843), are rosehead nails of different sizes. Such nails were of course hand-made and varied considerabY. They are, however, characteristic of the fur trade era, as cut nails made from sheet iron were manufactured shortly after 1800 A.D.

F, (No. 759), is called a "nail blank" for want of a better term, but it could have well been used in soft woods or even perhaps to shoe an ox. It also resembles "boat nails" which were used in such vessels.

G, large rose head nail which had been clinched, perhaps in a door casing.

H, (No. 868), hand-made portion of a kettle handle or bale.

I, (No. 915), portion of a large triangular file that measures 1/2" in width on each face and is 4" long. The teeth on this specimen are regular, and may have been machine-made. This file was broken and then its and modified by heating and hammering into a square cross
section. It was also twisted when heated. Perhaps this was to modify it into another type of tool. Files of this nature were used in metal working, and perhaps gun-smithing.

J, (No. 901), metal corkscrew of an elaborate form that is 4-1/8" long.

L, (No. 893), portion of a bone knife handle that is 2-7/8" in length. Three rivets are visible on it.

L, (No. 804), broken metal file. It is 1/2" long and 7/8" wide at its widest portion. Such files were of course invaluable on the frontier and were used for a wide variety of metal working.

M, (No. 731), steel knife blade, 8-1/4" long, and 1-1/8" wide. It is almost complete and lacks only a small portion at its handle end. This specimen is typical of the type of common, multi-purpose knife used during the late 18th century. Similar ones were found during the 1936-37 excavations at Grand Portage.

N, (No. 643), pair of scissors probably used for light sewing. They are very well made and ornamented, and may date as late as the 1860's. They are 4-1/4" long.

O, (No. 905), cow bell made of thin sheet metal which measures 3-3/4" by 4-1/2". This object may date from the late 1800's as it seems to be of quite a modern type.
Plate 23. Miscellaneous Materials.
From Warehouse Northwest of Stockade

A, (No. 922), one black barrel bead 1/4" long, one white barrel bead, 1/4" long, and one white cane bead, 3/16" long. All three beads are opaque.

B, (No. 711), one white seed bead, one white barrel bead, and one white cane bead, 3/4" long and 1/4" in diameter.

C, (No. 922), one dark blue translucent barrel bead 3/8" long and 1/4" in diameter.

D, (No. 829), six white seed beads, 1 dark green barrel bead 3/8" long and 3/16" in diameter, and 1 white barrel bead 1/4" long. All are opaque.

E, (No. 729), miscellaneous seed beads. Twenty-one are white, and nine are blue.

F, (No. 663), copper loop from a key handle. It is 1-7/16" long by 7/8" wide.

G, (No. 875), pasteware rim from a cup or saucer with a floral under glaze design.

H, (No. 925), clay "tear drop" shaped bead. No doubt it once had a glaze, but this is gone. It is 9/16" in length.

I, ( ), a piece of window glass of modern appearance.

J, (No. 486), burned kaolin trade clay pipe stem with spur and portion of bowl. The spur is marked with the letters, "A/Y".
I, (No. 912), trade clay or kaolin pipe stem.

J, (No. 655), kettle cover fastener or lug. It is of copper, and served to hold a metal ring which was used to lift the kettle cover.

K, (No. 439), copper washer which is 1-1/8" in diameter and has a central hole 5/16" in diameter. Its use is unknown.

L, (No. 921), steel buckle measuring 1" by 1-1/2". Buckles of this type were used for belts, on pouches, etc.

M, (No. 894), incomplete iron buckle which is 1/2" by 5/8".

N, (No. 645), brass jaw's harp that is 2-1/4" long and 1" wide.

The steel tongue is missing.

O, (No. 732), black gum flint of presumed British origin.

P (No. 926), black gum flint of presumed British origin.

Both flints are battered from much use.

Q, (No. 627), brass button with back loop missing; it is 7/8" in diameter, and is Stanley Olsen's type C, which dates from 1785-1800.

R, (No. 499), brass button that is 9/16" in diameter, and is Olsen's type D, which dates from 1760-1785.

S, (No. 717), brass button with back loop which is 5/8" in diameter, and also Olsen's type D.

T (No. 500), main spring from a flintlock. It is 3-1/4" in length and 1/2" in width.

U, (No. 737), lead musket ball, .52 in diameter.
X, (No. 894), fragment of a "serpent" or "dragon" flintlock side plate. It is cast brass.

Y, (No. 733), flintlock component, a tumbler from the interior of the lock.

**Plate 24. Miscellaneous Metal Objects**

*From Cabin North of Blockhouse*

A, (No. 1220), portion of a table knife as it has a hammered bolster. It is 4-1/4" long, and 7/8" wide.

B, (No. 1700), iron key with loop or handle broken. It is 4-1/2" long and 1" wide.

C, (No. 1713), head of a large "chisel shaped" spike. It measures 1-3/4" by 7/8". Such spikes were used in wooden boat construction.

D, (No. 1281), portion of a small hand-made hinge. It is made of copper and is 2-3/4" long by 7/8" wide and has a loop for a pin that is 3/8" inside diameter. There are two holes for attachment that are 3/16" in diameter. These were drilled into the metal. Such a hinge would have been used for a small cupboard or chest.

E, (No. 1060), portion of a door lock. This is the bolt part of a lock. It is 3-1/4" long by 1" wide, by 7/16" thick. Such locks were in common usage on 18th century and 19th century doors.
F, (No. 1726), broken half round file. It is 3-3/4" long, and 3/4" wide. Files of this nature were used at fur posts in gun repair, kettle repair, etc.

G, (No. 1282), broken triangular file that is 3-3/4" long by 3/8" wide. Files of this type were used for fine metal-working and the sharpening of saws.

H, (No. 1702), portion of a strap iron hinges. It is 7" long, 3/4" wide, and 1/8" thick and bears three holes for fastening to a door or cupboard. These holes are 1/4" in diameter.

I, (No. 1701), broken flat file. It measures 7-1/4" long, 1" wide, and 1/4" thick.

J, (No. 1713) broken hand-made file. It is of an irregular form and 7-1/4" long by 1" wide and 1/4" thick.

K, (No. 1655), portion of a handle from a pot or dipper. It measures 5-7/8" long, and is made of round bar iron that is 3/8" in diameter. At one end it has a loop for suspension which is 1-1/2" in diameter.

Plate 27. Miscellaneous Materials

Cabin North of Blockhouse

A, (No. 1686), 23 white opaque cane beads which are from 5/32" to 5/16" in length and 1/8" to 5/32" in diameter; 1 translucent blue cane bead, 3/16" in length and 5/32" in diameter, 3 black opaque cane beads, averaging 1/4"
and 1/8" in diameter, 3 white opaque seed beads; 1 black seed bead; 1 translucent blue seed bead; and 6 turquoise seed beads.

B. (No. 1652), 1 large black cane bead that is 1-1/4" long and 1/4" in diameter, 2 white cane beads 3/16" in length and 1/8" in diameter, 12 white seed beads, 1 turquoise seed bead, 1 blue seed bead, and 1 blue-grey cane bead.

C. (No. 1786), 82 white seed beads, 12 turquoise seed beads, 1 blue-grey seed bead, 2 white cane beads which are 1/8" in length and 1/8" in diameter, and 1 large brown glass cane bead. This specimen is 7/8" long and 1/4" in diameter and has a medium brown glass over a darker brown interior.

D. (No. 1787), 104 white seed beads, 25 turquoise seed beads, 1 blue seed bead, 1 blue-grey seed bead, 4 white cane beads which are 1/4" long by 5/32" in diameter, 7 brown seed beads, 1 translucent blue cane bead that is 3/16" long by 1/8" in diameter, and 1 translucent red barrel bead.

E. (No. 1703), 1 piece of copper wire that is 1/8" in diameter and 1-3/4" long.

F. (No. 1082), circular copper button back measuring 11/16" in diameter and with a central hole that is 1/4" in diameter.

G. (No. 1748), fragment of a copper buckle. It forms a right angle and is 7/8" on a side and 3/16" wide by 1/8" thick.
H. (No. 1862), uniform buckle clasp which is 1-1/4" wide by 1-1/2" high. Clasps of this form were used on British uniforms of the late 18th century to fasten canvas or leather straps.

I. (No. 1990), large ornamented steel shoe buckle that is 2-3/4" across the arch and 2-1/8" wide. The walls are 1/4" wide and 1/8" thick. It may have once belonged to a prosperous trader or partner in the Northwest Company.

J. (No. 1939), highly polished brass button 1-1/16" in diameter. Olsen's type D dating from 1760-1785.

K. (No. 1938), gilded brass button 1" in diameter. Olsen's type D, 1760-1785.

L. (No. 1688), brass button 7/8" in diameter and with a sun-burst design on the front. Olsen's type D, 1785-1800.

M. (No. 1048), wooden button with a single central hole 3/4" in diameter.

O. (No. 1575), identical with the preceding item.

P. (No. 1939), low, conical turned bone or horn button with one central hole and four holes around it in the form of a square. It is 7/8" in diameter and may have once had some type of covering over its front.

Q. (No. 526-2), high-domed brass button with an embossed basket weave decoration. In the center is a rosette.
R, (No. 398-6), hollow iron button with missing back loop.
S, (No. 640-3), button with a thin sheet of brass over an iron back. It is 5/8" in diameter and has four holes.
T, (No. 616-4), bone button 5/8" in diameter with four holes.
It would have been used for a shirt or similar garment.
U, (No. 596-5), turned bone button 1/2" in diameter and with four attachment holes.
V, (No. 228-1), German pfennig dated 1826.
W, (No. 515-2), silver-plated copper button 1-1/16" in diameter. It is Olsen's type C, and dates from 1785-1800.
X, (No. 255-2), brass button 15/16" in diameter. It is Olsen's type D and dates from 1760-1785.
Y, (No. 571-7), gold-plated brass button 15/16" in diameter. It is Olsen's type D.
Z, (No. 550-5), gold-plated brass button 13/16" in diameter.
It is Olsen's type C, and dates from 1785-1800.
Ah, (No. 127-3), silver-plated brass button 9/16" in diameter. Olsen's type E, dating from 1750-1812.
Bh, (No. 199-14), brass button 9/16" in diameter, Olsen's type D.
Ch, (No. 642-1), brass button, 17/32" in diameter, Olsen's type D.

Cabin North of Blockhouse.

A, (No. 1830), copper jew's harp that measures 2-1/8" long by 15/16" wide at its widest portion. The steel blade is missing.

B, (No. 1656), an "8" shaped piece of steel of unknown use. It is 3-1/8" long, and 1-1/8" wide and is made of steel wire 1/8" in diameter.

C, (No. 1988), a copper brooch that had been gold-plated. It is 1-1/4" in diameter. Originally it had a series of 9 blue glass sets mounted on it. There were 8 of these in a circular pattern around the outer perimeter of the piece, and one set in the center. At present, six sets are on the piece. A broken clasp is on the rear and portions of the gold plating or gilding survive. This is one of the most attractive pieces of jewelry yet found at this site.

D, (No. 1987), copper brooch or ornament that had been silver-plated. It is circular in form and 1-3/4" in diameter. A series of six curvilinear designs are stamped into its outline. They are composed of double lines of fine dots. Holes for attachment of a clasp are present on it.

E, (No. 1642), small silver brooch or ornament. It is 3/4" in diameter and circular in form with an attached bar
for a clasp. Brooches of this nature were common trade items of the late 18th and early 19th centuries and were worn on costumes or blankets.

F & G, (Nos. 1001 & 1047), two conical copper tinkerers or bangles. They are almost identical in form and dimensions and measure 1-3/16" long by 1/4" in diameter. Such objects were often made from scraps of brass or copper and were attached to dresses or blankets by the Indians.

H, (No. 1370), a "D" shaped fire steel that is 3" long by 1-3/8" wide. These were widely traded items and of course were used with a piece of flint to start fires.

I, (No. 1716), fragment of an oval fire steel which is 1-3/4" long and 3/8" in width.

J, (No. 1622), circular lead bale seal measuring 1-1/4" in diameter. On its rear are stamped the letters, "... OKLEY." Bale seals were used to mark and perhaps to secure from pilfering shipments of trade goods. They were frequently melted down for casting into lead musket balls, and therefore are scarce at most sites.

L, (No. 1832), a steel rear spring from a flintlock gun. It measures 1-3/4" long by 7/16" wide.
M, (No. 1168), honey colored round heeled French gun flint that is 1-1/8" by 1-1/16".
N, (No. 1954), lead musket ball measuring .55 in diameter.
O, (No. 1748), portion of a flint lock hammer. It is 3" in height and 1" in width at its widest portion.
P, (No. 1395), portion of a cast brass "dragon or serpent" side plate from a flint lock gun. It is 2" long and 1" wide at its widest point.
Q, (No. 1615), black British gun flint that measures 1-1/8" on a side. The heel has been flaked though the item itself is of the "gun spall" variety.
R, (No. 1356), dark honey colored gun flint of French origin which is 1" by 1-1/8".

Plate 27. Miscellaneous Materials

Cabin North of Blockhouse

A, (No. 1049), bottle neck and shoulder of dark green glass. The shoulder is square and indicates a "case bottle" of the type used for liquors in the late 18th century.
B, (No. 1852), fragment of light green window glass with air bubbles in it. Of the type used during the late 18th and early 19th century.
C, (No. 1447), shard of hard "china" with an underglaze turquoise colored floral design. It probably dates from the mid-19th century or later.
D, (No. 1547), shard of fine white "china" with a sprigged
over glaze design.
E, (No. 1356), shard of cream-colored pasteware.
F, (No. 1856), shard of porcelain with a blue under glaze
design.
G, (Nos. 1744 and 1936), shard of a blue willow ware saucer
with blue under glaze designs.
H, (No. 1124), trade kaolin pipe bowl fragment with "TD" de-
sign within a wreath. The spur is stamped, but only the
letter "T" is discernable.
I, (No. 1661), partial trade clay pipe bowl. It has no spur
and the stem has been broken, and carved down for inser-
tion into another stem.
J, (No. 1793), stem and spur of a trade clay pipe. The spur
bears the letters "GW."
K, (No. 1805), a stone imitation of a trade clay pipe. It
is 1-3/4" long and consists of a stem, spur, and lower
portion of the bowl. The stem hole was drilled with a
cylindrical steel drill 1/16" in diameter. There are
three holes in the upper portion of the bowl area, and
they are of a similar size, and were made for attachment
of a bowl. This is an unusual specimen and may have been
the efforts of a desperate smoker with a broken pipe, or
the idle doodlings of a bored fur trade employee in
winter months.
L, (No. 1719), broken stem and spur of a trade clay pipe with no letters on the spur.

M, (No. 1998), broken stem and spur of a trade clay pipe. The base of the bowl bears traces of fluting, but there are no letters on the rounded spur.

H, (1611), broken stem and spur of a trade clay pipe. The letters "GW" are on opposite sides of the spur.

O, (No. 1405), broken stem and spur of a trade clay pipe. The letters "TD" are on opposite sides of the spur.

P, (No. 1668 and 1669), portion of stem of a trade clay pipe.

Q, (No. 1989), brown chalcedony projectile point. It is corner notched and bifacially flaked. It is 1-3/4" in length and 3/4" in width, and dates from Middle Woodland times. This specimen was found amidst the ruins of a fur trade cabin and may date from c. 1785 or a bit earlier.

R, (No. 1471), one-half of a canine mandible.

3, (No. 1658), incomplete bone tube which is 2-1/4" long, and 1/2" wide. Probably a "cupping" or "swallowing tube" used by Chippewa medicine man.
SUMMARY AND RECOMMENDATIONS

During the 1963-64 field seasons, trenches five feet in width were excavated around the exterior and interior perimeters of the reconstructed Northwest Company depot. Test trenches were also excavated in the area lying west of the depot and south of Cook County Highway No. 17. Recommendations were prepared and submitted for the reconstruction of the palisades on their original locations.

The "East Gate riddle" was solved with the discovery of the original four posts which had supported the gatehouse, and recommendations made for its reconstruction. A large log warehouse was found and excavated which lay west of the depot. It definitely dates from the fur trade era. A hitherto unknown log structure was found north of the main gate of the depot as was other evidence which provides tantalizing hints on the earliest occupation of the site by fur traders.

Indications of a possible 15 buildings were found on the interior of the palisade. These are highly tentative sites, however, and further excavation is needed to determine their authenticity. Also, a previously unknown trench line was found adjacent to Lake Superior which dates from the fur trade era. This discovery raises the possibility that the palisade along the lake front had been moved about twenty feet inward prior to 1803.
The site was mapped by a professional engineer, and a permanent base point for future archaeological work was established. It was based on the 1962 MFS survey of the monument. In 1964, the pertinent 1962 MFS survey points were set in concrete as permanent reference points.

Most of the archaeology done at this unique site in past years has been "construction oriented." By this I mean that construction needs have dictated excavation priorities, and that excavations have not been made to solve broad and fundamental problems.

Some areas within the palisade enclosure have been destroyed by modern construction. As an example, consider the irreparable destruction caused by installation of concrete footings for a propane gas tank east of the Great Hall. Also, a sewer and water line laid in about 1962 for an office trailer destroyed portions of a pussling stone wall. There are other similar incidents, but it is not necessary to cite them here.

I am not arguing against essential developments which must be installed in any facility of this nature. Rather, I am protesting against the random destruction of unique archaeological remains by a lack of long range planning and orderly development.

Therefore, I urge that the most serious consideration be given to a careful and systematic exploration of the
fur trade depot over perhaps a three year period. Such a program would provide for a definitive report on the site and would provide basic data for its orderly development and interpretation. A continuation of the past will result in partial answers and further destruction to these archaeological remains.

In my considered opinion, a program should be established to excavate all of the post enclosure which lies south of a line drawn between Corners D and G. Excavations should be made north of the gatehouse and perhaps even in parts of the parking lot. Admittedly, an ambitious program of this nature would take about three field seasons and would cost thousands of dollars. The long term archaeological needs of this area would be met, and a strong base would be at hand for orderly development and interpretation of what is unquestionably the most important fur trade site in the western Great Lakes region aside from Michilimackinac.

Plate 11 (Personal Possessions)

(A) 111-5 Clay pipestem fragment, marked "Montreal."

(B) 352-1 Decorated clay pipestem fragment. Banded design with alternating bands which have lines connecting bands.

(C) 49-2 Clay pipe bowl fragment with "TD" marking.

(D) 604-2 Clay pipe bowl and stem juncture, the edge of what apparently is a "TD" brand shows above the stem.

(E) 437-1 Clay pipe bowl and stem juncture with an unmarked spur.

(F) 451-2 Clay pipe bowl and stem juncture with spur marked "0U."

(G) 389-2 Clay pipe bowl and stem juncture with spur marked "TP."

(H) 349-7 Clay pipe bowl and stem juncture with spur marked "TD."

(I) 291-1 Clay pipe bowl and stem juncture with spur marked "TP."

(J) 94-1 Clay pipe bowl and stem juncture, elaborate lattice, "TD" pipe spur attached.

(L) 616-2 Clay pipe bowl, unmarked, with a long slender unmarked spur.

(L) 46-1 Clay pipe bowl fragment. Front half with decorative vertical median ridge.

(M) 550-2 Clay pipe bowl. Four matching fragments.

(N) 275-1 Sherd of blue Delftware china.

(O) 612-4 Sherd of blue Willow Ware.

(P) 9-5 Sherd of china with brown leaf design.

(Q) 615-18-19 Two fragments of an unglazed porcelain disc.
(B) 437-8 Shard of blue and white Delftware china.

(8) 667-27 Shard of blue Willow china.

(I) 704-3 Shard of white china cup. The shard bears a raised shield with a blue outline, and the letters "OXO" also in blue.

(U) 194-1 Blue on white china rim.

(V) 99-1 Rim shard of white china with flowing ribbon design.

Plate 12 (Personal Possessions)

(A) 482-1 Iron belt buckle with catch.

(B) 437-6 Iron uniform strap buckle.

(C) 571-8 Iron uniform strap buckle.

(D) 158-1 Portion of small, ornamental copper brooch.

(E) 76-1 Light shoe or belt buckle half, square with rounded corners.

(F) 123-1 Small ornamental shoe buckle. Round or oblong; broken leaf design.

(G) 183-3 Buckle.

(H) 593-4-5 Two sections of a circular brooch type, floral decorated buckle.

(I) 437-7 Small ornamental buckle.

(J) 204-4 Circular brass buckle, ornamented and arched.

(K) 593-3 Cast copper rectangular buckle with pinned back, similar to a shoe buckle. Decorated with a tuine design of figure 8's defined by small hemispherical bosses.

(L) 601-5 Broken brass ornamental buckle.

(M) 412-1 Brass shoe buckle.
Plate 13 (Building Hardware)

(A) 627-3 Hinge leaf, 12" long, with a rosehead nail in situ.
(B) 54-2 Iron spike.
(C) 282-1 Iron key with very wide blade.
(D) 330-2 Short heavy chisel point spike.
(E) 305-1 Door lock bolt.
(F) 348-2 Wrought iron staple.
(G) 432-1 Ornamental iron hinge piece, with twin crescentic tails.
(H) 90-1 Part of door latch.
(I) 86-2 Light pintle.
(J) 173-3 Pintle.
(K) 568-1 Leaf from a hinge.

Plate 14 (Tools)

(A) 106-1 Half round file.
(B) 94-8 Modified triangular file.
(C) 659-3 Iron file fragment.
(D) 532-7 Broken half round rasp/file.
(E) 29-1 Fragment of hand cut file.
(F) 564-3 Triangular iron file.
(G) 607-7 5" section of channel gouge chisel.
(H) 423-1 Light forming gouge - chisel.
(I) 318-1 Short semi-lunate blade with a curved rocker-like serrated edge.
(J) 358-3 Broken iron splitting wedge.
(K) 660-1 Triangular iron file fragment.
(L) 41-4 Iron forging hammer.
(M) 643-1 Blacksmith's anvil hardy.

Plate 15 (Miscellaneous Metal Objects)

(A) 286-4 Lead disc.
(B) 232-2 Loop segment of a lead balancer.
(C) 578-18 A 1/3" thick, 5/8" diameter lead disc.
(D) 168-2 Keyhole cover plate made of kettle copper scrap.
(E) 710-10 A kettle tripod chain of five dog bone links.
(F) 674-2 Double end offset awl.
(G) 107-2 Thin dog bone shaped metal strip with four lines of staggered machine punched holes.
(H) 260-6 Steel nail maker or shipping needle.
(I) 248-2 Double end offset awl.
(J) 92-3 Fork or spoon handle with rope design embossed edge, marked "Rowsey."
(K) 425-3 Broken kettle hook.

Plate 16 (Miscellaneous Metal Objects)

(A) 546-5 Light barbed iron fish or frog spear, 5" long.
(B) 166-3 Broken fire steel.
(C) 532-6 Broken fire steel.
(D) 710-9 Bell-clapper.
(E) 199-10 "D" shaped fire steel.
(F) 126-1 "O" shaped fire steel.
(G) 178-2 Large iron fish hook, 8-1/2" long. Barb on end.
(H) 4-1 Iron ice creeper.
(I) 54-3 Net sinker, lead sheet - home made.
(J) 6-1 Iron fish or muskrat spear.
(K) 448-1 Broken trap spring.

Plate 17 (Cutlery)

(A) 219-3 Ornamented brass open work fragment.
(B) 549-39 Filagree brass knife.
(C) 384-13 Bone handled jack knife.
(D) 249-2 Small, home forged knife blade.
(E) 535-1 Bone knife handle slab, hand checkered.
(F) 215-1 Jack knife handle.
(G) 356-2 Knife blade.
(H) 586-1 5-1/8" long clamp knife blade of the eared or thumb flanged variety.
(I) 158-4 Strap iron knife, blade with sawtoothed edge.
(J) 586-3 Knife blade with repaced wood hand.

Plate 18 (Container Parts)

(A) 32-2 Kettle copper lug.
(B) 217-2 Scrap of copper kettle lid with dog-bone lug and lift ring.
(C) 50-2 Cast iron kettle lug.
(D) 433-1 Fairly modern iron kettle bale ear, stamped steel.
Iron pail ear.

Elaborate iron kettle ear.

Cast copper kettle lug. A flat lunette with a disc pivot. The lug retains a portion of the iron bail.

Cast copper kettle lug. Elongated hexagon, attached to copper. Two rivets in situ.

Cast copper kettle lug. Long oval shape, attached to copper. Two rivets in situ.

Tailed iron kettle lug.

A small tailed iron kettle lug with rectangular back.

Tailed iron kettle lug.

Fat lunette cast copper kettle lug, attached to copper. Three rivets in situ.

Kettle copper with heavy copper lug.

Plate 19 (Trade Goods)

Beads.

Beads.

Beads.

Beads.

Beads.

White globular bead with blue glass spiral inlay.

Erased brown glass bead with zig-zag yellow enamel thread design.

Bead; brown glass over lavender core cane bead.

Turquoise glass barrel bead, 3/8" long, and one white seed bead.

Copper hawk bell.
(K) 408-2 Copper hawk bell with clapper.

(I) 172-2 Small copper hawk bell with clapper.

(M) 654-1 Clear glass barrel bead 27/32" long, with ornate inlaid floral design.

(K) 527-2 Ring bezel for an oval set.

(i) 191-6 Brass trade ring with a green glass central setting, flanked by two blue sets.

(I') 561-4 Brass trade ring with a clear center set, with two blue sets on either side.

(G) 578-14 Brass trade ring with a green center set, with two blue sets on either side.

(L) 127-4 Top half of a jeweled, articulated cross pendant, loop on back for chain.

(L) 301-2 Ornate copper or brass cross set with unfaceted glass stones, round at the head and at the juncture of the cross arms, and the body of the cross. The section below the cross arm is no longer extant. Loop on back for attachment.

(T) 262-2 Small lead cross. Small slit in base of cross.

(U) 403-3 Silver triangular pendant, with jump ring at apex.

(V) 581-2 Iron jews harp frame.

(W) 578-15 Brass jews harp frame.

(X) 219-9 Leather washer.

Plates 20 (Firearms Components)

(A) 261-8A Gunflint, honey colored chalcedony.

(B) 215-13 Gunflint, broken, gray honey colored chalcedony.

(C) 192-2 Gunflint, British, dark gray chalcedony.

(D) 234-5 Gunflint, with gnawed heel, honey colored flint.

(E) 654-2 Gumspall, dark gray/black flint.
(P) 607-6 Flintlock, frizzen spring.
(U) 385-1 Tumbler bridle from a flint lock fusil.
(H) 301-1 Tumbler bridle from a flint lock fusil.
(1) 26-2 Musket ball.
(J) 374-1 Flintlock main spring.
(K) 416-3 Main spring from flintlock fusil.
(L) 234-7 Musket ball.
(N) 173-1 Broken brass side plate from a flintlock musket or fusil, with an engraved stand of arms.
(B) 37-1 Head end of serpent plate, back marked with XXXI, front - serpent head.
(O) 453-1 Broken serpent side plate.
(F) 234-7 Musket ball.
(Q) 405-3 Flintlock cock, missing jaws and screw.
(R) 238-2 Upper vise jaw from flint lock cock.
(S) 273-5 Iron corkscrew or single twist gun worm.
(T) 202-6 Trigger from a trade fusil.
(U) 234-7 Musket ball.
(V) 306-2 Vise slotted screw from the cock of a flint lock fusil.
(W) 335-1 Bear from flint lock fusil.
(Y) 85-2 Frizzen, from a flintlock musket.
(Y) 584-1 Musket ball.
(Z) 550-49 Musket ball.
(HI) 127-1 Breech tangs from trade or military musket.
(RR) 548-8 Musket barrel section, 3" long with mounting eye.
Plate 21 (Miscellaneous Metal Objects)

(a) 649  Hand forged staple.
(b) 702  Iron ring.
(c) 878  Hand forged "nail eye."
(d) 955  Pintle, 4-3/4" long.
(e) 701  One-half of hinge.
(f) 842  Pintle, 2-1/4" long.
(g) 671  Wrought iron object.
(h) 974  Pintle, 2-3/4" long.
(i) 724  Heavy iron pin 6-3/8" long, 11/16" in diameter with eye at one end, 5/8" inside diameter.
(j) 638  Iron ring.
(k) 662  Padlock.

Plate 22 (Miscellaneous Metal Objects)

(a) 714  Rosehead nail.
(b) 714  Rosehead nail.
(c) 714  Rosehead nail.
(d) 714  Rosehead nail.
(e) 843  Rosehead nail.
(f) 759  Nail blank.
(g)  Large rosehead nail.
(h) 868  Fragment handle from kettle.
(i) 915  Triangular file 4" long, each face 1/2" wide.
(j) 901  Cork screw.
(K) 893  Part of bone knife handle, 2-7/8" long.

(L) 504  File, 9" long (Broken).

(M) 731  Knife blade.

(N) 643  Scissors, 4-3/4" long.

(O) 908  Cow bell.

Archeological Catalog, Grand Portage National Monument, 1963
A. B. Woolworth, Archeologist (site 21aK6-1963)

Bag #1  June 12, 1963. Near Stockade, under N. W. Co. sign at the Northeast side of stockade.

1-1  5 Rose head nails
1-2  A piece of round brass wire 1/4 x "3"
1-3  A piece of a forged strap cupboard door pull, iron. 3/16 x 3/8 x 3".
     Discarded.
     4 Canine leg bones.

     Discarded:
     2 Fragmentary rosehead nails.
     Collected by Dick Frederiksen

Bag #3  June 18, 1963. Sodding, near west stockade interior.

3-1  A large rosehead-chisel point spike, 3/8 sq.; shank x 9 5/8" in length.
3-2  Iron rap fragment. 3/16 x 7/8 x 3".
3-3  Light bluish-green bottle bottom fragment with the letter "La" on the bottom blingy.
     Discarded:
     1 Fragmentary rosehead nail.
     4 Fragmentary common sq. nails.
     1 six inch wire nail.
     2 C.G.C., imitation rosehead spikes.

4-1  Iron ice creaper.

Bag #5  June 22, 1963. W. trench of stockade interior. 190' E, 3 W.

     Surface.
5-1  Elson glass bottle stopper-lead glass.
5-2  Shard of white china, blue design-villenware? 
     Discarded:
     1 Fragmentary rosehead nail.

6-1  Iron fish or muskrat spear, 15" long.
6-2  Iron fish spear, bent, 15" long.
6-3  Probable fish spear tip; broken. 6 1/2" long.
6-4  Flat bobby pin. 3" long.
6-5  Clay pipe stem fragment. 2" long.
6-6  Fragment of iron door hinge.
6-7  Rim shard, blue on white china-fluted.
     Discarded:
     1 Common sq. nail
Bag #8 June 21, 1963. Area west of stockade, surface.

8-1 Shard of Maslin ironstone ware with Monduit, pieces.
8-2 5 pieces of rotted wood.
8-3 Yellow brick. (not in bag)
8-4 Yellow brick. Discarded:
   1 fragment of animal bone—broken phalange.
   1 piece of scrap iron.
   7 roosehead nail fragments.
   1 piece of iron wire.
   20 pieces of (wood mill ?)

Bag #9 June 24, 1963. West of stockade, surface sodding.

9-1 1 Iron door-lookplate with roosehead nail in situ. 7 3/8" x 2 1/2" x 5/16".
9-2 1 Door pinte pin-spike 1/2" x 11/16" x 6 1/4"—pin diameter 1/2".
9-3 1 Ox shoe with roosehead 7 nails. 5 15/16" x 1 1/2" x 5".
9-4 1 Shard of blue and white china bowl.
9-5 1 Shard of white china with a brown leaf design.
9-6 1 Fragment of dark olive green bottle bottom; blown.
9-7 1 Shard of blue and white Delft ware.
9-8 1 Fragment of ravy, light green window glass. Discarded:
   1 fragment of white bottle glass.
   2 fragmentary roosehead nails.
   4 common sq. nails.
   1 wire nail.
   4 pieces of stone.
   1 piece of white china.
   1 piece of brown bottle glass.
   1 white button.

Bag #10 June 25, 1963. trench west of stockade 510°e, Od depth 3" to 6".

10-1 1 Forged nail—wide flat head (1" dia) with a shaft (1 1/4") wide (1/2"") thin (1/16") Shank. Discarded:
   1 light bulb base.

Bag #11 June 25, 1963. West stockade cornering trench 90° N., o v., 0-6".

Discarded:
   1 fragment of light bluish-green bottle glass.
   3 fragments of clear bottle glass.
   2 shards of china on 1930.
   10 common square nails.
   7 pieces of stove iron.
   1 shard of white china.
   2 fragments of modern glass mill plates.

Bag #12 June 25, 1963. West trench 90° S., o v. 0-6"

Discarded:
   31 pieces of flattened tin can.
   1 fragment of animal bone.

Bag #49  June 29, 1963, West trench, exterior. 40°N,0°W. 15-18"
49-1  Kettle lug, crescent, mounted on kettle fragment
49-2  Clay pipe bowl fragment with T. D. marking
49-3  Clay pipe bowl fragment
49-4  Clay pipe stem fragment, losang shaped
49-5  Iron wire, twisted, approximately 6"
        Discarded:
        1 kettle copper scrap
        1 piece of fused glass or clinker.

Bag #50  June 29, 1963. West trench, exterior. 50°N,0°W. 6-12"
50-1  Rodent tooth, squirrel or muskrat
50-2  Cast iron kettle lug
50-3  Clay pipe bowl fragment
        Discarded:
        1 piece of light olive bottle glass
        1 piece of fused glass
        6 common sq. nails
        1 piece window glass
        1 piece of white china
        1 piece of crock

Bag #51  June 29, 1963. West trench, exterior. 80°N,0°E. 3-12"
        Discarded:
        4 rosehead nails
        1 piece fused glass
        2 pieces of window glass
        2 pieces of bottle glass

Bag #52  June 29, 1963. West trench, exterior. 170°N,0°W. 5-6"
52-1  Unfinished iron door pindle
Discarded:
1 rosehead nail
1 common sq. nail

Bag #53  June 29, 1963. East trench, exterior. Sodding
53-1 1 large roseheaded, chisel pointed spike. 6 1/4" long.
53-2 1 sherd blue on white china.
Discarded:
1 piece of bottle glass, clear
1 piece of earthen ware crock
1 piece of barrel hoop
5 common sq. nail
2 rosehead nails

Bag #54  July 1, 1963. West trench, exterior. 40'E,0'W. 1'34 1/2"
54-1 Beige gunflint, broken
54-2 Iron spikes (illustrated materials) 
54-3 Clay pipe stem fragments
54-4 Discarded:
54-5 2 net sinkers, haste made of sheet lead.
54-6

Bag #55  July 1, 1963. West trench, exterior. 40'E,0'W. 1'34 1/2"
55-1 2 beads, 1 blue bead, 1 large black cane.
55-2 1 small piece of copper sieve or grater.
Discarded:
2 rosehead nails
3 common sq. nails
1 piece of window glass

Bag #56  July 1, 1963. West trench, exterior. 100'E,5'W. 20-24"
56-1 2 pieces of copper sieve or grater
56-2 1 blue seed bead
56-3 1 fragment of opaque blue glass
Discarded:
2 rosehead nails
2 common sq. nails
3 pieces of window glass
1 piece of light olive bottle glass

Bag #57  July 1, 1963. West trench, exterior. 60'E,0'W. 23-26"
Discarded:
1 rosehead nail
1 piece of dark olive green bottle
Discarded:
4 pieces of modern glass, 1 from a catsup bottle
1 piece of olive green glass bottle
2 rosehead nails
1 common sq. nail

Bag #59  
July 1, 1965, West trench, exterior, 70°W, 15-18”
59-1  2 pieces of copper sieve or grater, (illustrated material)
59-2  Beads, 60 white seeds, 6 white cane, 27 blue seeds and 3 red seeds
      Discarded:
      1 rosehead nail
      4 pieces of bottle glass
      2 pieces of window glass

Bag #60  
July 1, 1965, West trench, exterior, 70°W, 18-21”
Discarded:
1 section of barrel hoop

Bag #61  
July 1, 1965, West trench, exterior, 90°W, 16-19”
61-1  Rings loop, fabricated from kettle copper.
      Discarded:
      2 rosehead nails
      1 common sq. nail
      2 pieces of window glass
      1 piece of fused glass

Bag #62  
July 1, 1965, West trench, exterior, 110°W, 20-23”
62-1  Bottom of rectangular dark olive green bottle
62-2  Shard of white china

Bag #63  
July 1, 1965, West trench, exterior, 120°W, 9-12”
63-1  Copper kettle rim; 5” long
63-2  One half pair of scissors, 5 1/2” long.

Bag #64  
July 1, 1965, West trench, exterior, 120°W, 15-18”
64-1  A slim, circular strip of copper; 1/8” wide and 6 1/2” in dia.
64-2  10” section of copper kettle rim.
      Discarded:
      2 rosehead nails

Bag #65  
July 1, 1965, West trench, exterior, 120°W, 21-24”
Discarded:
3 common sq. nails

Bag #66  
July 1, 1965, North trench, exterior, surface
66-1  2 white cane and 2 white seed beads

Bag #67  
July 1, 1965, North trench, exterior, surface
67-1  Door plated 4” spikes, plate 3/8” dia, 14 long
Bag #68

July 1, 1963. Drainage ditch. 260'E, 0'E. 6'-12".

68-1 White china shard marked with the Bailey-Walker on the left half of an open book

68-2 Small lump of anthracite coal (? ) (cannel coal)?
Discarded:
1 fragment of kerosene lamp shade
1 fragment bluish bottle glass

Bag #69

July 1, 1963. Drainage ditch at 350'E 5'E. 6-12"

69-1 One half of a round turquoise blue bead with white circular inlays centered with red and blue insets. Bead is 5/16" in dia.

69-2 Turquoise glass barrel bead, 3/8" long, and 1 white seed bead.

69-3 Clay pipe stem fragment
Discarded:
1 shard of white china.

Bag #70

July 2, 1963. West trench, exterior. 40'E, 5'E 18'-21"

70-1 Open end brass saving thimble.
Discarded:
5 rosehead nails
5 common sq. nails
1 bottom fragment of dark olive green bottle glass
1 shard of earthen ware crack
1 chip of white china
1 piece of fused glass
1 piece of window glass

Bag #71

71-1 Clay pipe stem fragment
Discarded:
3 pieces of kettle copper
1 fragment of large animal vertebrae
1 rodent scapula
1 piece of white glazed earthen ware
1 piece of fused glass
5 pieces of bottle glass
1 piece of 1/4" plate glass
15 common sq. nails
9 rosehead nails

Bag #72

July 2, 1963. West trench, exterior. 50'E, 0'E. 15'-18"

72-1 Clay pipe stem fragment
Discarded:
3 pieces of window glass
1 piece of kettle copper
1 piece of bottle glass
5 common sq. nails
2 rosehead nails

Bag #73

July 2, 1963. West trench, exterior. 70'E, 5'E. 24-27"
73-1  Beads, 1 white cane, 6 white seeds and 2 blue seeds.
73-2  Clay pipe fragment, stem and bowl juncture.
73-3  Small flint chip.
        Discarded:
        1 rosehead nail
        2 pieces of window glass
Bag #74 July 2, 1963. West trench, exterior. 120°W, 0°N. 21-24"
        Discarded:
        1 piece dark olive glass
        2 pieces of modern pressed glass
        1 piece bluish glass
Bag #75 July 2, 1963. West trench, exterior. 120°W, 0°N, 24-30"
        Discarded:
        1 shard, white china cup
        1 piece of thin glass
        1 piece of bottle glass, clear.
Bag #76 July 2, 1963. West trench, exterior. 130°W, 0°N, 23-26"
76-1  Light shoe or belt buckle half
76-2  Copper kettle rim, 12" long
        Discarded:
        2 pieces of copper kettle rim
Bag #77 July 2, 1963. West trench, exterior. 130°W, 0°N, 23-26"
        Discarded:
        1 scrap of kettle copper
Bag #78 July 2, 1963. West trench exterior. 130°W, 0°N, 21-24
78-1  Scissors fragment, 5 1/2" long.
Bag #79 July 2, 1963. West trench, exterior. 140°W, 0°N, 18-24"
        Empty
        Discarded:
Bag #80 July 2, 1963. West trench, exterior. 150°W, 0°N, 15-18"
        1 c.o.c. imitation rosehead spike.
        Discarded:
Bag #81 July 2, 1963. West trench, exterior. 160°W, 0°N, 12-15"
        1 rosehead nail
        Discarded:
Bag #82 July 2, 1963. West trench, exterior. 170°W, 0°N, 15-18"
82-1  Strap hinge fragment, 5 3/4" long
        Discarded:
        1 pebble, rounded, over. 55 cal.
        1 piece of bottle glass
        1 spike
        1 piece of strap iron
Bag #83
July 2, 1963. West trench, exterior. 220°E, 0°W. 6-12"
1 piece of white glass refrigerator tray.
Discarded.

Bag #84
July 2, 1963. West trench exterior. 220°E, 0°W. 9-12"
3 pieces of window glass
1 piece of white glass refrigerator tray.
Discarded.

Bag #85
July 2, 1963. East trench drainage North of block edge. 12-15"
85-1 Beads, 60 white seed beads, 3 white cane beads, 1 white barrel bead, 5 red seed beads, 27 blue seed beads.
85-2 Frisson, from a flintlock musket.

85-4 Clay pipe bowl fragments
85-5 Clay pipe stem fragments
85-10
85-11 Broken cane bead, brown outside, purple glass inside.
Discarded.
13 pieces of glass
2 shards of china.

Bag #86
86-1 Fragment of deer pelvis
86-2 Light pinfire
86-3 Staple 3 1/2" long
86-4 Wedge shaped fragment of sawn oatlinite-like stone
86-5 Shard of blue and white china
86-6 Clay pipe bowl and stem juncture
86-7 Clay pipe stem fragments
86-8
86-9 Iron rod 1/8" dia. 9 1/2" long
Discarded.
1 cco spike
1 small stone
1 piece of mason jar
1 small roll of birch bark

Bag #87
July 2, 1963. East trench, Paul Grand Louis. 30"
87-1 1 large, 9 1/2" iron spike—possibly broken pintle

Bag #88
July 3, 1963. West trench exterior, 270°E, 0°W. 9-12"
1 common sq. nail
2 pieces of window glass
1 piece of animal bone
Discarded.
Bag #89  July 3, 1963. West trench exterior.  280°N, 0¹W.  9-15"  
1 common sq. nail  
Discarded.

Bag #90  July 3, 1963. West trench, exterior.  290°N, 0¹W.  6-15"  
90-1  Partition of door latch

Bag #91  July 3, 1963. East trench, surface  
1 ece spike  
Discarded.

Bag #92  July 3, 1963. Hook filled trench, corners DtoG Drainage  
92-1  Iron strip with rivet 5/8" x 7"  
92-2  1946 Lincoln head penny  
92-3  Fork or spoon handle with rope design embossed edge.  
92-4  Sherd of blue and white china

92-5  Clay pipe stem fragments

92-8  1 white cone bead  
Discarded.

2 spikes  
5 pieces of modern glass

Bag #93  July 3, 1963. East trench, surface  
1 piece of fused glass  
1 china shard-buff paste ware  
1 piece of brown bottle glass

Bag #94  July 3, 1963. East trench, in area F.  3-6"  
94-2---  Clay pipe bowl fragments  
94-3  
94-4  Clay pipe stem fragment. 94-4 marked A. Paris---PHILDS.

94-6  1 white seed bead

94-7  1 modified triangular tile  
Discarded:  
1 fragment of animal bone  
1 piece of clear bottle glass  
4 pieces of window glass  
1 shard of a white china mug.

Bag #95  July 6, 1963. Test trench in area F.  6-9"  
95-1  "Clay marble"  
Discarded:  
1 barbed wire staple  
3 pieces of dark olive green glass  
2 pieces of earthen ware crock  
4 pieces of white china  
10 pieces of lamp chimney  
1 piece of strap iron
Bag #96  July 8, 1963, West trench exterior 40°N, 0°W. 27" and below
96-1  Clay pipe, stem and bowl juncture
96-2  Clay pipe, stem and bowl juncture
96-3  Clay pipe bit
  Discarded:
  1 Avian long bone
  8 glass fragments
  1 white china fragment
  1 piece of fused glass or clinker

Bag #97  July 8, 1963, West trench, exterior 50°N, 0°W 18"-21
97-1  Kettle copper scrap
  Discarded:
  4 small scraps of kettle copper
  5 small pieces of glass
  1 shard of white china
  1 copper nail
  1 small scrap of animal mandible

Bag #98  July 8, 1963, West trench exterior 50°N, 0°W. 21-24"n
98-1  Bottle mouth with laid on lip and ring
  Discarded:
  3 common sq. nails
  1 rosecut nail
  2 pieces of light olive bottle glass
  2 pieces of window glass

Bag #99  July 8, 1963, West trench, exterior 50°N, 0°W. 21-24"
99-1  Shard of white china with flowing ribbon design
  Discarded:
  2 pieces of glass
  1 shard of white china
  5 common sq. nails
  1 piece of scrap iron

Bag #100  July 8, 1963, West trench, exterior 50°N, 0°W. 24-27"
  Discarded:
  5 common sq. nails
  1 piece of window glass
  1 piece of fused glass or clinker

Bag #101  July 8, 1963, West trench, exterior 50°N, 0°W. 27-30"
  Discarded:
  5 pieces of glass
  7 common sq. nails
  1 rosecut nail
  1 disintegrated fish vertebrae.
Bag #102  July 8, 1963. So. Fasade, exterior. 176'E. 6"-12"

102-1  Bottle glass, bottom fragment light bluish-green
102-2  Animal bone splinter with tooth or knife marks
102-3  Clay pipe bit.
        Discarded:
        4 common sq. nails
        3 rosehead nails
        3 pieces of glass

Bag #103  July 8, 1963 East wall trench, exterior. 266'E. 14-17"

103-1  Small chip of white flint or chert
103-2  Clay pipe stem fragments - 3 pieces
103-3  Small animal bone
103-4----  Fragments of medium green window glass
103-5  Laid over lip of flared-mouthed bottle
        Discarded:
        6 rosehead nails
        7 small pieces of glass
        1 small shard of white china

Bag #104  July 8, 1963. West trench, exterior. 310'E, 0'W. 10"-21"

104-1  A large chisel point, rosehead spike.

Bag #105  July 8, 1963. West trench, exterior. 340'E, 0'W. 3-9"

105-1  3 moose teeth.
        Discarded:
        1 fragment of modern bottle glass, green.

106-1  Half-round file with stamped name (illegible)
106-2  Roundless spike, 1/2" in dia. 3 3/4(?) in. in length
        Discarded:
        1 piece of fused glass

Bag #107  July 8, 1963. Bedding, South wall, exterior.

        Discarded:
        1 wrought iron nail
        1 piece of kettle copper
        1 fused glass or tinker

Bag #108  July 9, 1963. West trench, exterior. 40'E, 0'W. 27" and below.

108-1  Clay pipe stem fragment
108-2  Lump of scrap iron
108-3  Medium green window glass
        Discarded:
        5 common sq. nails
        1 rock
        1 piece of strap iron
        5 pieces of glass
Bag #109  July 9, 1963. East trench. 40°W. 18-21"  Discarded: 3 rosehead nails 2 small pieces of thin, friable iron, probably tin can.

Bag #111  July 9, 1963. West trench, exterior. 50°W. 27" and below.  
111-1  Broken cold chisel. 3 7/8" x 1/2" sq.  
111-2  Three chips of blue willow china  
111-5  Clay pipe stem-marked "Montreal"  Discarded: 6 rosehead nails 10 common sq. nails  Amythestine crystal 1 thin piece of strap iron 7 pieces of modern glass 1 shard of white china.

Bag #112  July 9, 1963. West trench, exterior. 50°W. 9-15"  Discarded: 1 thin piece of bone (fish gill?) 1 piece of modern window glass 2 common sq. nails.

Bag #113  July 9, 1963. West trench, exterior. 50°W. 15-21"  
113-1  Clay pipe bowl and stem juncture with unmarked spur.  
113-2  1 chip of blue and white willow ware.  Discarded: 2 rosehead nails 1 common sq. nail 2 pieces of window glass 1 piece of fused glass.

Bag #114  July 9, 1963. East trench, exterior. 75°W. 3-6"  Discarded: 3 rosehead nails.

Bag #115  July 9, 1963. South trench, exterior. 95°W. 3-6"  
115-1  A piece of chipped and broken stone  Discarded: 3 pieces of glassed china 4 pieces of modern glass.

Bag #115  July 9, 1963. South trench, 95°W. 6-9"  
116-1  Small fragment of amythestine glass  
116-2  Bottom of mold-blown rectangular, clear glass bottle  Discarded:
1 piece of fused glass
3 pieces of bottle glass
1 shard of heavy white porcelain (toilet bowl?)

Bag #117 July 9, 1963. South trench, exterior. 120'-126' E. 0-3"

117-1 Iron key
117-2 Clay pipe stem fragment
   Discarded
6 rosehead nails
3 common sq. nails
1 shard of china (ca. 1930's)
4 pieces of modern glass

Bag #118 July 9, 1963. South trench, exterior. 126'-136' E. 0-3" (Paul Grand Louis)

3 rosehead nails
Discarded

Bag #119 July 9, 1963. South trench, exterior. 126'-136' E. 0-3" (Gerald Spry)

119-1 Partly forged fish or muskrat spear. 2" long 1/2" dia.
119-2 Ornamental iron?
119-3 Clay pipe stem fragment
   Discarded
1 rosehead nail
1 piece of strap iron
1 piece of window glass
1 piece of recent china

Bag #120 July 9, 1963. South trench exterior. 126'E. 3-6"

1 rosehead nail
3 pieces of scrap iron
Discarded

Bag #121 July 9, 1963. South trench exterior. 126'E. 3-6"

121-1 Enamelled iron kettle lug
121-2-4 Clay pipe stem fragment
121-5 44 cal. S.C. cartridge W.R.A. no. = 44 W.C.F.

172-4 Iron strap-buckle fragment
172-5 Pick-up section of a lime green bottle
172-6 Unidentified iron object, Iron strap, 1/4" x 1 5/8" with three deeply punched bosses
172-7-8 Clay pipe stem fragments
172-9 Clay pipe stem fragment, tooth worn.
172-10 Clay pipe stem bit
172-11 2 lead shot .15 and .20 caliber average dim.
Discarded:
2 pieces of iron forge scrap
1 C.C.C. imitation rosethead spike
1 tiny fragment of a clay pipe bowl
3 pieces of glass
6 rosethead nails

Bag s173
July 10, 1963. South trench, exterior. 246' E., 6-9"

173-1 Broken brass side plate from a flintlock musket or fusil, with an engraved stand of arms.
173-2 Cock screw from a flintlock fusil
173-3 Fragmentary iron plint
173-4 Iron hook with a shank ending in a corkscrew
173-5 Iron corkscrew or single-twist gun worm
173-6 2 double end nails
173-7 Unidentified iron object, probably forging scrap
Bag #173  
173-8  Prefored iron strap, similar to 172-6  
173-9  Iron files section  
173-10  Small scrap of crudely checkered bone-knife handle?  
173-11  Clay pipe bowl fragment- unmarked  
173-12  Clay pipe bowl fragment T.D. brand  
173-13-17  Clay pipe stem fragments  
173-18  Bottom from a square mould-blown, pontil marked soda glass bottle.  
173-19  Neck and mouth of the above  
Discarded:  
   3 roosehead nails  
   4 common sq. nails  
   4 shards of dark olive bottle glass  
   1 piece of fused glass or clinker  
   2 small pieces of iron forged scrap  
   2 pieces of strap iron  
   9 small scraps and fragments of bottle copper  
   1 shard of white china (ironstone)  
   3 fragments of soda glass bottle  
   1 piece of moderately old window glass  
   2 pieces of clear glass, catsup bottle.  

Bag #174  
July 10, 1963. South trench exterior. 276' E., No depth given  
1 shard of white china, ironstone.  
Discarded:  

Bag #175  
July 11, 1963. West trench exterior. 70 N., 5' W., 18-24'  
1 piece of dark olive bottle glass  
1 small piece of blue-green bottle glass  
1 piece of modern window glass  
2 roosehead nails  
Discarded:  

Bag #176  
July 11, 1963. West trench, exterior. 70 N., 5' W., 24-30'  
2 roosehead nails  
1 piece of modern window glass  
Discarded:  

Bag #177  
July 11, 1963. West trench, exterior. 70' N., 30-36'  
177-1  Band: 3 white seed beads and 1 blue seed bead.  
177-2  Clay pipe stem fragments  
Discarded:  
   1 section of strap iron  
   1 roosehead nail  
   1 piece of modern window glass  

Bag #178  
July 11, 1963. South trench, exterior. 126' E., 25' N., 6-9'  
178-1  1 copper tinkler  
178-2  1 large iron fish hook  
178-3  Slotted section of 1/16" copper strip  
178-4  Clay pipe spur, marked N.W.  
178-5-6  Clay pipe stem fragments  
178-7  Clay pipe bowl fragment
178-8
Iron gilt head, 1/2" x 5/8"
Discarded:
1 fragment of fine grained basalt
4 rosehead nails
2 pieces of iron forge scrap
1 piece of kettle copper.

Bag #179
July 11, 1963. South trench exterior. 136° E., 6-9"

179-1
Large tubular, translucent blue, faceted bead
179-2
Iron knife haft
179-3-5
Clay pipe stem fragments
179-6
Chipped scrap of kettle copper, 1" x 4 3/4"
179-7-8
1 chip of gray chert, 1 of red jasper
Discarded:
14 very fragmentary rosehead nails
9 scraps of kettle copper
1 sherd of buff china
1 tooth of an immature large mammal
1 piece of fused glass or clinker

Bag #180
July 11, 1963. South trench exterior. 126° E., 35° N. 6-9"

180-1
Beads: 23 white seeds, 1 white cane bead and 1 white barrel bead
2 blue and red seed beads.
180-2
Modern type strap buckle
180-3
Line green bottle mouth with appliqued lip
180-4
Clay pipe stem fragment
180-5
Clay pipe stem bit
180-6-7
Clay pipe stem fragments
180-8
Clay pipe stem bit
180-9
1 piece of milk glass
Discarded:
8 rosehead nails
5 pieces of kettle copper
5 pieces of iron forge scrap
1 small stone fragment

Bag #181
July 11, 1963. South trench, exterior. 136° E., 6-9"

181-1
1 copper tinkler
181-2
Complete barrel hoop, 43" long
181-3-7
Clay pipe stem fragments
181-8
Large animal joint
181-9
(1500) Vesselware sherd
Discarded:
2 rosehead nails
6 scraps of kettle copper
3 pieces of modern window glass
1 piece of old window glass
1 piece of fused glass or clinker

Bag #182

182-1
6 white m.&.g beads, 2 blue and 1 red seed beads, and 3 white cane beads.
182-2
Kettle copper arrow head
182-3-7
Clay pipe stem fragments

1 common sq. nail
1 chip of olive green bottle glass

Bag #193  July 15, 1963.  Gata area, 40'E, 10M', surface

195-1  Kettle copper with hollow riveted patch
195-2  Round iron washer, 1 3/8" dia.
Discarded:
1 rooshad nail
1 R.M.U.M. Hornet center fire cartridge casing
1 piece of strap iron
2 pieces of kettle copper
1 piece of disposable beer bottle glass
1 shard of gray glazed earthenware crock
1 piece of fused glass or clinker

Bag #195  July 15, 1963.  Gata area 50'E, 10'M', surface
1 fused glass or clinker
3 pieces of modern bottle glass
1 piece of green plastic
1 small scrap of kettle copper
Discarded:

Bag #197  July 15, 1963.  Northwest E, 1/2',

197-1-2  2 clay pipe stem fragments
Discarded:
1 rooshad nail
1 copper cosmetic compact bottom

Bag #190  July 15, 1963.  South trench exterior, 126'E, 6-9'

198-1  Clay pipe stem, bowl juncture, spur marked W.O.
198-2  Clay pipe bowl fragment
198-3  Clay pipe stem fragment
198-4  Oval shaped section of copper bar
198-5  Ornamental copper of brass fragment
Discarded:
13 rooshad nails
1 scrap of kettle copper
1 piece of glass
1 piece of fused glass or clinker
1 tiny chip of gray chalk

Bag #199  July 15, 1963.  South trench exterior, 126'E, 33'M, 6-9'

199-1-7  Clay pipe stem fragment
199-8  Clay pipe stem bit
199-9  12 tiny white seed beads, 30 white seed beads, 6 white cane beads,
2 blue and 1 red seed bead, 1 white seed bead with red and green
quartered stripes, 1 small white globular bead
199-10  "D" shaped fire etch
199-11  Eye end of large hollow copper

Bag #203  July 15, 1963. South trench, exterior. 196 E., 6-9"

203-1  3 Clay pipe stem fragments
203-4  Clay pipe stem bit
203-5  Lamp of heavily corroded copper, possibly of native origin.
       Discarded:
       3 roosehead nails
       1 common sq. nail
       1 piece of water shredded plate glass, probably of lead glass
       1 piece of fused glass or clinker

Bag #205  July 15, 1963. South trench exterior. 196 E., 9-12"

209-1  Large piece of iron forge strap
       Discarded:
       3 pieces of moderately old window glass
       1 shard of ironstone
       1 piece of clear lead bottle glass
       1 piece of fused glass or clinker
       3 roosehead nails

Bag #210  July 15, 1963.

210-1  108 white seed beads, 1 translucent blue cane bead, 2 translucent
       blue seed beads, 50 blue seed beads, 1 black cane bead, 11 red
       seed beads, 3 white cane beads, 1 white barrel bead and 2 white
       globular beads.
210-2  Small cluster of fire-fused seed beads
       Discarded:
       2 roosehead nails
       2 pieces of modern bottle glass
       1 shard of blue marked china
       1 piece of ironstone
       1 piece of dark-olive bottle glass

Bag #211  July 15, 1963. South trench exterior. 206 E., 6-9"

211-1  17 white seed and 5 blue seed beads, 5 white cane beads.
211-2  Clay pipe bowl fragment
211-3  Clay pipe bowl and stem junctures, No identifying marks
211-6  Clay pipe stem fragments
211-9  Pieces of old green window glass
       Discarded:
       10 roosehead nails
       4 common sq. nails
       7 pieces of old window glass (see 211-9)
       17 pieces of modern bottle glass
       16 pieces of modern window glass
       Neck, shoulder and bottom of 1890's type medicine bottle. Would
       break with turned over lips.

Bag #212  July 15, 1963. South trench, exterior. 206 E., 9-12"

212-1  5 white seed beads, 1 white cane bead, 6 blue seed beads and 1 red seed bead
       Copper or brass item, round centered, with three, pirouet leaves
       on bladed.
212-3  Brush or copper button, 5/32" dia.
212-4  Clay pipe bowl fragment, with an unidentified brand.
212-5  Clay pipe stem fragments
212-7  Clay pipe stem bit
Discarded:
13 rosehead nails
3 scraps of bottle copper
1 "O" shaped piece of 1/4" iron wire, 7 3/4" long
6 pieces of modern bottle glass
3 pieces of clear greenish window glass
16 pieces of modern window glass
1 piece of dark olive bottle glass

Bag #213  July 15, 1963. South trench, exterior. 206' E., 12-15"

213-1  Clay pipe stem fragment
213-2  Portion of dark olive glass bottle mouth
213-3  Small fragment of sheet lead.
Discarded:
2 rosehead nails
2 pieces of modern window glass
2 pieces of modern clear bottle glass
1 fragment of bottle copper
1 shard of buff-glazed mixing bowl.

Bag #214  July 15, 1963. South trench, exterior. 216' E., 12-15"

214-1  4 white and 2 blue seed beads, 2 white cane beads
214-2  Lip fragment of a dark olive green glass bottle (beach eroded)
214-3  1 possible brown flint gun spall fragment
Discarded:
2 rosehead nails
2 pieces of modern clear bottle glass
4 pieces of modern window glass

Bag #215  July 15, 1963. South trench, exterior. 221' E., 6-12"

215-1  Jack knife handle

Clay pipe stem fragments
Discarded:
5 pieces of dark olive green bottle glass
9 rosehead nails
3 pieces of bright green modern bottle glass
2 pieces of window glass
2 chips of white china, probably ironstone
5 pieces of clear modern bottle glass

Bag #223

July 16, 1963. Drain trench, No. of Blockhouse

223-1
Bottom of a dark olive green glass bottle with a moderately high conical, kick-up.

223-2-4
Clay pipe stem fragments
Discarded:
2 fragments of deer pelvis
2 rosehead nails
1 C.C.C. imitation rosehead spike
1 piece of fused glass or clinker
1 piece of modern window glass
3 pieces of glass from a pint whiskey bottle. (screw top)
1 chip of white ironstone china

Bag #224

July 16, 1963. Drain trench, No. of Blockhouse, Sep. #32 3-4

224-1-3
Clay pipe stem fragments

Bag #225

July 16, 1963. Drain trench, No. of Blockhouse 4-5

225-1
Dark olive green glass fragment, from a bottle, kick-up.

225-2
Reddish-brown glass fragment of heavy terracotta

Bag #226

July 16, 1963. South trench, exterior. 100' E., 7' N., 5-6

226-1
1 white seed and 1 white cane beads.
Discarded:
1 piece of fused glass
1 piece of a broken Coca-Cola bottle

Bag #227

July 16, 1963. South trench, exterior. 126' E., 9-12

227-1
Clay pipe bowl fragment, 3/4" broad

227-2-5
Clay pipe stem fragments

227-6
Clay pipe stem bit

227-7
Blue decanted grayish-white china

227-8
Fragment of a 1/16" thick copper hinge

236-12  Fragments of large animal bones.

Discarded:
7 rosette nails
4 common sq. nails
1 shard of white ironstone china
1 piece of olive green bottle glass

Bag #237  July 16, 1965. South trench, exterior. 336' E., 9-12"

237-1  1 blue and three white seed beads, 1 white cane bead
Discarded:
3 rosette nails
8 common sq. nails

Bag #238  July 16, 1965. South trench, exterior. 336' E., 12-15"

238-1  7 blue, 20 white seed beads, 10 white cane beads
238-2  Upper vice jaw from a flint look cook
238-3-5  Clay pipe bowl fragments
238-6  Clay pipe stem base

Discarded:
His fire cartridge .42 calibre short, Marked H.
Piece of a large bluish green bottle, ca. 1840-1860

Bag #239  July 16, 1965. South trench, exterior. 336' E., 12-15"

239-1  4 blue and 14 white seed beads, 1 white cane bead, 1 yellow-glassed globular clay bead with a blue sprig design.
239-2  "Y" shaped fire steel of light manufacture.
239-3  Clay pipe bowl fragment
239-4-7  Clay pipe stem fragments
239-8-9  Clay pipe stem bits
Discarded:
1 common sq. nail
.22 calibre short rimfire cartridge
2 pieces of modern window glass
1 piece of partially melted clear glass bottle

Bag #240  July 16, 1965. South trench, exterior. 336' E., 9-12"

240-1  1 small fragment of a honey beig gunflint
240-2  1 small lead area
240-3  Lead musket ball .55 calibre
240-4-6  Clay pipe bowl fragment
240-7  Clay pipe stem showing tooth wear
240-8-7  Clay pipe stem fragments
240-8-9  Shard of blue on white china, soft paste.
Discarded:
5 rosette nails
5 pieces of modern window glass
1 piece of moulded imitation cut glass
1 piece of brown beer bottle glass
1 piece of dark olive green bottle glass
1 shard of white ironstone china
1 piece of thin, clear bottle glass
1 piece of brown glazed earthen ware crock
1 piece of fused glass or clinker.

Bag #241  July 17, 1963.  Gate Area, 10' E., 50' S., 2nd layer.
2 pieces of modern clear bottle glass
1 rosehead nail
1 piece of fused glass or clinker.
Discarded:

Bag #242  July 17, 1963.  South trench, exterior.  100' E., 12-15".
3 rosehead nails
1 piece of modern screw top glass jar.
Discarded:

Bag #243  July 17, 1963.  South trench, exterior.  100' E., 6-9"

243-1  1 red , 2 blue and 12 white seed beads.
243-2  Clay pipe stem fragment
243-3  Massonated scrap of kettle copper
243-4  Iron forge scrap
Discarded:
5 rosehead nails
1 modern lead fishing sinker with a wire shank
1 piece of dark olive green glass from a sq. bottle
1 animal tooth
1 chip of white ironstone china
2 pieces of clear bottle glass

Bag #244  July 17, 1963.  South trench, exterior.  100' E., 9-12"

244-1  Clay pipe stem fragment
Discarded:
1 piece of modern clear bottle glass
1 fragment of a rosehead nail.
3 fragments of a large animal tooth.

Bag #245  July 17, 1963.  South trench, exterior.  110' E., 5-9"

245-1  19 white seed beads, 2 black and 3 white cane beads and 1 small, w. its globular bead.
245-2-4  Clay pipe stem fragments
245-5  Clay pipe bit
245-6  1 musket ball .55 calibre
245-7  Black on white transfer china
245-13  Clay pipe stem bit
Discarded:
1 large shard of decorated china, modern
1 small chip of white ironstone china
5 rosehead nails
1 piece of window glass
1 piece of fused glass or clinker.

Bag #246  July 17, 1963.  South trench, exterior.  136' E., 12-15"

246-1  1 white seed and 2 white cane beads.
246-2  Clay pipe bowl and stem juncture.

301-4  Clay pipe stem fragment
Discarded:
1 round head nail
1 shard of white ironstone chime
2 pieces of old window glass

Bag #302
July 19, 1963, South trench, exterior. 326'E., 21-24"n
1 piece of olive green bottle glass from a sq. bottle
1 piece of window glass
1 piece of blue-green bottle glass
2 common sq. nails
Discarded:

Bag #303
July 19, 1963, South trench, exterior. 336'E., 9-12"
303-1
1 white cane bead
303-2-3
Clay pipe stem fragments
Discarded:
1 common sq. nail

Bag #304
July 19, 1963, South trench, exterior. 346'E., 12-15"
304-1
1 red, 2 turquoise blue, and 9 white seed beads, 2 white cane beads,
and 1 white barrel bead
Discarded:
1 piece of 1/8" plate glass

Bag #305
July 20, 1963, Dock Area. 0'E., 30'E., 9-12"
305-1
Door lock belt
305-2
Diamond shaped piece of bottle copper
305-3-5
Clay pipe stem fragments
305-6
Tip of a half round iron file
Discarded:
2 round head nails
1 common sq. nail
1 piece of iron forge scrap
3 pieces of strap iron
4 scraps of bottle copper
1 piece of modern window glass
5 pieces of clear bottle glass
1 piece of 1/4" plate glass mirror
1 round bone
1 piece of fused glass or clinker

A short 1 1/8" stubby punch.
306-5
Kettle copper ear lugs.
Discarded:
6 round head nails
5 pieces of strap iron
2 pieces of iron forge scrap
10 pieces of modern window glass
10 scraps of kettle copper
Bag #307  
307-1  Frizen spring from a flintlock fusil  
307-2  Lower section of a square flintlock cock  
307-3  Hammer forged ferrule-tip for setting pole?  
307-4  Clay pipe stem fragment  
307-5  Octagonal kettle copper washer 1 1/8" x 1 1/16"  
307-6  Kettle copper diamond shape  
Discarded:  
6 rosehead nails  
1 piece of iron forge scrap  
14 pieces of window glass  
1 piece of clear bottle glass  
7 scraps of kettle copper  
1 piece of fused glass or clinker  
1 .22 caliber short cartridge case, Paper I

Bag #308  
308-1  Broken open end wrench?  
308-2  Kettle copper scrap with 6 holes punched under rim.  
308-3  Clay pipe stem fragment  
Discarded:  
1 rosehead nail  
1 common sq. nail  
1 lbs. of clinkers  
1 broken chisel point nail  
1 piece of strap iron  
1 piece of iron forge scrap  
2 scraps of kettle copper  
1 piece of window glass

Bag #309  
309-1  Kettle copper with rivet backed with octagonal washers  
309-2  Kettle copper scrap with patch  
309-3  Numbered  
309-4  Cutting edge from axe  
309-5  Modified iron rasp  
309-6  Iron nail scar  
309-7  Clay pipe stem fragments  
Discarded:  
5 pieces of strap iron  
1 piece of iron forge scrap  
6 scraps of kettle copper

Bag #310  
July 20, 1963.  Deck Area.  O'N., 30'E., 9-12"  
310-1  Dog bone, Kettle lid lug  
310-2  Iron setting pole point  
Discarded:  
1 piece of strap iron  
9 scraps of kettle copper  
5 pieces of window glass  
1 clinker

Bag #311  
July 20, 1963.  Deck Area.  O'N., 30'E., 9-12"  
311-1  One 1/8" thick copper washer, 3/4" in dia.  
311-2  1 light iron pinole
Bag #312 July 20, 1963, Dock Area, O'H., 30' E., 9-12"  
312-1 Large iron, half round rasp  
312-2 Flattened iron loop 1/8" x 3/8"  
312-3 A small plate of bone  
Discarded:  
5 resheared nails  
9 small scrap of kettle copper  
1 small piece of clear modern bottle glass  
2 pieces of window glass  
1 clinker

Bag #313 July 20, 1963, Dock Area, O'H., 50' E., 9-12"  
4 resheared nails  
1 small scrap of kettle copper  
1 piece of modern window glass  
Discarded:  

Bag #314 July 20, 1963, Dock Area, O'H., 20' E., 12-15"  
314-1 Section of a heavy iron file  
314-2-3 Clay pipe stem fragments  
Discarded:  
4 resheared nails  
1 common sq. nail  
12 pieces of iron forge scrap  
1 piece of strap iron  
2 pieces of modern bottle glass  
2 pieces of modern window glass  
4 scraps of kettle copper  
1 piece of gray-glassed earthen ware crock  
1 piece of clinker

Bag #315 July 20, 1963, Dock Area, O'H., 20' E., 15-18"  
315-1 Small coil of brass wire approx. 18 gauge  
Discarded:  
2 resheared nails  
2 pieces of modern window glass  
2 clinkers  
1 piece of native float copper

Bag #316 July 20, 1963, Dock Area, O'H., 40' E., 6-9"  
316-1 Iron spring eye  
316-2 Lettle copper strips, twisted together  
316-3-6 Clay pipe stem fragments  
Discarded:  
14 resheared nails  
2 common sq. nails
1 piece of iron forge scrap
7 scraps and pieces of kettle copper
leather, best edge with machine made bullpen eyelets
6 pieces of modern window glass
5 pieces of modern bottle glass, clear
4 pieces of brown beer bottle glass
1 clinker
2 shards of chine, modern, ca. 1920-30, chine

Bag #317
July 20, 1963, Dock Area. O'E., 40'H., 12-15"
317-1
Littered iron eye, skillet handle?
Discarded:
15 rosehead nails
2 pieces of strap iron
1 piece of forge iron scrap
13 pieces of kettle copper
5 pieces of modern brown beer bottle glass
10 pieces of clear modern bottle glass
12 pieces of modern window glass, one was burned

14" section of .50 calibre gun barrel (smooth bore)  
1 unidentified iron object  
Broken iron splitting wedge  
Clay pipe stem fragment  
Discarded:  
5 common sq. nails  
2 scraps of kettle copper  
3 pieces of modern bottle glass  
2 pieces of modern window glass  

**Bag #359**  
July 23, 1963. Dock Area. O'E., O'E., 6-9"  
3 white cane heads  
Clay pipe stem fragments  
Discarded:  
3 roosehead nails  
1 common sq. nail  
1 scrap of kettle copper

Bag #365  July 23, 1963.  North trench, interior.  130'E.  3-6"  
365-1-2 Clay pipe stem fragments

Bag #366  July 23, 1963.  North trench, interior.  130'E.  6-12"  
366-1  1 white seed bead  
Discarded:  
1 rosehead nail  
1 piece of modern window glass  
1 piece of clear bottle glass, ca. 1890 (sq. bottle)

Bag #367  July 23, 1963  North trench, interior.  130'E.  12-15"  
367-1 Clay pipe stem fragment  
Discarded:  
2 rosehead nails  
1 stone fragment

Bag #368  July 23, 1963.  South trench, interior.  140'E.  3-6"  
368-1  1 white seed and 1 white cane bead  
368-2 Clay pipe stem fragment  
368-3 Broken section of a short heavy iron bolt  
368-4 Fish flute or sale - probably made of native copper  
Discarded:  
4 rosehead nails  
1 common sq. nail  
1 center fire cartridge, unmarked, about .44 cal.  
6 small scrapes of kettle copper  
2 fragments of modern brown glass bottle  
7 pieces of modern window glass  
3 pieces of clear, modern bottle glass  
1 tiny chip of anythiste glass  
1 piece of dark olive green bottle glass  
1 one inch segment of iron water pipe, 7/8" int. dia.

Bag #369  July 23, 1963.  South trench, exterior.  145'E., 36-40"  
Discarded:  
1 piece of strap iron  
1 piece of window glass  
1 clinker

Bag #370  July 23, 1963.  South trench, interior.  150'E., 3-6"  
370-1 Broken "C" shaped fire steel  
370-2 Clay pipe stem bit  
370-3 1 piece of probable iron forge scrap  
Discarded:  
7 rosehead nails  
2 common sq. nails  
9 pieces of modern window glass  
2 scrapes with 2 pieces of copper kettle  
2 pieces of clear bottle glass - bottle mouth ca. 1865-1900  
1 fragment of animal bone  
1 clinker

Bag #371  July 23, 1963.  South trench, exterior.  166'E., 9-22"
571-1  Fragment of old window glass
571-2  Iron tang piece with a counter sunk screw hole
       Discarded:
       2 pieces of window glass, 1 old, 1 modern
       1 clinker

572-1  Clay pipe bowl fragment
572-2  Bar of iron fuse scrap  0 3/4 x 1 1/6 x 5/16"
572-3  Neck and neck of a small, brown clear glass bottle
       Discarded:
       7 roosehead nails
       1 modern machine part
       5 pieces of white ironstone china
       5 pieces of modern bottle glass
       2 pieces of cast iron stove
       1 scrap of kettle copper

Bag #373  July 23, 1963.  South trench, interior.  200'E,  3-6"

573-1  Piece of a square amythestine glass bottle
573-2  Shard of fine, hard past white china
       Discarded:
       2 roosehead nails
       1 piece of strap iron
       1 piece of copper kettle rim
       3 pieces of cast iron stove
       5 pieces of 1 plate glass, modern

Bag #374  July 25, 1963.  South trench, interior.  200'E,  5-6" Fern. 945

574-1  Flint lock main spring
574-2  Copper tinker
574-3  Clay pipe stem fragment, with breaking score mark
574-4-18  Clay pipe stem fragments
574-19-20  Clay pipe stem bits
574-21  8 roosehead nails
       Discarded:
       1 scrap of kettle copper

Bag #375  July 25, 1963.  South trench, interior.  210'E,  3-6"

575-1-2  Clay pipe stem fragments
575-3-4  Clay pipe stem bits
       Discarded:
       4 roosehead nails
       4 common sq. nails
       12 pieces of modern window glass
       8 pieces of clear, modern bottle glass
       1 piece of bluish green flat medicine bottle 1860's
       1 piece of kettle copper
       1 piece of cast iron stove
       1 shard of brown glazed earthenware crock
       1 fragment of animal fib bone
       1 piece of leather
Bag #376  
July 23, 1963. South trench, interior. 220° E., 3-6"

376-1 Clay pipe bowl and stem juncture with T.D. marked spur
376-2 Broken mid-sea pipe bowl
376-3 Small piece of yellow brick
376-4 Mouth and neck of a clear, blown glass bottle (1850's)

Discarded:
- 6 rosehead nails
- 2 common sq. nails
- 13 pieces of modern window glass
- 4 pieces of clear bottle glass
- 1 sherd of white ironstone china
- 2 pieces of cast iron stove
- 1 clinker
- 2 pieces of moulded white china (1860's)
- 1 ceramic insulator-tubular

Bag #377  
July 23, 1963. South trench, interior. 220° E., 3-6"

377-1 Harmonica fragment
377-2 Plated wood umbrella shaft and handle? stamped with two cartouches
  1 bearing "O.S." the other, "42"

Discarded:
- 1 C.C.C.C. imitation rosehead spike

Bag #378  
July 23, 1963. South trench, interior. 240° E., 3-6"

Discarded:
- 3 rosehead nails
- 1 clinker

Bag #379  
July 23, 1963. South trench, interior. 240° E., 3-6"

379-1 1 pale blue seed, 12 turquoise seed and 1 red seed beads. 130 white seed beads; 1 black and 6 white cane beads and 2 barrel beads.
379-2 1 each eroded cast button with high surface relief
379-3 1 clay pipe bowl fragment, marked W.C.
379-4-6 Clay pipe basin fragment
379-7 Clay pipe stem fragment, whittled toward each end
379-8-17 Clay pipe stem fragments
379-18 Iron file tang and heel
379-19 Round, double tapered nail
379-20 Short iron wedge
379-21 Double end nail with no offset
379-22 1 broken strap iron rivet pin with 2 dia. rivet
379-23 Broken copper hinges piece

Discarded:
- 15 rosehead nails
- 2 common sq. nails
- 1 piece of iron forge scrap
- 7 scraps of bottle copper
- 3 fragments of animal bone
- 31 pieces of modern window glass
- 2 sherds of white ironstone china
- 1 stone
- 1 clinker
- 1 center fire shotgun shell "Winchester Leaders, No. 12."

Bag #360
July 23, 1963. South trench, interior. 250' E., 3-6".

380-1  1 red, 2 blue and 7 white seed beads.
380-2  Clay pipe bowl fragments, with F.D. Brand
380-3  Basketball. .58 cal.
380-4  Double end off-set nail
Discarded:
5 roundhead nails
2 pieces of cast iron stove
2 pieces of iron forge scrap
4 scraps of kettle copper
20 pieces of clear, modern bottle glass
5 pieces of window glass
1 piece of modern, brown bottle glass
1 clinker

Bag #381
July 23, 1963. South trench, interior. 260' E., 3-6".
Discarded:
1 common sq. nail
1 piece of clear, modern bottle glass
2 pieces of brown, modern bottle glass
1 sherd of white ironstone china
1 sherd of buff-colored mixing bowl
1 center fire cartridge marked S.A. Co., 1903 B.A.

Bag #382
July 23, 1963. South trench, exterior. Fireplace at 266' E.
Discarded:
1 roundhead nail
1 common sq. nail
6 pieces of window glass
1 fragment of leg bone from a large animal (moose?)
1 sherd of white ironstone china
1 piece of cinnamon brown earthen ware crock

Bag #383
July 23, 1963. South trench, exterior. 266' E., 21-24"

383-1  1 small brass thimble
Discarded:
2 roundhead nails
1 common sq. nail
1 chip of white ironstone china
1 piece of dark-olive green bottle glass
4 pieces of window glass
1 small fragment of animal bone

Bag #384

384-1  1 white seed bead and 2 white cane beads
384-2-4  Clay pipe bowl fragments
384-5  Clay pipe spur marked T.D.
384-6-12  Clay pipe stem fragments
384-15  Bone handled jack-knife of no great antiquity.
Discarded:
5 roundhead nails
5 common sq. nails
5 wave worn fragments of clear glass
2 blue-green bottle fragments (ca. 1830's)
2 pieces of window glass
2 pieces of animal bone
3 sherds of white ironstone china
**Bag #395**  
July 25, 1963. SOUTH TRENCH, INTERIOR. UNMARKED

- **305-1**: Bottle mouth with laid-on lip, light olive green glass  
  Discarded:
  - 8 rosehead nails
  - 15 common sq. nails
  - 13 pieces of modern window glass
  - 2 pieces of dark olive green glass
  - 2 pieces of ¾" plate glass
  - 2 scraps of bottle copper
  - 1 fragment of cast iron

**Bag #396**  
July 24, 1963. DOCK AREA 0'E., 0'B., 23"-26"

- **396-1**: Clay pipe bowl fragment
- **396-2**: Clay pipe stem fragment
- **396-3**: Fragment of barnacle shell  
  Discarded:
  - 1 common sq. nail
  - 1 piece of strap iron
  - 1 scrap of bottle copper
  - 2 pieces of blue-green bottle glass (ca. 1860-80)

**Bag #397**  
July 24, 1963. DOCK AREA 0'E., 10'B. No depth

- **397-1**: 2 turquoise and 4 white seed beads, 3 white cone beads
- **397-2**: Clay pipe bowl fragment
- **397-3**: Clay pipe stem fragments
- **397-4**: Small fragment of polished bone  
  Discarded:
  - 2 rosehead nails
  - 3 common sq. nails
  - .32 caliber rim fire cartridge casing
  - 1 fragment of unvented light bulb glass
  - 1 shard of brown-glazed earthenware cream
  - 1 clinker

**Bag #398**  
July 24, 1963. DOCK AREA 0'E., 10'B. No depth

Discarded:
- 1 12" inch machine made bolt with three washers and nut
- 1 cast iron stove part

**Bag #399**  
July 24, 1963. DOCK AREA 0'E., 20'B. 18-21"

- **399-1**: 1 blue and 2 white seed beads, ¾ of a globular bead, 5/16" in dia. of a dark material, studded with 10 bluish white inlaid dots.
- **399-2**: Clay pipe bowl and stem juncture, spur marked T.D.
- **399-3**: Clay pipe bowl fragments
- **399-4**: Clay pipe stem fragments
- **399-5**: Clay pipe stem bit
- **399-6**: Iron hook from a mate or dipper handle  
  Discarded:
  - 6 rosehead nails
  - 6 scraps of bottle copper
  - 1 piece of iron forging scrap
  - 3 pieces of modern window glass
  - 3 pieces of modern bottle glass
  - 1 clinker
Bag #190  July 24, 1963.  Deck Area.  0'N., 20'W., 10-21"  

390-1  Clay pipe bowl fragment  
390-2  Clay pipe stem fragment  
390-3  A single solid copper rivet  
390-4  A portion of a sheet copper kettle lug with two solid copper rivet in situ.  
390-5  Triangular scrap of kettle copper with rivet and copper rivet pads  
390-6  A lapped ring of approx. 3/16" iron, 1 1/3" x 2"  
390-7  A small strap of iron with a rounded flancl, 3/4" in dia. pierced  
with a 1/8" hole  
390-8  1 piece of iron, shaped like a blade blank for a trade axe 3 3/4 x 2 1/8 x 5/8"  
390-9  Iron staple  
            Discard  
6 rosetted nails  
1 section of iron wire  
2 pieces of strap iron  
15 scraps of kettle copper  
5 pieces of modern window glass  
1 piece of iron forging scrap  
1 clinker  

Bag #191  July 24, 1963.  Test pit.  120'E corner "A" No depth  

391-1  1 white seed bead.  
            Discarded  
2 scraps of kettle copper  
1 clinker  
1 chip of flint  
1 small scrap of iron  

Bag #192  July 24, 1963.  South trench, exterior.  test trench.  126'E.  

392-1  Clay pipe bowl fragment  
392-2  Small chip of gray flint—possibly from a gun spall  
            Discarded  
1 rosetted nail  
1 common sq. nail  
4 pieces of modern window glass  
1 piece of styrethylene bottle glass  
1 piece of clear, modern bottle glass  

Bag #193  July 24, 1963.  South trench, interior.  200'E., 6-9" Fea. 143  

393-1-2  Clay pipe bowl fragments  
393-3-4  Clay pipe stem fragments  
393-7  A light screw with a vertically flattened head perforated with a  
3/16" dia. hole.  Overall length 1 1/16"  
393-8  A flat sheet of iron with unidentified purpose.  It is oval shaped  
and perforated with 3 holes.  The top of the oval is serrated and  
It seems probable that the artifact was fabricated from a portion  
of a wood saw blade.  
            Discarded  
2 pieces of clear 1/8" plate glass  
2 chips of animal bone
Bag #594  July 24, 1963. South trench, interior. 200' E., 6-9" Pest. #43

394-1 Clay pipe bowl fragment marked F.D.
394-2-3 Clay pipe stem and stem bit fragments. 394-2 scored for breaking.
394-4 Copper tinker
394-5 Dog-bone shaped copper kettle lid lug
Discarded:
3 common sq. nails
2 scraps of kettle copper
1 small fragment of calcined bone

Bag #595  July 24, 1963. South trench, interior. 200' E., 9-12" Pest. #43

395-1-4 Clay pipe stem fragments
395-3-7 Clay pipe stem bits
395-8 Triangular kettle copper pendant, pierced at its apex.
395-9 Fish bones
Discarded:
2 scraps of kettle copper
4 pieces of window glass (burned and pumbled)
1 fragment of animal bone

Bag #596  July 24, 1963. South trench, interior. 210' E., 6-9"

396-1 Clay pipe bowl fragment; marked T.D. on bowl and spur
396-2-3 Clay pipe bowl fragments
396-7-1 Clay pipe stem fragments
396-22-24 Clay pipe stem bits
396-25 1 blue sod bead
396-26 1 9/16" dia. copper kettle lid lift ring
396-27 Iron reinforcing pull or kettle ear
396-28 Iron staple
396-29 Forged and lapped iron reinforcing dia. 3/4" dia.
396-30 Silver Wrap tinker, 9" long
Discarded:
18 rosehead nails
2 common sq. nails
2 pieces of kettle copper
21 pieces of modern window glass
3 shards of white ironstone shisa
1 shard of buff-glazed mixing bowl
1 piece of modern catnap bottle
2 pieces of clear, modern bottle glass
1 piece of a small mould-blown sq. medicine bottle
1 12 gauge shotgun shell 20-M.G. Ch. Nitro slug

Bag #597  July 24, 1963. South trench, interior. 210' E., 9-12"

397-1 10 turquoise, 1 medium blue and 45 white seed beads; 1 medium blue and 13 white cane beads. 1 dark stick bead with a double zig-zag scroll in laid on yellow glass. 1 small white globular bead, 1 small white barrel bead and 1 large white barrel bead with a green inlaid line at each end.
397-2-6 Clay pipe stem fragments
397-7 Clay pipe stem bit
397-8 Copper tinker
Discarded:
6 rosetted nails
1 common sq. nail
2 pieces of dark olive green bottle glass
3 pieces of clear modern bottle glass
5 pieces of clear 1" plate glass
4 pieces of window glass
1 clincher

Bag #398
July 24, 1963 South trench, interior. 220'E., 3-6"
398-1-4 Clay pipe stem fragments
398-5 Broken trap spring
398-6 Hollow iron button, 3/4" in dia.
398-7 Clay pipe bowl fragment
398-8 Clay pipe stem fragment
398-9 Small double-and-off-set nail
398-10 2 strap iron sections, the ends, interlocked and folded back on themselves to form loops
398-11 A small piece of polished red mica of a good dark-red quality
398-12 1 edge serrated and with a doubled zig-zag line scored into each side
398-13 2 strap iron sections, the ends, interlocked and folded back on themselves to form loops
398-14 A small piece of polished red mica of a good dark-red quality
398-15 1 edge serrated and with a doubled zig-zag line scored into each side
Discarded:
6 rosetted nails
2 common sq. nails
1 sink drain washer
1 tail gate hasp from a truck or trailer
3 .22-20 center fire cartridge cases, REMINGTON
2 pieces of strap iron
1 piece of iron forge noose
5 pieces of pale lime glass, apparently modern
15 pieces of window glass
1 piece of brown, bear bottle glass
1 piece of light bluish green bottle glass, late 1880's

Bag #399
July 24, 1963 South trench, interior. 230'E., 3-4"
399-1 Discarded:
1 rosetted nail
3 pieces of clear modern bottle glass
Discarded:
4 rosetted nails
7 common sq. nails
1 shard of white iridescent glass
4 pieces of thick 1" clear bottle glass
1 brown bear bottle fragment
12 pieces of window glass
1 small chip of eyeshielding glass
1 antler bone fragment

Bag #400
July 24, 1963 South trench, interior. 240'E., 6-7"
400-1 Clay pipe bowl fragment
400-2 Clay pipe stem fragment
400-3 Small double-and-off-set nail
400-4-5 2 strap iron sections, the ends, interlocked and folded back on themselves to form loops
400-6 A small piece of polished red mica of a good dark-red quality
1 edge serrated and with a doubled zig-zag line scored into each side
Discarded:
4 rosetted nails
7 common sq. nails
1 shard of white iridescent glass
4 pieces of thick 1" clear bottle glass
1 brown bear bottle fragment
12 pieces of window glass
1 small chip of eyeshielding glass
1 animal bone fragment

Bag #401
July 24, 1963 South trench, interior. 250'E., 9-12"
401-1 9 blue and 25 white seed beads. 1 black and 6 white coin beads.
1 white barrel bead and 1 white globular bead with a blue glass spiral inlay.
401-2 Clay pipe bowl and stem juncture, spur mark C.W.
401-3 Clay pipe bowl fragment, from a large pipe bowl
401-4 Clay pipe stem fragment
401-5 Clay pipe stem bit
Discarded:
1 rosehead nail
10 common sq. nails
1 section of 1/16" round iron wire.
1 lip fragment from an old glass bottle
16 pieces of window glass
3 pieces of soda cola bottle
4 fragments of clear bottle glass-1 from a screw top bottle
1 winchester loader 12 gauge shotgun shell case
1 fragment from an animal mandible

Bag #402 July 24, 1963. South trench, interior. 230'E., 12-15'
402-1 5 blue seed beads, 8 white seed beads, 4 white cane beads, 2 small globular white beads and 2 small white barrel beads
402-2-4 Clay pipe bowl fragments
402-5-6 Clay pipe stem fragments
402-7 Small kettle copper spout? apparently cut off to a 1 3/4" length. It is flattened to a 1/2" minimum width by 1 1/2" maximum width.
402-8 .56 calibre musket ball
Discarded:
1 common sq. nail
2 scraps of kettle copper
1 hard of white ironstone china
5 pieces of clear modern bottle glass
1 pieces of brown modern bottle glass
6 pieces of modern window glass
1 clinker
1 section of lower mandible, animal

Bag #403 July 24, 1963. South trench, interior. 240'E., 5-6" sec. #49
403-1 4 white seed beads and 2 white cane beads
403-2 Clay pipe stem fragment
403-3 Silver triangular pendant, with jumping cat spar.
403-4 Copper hawk ball
403-5 14 gauge round copper wire, 24" long
403-6 Shard of lightware china
Discarded:
12 rosehead nails
5 scraps of kettle copper
6 pieces of modern window glass

Bag #404 July 24, 1963. South trench, interior. 240'E., 6-12'
404-1 1 blue and 4 white seed beads, 1 white cane and 1 large white barrel bead that formerly was inlaid around its median ring.

Bag #405 July 24, 1963. South trench, interior. 250'E., 5-6'
405-1 Clay pipe stem and bowl sherd, unmarked
405-2 Clay pipe stem fragment
405-3 Flintlock Locking jaws and screw
405-4 Piece of shirting
Discarded:
4 rosehead nails
5 common sq. nails
3 loose of bottle copper
1 shard of white ironstone china
2 pieces of white chalk-like rock
14 pieces of clear bottle glass
2 pieces of window glass
1 piece of kerocene lamp chimney

Bag #406
July 24, 1963. South trench, interior, 250'E., 6-9".

406-1
Clay pipe stem fragment, scored for breaking

406-2-4
Clay pipe stem fragments

406-5
A piece of 5/32" copper wire, 3/4" long
Discarded:
2 rosehead nails
1 common sq. nail
1 shard of white ironstone china
1 piece of bluish green bottle glass ca. late 1880's
1 clinker

Bag #407

407-1
Brown glass over lavender core cane bead, 15/16" long

407-2
Thin dog bone shaped metal strip with 4 lines of staggered, machine punched holes
Discarded:
4 rosehead nails
2 pieces of window glass
1 piece of irregularly splintered bone
1 clinker

Bag #408
July 24, 1963. South trench, interior, 250'E., 12-15".

408-1
Clay pipe stem fragment

408-2
Copper head nail

408-3
Large headed copper rivet, used

408-4
A piece of 1/16" thick sheet copper with one end that has been filed rounded and placed. The other end is broken off and it's purpose is unknown
Discarded:
1 rosehead nail
1 common sq. nail
2 shards of white ironstone china
2 pieces of window glass
1 clinker

Bag #409
July 24, 1963. South trench, interior, 250'E., 15-18".
Discarded:
1 clinker

Discarded:

Bag #410
July 24, 1963. South trench, interior, 260'E., 6-9".

410-1
Broken mainspring from a flintlock fusil

410-2
A broken iron ring 1/8" wire, in a 1/2" dia, circle
Discarded:
2 rosehead nails
3 common sq. nails
1 wire nail
1 clear glass bottle mouth of crimped pop bottle type
2 pieces of brown modern bottle glass
3 pieces of clear modern bottle glass
1 shard of white ironstone china
2 pieces of window glass
1 rabbit bone
1 scrap of kettle copper
1-.30 caliber center fire cartridge W.A. Co. .30 U.S.C.

Bag #411
July 24, 1963. South trench, interior. 260'E., 9-12"

411-1
1 cust lead object of indeterminate purpose
Discarded:
2 roosehead nails
1 scrap of kettle copper
2 pieces of dark olive green glass from a sq. bottle
1 piece of birch bark
3 animal bone fragments
1 piece of modern window glass
1 piece of clear bottle glass ca. late 1800's

Bag #412
July 24, 1963. South trench, interior 270'E., 5-6"

412-1
Brass shoe buckle
412-2
A small scrap of cloth
412-5
Red lined bottle glass fragment
Discarded:
3 roosehead nails
2 common sq. nails
1 U.S.A. .30 A.C.P. cartridge casing
1 Winchester No.12 shotgun shell roosehead
4 pieces of modern bottle glass
1 piece of porrosene lamp chimney
2 pieces of window glass
1 slipper

Bag #413
July 24, 1963. South trench, interior, 270'E., 6-9"

413-1
1 white seed band
413-2
1 clay pipe stem fragments, heavily tooth worn
413-3-5
Clay pipe stem fragments
413-6-7
Clear glass bottle fragments with a thin red glass lining similar to 413-5
413-8
A hammer forged lump of iron on indetermined purpose
413-9
Cloth scrap
Discarded:
7 roosehead nails
3 common sq. nails
1 shard of ceramic bottle labeled stone bottle, garnetted not to absorb
1 shard of white iron stone china
1 automobile tire valve stem
1 scrap of kettle copper
1 black glass button
3 pieces of modern window glass

Bag #414
July 24, 1963. South trench, interior 270'E., 9-12"

414-1
Clay pipe stem fragments
Discarded:
1 piece of modern window glass  
1 piece of stone

**Bag #415**  
415-1  Clay pipe stem fragment  
Discarded:  
2 rosehead nails  
1- .22 caliber rimfire cartridge casing

**Bag #416**  
416-1  Clay pipe bowl fragment  
416-2  Clay pipe stem fragment  
416-3  Main spring from a flintlock fusil  
416-4  Red-lined clear bottle glass fragment, similar to #412-3  
Discarded:  
1 Rosehead nail  
3 common sq. nails  
1 wire finishing nail  
2 pieces of dark olive green bottle glass  
1 piece of brown duraglass  
3 pieces of modern window glass  
2 shards of white ironstone china  
1 piece of bottle copper  
1 Peter's .52-16 centerfire cartridge casing

**Bag #417**  
417-1  Clay pipe bowl and spur. Spur marked T.J.  
417-2  Clay pipe bowl fragment  
Discarded:  
5 rosehead nails  
10 common sq. nails  
1 shard of white ironstone china  
2 chips of dark olive green glass  
1 piece of 3rd plate glass  
2 pieces of window glass  
1 bone fragment

**Bag #418**  
418-1  1 red, 6 turquoise, 2 translucent blue and 23 white seed beads. 2 medium blue and 6 white cane beads. 1 small and 1 medium sized white burlap beads and 1 white, seed bead with red and green quartered stripes  
418-2-3  Clay pipe stem fragments  
418-6  Clay pipe stem bit  
418-7  Eye haft of broken tool?  
Discarded:  
9 rosehead nails  
6 common sq. nails  
7 pieces of window glass  
5 pieces of clear modern bottle glass  
1 piece of dark olive green bottle glass  
1 shard of brown glazed earthenware creek  
1 white glass underwear button  
5 shards of white ironstone china  
1 clinker  
1 Peter's 44-40 centerfire cartridge casing
Bag #419  July 25, 1963. Dock Area O'E., 0'E., 0-6"
Discarded:
1 common sq. nail
1 piece of strap iron

Bag #420  July 25, 1963. Dock Area O'E., 20'E., 18-21"
420-1-4 Clay pipe stem fragment
420-5 Flintlock flint near
420-6 Undenominated iron piece. Flat sheet iron with a reinforcing plate forming a transverse liner in a 5/16" dia. hole
420-7 Small scrap of a lead or pewter decorative band with acanthus leaves
420-8 Kettle copper scrap with patch and hollow rivets
420-9 Iron file fragment
420-10 Large headed spike with a thin flat chisel shank
420-11 Fragment of a large iron band saw
Discarded:
7 rosehead nails
a 9" and a 6" wire spikes
7 scraps of kettle copper
2 pieces of strap iron
3 pieces of window glass
1 piece of iron forge scrap
1 animal rib fragment

Bag #421  July 25, 1963. Dock Area O'E., 20'E., 18-21"
421-1 Iron file tip, half round
421-2 A large flattened pad of iron forge scrap
Discarded:
6 rosehead nails
3 pieces of iron forge scrap
3 scraps of kettle copper
1 piece of modern bottle glass
1 piece of cement

Bag #422  July 25, 1963. Dock Area O'E., 20'E., 18-21"
422-1 Clay pipe bowl fragment
422-2-3 Clay pipe stem fragments
422-4 Clay pipe stem bit
422-5 Bear spring from a flintlock flint
422-6 A small lapped iron ring
Discarded:
5 rosehead nails
2 pieces of strap iron
1 piece of thin sheet iron
5 pieces of iron forge scrap
4 scraps of kettle copper
3 pieces of window glass
1 piece of clear bottle glass
1 piece of cement mortar

Bag #423  July 25, 1963. Dock Area O'E., 30'E., 18-21"
423-1 Light forming gouge—chisel
423-2 Solid copper rivet
Discarded
5 rosehead nails
7 scraps of kettle copper
1 piece of strap iron
1 clinker

Bag #424  July 25, 1963.  Deck Area O'E., 30'E., 15-16"

424-1  Cast copper kettle lug.  Elongated Hexagon
        Discarded:
          4 scraps of kettle copper

Bag #425  July 25, 1963.  Deck Area O'E., 30'E., 15-16"

425-1  Cast copper kettle lug- Long oval shape
425-2  Tailed iron kettle lug
        7 425-3  Broken kettle hook
425-4  Forged eye on skillet or ladle handle
425-5  Large fish tail finial, probably from a large door hinge
        Discarded:
          5 pieces of strap iron
          2 pieces of slag-like iron forge scrap
          2 pieces of flat bar-stock iron forge scrap
          13 scraps of kettle copper
        1 clinker

7

Bag #426  July 25, 1963.  Deck Area O'E., 30'E., 15-16"

426-1  Iron rectangle 1" x 1½" with a low iron hasty hoop
        Discarded:
          5 rosehead nails
          6 scraps of kettle copper
        1 clinker

Bag #427  July 25, 1963.  Deck Area Profile trench, O'E., 30'E., 18-21"

427-1  Clay pipe spur marked G.W.
427-2-3  Clay pipe stem fragments
427-4  Flat iron file tip
427-5  Lift hoop from a dog-bone kettle lid lug
        Discarded:
          5 rosehead nails
          1 piece of strap iron
          2 pieces of kettle copper
        6 pieces of window glass
        1 clinker

Bag #428  July 25, 1963.  Deck Area O'E., 30'E., 21-24"

Discarded:
          1 rosehead nails
          1 piece of strap iron
          1 piece of iron forge scrap
          2 pieces of modern window glass
        4 scraps of kettle copper

Bag #429  July 25, 1963.  Deck Area Profile trench, O'E., 30'E., 21-24"

429-1  Clay pipe stem fragment
        Discarded:
          5 rosehead nails
          4 scraps of kettle copper
        1 piece of strap iron

Discarded:
1 piece of strap iron
3 scrapes of kettle copper

431-1  Clay pipe stem fragment
Discarded:
3 scrapes of kettle copper
1 clinker

432-1  Ornamental iron hinge piece, with twin crescentic tails

Bug #433  July 25, 1963. Dock Area O'N., 40°E., 19-22"

433-1  Fairly modern iron kettle bale ear, stamped steel
Discarded:
1 rosetted nail
1 common sq. nail
2 pieces of modern window glass
1 piece of modern bottle glass, (ca. 1900's)

Bug #434  July 25, 1963. Dock Area O'N., 30°E., 16-19"

434-1  Broken cast copper kettle lug. Shield shaped
434-2  1" section of 6" dia. copper rod, probably part of a kettle lid,
lifting ring
434-3  Heavy iron ferrule. Would accept a pole or handle about 1 1/4" in dia.
434-4  4" iron wire, doubled, with a 1 1/4" x 1 3/4" loop at one end
Discarded:
4 rosetted nails
2 pieces off-strap iron
3 scrapes of kettle copper
3 pieces of iron forge scrap

435-1  Clay pipe stem fragment
Discarded:
1 "O.K." iron chain shackle link
2 pieces of kettle copper

Bug #436  July 25, 1963. O'shars A to B. test pit 51 A. 21"

Discarded:
1 piece of clear modern bottle glass

Bug #437  July 25, 1963. South trench, interior. Face #49, 240°E.,

437-1  2 blue, 23 white seed beads, 4 medium blue and 17 white cane beads
1 small white barrel bead
437-2  Clay pipe bowl and stem juncture with an unmarked spur
437-3  Clay pipe bowl fragment
437-4  Clay pipe stem fragment
437-6  Iron uniform strap buckle
437-7  Small ornamental buckle, length, 2 3/4" x 1 3/4" in width. The buckle
is made like a shoe buckle.

2 red, 1 dark blue, 5 turquoise and 22 white seed beads; 1 white cane and 1 small white barrel bead

Discarded:
1 rosehead nail
7 round wire nails
1 6" round wire spike
3 pieces of contemporary brown bottle glass
2 pieces of clear bottle glass
5 tiny fragments of pipe clay
1 scrap of kettle copper

Bag #481 July 26, 1963. East trench, interior. 350'E., 27'E., 15-18".

Clear glass bead, 13/32" in dia., with concave sides.
Clay pipe bowl fragment, with spur marked T.A.

Discarded:
1 rosehead nail

Iron belt buckle

Discarded:
1 common sq. nail
1 C.C.C. imitation rosehead spike
1 piece of brown bottle glass; modern

Half of a globular translucent green glass bead with an inlaid white sprig design radiating from a median band comprised of narrow threads of blue glass on either side of a thin red thread.

Bag #484 July 26, 1963. Dock Area. O'H., 10'E., Swalk 21-24".

1 clay pipe stem fragment

Discarded:
3 common sq. nails

Bag #485 July 29, 1963. Dock Area. 10'E., O'H., 9-12".

Discarded:
1 hinge from a cast iron stove door
1 kettle copper scrap
1 small bone fragment
1 rosehead nail
4 common sq. nails

Bag #486 July 29, 1963. Dock Area. O'H., 60'E., 6-9".

Discarded:
5 shards of cheap china ca. 1820-30
1 piece of jam or jelly bottle
1 piece of jar glass marked Mason's Patent
4 pieces of white glass lid for Mason's patent jar
1 clear glass lid for a Mason's patent jar

Bag #487 July 29, 1963. Dock Area. O'H., 60'E., 9-12".

Discarded:
1 chisel point rosehead nail
1 iron staple
1 modern sq. iron spike
1 broken chain hook
2 small pieces of "channel coal"

Bag #488
July 29, 1963. East trench, interior (77'E) 6-9"
Discarded:
Mould blown glass bottle, late 1800's
35 pieces of modern bottle glass
2 shoe fragments
2 cast iron stove parts
23 sherds of modern earthen ware
1 porcelain door handle and knob
4 round wire splines
4 round wire nails
2 lamps of plaster

Bag #489
July 29, 1963. East trench, interior (77'E) 6-9"

489-1
Corner reinforcement iron needs to be cleaned in order to assign it a date
Discarded:
1 piece of dark olive green bottle glass
2 pieces of clear pop bottle glass
1 piece of strap iron
1 bone fragment

3 tile fragments
1 bone fragment
2 fragments of colored glass
4 pieces of strap iron

Bag #514 July 30, 1963. East trench, exterior. 100' E., 24"

514-1 1 battered iron staple
G.P. --- Discarded:
1 wire nail, 6 penny
3 tin can fragments

Bag #515 July 30, 1963. East trench, exterior. 140' E., 12-15"

515-1 Clay pipe stem fragment
515-2 Silver plated copper button with a soldered copper loop. 1 1/16" in dia.
G.P. --- Discarded:
5 fragments of window glass
6 fragments of old, charred wood
4 fragments of bone, old

Bag #516 July 30, 1963. East trench, exterior. 140' E., 12-15"

516-1 Clay pipe stem fragments
516-2 Main spring, broken, from a flintlock fusil
516-3 1/4" dia. iron rod, with a broken end and the other end forged-flattened into an eye 45" in lengths.
G.P. --- Discarded:
2 fragmentary rosette nails
1 animal tooth

G.P. ---
12 bone fragments
1 fragment of old charred wood
6 fragments of glass
1 fragment of pottery

Bag #517 July 30, 1963. East trench, exterior. 150' E., 9-12"

G.P. --- Discarded:
1 piece of 3/8" wide strap iron

7 glass fragments
1 bone fragment
1 rock fragment

Bag #518 July 30, 1963. East trench, exterior. 160' E., 9-12"

518-1-2 Clay pipe stem fragments
518-3 Rosette nail
G.P. --- Discarded:
4 rosette nails

Bag #519 July 30, 1963. East trench, exterior. 170' E., 9-6"

519-1 Clay pipe stem fragment
G.P. --- Discarded:
2 rosette nails

4 bone fragments
1 porcelain tea kettle lid.
Bag #520  July 30, 1963. East trench, exterior. 180'E., 3-6"  
520-1  3 turquoise seed beads, 1 white cone and 1 wire wrapped white barrel bead.  
520-2  Clay pipe bowl fragment  
520-3-4  Clay pipe stem fragments  
520-5  Upper front tooth of an elk or small moose  
Discarded:  
4 rosehead nails  
G.P.-------- 6 glass fragments  
2 sandstone pieces  
3 pottery fragments  

Bag #521  July 30, 1963. East trench, exterior. 190'E., 3-6-9"  
521-1  Clay pipe stem bit  
Discarded:  
2 rosehead nail fragments  
G.P.-------- 2 pieces of a plastic ring  

Bag #522  July 30, 1963. East trench, exterior. 190'E., 6-12"  
Discarded:  
5 rosehead nails  
6 common sq. nails  
G.P.-------- 5 glass fragments  
1 pottery fragment  
1 piece of strap iron  
1 small piece of broken clay pipe stem  
1 modern spike  

Bag #523  July 30, 1963. East trench, exterior. 200'E., 12-15"  
523-1  Strap iron hinge piece. Home fabricated  
523-2  Nail blank  
Discarded:  
1 scrap of kettle copper  
G.P.-------- 1 glass fragment  

Bag #524  July 30, 1963. North trench, exterior. 260.5'E., 295'E.3-6-9"  
524-1  Clay pipe stem fragments  
Discarded:  
1 common sq. nail  
G.P.-------- 2 pieces of colored glass  
3 bone fragments  

Bag #525  July 30, 1963. North trench, exterior. 260.5'E., 295'E., 6-9"  
525-1  Cone bead, reddish brown over a yellow glass core  
525-2  Clay pipe bowl fragment  
525-3  Clay pipe stem fragment  
Discarded:  
1 rosehead nail  
G.P.-------- 6 porcelain pottery fragments  
5 bone fragments  
5 glass fragments  

Bag #526  July 30, 1963. North trench, exterior. 260'E., 295'E., 9-12"
525-1  Fat lunate cast copper kettle lug
525-2  High domed brass button face with embossed decoration
525-3  Iron knife with a replaced wooden handle
        Discarded:
        1 rosehead nail
0.5----------------- 2 bone fragments
        1 bottle neck
        3 clear glass fragments
        1 burnt glass fragment
        4 pieces of pottery

Bag #527  July 30, 1963. North trench, exterior. 260'E., 305'E., 9-12".
527-1  Clay pipe bowl and stem juncture fragment
527-2  Silver? Ring bezel for an oval set 8/16" x 23/32"
        Discarded:
        1 rosehead nail
0.5----------------- 5 glass fragments

Bag #528  July 30, 1963. North trench, exterior. 260'E., 325'E., 6-9"
        Discarded:
        3 rosehead nails
        4 common sq. nails
        1 3\(\frac{1}{2}\)" shaped piece of \(\frac{1}{4}\)" dia. iron wire
        A 6" section of partly rounded iron forge scrap
        1 piece of shoe sole
        1 piece of charred wood
        3 bone fragments
        3 glass fragments
        1 piece of metal 1¼" long
0.5----------------- 6 glass fragments

Bag #529  July 30, 1963. North trench, exterior. 260'E., 325'E., 6-9"
529-1  Iron wire oval, wire diameter is 3/16", 1 3/4" x 3 7/8".
        Discarded:
        6 glass fragments

Bag #530  July 30, 1963. South trench, interior. 140'E., 48'E., 3-6"
530-1  Clay pipe stem, scored for breaking
530-2  Clay pipe stem fragments
530-4  Clay pipe stem fragments
530-5  Flat brase or copper artifact, shaped like a tailed bread board.
        Discarded:
        8 rosehead nails
        4 common sq. nails
        1 C.O.C. initialed, rosehead spike
        1 door key eye of modern manufacture
        1 piece of iron forge scrap
        1 scrap of knife copper

Bag #531  July 31, 1963. South trench, interior. 130'E., 5-6"
531-1  1 turquoise and 2 white seed beads. 1 translucent blue cane bead
531-2  Clay pipe stem fragments
531-3  Clay pipe stem fragments
531-4  Clay pipe stem bits
531-6  Lead ornament, broken. Composed of a straight \(\frac{1}{4}\)" bread band with adjacent rows of hemispherical balls, \(\frac{1}{4}\)" dia. ball on 1 edge, \(\frac{1}{6}\)" balls on the opposite.

2 roosehead nails
22 common sq. nails
1 shard of white ironstone china
1 copper kettle lug
1 cast iron stove part
2 glass buttons
2 animal bone fragments
1 piece of glass thermometer with mercury

Bag #564  Aug. 2, 1963. West trench, interior. 50°W., 5'8", 5-6"
564-1-2  Clay pipe stem fragments
564-3  Double-end off-set nail with east lead ferrule
564-5  6¹ triangular iron file
Discarded:
2 roosehead nails
7 common sq. nails
1 fragment of kettle copper
1 cast iron stove fragment
1 animal bone fragment

Bag #565  Aug. 2, 1963. West trench, interior. 50°W., 5'8", 6-9"
565-1  Broken iron fire tongs
565-2  1 half soft ceramic bead or marble, 3/8" dia.
Discarded:
2 roosehead nails
6 common sq. nails
1 piece of kettle copper
Bag #566
Aug. 2, 1963. West trench, interior. 50' N., 5'E., to 24"

566-1.2 Clay pipe stem fragments
Discarded:
3 rosehead nails
1 scrap of bottle copper

Bag #567
Aug. 2, 1963. West trench, interior. 60' N., 5'E., 6-9"

567-1 Clay pipe bowl and stem juncture. O.W. marked spur.
567-2 Clay pipe bowl fragment
567-3 Clay pipe stem fragment, scored for breaking
567-4 Clay pipe stem fragment
567-5 Brown and white stripped chine shard
Discarded:
2 rosehead nails
2 pieces of strap iron
1 animal bone fragment
1 brick fragment
1 piece of bluish green bottle glass
1 scrap of bottle copper

Bag #568
Aug. 2, 1963. West trench, interior. 70' N., 5'E., 3-6"

568-1 Leaf of a large "H" hinge. Remainant is 6" long
Discarded:
4 rosehead nails
1 piece of animal bone
1 piece of leather

Bag #569
Aug. 2, 1963. West trench, interior. 70' N., 5'E., 6-9"

569-1 1 red, 2 turquoise and 28 white seed beads, 4 white cane beads.
569-2 Section of a cut knot, probably from an old board.
569-3 Section of an old wooden board
Discarded:
5 rosehead nails

Bag #570
Aug. 2, 1963. West trench, interior. 90' N., 5'E., 3-6"

596-2-5 Clay pipe stem fragments
596-4 Trigger from a flintlock fusil (or pistol)
596-5 Bone button, 5/8" in dia.
596-6 Copper facing iron, a wooden backed button, 11/16" dia.
Discarded:
14 round head nails
5 common sq. nails
3 pieces of bottle copper
1 glass button
1 shred of soft paste china from which all glazed has flaked
1 piece of iron surge scrap

Bag #597 Aug. 5, 1963. West trench, interior. 60°N., 5°5', 6-3"

597-1 Bar iron piece. 1 3/4" x 2" x 10". 3" inches of the piece have been bent to form a right angle, which has been crudely punched with a 7/16" hole.
Discarded:
2 round head nails
1 piece of thin sheet iron
1 black rubber comb

G.F. 1 fragment of glass bottle
15 pieces of wood
1 brick
20 fragments of brick
10 fragments of tin can
4 pieces of strap iron
6 fragments of rope

Bag #598 Aug. 5, 1963. West trench, interior. 60°N., 5°58', 9-12"
Discarded:
3 round head nails
1 piece of bottle copper

G.F. 6 fragments of plain glass
2 fragments of bottle glass
1 automobile ash tray
2 pieces of strap iron
20 pieces of old wood

Bag #599 Aug. 5, 1963. West trench, interior. 90'E., 5'E., 3-6";

599-1 Clay pipe stem fragment
599-2-1 Clay pipe stem bits
Discarded:
2 roundhead nails
2 concave sq. nails
2 pieces of bottle copper

G.P.------ 3 pieces of strap iron
4 pieces of moose leather
1 piece of wood
1 piece of plain glass
4 pieces of animal bone

Bag #600 Aug. 5, 1963. West trench, interior. 90'E., 5'E., 6-9"

600-1-2 Clay pipe stem fragments
Discarded:
4 roundhead nails

G.P.------ 6 pieces of window glass
1 piece of bottle glass
2 pieces of strap iron

Bag #601 Aug. 5, 1963. West trench, interior. 100'E., 5'E., 3-6"

601-1-3 Clay pipe stem fragments
601-4 Bottom corner section of a squared, dark olive green bottle
601-5 Broken brass ornamental buckle
601-6 Heal and pivot section of a large thumb-flanged scrap knife
601-7 Hand forged iron staple
Discarded:
26 concave sq. nails
9 concave sq. nails
3 pieces of strap iron
1 fragment of animal cranial

Bag #602 Aug. 5, 1963. West trench, interior. 100'E., 5'E., 6-9"

602-1 Clay pipe stem and bowl fragment, spur marked T.D.
602-2 Clay pipe stem fragment
Discarded:
6 roundhead nails
1 straight tooth cap

G.P.------ 2 pieces of plain glass

Bag #603 Aug. 5, 1963. East trench, exterior. test pit. 50'E.,

603-1 2 white used beads and 5 white gume beads.
Discarded:
3 roundhead nails
1 wire nail
1 small stone
1 small chip of white ironstone china
1 piece of window glass

G.P.------ 3 small racks
1 piece of glass

Bag #604 Aug. 5, 1963. East trench, exterior. test pit 60'E., ca. 40-50"
604-1  2 turquoise and 12 white seed beads, 1 white cane bead.
604-2  Clay pipe bowl and stem fragments. The edge of what apparently
       is a T.C. bowl, above the stem
604-5-4  Clay pipe bowl fragments
604-5-11  Clay pipe stem fragments
604-12  Clay pipe stem bits
604-13  Fragment of old window glass
       Discarded:
       1 roughhead nail
       1 piece of kettle copper
       3 pieces of modern window glass
       2 pieces of ceramic drain tile

Bag #605  Aug. 5, 1965, East trench, exterior. Test Pit 130' N., ca. 40".

605-1  Clay pipe stem bit
605-2  Clear glass, pontil-marked tumbler bottom, 1 5/8" in dia.
       Discarded:
       2 roughhead nails
       1 copper eye nail
       1 C.C.'s imitation roughhead spike
       1 piece of ceramic drain tile
       1 fragment of animal bone

Bag #606  Aug. 5, 1965 South trench, Dock Area 0'8., 20'8., 21-25".

606-1-2  Clay pipe stem fragments
606-2-1  50 clinkers
       Discarded:
       1 fragment of settie glass
       1 fragment of plain glass

Bag #607  Aug. 5, 1965, South trench, Dock Area. 0'8., 20'8., 21-25".

607-1-5  Clay pipe stem fragments
607-6    Flintlock frizzen spring
607-8    3/4"-diameter dia. section of iron rod, 5" long
607-7    5" section of channel gouge chisel
       Discarded:
       4 small pieces of iron forge scrap
       1 piece of clear bottle glass, modern
       10 pounds of clinkers

Bag #608  Aug. 5, 1965, South trench, Dock Area. 0'8., 20'8., 25-28"

608-1    Copper kettle rim

Bag #609  Aug. 6, 1965, South trench, Dock Area. 2'8., 50'8., 0-6".

609-1    10 roughhead nails — for study —
609-2    1 nail—macehead, nail type head, roughhead type shank
       Discarded:
       1 piece of kettle copper

Bag 610  Aug. 6, 1965, South trench, Dock Area 2'8., 70'8., 0-9"
610-1 Clay pipe stem fragment
610-2 4 round head nails -- for study --
        Discarded:
        1 small piece of iron forge scrap
        1 piece of grey-glazed earthenware crock
        2 .20 caliber rimfire cartridges, Peters M.V.

Bag #611
Aug. 6, 1965. South trench, Dock Area 21N., 70'E., 9-12''

611-2-4 Clay pipe stem fragments
611-5 7 round head nails -- for study --

Bag #612
Aug. 6, 1965. South trench, Dock Area 21N., 80'E., 0-9''

612-1 1 round head nail and 1 common sq. nail -- for study --
612-2 Iron turnbuckle eye screw
612-3-5 Shards of blue ceramic ware
        Discarded:
        3 pieces of kettle copper
        1 piece of kettle copper
        1 small piece of tin can
        2 pieces of grey-glazed earthenware crock

Bag #613
Aug. 6, 1965. East trench, exterior. 356'E., 12'N., 0-12''
        Discarded:
        1 wood finial not float with traces of aluminum paint
        1 tin can

Bag #614
Aug. 6, 1965. East trench, exterior. 356'E., 12'N., 30-36''

614-1-5 Clay pipe stem fragments
614-4-5 Lead rivets, lead from sheet lead
614-6 Clay beaker and lead of no great antiquity
614-7 Kit's balls of no great antiquity
        Discarded:
        1 modern bottle; not float

Bag #615
Aug. 6, 1965. East trench, exterior. 100'E., test trench -- ca. 40''

615-1-25 Clay pipe stem fragments
615-18 Clay pipe stem bit
615-17 Buried and broken gun flint
615-18-1 Bottle fragments of an unglazed porcelain disc. 1 1/2'' in dia.
        Discarded:
        2 round head nails
        1 piece of kettle copper
        1 shard of white ironstone china
        5 fragments of a clear glass bottle
        5 pieces of ceramic drain tile

Bag #616
Aug. 6, 1965. East trench, exterior. 130'E., test trench, 40''

616-1 4 white lead beads, 2 medium blue and 3 white cane beads
616-2 Clay pipe bowl, unmarked, with a long, slender, unmarked spur
616-3 Clay pipe stem fragments
616-5 Stone or section button, 5/8'' in dia
616-5 Part of iron staple
616-6 Bottle bottom of lime green glass, with a high conical kick-up
        and pentil mark
616-7  Cement log cabin chinking. Outside surface bears white-wash.

  Discarded:
  6 roachhead nails
  1 piece of strap iron
  1 piece of blue glass (bluish-green) bottle
  1 fragment of animal bone
  7 World War I ever present buttons (slope surface)

Bag #617  Aug. 6, 1963. Tent pit-Straddle trench on a sunken trench line.

  1 piece from the N.E. corner of the Natl. Park Service parking
  lot second S. of the C.P. stockade.

617-1  What appears to be a roachhead nail with wood fragments adhering
to tin surface

617-2  Roachhead nail

  Discarded:
  Animal bone fragment

Bag #618  Aug. 6, 1963. Tent trench, interior 40' E.

618-1  Shattered lead market ball

618-2  Small iron scraper

  Discarded:
  6 roachhead nails
  15 common sq. nails
  4 pieces of strap iron
  2 pieces of bottle copper
  1 scrap of bottle copper
  2 shards of white ware stone chima

Bag #619  Aug. 6, 1963. West trench, interior 40' N., 12-15'

  Discarded:
  2 roachhead nails
  1 common sq. nail
  1 piece of strap iron

Bag #620  Aug. 6, 1963. West trench, interior 130' N., 6-9'

  Discarded:
  6 roachhead nails

Bag #621  Aug. 6, 1963. West trench, interior 80' N., 6-9'

  Discarded:
  1 roachhead nail

Bag #622  Aug. 6, 1963. West trench, interior 80' N., 12-15'

  Discarded:
  5 roachhead nails
  2 pieces of strap iron
  1 small piece of iron forge scrap

Bag #623  Aug. 6, 1963. West trench, interior 110' N., 6-9'

623-1  Clay pipe stem fragments
623-2  Clay pipe stem bit
623-3  2 roachhead nails
623-4  Wood plug, probably from stockade restoration

  Discarded:
  3 roachhead nails
  2 pieces of strap iron
1 piece of amphora-style mould-blown glass bottle of no great antiquity

Bag #624 Aug. 6, 1963. West trench, interior. 119'N., 9-12'
624-1-3 Glass pipe stem fragments
624-4 Sherd of dark greenware china
624-5 Disc. plug, probably dating from stockade restoration
10 Removed nails
1 piece of dark olive-green glass bottle

Bag #625 Aug. 6, 1963. West trench, interior. 120'N., 3-6'
5 Removed nails
2 pieces of strap iron
2 pieces of animal bone
2 sherds of gray-glazed earthen-ware crock
1 wooden plug

Bag #626 Aug. 6, 1963. West trench, interior. 130'N., 3-6'
626-1 Section of half-round file
626-2 Section of flat file
5 Removed nails
2 pieces of strap iron

Bag #627 Aug. 6, 1963. West trench, interior. 160'N., 3-6'
627-1 Glass pipe stem fragment
627-2 Hatchet head, almost
627-3 Disc. leaf, 12" long, with a hatchet head in situ.
10 Removed nails
1 piece of strap iron
1 piece of brown lamp chimney
1 piece of the mouth of a glass milk bottle
2 animal bone fragments (moose?)

Bag #628 Aug. 6, 1963. West trench, interior. 180'N., 3-6'
Bolsinate
1 machine bolt
1 12" section of iron rod of the corrugated type used in reinforcing concrete

Bag #629 Aug. 6, 1963. West trench, interior. 197'N., 350'W., 0-12'
Bolsinate
1 glow silve. part, a replaceable point

Bag #630 Aug. 6, 1963. Drainage ditch curved across road, 10-15'W., 10-30'N.
630-1-2 2 soft yellow bricks
630-3 A broken horse shoe (provenience on this is doubtful)
630-4 A 30" iron spline, square (provenience on this is doubtful)

Bag #631 Aug. 6, 1963. South trench, near corner C. 0'N., 20'E., Depth?
Fitted line till.

631-1 Caribou antler
Bag #632  Aug. 6, 1963, South trench, Dock Area 0'E., 70'E., 9-12"  
632-1  4 mating fragments of caribou antler  
Bag #633  Aug. 6, 1963, South trench, Dock Area 0'E., 80'E., 12-18"  
633-1  Caribou antler fragment with shallow saw cut. This piece mated with 632-1, and has been joined with it.  
633-2  1 turquoise seed bead and 1 white cane bead  
Items, #631-1, 633-1, are all mating fragments, comprising the major portion of a right antler.  
634-1  Clay pipe bowl fragment  
634-2  Clay pipe stem fragment  
634-3-4  Runnels of melted lead  
Discarded:  
1 roshhead nail  
9 common sq. nails  
1 piece of strap iron  
1 piece of window glass  
1 piece of modern, brown glass bottle  
Bag #635  Aug. 7, 1963, West trench, interior. 240'E., 3-12"  
Discarded:  
1 roshhead nail  
1 beach pebble  
Bag #636  Aug. 7, 1963, West trench, interior. 260'E., 3-6"  
Discarded:  
A broken roshhead nail  
1 piece of strap iron  
1 piece of tin can  
Bag #637  Aug. 7, 1963, West trench, interior. 280'E., 3-6"  
Discarded:  
7 roshhead nails  
Bag #638  Aug. 7, 1963, West trench, interior. 300'E., 3-6"  
638-1  Clay pipe stem fragment  
Discarded:  
2 roshhead nail  
1 bone fragment, from a large animal  
Bag #639  Aug. 8, 1963, South trench, interior. 130'E., test pit 33"  
Discarded:  
1 roshhead nail  
1 piece of strap iron  
Bag #640  Aug. 8, 1963, South trench, interior. 130'E., test pit.  
640-1  Clay pipe stem fragment  
640-2  Avian bone fragment  
640-3  Iron button with a thin sheet brass facing  
Discarded:  
6 roshhead nails
1 piece of strap iron
2 scraps of kettle copper

Bag #641  Aug. 8, 1963. South trench, interior. 160'E., 16"
641-1  Clay pipe stem fragment
         Discarded:
         1 rosehead nail
         2 pieces of round iron wire

Bag #642  Aug. 8, 1963. West trench, interior. 210'E., 3-6"
642-1  Metal button, 17/32" in dia.
642-2  Chinese shard, probably Delft-ware
         Discarded:
         1 rosehead nail
         1 cast iron stove part

Bag #643  Aug. 8, 1963. West trench, interior. 270'E., 3-6"
643-1  Blacksmith's anvil hardy
         Discarded:
         2 rosehead nails fragments.

Bag #644  Aug. 8, 1963. West trench, interior. 310'E., 3-6"
644-1  4 red, 1 dark blue, 1 medium blue, 19 turquoise seed beads, and
        49 white seed beads. 1 medium blue and 5 white cane beads
644-2  1 brass curtain ring
         Discarded:
         1 common sq. nail
         1 round wire spike
         1 piece of bottle glass, partly melted
         1 piece of a modern, white bottle glass
         1 tin can rim

Bag #645  Aug. 8, 1963. West trench, interior. 330'E., 3-6"
645-1  Clay pipe stem fragment
         Discarded:
         2 common sq. nails
         1 Filat bottle bottom
         1 corset stay
         1 piece of wood

G.P.-------- 1 piece of glass
              1 piece of wood

Bag #646  Aug. 8, 1963. South trench, Dock Area. 2'E., 60'E., 1'30"L. 8"
646-1  Clay pipe bowl fragment
646-2  35 rosehead nails, and 1 common sq. nail. Held for study
646-3  Clear glass bottle bottom 1" in dia. pontil marked with a slight
        kick-up.
646-4  Diamond shaped kettle copper rivet or tinkler blank, 1 3/8" long.
         Discarded:
         2 scraps of kettle copper
         7 pieces of kettle cop.; or
         1 piece of dark olive green bottle glass, heat slumped
         1 piece of window glass, heat deformed

Aug. 1 or 7? 1963. South trench, Area C, Corner C. O'E., 10'E., core of trench line.

556-1: 1 rooshed nail
556-2: 2 pieces of dark lime green
Discarded:
1 scrap of kettle copper
1 piece of tin can

Aug. 7, 1963. South trench, area of corner C. O'E., 10'E., 0-6"

657-1: Clay pipe bowl fragment. T.D. brand in corded circle
657-2: Clay pipe bowl and stem juncture with T. D. spur
657-3: Clay pipe stem fragment
657-4: Point for iron shod push pole?
657-5: Steatite pipe blank
657-6: 1 rooshed nail
657-7: 8 common sq. nails
Discarded:
1 piece of kettle copper
2 pieces of strap iron
1 piece of iron forge scrap
1 cast iron stove part

Aug. 7, 1963. South trench, Dock Area 2'N., 70'E., 9-12"

658-1-3: Clay pipe stem fragments
658-4: Small 1 5/8" long ornamental hinge leaf. Copper
658-5-6: 4 rooshed nails; and 1 common sq. nail
658-7: Charcoal fragments

Aug. 7, 1963. South trench, Dock Area C', 60'E.

659-1: Banded ceramic marble
659-2: Strap handle from an earthenware jug.
659-3: Iron file fragment—4½" long
Discarded:
2 fragmentary rooshed nails
1 round wire nail
5 tin can fragments
1 shard of 1920-30's china
1 animal bone fragment

OUT OF SEQUENCE

June 25, 1963. West trench, exterior. 250'E., 0'W., 3-6"

660-1: Segment of a triangular iron file with band cut teeth.
Discarded:
1 small fragment of modern window glass
2 small pieces of stone

OUT OF SEQUENCE

July 27, 1963. West trench, exterior. 10'E., 0'W., 6-9"

661-1: 1 white, and 1 blue seed beads.
661-2: Clay pipe stem fragment
661-3: China sherd, white, with dark brown rectangles. Two of these brown rectangles have flaked out of the glaze surface.
661-4 White china shard with a lavender floral design.
661-5 The mouth and laid over lip of a small clear glass bottle, probably dating ca. 1860-1900.
661-4 Rectangular scrap of kettle copper with patch
Discarded:
1 rosette nail
17 common sq. nails
2 pieces of iron forge scrap
2 narrow strips of scrap kettle copper
3 pieces of modern clear glass bottle
6 small shards of white ironstone china
1 white glass button
2 pieces of animal bone.

Bag #662 Aug. 7, 1963, west trench, interior. 190’N., 3-6”
662-1 Clay pipe bowl and stem juncture, with T.D. spur
662-2-3 Clay pipe bowl fragments, mating
662-4-5 Clay pipe stem fragments, mating
Discarded:
1 rosette nail
3 animal bone fragments

Bag #663 Aug. 7, 1963, west trench, interior. 200’N., 3-6”, sod level.
663-1 Distal end of animal leg bone, sawn through 2” up the shaft
663-2 Cast iron door bolt, probably of no great antiquity
Discarded:
1 rosette nail
1 round wire nail
OUT OF SEQUENCE

Discarded:
5 pieces of white porcelain sink or ice box tray.

THE FOLLOWING PAGES ARE FROM STRUCTURES NUMBER 1. 220'-250'N., 50'-75'W

Bag #706  Aug. 14, 1963.  Structure No. 1  240'E., 60'W., 0-6"  
706-1  Iron key, 5 5/16" long
706-2  Iron hook, 51/2" long, forged from 9/16" stock.  Probably a crane or pet hook.
706-3  Cleat nail, spear-pointed, 61/2" long.
706-4-5  Two chisel pointed hand forged spikes with inordinately large shanks.  Shanks are 3/4" and 3 3/8" respectively.
706-6  Twenty relatively intact rosehead nails 1/2 x 1/4".

Bag #707  Aug. 14, 1963  Structure No. 1  220'-250'N., 75'W., 0-3"
707-1  3 turquoise and 36 white seed beads.  1 broken white barrel bead.
707-2-13  Clay pipe stem fragments
707-14  Flat brass button, 9/16" dia., with an iron eye
707-15  The high domed head of a brass tack 7/16" dia.
707-16-17  Two broken black gun flints

Bag #708  Aug. 14, 1963.  Structure No. 1  No further data
708-1  A chisel pointed cleat nail, 6" long
708-2  A rosehead nail
708-3  A flattened rectangular spike or light splitting wedge forged from a file, 9 3/4" long.
708-4  5 fragments of a flat iron container lid with an oval wire lift-handle.

Bag #709  Aug. 17, 1963.  Structure No. 1  240'E., 75'W and level
709-1-2  Clay pipe stem fragments
709-3  Slate or clay marble
709-4  Barrel hoop from a small keg.  Probably gun powder or high wine keg.
Approximately 6-61/2" dia.
709-5  Hand forged spike, with a sq. faceted head, and a spear point.  The shank is 51/2" long.
709-6  A hand forged spike with a thin flat rectilinear shank.  Chisel pointed and almost headless.
709-7  14 rosehead nails and 3 broken nail fragments which are most probably from rosehead nails.

Bag #710  Aug. 19, 1963.  Structure No. 1  No further data.
710-1  Clay pipe bowl fragment, unmarked
710-2  Forged iron spike with a thin flat shank chisel pointed and with an inordinately large head.
710-3  9 rosehead nails of assorted sizes.
710-4  Flat-taper button with an iron eye.  One edge has been broken.  1" dia.
710-5  A small plate-mounted pintil, with rosehead nail in situ.
710-6  Oval fire steel, broken
710-7  Broken bottle bale
710-8  Triangular iron file, broken, 4 7/8" long
710-9  Bell clapper?
710-10 A kettle tripod chain of five dog bone links, 21½" in length.
710-11 Iron rope reinforcing eye. Boat hardware?
710-12 Iron pin with a flattened rolled eye; 5" long
710-13 A broken rod jasper avoid chipped stone blade
710-14 Fragment of a large animal pelvic girdle.
Bag #1
June 9, 1964, Sq. A. O"-6"

1. Clay trade pipe bowl fragment marked G.W. on spur.
2-5. Clay trade pipe stem fragment.
6. Small silver button.
7. 1 white barrel bead, 2 white cane beads, 7 white seed beads.
8. Glass pencil.
10. Clear glass bottle fragment.
11. Fragment window glass.
12. Rim shard white ironstone china.
13. Rim shard white ironstone china.
14. Lead runnel.

Rosehead nail, pointed
Rosehead nail, pointed
Discards:
1 fragment bone
1 rosehead nail fragment

Bag 12
June 10, 1964. Sq. A plus 5, 3"-9"

01-03 Clay trade pipe stem fragments
04 Partially restored white ironstone dish
05 Portion of partially restored white ironstone dish
06 Portion of bottom of white ironstone dish with part of trade mark
07 Sherd white ironstone china with part of trade mark
08 Rim sherd white ironstone china
09 Sherd white ironstone china
90 Fragment of clear glass bottle mouth
91 Fragments of amber bottle glass
92 Unidentified iron object, 3 3/4" long, tapered, 1 3/4" wide:
  at one end and 5/16" wide at other end. Both ends are broken.
  Object has tapered slot at wide end. Slot is 1" long and rounded
  at both ends.
93 Iron finial from trigger guard
94 Unidentified iron object 1 5/8" long, 1/4" wide.
95 Rosehead nail, pointed
96 Rosehead nail, point broken
97-101 Rosehead nails, pointed
Discards:
1 cut nail
1 fragment bone

Bag 13
June 10, 1964. Sq. A plus 5, 9"-12"

102 Iron bar, bent 1" diam. 19" long.

Bag 14
June 10, 1964. Sq. B, Blockhouse, 0"-5"

103 Clay trade pipe stem fragment
104-5 Rosehead nails, pointed
Discards:
3 cut nails
2 rosehead nail fragments
1 fragment bone
1 animal tooth

Bag 15
June 10, 1964. Sq. B, 9"-12"

106-7 Clay trade pipe stem fragments
108 1 white barrel bead
109 Silver ring, flat, 7/8" dia.
110-11 Rosehead nails, pointed
Discards:
1 sherd white ironstone china
3 broken rosehead nails

Bag 16
June 10, 1964. Sq. B plus 5, 0"-9"

112 Clay trade pipe stem fragment
Bag #17 June 10, 1964. Sq. 6, 6"-9"
129 1 white barrel bead, 6 white cane beads, 4 white seed beads.
1 turquoise seed bead.

Bag #18 June 10, 1964. Sq. 6 plus 5, 3"-9"
111 Fragment clear bottle glass
Discards
1 obsidian flake

Bag #19 June 10, 1964. Sq. 7, 0"-9"
122 1 turquoise seed bead.
123 Lead round ball, .50 calibre.
Discards
2 rosehead nails

Bag #20 June 11, 1964. Sq. 1 plus 5, 9"-12"
124 Clay trade pipe bowl fragment, marked.
125 Clay trade pipe bowl fragment, marked T.D.
126 Clay trade pipe stem fragment
127 1 ceramic tile 7/15" sq., black glazed
128 1 ceramic tile 7/16" sq., lavender glazed.
129 1 ceramic tile 7/16" sq., tan glazed.
130 Sherd pasteware with yellow and green design.
131 Rosehead nail
132-33 Rosehead nails, pointed
134 Rosehead nail
135 Fragment kettle copper
136 Large animal bone, cut with saw, 5 3/4" long.
Discards:
3 rosehead nails
4 cut nails
1 fragment kettle copper
1 fragment window glass
1 fragment bone

Bag #21 June 10, 1964. Sq. 8, 6"-9"
137 2 white cane beads, 3 white seed beads, 2 turquoise seed beads.

Bag #22 June 10, 1964. Sq. 8, 6"-9"
138 1 white cane bead, 4 white seed beads.
June 11, 1964. Sq. A, plus 5, 12".

Clay trade pipe stem fragment
7 white barrel beads, 8 white cane beads, 3 white seed beads.
Bottle glass fragment
1 1/4" x 1 5/8" long
Copper tinker 2" long
Copper tinker 7/8" long, has fabric inside.
Copper tee bottle outlet fragment
Fragrant sheet copper
Breeze top from tire pump? marked Patent
Large cut nail
Rosehead nail, pointed

June 11, 1964. Sq. B, plus 5, 12"-15"

1 animal tooth
Discarded
1 fragment bone
1 fragment bottle glass

June 11, 1964. Sq. C, plus 5, 15"-18"

Clay trade pipe stem fragment
2 white cane beads, 1 large translucent blue cane bead, 1 yellow globular bead with blue glass inlay, 2 white seed beads, 2 turquoise seed beads.

June 11, 1964. Sq. C, 6"-9"

Clay trade pipe stem fragment
6 white cane beads, 1 white seed bead.
Rosehead nail, pointed
Rosehead nail
Discarded
2 rosehead nails

June 11, 1964. Sq. E, 3"-5"

Rosehead nail
Rosehead nail, pointed

June 11, 1964. Sq. 6, 15"-18"

Clay trade pipe bowl fragment, marked T.B. on spur.
1 large white barrel bead, 1 white seed bead.
3 white cane beads, 5 white seed beads, 1 translucent blue cane bead.
Large copper tinker 2" long.
Discarded
1 shard pasteware.
June 11, 1964, Sq. E, 9"-12"

166 Lead round ball .55 caliber
167 Unidentified iron object made of strap iron 1 1/8" wide and 1/8" thick wrapped around a tublar piece of the same width and 7/8" inside dia. Strap iron meets then flares out. Ends are broken.
168 Church plate iron door latch
169-73 Roundhead nail, pointed.
Discards: 1 roundhead nail.

June 12, 1964, Sq. E, 9"-12"

174 Lead round ball .52 caliber
175-77 Fragments sheet copper
176-79 Bone fragments
Discards: 5 bone fragments

June 11, 1964, Sq. F, 6"-9"

180 Clay trade pipe stem fragment
181 1 turquoise seed bead
182 1 white glass button
183 Bottle glass fragment
184 White glass fragment
185 Roundhead nail, pointed
186 Bone fragment
Discards: 1 cut nail
1 bone fragment

June 12, 1964, Sq. A, 10"-21"

187-88 Clay trade pipe stem fragment
189 1 white barrel bead, 6 white cane beads, 6 white seed beads. 1 white seed bead with green glass inlay on the quarters, 2 red beads with brown glass overlay, 1 turquoise seed bead.
190 Base fragment clear glass bottle marked Bull pin.
191 Stamp cut piece of copper
192 Roundhead nail, pointed
193 wrought iron staple 1" wide, 2 3/4" long.
194 Iron fragment 5/8" wide and 3/4" thick, 3 1/8" long
Discards: 1 roundhead nail
1 bone fragment

June 12, 1964, Sq. B, 12"-15"

195-97 Clay trade pipe stem fragments
196 1 yellow globular clay bead-glass inlay missing, white barrel bead, 1 white cane bead, 5 white seed beads.
199 1 lead shot, app. #4 buck.
200 Bone fragment
Discards: 1 fragment window glass
3 bone fragments

314. Fire striker?
315. 3 roshed nails
316. Saw cut fragment bone
Discards:
1 bone fragment

Bag #51
June 16, 1964. Sq. A trench, 1.6'-2.0'

317. 2 white cane beads, 4 white seed beads, 1 turquoise seed bead
318. Fragment olive-green bottle glass
319. Fragment light green bottle glass
320. Fragment clear bottle glass
321. Stone blade fragment
322. Rim sherd white iron stone china
323. Shard paste-ware
324. Iron lug from copper kettle fragment of copper held to lug by copper rivet
325. Fragment east iron
326. Fragment iron-possibly knife point?
Discards:
1 fragment light green bottle glass
3 roshed nails

Bag #52
June 16, 1964. Sq. B, trench, 0"-6"

327. Clay trade pipe stem fragment
328. Fragment base olive green glass bottle
329. 3 roshed nails
330. Bone fragment
Discards:
1 roshed nail
2 fragment bone
Bag #53

331 Clay trade pipe stem fragment
332 2 white cane beads, 3 white seed beads
333 Fragment french gun flint
334 Brass cartridge casing .38-.55 calibre,
335 Sherd glazed earthen ware
336 Fragment light green bottle glass
337 Fragment threaded iron plug 3/4" dia
338 4 rosette head nails
Discards:
6 rosette head nails
1 cut nail

Bag #54
June 16, 1964. Sq. A plus 10°, 12°-15"

331 Clay trade pipe bowl fragment
340-355 Clay trade pipe stem fragments
356 Fragment clear bottle glass
357 Fragment fused glass
358-360 Sherd blue willow ware
361 Fragment kettle copper with nails holes along one edge
362-63 Fragment kettle copper
364 Bone fragment-rib
365-66 Animal teeth
Discards:
1 sherd blue willow ware
3 fragments kettle copper
0 fragments bone

Bag #55
June 16, 1964, Sq. D, trench, 6°-12°

367 Fragment olive green bottle glass

Bag #56
June 16, 1964. Sq. A, 9°-12°

360 Clay trade pipe bowl fragment
369 Clay trade pipe stem and base of bowl fragment marked G.W. on spur.
370-72 Clay trade pipe stem fragments
373 Fragment fused glass
374 Fragment kettle copper
375 Fragment 3" dia. iron wire app. 13" long with one end bent to form hook
376 Large wire spike 8 1/8" long, 3/8" dia.
377 5 rosette head nails
Discards:
5 rosette head nails
3 cut nails
3 wire nails
5 fragment bone

Bag #57

378 Clay trade pipe bowl fragment
379-81 Clay trade pipe stem fragments
382 1 white cane bead, 2 white seed beads, 1 turquoise seed beads
383 Lead round ball .56 calibre
Fragment bronze buckle
385  Short black animal fur
   Discards:
   4 roosehead nails
   2 fragments clear bottle glass
   1 fragment window glass
   2 fragment kettle copper
   4 fragments bone

Bag #59  June 16, 1964, S-Stockade trench, 15'–16''

366  4 white seed beads
337  fragment chart scro, er
508  1 roosehead nail
   Discards:
   1 roosehead nail
   1 fragment brass
   10 fragments animal rib

Bag #60  June 16, 1964, Sq. 3/W. of Sq. A, 16''

369  fragment bright green bottle glass
370  fragment clear bottle glass, rim
391  fragment kettle copper
352  fragment 1/8'' dia. wire with one end flattened and bent to L shape
   Discards:
   2 cut nails
   1 wire spike
   1 fragment window glass

Bag #61  June 16, 1964, Sq. A', 9''–12''

373  9 white seed beads, 1 translucent light blue cane bead, 2 turquoise seed beads, 1 green seed bead, 1 brown glass overlay seed bead
394  4 roosehead nails
   Discards:
   10 roosehead nails
   4 cut nails

Bag #62  June 17, 1964, Sq. A', 15''–16''

395–96  Clay trade pipe stem fragments
397  5 white seed beads, 1 turquoise seed bead
398–93  fragment olive-green bottle glass
400  Chert postware
401  3 roosehead nails
   Discards:
   1 chert postware

Bag #62  June 17, 1964, Sq. A', 15''–16''

402  Clay trade pipe bowl fragment
403  Clay trade pipe stem and bowl fragment marked T.D. on spur
404  Clay trade pipe spur fragment marked T.D.
405–2?  Clay trade pipe stem fragments
1 red glass globular bead, 1 translucent blue cane bead with fine white lines running the length of it, 1 white barrel bead, 1 white globular bead, 9 white cane beads, 15 white seed beads, 2 light blue seed beads, 1 translucent and turquoise seed beads.

8 white cane beads, 26 white seed beads, 1 white barrel bead, 1 white w/ pink and green glass inlay seed bead, 3 turquoise seed beads, 1 dark blue seed bead, 1 light blue seed bead.

2 white cane beads, 3 white seed beads, 2 turquoise seed beads.

2 white cane beads, 5 white seed beads.

Fragment green bottle glass

Fragment dark green bottle glass

Fragment amber bottle glass

Fragment window glass

Bruce Jew's harp

Fragment 1/4" dia brass wire

Fragment bottle copper

Lead rumel with fragment charcoal imbedded

Large fragment sheet iron

Horse shoe

Strap iron 1/4" wide, ends riveted together to form circle 5 3/4" dia.

Fragment iron rod, 24" long, 1/4" dia.

Fragment auto-speedometer cable

12 rosehead nails

Discards:

14 rosehead nails

5 out nails

2 wire nails

2 fragment amber bottle glass

2 fragments crystal bottle glass

1 fragment dark green bottle glass

1 fragment light green bottle glass

3 fragments modern soft drink bottle

3 fragments window glass

2 fragment fused glass

1 sherd potware

1 fragment bottle copper

1 fragment sheet iron

19 fragment bone

Bag #63 June 19, 1964, Sq. 6 trench, 24" plus

1 white barrel bead, 7 white cane beads, 11 white seed beads, 1 translucent turquoise cane bead, 2 turquoise seed beads, 1 brown glass overlay seed bead, 1 grey seed bead.

Lead round ball 52 calibers.

Lead round ball 55 calibers.

Fragment green window glass

Discards:

1 wire nail

2 out nails

2 rosehead nails

10 fragments green window glass

1 fragment green bottle glass

2 bone fragments

Bag #64 June 22, 1964, Sq. 60 /30W, 0"-12"

Discards:

4 fragment iron
Bag # 55  June 22, 1964. Sq. 70M/15W, 0°-12".

448  Fragment amber bottle glass
449  Shard pasteware with blue and black line design
450  Fragment clear bottle glass with part of trade mark
451  Fragment cast iron

Discards:
10 cut nails
2 sherds white ironstone chima
1 fragment amber bottle glass
2 fragment window glass

Bag # 66  June 22, 1964. Sq. 50M/15W, 0°-12".

452  Clay trade pipe stem fragment
453  1 white seed bead, 1 brown glass overlay seed bead
454  Fragment dark green bottle glass
455  Lug from copper kettle
456  Fragment cast iron

Discards:
6 cut nails
2 fragment amber bottle glass
1 fragment red plastic
1 fragment window glass
1 shard white ironstone chima
2 sherds earthenware
5 fragment lead

457  Clay trade pipe stem fragment
458  1 white obsidian bead, 3 white seed beads.
459  Fragment brass
460  Jaw bone from small animal
461  Fragment bone, large animal

Discards:
2 roosehead nails
1 fragment green window glass
3 fragment bone

Bag # 68  June 23, 1964. Sq. E, 18°-51".

462  2 white cane beads, 6 white seed beads, 1 turquoise seed bead.
463  7 roosehead nails, 2 cut nails

Discards:
2 roosehead nails
1 fragment clear bottle glass
1 fragment window glass
5 fragment tin can cover
12 fragment bone.

464-67  Clay trade pipe stem fragments
468  1 globular yellow clay with blue glass inlay bead, 1 white seed bead, 1 turquoise seed bead
469  Shard blue willow ware.
470  Fragment dark green bottle glass
Bag #70  June 24, 1964, Sq. 6, 27"-36"

471 2 rosehead nails
Discards:
2 rosehead nails
1 fragment bone

Bag #71  June 24, 1964, Sq. 6, 0"-30" trench

476-78 Clay trade pipe stem fragments
477 Large fragment sheet iron
480 Tin can cover
481 Fragment charred wood
482 Large animal bone, cut with saw.
Discards:
2 wire nails
1 bottle cap
2 fragment tin
1 fragment bone

Bag #72  June 24, 1964, Sq. 6, 17"

483 Clay trade pipe stem fragment
484 Fragment fused glass
Discards:
2 wire splices

Bag #73  June 24, 1964, Sq. A 27"-30" Post #1

485 Wood fragment
Discards:
1 fragment bone
1 fragment tin

Bag #74  June 24, 1964, Sq. 240E/80W, 0"-3" Log cabin site

486 Clay trade pipe stem and bowl fragment marked "G-92" on spur.
487-88 Clay trade pipe stem fragment
490 Copper disc 1 1/2" dia. with holes in center 5/16" dia.
5 rosehead nails
Discards:
5 rosehead nails
3 fragment bone

Bag #75  June 25, 1964, Sq. 230N/55W, 0"-3" Cabin site

491-92 Clay trade pipe stem fragment
493 Lead fragment
5 rosehead nails

Bag #76  June 26, 1964, Sq. 240E/65W, 0"-3" Cabin site

Fragment amber bottle glass
Fragment clear bottle glass
Window glass
1013  Rim shard blue willow china
1015  Shard white ironstone china
1014  Shard yellow glazed pasteware
1016  Fragment fused glass
1017  Fragment gun barrel or iron pipe, 3/4" outside dia., 5" long
1018  Fragment iron wood rasp
1019  Toy tin cricket
1020  Ironawl 7 1/2 3/4" long
1021  Fragment kettle copper
1022  Lower right rodent claw bone
1023-25 Animal teeth
1026  Large box e fragment
1027  12 roosehead nails
Discards:
50 roosehead nails
7 cut nails
2 wire nails
6 fragments dark green bottle glass
2 fragments light green bottle glass
6 fragments clear bottle glass
1 fragment amber bottle glass
16 fragments window glass
11 shards pasteware china
5 shards white ironstone china
4 fragments fused glass
1 fragment kettle copper
1 fragment strap iron
7 fragment bone

Bag #221 July 7, 1964  Sq. - North of Blockhouse 9" - 12"
1028-29 Clay trade pipe bowl fragment
1030  Clay trade pipe stem fragment
1031  Shard yellow glazed pasteware
1032  1 roosehead nails
Discards:
1 cut nail
1 roosehead nail
1 wire nail
1 fragment fused glass
1 shard pasteware
1 fragment bone

Bag #222 July 7, 1964  Sq. - North of Blockhouse 12" - 15"
1033-45 Clay trade pipe bowl fragment
1034  Clay trade pipe stem fragment
1046  3 white cone beads, 31 white seed beads, 6 turquoise seed beads.
1 red seed bead.
1347  1 brass tinkles
1348  1 wooden button
1049  Fragment mouth, neck and shoulder of dark green glass bottle
1050  Fragment green bottle glass
1052-54 Window glass fragment
1056-57 Shard glazed earthenware
1058  Fragment fused glass
1059  Fragment kettle copper
1060  Unidentified iron object 1" long, 7/8" wide and 5/16" thick with
thin tang projecting which is 3/8" wide, 1/8" down to 1/16" thick and 2½" long.

1061 Fragment iron bar ½" dia., 2 ¾" long
1062-63 Animal teeth
1064 Fragment rib bone
1065 5 rosehead nails
1066 1 wire nail
1067 Fragment birch bark?
  Discards:
  24 rosehead nails
  3 cut nails
  1 wire spike
  1 fragment tin
1 fragment green bottle glass
  19 fragments window glass
  6 shards pasteware
  4 fragment fused glass
  19 bone fragments

Bag #223 July 7, 1964. Sq. North of Stockade 15"-18"

1068-69 Clay trade pipe bowl fragment
1073-77 Clay trade pipe stem fragment
1078 Fragment globular yellow clay with blue glass inlay bead.
1079 Fragment green barrel bead
1080 19 white cane beads, 50 white seed beads, 1 brown glass overlay cane bead, 1 brown glass overlay seed bead, 1 turquiose cane bead
12 turquoise seed beads, 2 gray-blue seed beads, 1 gray seed bead, 1 dark blue seed bead.
1081 1 copper tinkler
1082 Copper eyestalk?
1083 Fragment bottle copper
1084 Fragment bottle mouth
1085 Fragment clear bottle glass
1086 Fragment window glass
1087 Sherd pasteware
1088 Fragment fused glass
1089 Fragment strap iron
1090 Fragment bone
1091 Fragment iron key 2" long
1092 9 rosehead nails
  Discards:
  15 rosehead nails
  1 cut nail
  3 wire nails
  1 fragment bottle glass
  7 fragment window glass
  2 shards pasteware
  Modern staples for staple gun
  5 fragments strap iron
  11 bone fragments

Bag #224 July 7, 1964. Sq. North of Stockade 6"-9"

1095-96 Clay trade pipe stem fragments
1097 1 white barrel bead, 9 white cane beads, 12 white seed beads,
  7 turquoise seed beads.
1098 Green glass bottle neck
1099-1100 Clear glass bottle fragment
1101 Window glass fragment
1102 Fused glass fragment
1103 Fragment blue willow china
1104 Fragment fused blue-gray glass
1105 Triangular garden hoe blade
1106 Fragment lock (door) plate
1107 Iron ice crazer
1108 Fragment iron pot rim
1109 Fragment toy cap gun
1110 3 rosette nails
   Discard:
   10 rosette nails
   4 cut nails
1111-13 Clay trade pipe stem fragment
1114 Fragment dark green bottle glass
1115 Fragment amber bottle glass
1116 Fragment clear bottle glass
1117-18 Fragment window glass
1119 Sherd yellow glazed pasteware
1120 Fragment bottle copper
1121 Fragment fused glass
1122 Leather harness strap, with buckle and snap. Strap is 1 1/8" wide
   Buckle and snap are iron
1123 3 rosette nails
   Discard:
   1 rosette nail
   1 wire nail
   1 fragment dark green bottle glass
   1 fragment amber bottle glass
   1 fragment light blue bottle glass
   1 fragment window glass
   1 fragment fused glass
   3 sherds pasteware.

Bag #225 July 7, 1964. Sq. No. of Blockhouse. 9°-9”

1124-35 Clay trade bowl fragment
1136-54 Clay trade pipe stem fragment
11.55 3 white barrel beads, 17 white cane beads, 34 white seed beads,
   1 blue-gray seed bead, 6 turquoise seed beads, 3 brown glass
   overlay seed beads, 1 black seed bead, 1 blue seed bead, 1 green seed bead
   43 white cane beads, 1 white barrel bead, 61 white seed beads.
11.56 1 black seed bead, 22 turquoise seed beads, 1 translucent blue n
   seed bead, 1 black cane bead, 3 brown glass overlay seed beads.
   1 light blue cane bead, 1 pink barrel bead.
11.57 1 white barrel bead, 1 yellow globular with blue glass inlay
   bead.
11.58-53 Fragment dark green bottle glass
11.60-61 Fragment window glass
11.62 Fragment fused glass
11.63-64 Sherd earthenware
