This autumn, Smoky Mountain elk will be players in a courtship ritual that is one of the great spectacles of the North American animal kingdom. Mature male (bull) elk will compete for control of groups of females called “harems.”

Most of the time, the competition between males will be pure showmanship—prancing, bugling, grunting, and other non-contact methods of intimidation. At times, however, the contests may turn deadly serious with bulls using their sharp antlers to attack other males.

Bugling is one of the most widely-recognized parts of courtship (called the rut). Bulls toss back their heads and utter a long, loud, sonorous call that can be heard for as much as a mile away. Bugling is a way for bull elk to assert their dominance against rival males as larger bulls usually have deeper, louder calls.

The white-tailed deer (bucks) also have some dramatic courtship rituals. They generally stop eating during the rut and will chase or lock antlers with other bucks to determine dominance. Males may also be observed chasing females and making bleating sounds.

The white-tailed deer rut lasts from October into January with a peak around Thanksgiving. Cades Cove is probably the best place in the park to watch deer. The 11-mile Cades Cove Loop Road is open from sunrise to sunset throughout the year.

Both deer and elk are especially unpredictable in fall. People should never approach or attempt to feed them. Use binoculars and cameras with telephoto lenses to observe their activities.

The Fall “Rut” Is On!

Approximately 200 elk now live in the vicinity of the national park.

This autumn, Smoky Mountain elk will be players in a courtship ritual that is one of the great spectacles of the North American animal kingdom. Mature male (bull) elk will compete for control of groups of females called “harems.”

Most of the time, the competition between males will be pure showmanship—prancing, bugling, grunting, and other non-contact methods of intimidation. At times, however, the contests may turn deadly serious with bulls using their sharp antlers to attack other males.

Bugling is one of the most widely-recognized parts of courtship (called the rut). Bulls toss back their heads and utter a long, loud, sonorous call that can be heard for as much as a mile away. Bugling is a way for bull elk to assert their dominance against rival males as larger bulls usually have deeper, louder calls.

The white-tailed deer (bucks) also have some dramatic courtship rituals. They generally stop eating during the rut and will chase or lock antlers with other bucks to determine dominance. Males may also be observed chasing females and making bleating sounds.

The white-tailed deer rut lasts from October into January with a peak around Thanksgiving. Cades Cove is probably the best place in the park to watch deer. The 11-mile Cades Cove Loop Road is open from sunrise to sunset throughout the year.

Both deer and elk are especially unpredictable in fall. People should never approach or attempt to feed them. Use binoculars and cameras with telephoto lenses to observe their activities.

Thanks to a $250,000 grant from Partners in Preservation (PIP), crews will be at work this fall rehabilitating the iconic Clingmans Dome observation tower. Their tasks will include stabilizing support walls at the base of the ramp, repairing deteriorated sections of columns, and repointing some stone masonry.

For safety reasons the tower will be closed to the public during the duration of the project, which is likely to last through most of the fall. However, visitors will still be allowed to hike up the 0.5 mile paved trail to the top of the mountain, which is the high point in the Smokies and the third highest summit east of the Mississippi River. Visitors on the trail should be aware that construction vehicles may be headed up or down the route.

Great Smoky Mountains National Park competed with 20 other parks for the Partners funding. In honor of the National Park Service centennial last year, grants were awarded to nine historic preservation projects in various national parks. The National Trust for Historic Preservation and the American Express Company, among others, team up to provide the PIP grants each year.

The modern design of Clingmans Dome tower was a radical concept when it was conceived by local architect Hubert Bebb and the NPS in the late 1950s.

The observation tower was created to replace a wooden structure upon which visitors had to climb steep stairs to get a view above the Fraser fir trees. That tower had fallen into disrepair and was closed in 1950. The ramp of the new tower was designed to mimic the grade of the trail leading to the mountaintop and allows access by strollers and persons unable to climb multiple flights of stairs.
The list below shows number of sites, elevations, daily fees, approximate 2017 operation dates, and maximum RV lengths. Visit www.nps.gov/grsm for current information.

- **ABRAMS CREEK** 16 sites, elev. 1,125’, $14, open May 26-Oct. 9, 12’ trailers
- **BALSAM MOUNTAIN** 42 sites, elev. 5,310’, $14, open May 26-Oct. 9, 30’ RVs
- **BIG CREEK** 12 sites, elev. 1,700’, $14, open April 14-Oct. 29, tents only
- **CADES COVE** 159 sites, elev. 1,807’, $17-$20, open year-round, 35’-40’ RVs
- **CATALOOCHEE** 27 sites, elev. 2,610’, $20, open April 7-Oct. 29, reservations required, 31’ RVs
- **COSBY** 157 sites, elev. 2,459’, $14, April 14-Oct. 29, 25’ RVs
- **DEEP CREEK** 92 sites, elev. 1,800’, $17, open April 14-Oct. 29, 26’ RVs
- **ELKMONT** 220 sites, elev. 2,150’, $17-$23, open March 10-Nov. 26, 32’-35’ RVs
- **LOOK ROCK Closed**
- **SMOKEMONT** 142 sites, elev. 2,198’, $17-$20, open year-round, 35’-40’ RVs

**facilities**

- **challenges**
- **accommodations**
- **Bicycle and pedestrian morning on Cades Cove Loop Road.**

**pets in the park**

Pets are allowed in frontcountry campgrounds and beside roads as long as they are restrained at all times. Pets are not allowed on park trails, except for the Gatlinburg and Oconaluftee River trails. Dogs on these trails must be leashed.

**picnic areas**

Please see pages 8-9 for locations of picnic areas. All have charcoal grills for cooking. Cades Cove, Deep Creek, Greenbrier, and Metcalf bottoms are open year-round. Heintooga closes October 9. Big Creek, Collins Creek, and Cosby close on October 29. Chimneys closes November 26. Look Rock will not open this year.

**special events**

- December 9: Festival of Christmas Past
- Sugarlands Visitor Center
- December 16: Holiday Homecoming
- Oconaluftee Visitor Center

**visitor centers**

- Sugarlands—Sept. & Oct.: 8-6; Nov. 8-5; Oconaluftee—Sept. & Oct.: 9-6; Nov. 9-5; Cades Cove—Sept. & Oct.: 9-6:30; Nov. 9-5:30; Clingmans Dome—Sept. & Oct.: 10-6; Nov. 9:30-5.

**facility rentals**

The Appalachian Clubhouse and Spence Cabin, both located near Elkmont Campground, can be rented for daytime events from spring through fall. Contact www.recreation.gov.

**other services**

There are no gas stations, showers, or restaurants in the national park. Mt. LeConte Lodge is the only lodging.

**campsites at Elkmont, Smokemont, Cataloochee, Cosby, and Cades Cove may be reserved.**

- **Campsites at Elkmont, Smokemont, Cataloochee, Cosby, and Cades Cove may be reserved.**
- **For reservations call 1-877-444-6777 or contact www.recreation.gov.**
- **Sites may be reserved up to six months in advance.**
- **Reservations are required at Cataloochee Campground.**
- **Other park campgrounds are first-come, first-served.**
- **Site occupancy is limited to six people and two vehicles (a trailer = 1 vehicle). The maximum stay is 14 days.**
- **Special camping sites for large groups are available seasonally at Big Creek, Cades Cove, Cataloochee, Cosby, Deep Creek, Elkmont, and Smokemont. Group sites must be reserved. Call 1-877-444-6777 or contact www.recreation.gov. Group sites may be reserved up to one year in advance.**

**bicycling**

Most park roads are too narrow and heavily traveled by automobiles for safe or enjoyable bicycling. However, Cades Cove Loop Road is an exception. This 11-mile, one-way, paved road provides bicyclists with excellent opportunities for viewing wildlife and historic sites.

- **Helmets are required for persons age 16 and under and are strongly recommended for all bicyclists.**
- **From mid-May through mid-Sept., Wednesday and Saturday mornings, only bicyclists and pedestrians are allowed on Cades Cove Loop Road. Bicycles may be rented at the Cades Cove Campground store next to Cades Cove Campground.**

**accommodations**

LeConte Lodge (accessible by trail only) provides the only lodging in the park. Call (865) 429-5704.

For information on lodging outside the park:
- Bryson City 1-800-867-9246
- Cherokee 1-828-789-0034
- Fontana 1-800-849-2258
- Gatlinburg 1-800-588-1817
- Maggie Valley 1-800-624-4431
- Pigeon Forge 1-855-716-6199
- Sevierville 1-888-889-7415
- Townsend 1-800-525-6834

**smokies trip planner**

to order maps and guides: www.SmokiesInformation.org
The above temperature and precipitation averages are based on data for the last 20 years. Temperatures are in degrees fahrenheit. An average of over 84” (7 feet) of precipitation falls on the higher elevations of the Smokies. On Mt. Le Conte, an average of 82.8” of snow falls per year.

horse riding

Horseback riding is generally available from early March into November. Rates are $30 per hour. Most stables have maximum rider weight limits of 225 or 250 pounds and age restrictions for children. Please call the stables below or stop at a visitor center for detailed information.

CADES COVE (865) 448-9009
www.cadescovestables.com
SMOKEMONT (828) 497-2373
www.smokemontriding-stable.com
SMOKY MTN (865) 436-5634
www.smokymountainriding-stables.com
SUGARLANDS (865) 436-3535 www.sugarlandsriding-stables.com

Hayrides and carriage rides ($12 per person) are available from Cades Cove Riding Stable. Wagon rides ($10 per person) are offered at Smokemont. Souvenir photos, tee-shirts, hats, and ice may be available.

The Park Service operates horse camps at Cades Cove, Big Creek, Cataloochee, and Round Bottom. Call 877-444-6777 or visit www.Recreation.gov for reservations.

backcountry camping in the smokies

Camping at a backcountry campsite or shelter can be an exciting adventure for persons properly equipped and informed. To facilitate this activity, the National Park Service maintains over 800 miles of trails and more than 100 backcountry campsites and shelters throughout the park. One of the greatest challenges for backcountry campers is deciding where to go. Here are some tools to help.

1. Go online to view the park’s official trail map (www.nps.gov/grsm/plan-yourvisit/maps.htm), which shows all park trails, campsites, and shelters. Park rules and regulations are also listed here. If you wish, you can purchase the printed version of the trail map for $1 by stopping at any park visitor center or calling (865) 436-7318 x226 or shopping online at www.SmokiesInformation.org.

2. Call or stop by the park’s backcountry office (open every day from 8:00 a.m. to 5:00 p.m.). The office is located in Sugarlands Visitor Center, two miles south of Gatlinburg on Newfound Gap Road (U.S. 441). (865) 436-1297.

3. Make your reservation through the backcountry office at Sugarlands Visitor Center (by phone or in person) or online at www.smokiespermits.nps.gov.

Reservations and permits are required for all overnight stays in the backcountry. The cost is $4 per person per night. Reservations may be made up to 30 days in advance.

Rangers will need to rescue over 100 people in the backcountry this year. If you don’t want to be one of them:

- **Ditch the sandals.** Sturdy hiking boots are the best way to prevent a lower leg injury.
- **Know when the sun sets.** Many hikes turn into rescues. Many hikes turn into rescues because people get caught out on trails after dark without flashlights or headlamps.
- **Know your limits.** Don’t plan a 15-mile hike unless you are in spectacular physical condition and have done such hikes in mountain terrain recently.
- **Prepare for the weather.** These mountains are green because it rains a whole lot here. Always carry rain gear. Stay dry.
1. clingmans dome
A paved, but steep, 0.5 mile trail leads to the highest point in the Great Smoky Mountains. The observation tower may be closed for repairs, but there are good views from the trail. To get there: turn off Newfound Gap Road 0.1 mile south of Newfound Gap and follow the 7-mile-long Clingmans Dome Road to the parking area. A visitor center is located along the trail. The road to Clingmans Dome is closed from December 1 through March 31 due to weather.

2. andrews bald
“Balds” are mountaintop meadows of mysterious origin. Andrews offers panoramic mountain views in favorable weather. The 3.6 mile roundtrip hike to Andrews Bald is along Forney Ridge Trail and starts from the end of Clingmans Dome parking area. The trail leads through high elevation spruce-fir forest with evergreen trees and unusual flora and fauna.

3. sugarlands visitor center
It’s fun, it’s free, and it’s easy to find. Sugarlands Visitor Center is located 2 miles south of Gatlinburg, TN on U.S. 441. Highlights include flora and fauna exhibits, a 20-minute film in the surround-sound theater, an information desk, and bookstore. Several short nature trails also begin at the center, as do ranger-led walks and talks. Open every day except Christmas.

4. water-powered grist mills
Two historic, water-powered grist mills operate from 9-5 daily, grinding corn into corn meal. Cable Mill sits in Cades Cove (halfway around the one-way loop road). Mingus Mill is 2 miles north of Cherokee, NC on U.S. 441 (Newfound Gap Road). Corn meal is available for purchase.

5. newfound gap
This gap is a low point in the mountain range and straddles the boundary of North Carolina and Tennessee. From here one can enjoy spectacular views into both states and take a short stroll along the famous Appalachian Trail. There are also restrooms and the historic Rockefeller Memorial.

6. oconaluftee history museums
The Davis-Queen house at the Mountain Farm Museum. This history buff’s paradise now offers free indoor and outdoor museums. It also features old-time breeds of livestock (seasonally) an heirloom garden and row crops and occasional historic demonstrations. The new visitor center and mountain farm museum are located on U.S. 441 (Newfound Gap Road), 2 miles north of Cherokee, NC. A new audio tour of the farm can be rented at the visitor center for a small fee. Open every day except Christmas.

7. deep creek waterfalls
Around 2 miles of walking will acquaint you with beautiful Deep Creek and three pretty waterfalls (Juney Whank, Tom Branch, and Indian Creek). The trails to the waterfalls start from the large parking area at the end of Deep Creek Road (across the creek from Deep Creek Campground). Deep Creek also features a picnic area.

8. mt. le conte
The Rainbow Falls Trail to Mt. Le Conte and LeConte Lodge will be closed Mondays-Thursdays for trail repairs through November 16. However, there are plenty of alternatives for hikers to this popular peak. The Boulevard Trail starts from Newfound Gap and runs 8.1 miles to LeConte Lodge. Bull Head Trail begins from Cherokee Orchard and is 6.4 miles long. Alum Cave Trail starts from Newfound Gap Road and is 5 miles long. Brushy Mountain and Trillium Gap trails lead 9.1 miles to the summit.

WHERE TO BEAT THE CROWDS
If you want to beat the October crowds, try some of these off-the-beaten-path destinations.

9. Look Rock walking trail and tower. Great views, just off the Foothills Parkway West, 18 miles from Townsend, TN.

10. Cataloochee Valley. This remote area is accessible only by narrow, winding secondary roads. But when you arrive, there are elk to watch, historic buildings to explore, and plenty of trails to walk. 39 miles from Cherokee; 65 miles from Gatlinburg.

11. Foothills Parkway East. A 6-mile scenic road connects U.S. 321 with Interstate-40 and offers several parking areas with spectacular autumn views along the way.

12. Fontana Dam and Lake. A TVA visitor center and tours highlight the highest dam in the East. Fontana Marina offers boat rentals and shuttles for access to remote, historic areas like Hazel Creek and Eagle Creek. 33 miles from Bryson City.
Trails Forever Crews Turn Rocky, Rooty Gulleys into Beautiful Trails

Any veteran hiker in Great Smoky Mountains National Park has probably noticed a spectacular improvement in several of the park’s most popular trails over the last eight years. Fornery Ridge Trail to Andrews Bald has been transformed from an ankle twisting obstacle course into an attractive, durable, landscaped footpath. Ditto for Chimney Tops and Alum Cave trails.

Now the park’s Trails Forever crew, the cadre of park employees, interns, and volunteers responsible for the aforementioned successes, has turned its efforts to Rainbow Falls Trail to Mount Le Conte, one of the most heavily-used trails in America’s most-visited national park.

“A lot of the [Rainbow Falls] trail was eroded down to a hazardous gulley filled with roots and rocks,” said Josh Shapiro, Trail Supervisor for the Trails Forever crew. “Because the drainage system had failed, the gulley kept eroding deeper and deeper,” he added.

Rainbow Falls has also become plagued with a destructive network of social trails, places where hikers have decided to shortcut to a stream or cut across the switchbacks of the maintained trail. Social trails cause erosion, destroy wildflowers, trees, and other vegetation, and all-too-frequently cause people to get lost.

For the Trails Forever crew, erasing social trails is no small task. Workers need to rehabilitate the soil, transplant ferns, grasses, and other vegetation on top of the paths, bring in forest duff, then arrange logs and deadfalls to discourage hikers from recreating the social trails. Of course, trail crews would greatly prefer hikers to stay on the maintained trails and refrain from creating new ones. This would save park flora and fauna, reduce the soil eroding into streams, cut down on visitor injuries and searches, and save the park a significant amount of money.

Shapiro said fixes for the eroded gullies are by necessity drastic. The crew often builds “turnpikes”—frames made from black locust logs that hold rocks and soil in place—and stone staircases constructed from native materials. The massive rocks are moved into place with help from heavy duty grip hoists.

To accommodate the ongoing work, Rainbow Falls Trail is closed Mondays through Thursdays until November 16. Hikers are welcome Fridays through Sundays and on holidays. By the end of the season, reconstruction work should be finished from the Rainbow Falls trailhead to the waterfall.

In 2018, plans are to again close the trail Mondays through Thursdays from early May to mid-November. The crew will then be focusing on the section from the waterfall to the top of Le Conte, including a quarter-mile stretch that was heavily impacted by the 2016 wildfire.

The Trails Forever crew consists of nine National Park Service employees, most of whom work on a temporary or seasonal basis and 12 AmeriCorps enrollees who are part of the American Conservation Experience (ACE) program. On Wednesdays the crew is bolstered by a number of park volunteers.

Trails Forever is supported by an endowment created and managed by the nonprofit Friends of the Smokies.

“The rock work we are doing should last over 100 years,” Shapiro said. “The turnpikes and other improvements should be good for decades as long as they receive routine maintenance.”
### SUGARLANDS/ELKMONT AREA

### METCALF BOTTOMS AREA

- **Junior Ranger: School Days at Little Greenbrier:** Go back in time to discover what it was like to live in a mountain community and go to school in a one-room schoolhouse. Fun for all ages, and great for Junior Rangers. Please arrive 15 minutes before program start; space is limited.

### CADES COVE AREA

- **Junior Ranger Program:** Join a Park Ranger for a hands-on exploration of the Smokies. Participation counts towards credit for earning a Junior Ranger badge and certificate.
- **WILD by Design:** A short talk and demonstration about the wild things in the Smokies.
- **Wee Wild Ranger Program:** A fun, interactive program specifically for kids 3-5 years old learning about butterflies. Kids will receive a “Wee Wild Ranger” certificate.
- **Evening Hayride:** Enjoy a ranger-led open air hayride viewing wildlife and discovering the diversity of Cades Cove. Fee: $14.00 per person.

**Note that travel time to programs at Cades Cove Visitor Center/Cable Mill area could be an hour or more once you get into the Cove due to heavy traffic volume. Plan accordingly.**
THE LATE NOVEMBER 2016 wildfires burned hottest on south-facing, dry sites where Table Mountain pine forest dominates. Most of the duff ground cover was reduced to charcoal. Still, tiny Table Mountain pine seeds rained from the cones dangling in the treetops. By the summer of 2018, the pines will be knee-high. The roots of burned mountain laurel and scarlet oaks will send up shoots and eastern fireweed and Canada horseweed will proliferate.

TABLE MOUNTAIN PINES will be 3-5 feet tall in five years. It will be a “dog-hair thicket” of pines, too dense to walk through. There may be “islands” of red maple and oak saplings 8-10 feet tall. Some grasses and wildflowers such as goldenrod and greater tickseed will cover the ground.

VERY DENSE, DARK Table Mountain pinewoods (with trees 25 feet tall) will cover the driest, sunniest mountain slopes. This pinewoods will be interspersed with a very few mountain laurel shrubs and oaks. Eventually, this forest type will require additional fire to perpetuate itself.
During late November of 2016, the Chimney Tops 2 fire burned an area of approximately 11,000 acres in Great Smoky Mountains National Park. Although the wildfire killed at least two black bears and probably killed small mammals such as chipmunks, squirrels, and mice in the park, the fire’s long-term impact on wildlife habitat should be positive.

“Fire creates early successional forest habitat,” said wildlife biologist Bill Stiver, “Which is good for elk, deer, bear, turkey, rabbits—and lots of other wildlife.” Disturbances like fire open up the forest canopy and allow energy in the form of sunlight to reach the forest floor. This, along with the nutrients released by the burned vegetation, triggers a surge of growth for plants that are nutritional for wildlife. “Wildlife flourishes when there is a mosaic of habitats, from old-growth forest to open, early successional zones,” Stiver added.

**Birds**
A number of beautiful songbirds favor early successional forest types, including Golden-winged Warblers, Prairie Warblers, and Red-headed Woodpeckers. All of these species are uncommon in the Smokies because disturbances like large fires are rare in the park’s usually soggy environment.

**Bears**
Black bears will benefit early in the year from the grasses that emerge in burn areas where the duff layer on the forest floor has been reduced or eliminated. Duff, like mulch in your garden, inhibits the growth of new plant life. The native shrubs that produce the blackberries, blueberries, and huckleberries that bears love also get a boost in the post-fire cycle of forest succession.

**Pollinating Insects**
The burning of the duff layer, a more open forest canopy, and the influx of nitrogen and other nutrients from burned wood should lead to a proliferation of flowering plants. These flowers will attract native bumblebees, butterflies, moths, and other insects that should in turn flourish themselves.

**Bats**
Most bats have a hard time flying through dense vegetation, so a more open forest makes hunting insects easier.

**Deer, Elk**
Browsers will benefit from the boost to grasses and other herbaceous plants. Root sprouts from burned trees and shrubs also make excellent browse.
Until approximately 1,200 years ago, Native Peoples who called the Great Smoky Mountains their home lived off the generous bounty of the land by hunting, fishing, and gathering wild plant foods. Over the centuries they had learned to follow nature’s smorgasbord, harvesting berries, wild greens, fruits, seeds, and nuts as the seasons provided them. Between 1,200 and 600 years ago, Native Peoples became increasingly proficient at agriculture, so that the majority of their plant-based foods came from the corn, beans, and squash they cultivated. All of these plants were native to the New World and seeds were exchanged among peoples in North America, Central America, and Mexico.

The European-American farmers who arrived in the Smokies in the early 1800s brought their own agricultural practices but also adopted many of the Cherokee life skills. The Europeans grew corn, raised livestock, hunted, fished, and gathered dozens of types of wild foods. For the most part, they were able to support their large families just from what they grew and gathered from the forest.

Wild foods do not simply fall into one’s lap. Harvesting, preparing, and preserving them takes an enormous amount of skill and practice. Families needed to know exactly when and where the foods would be ready for harvest so they could get there before insects, birds, and agents of decay beat them to it. People also needed to know how to prepare and preserve the bounty, whether through drying, pickling, canning, or other methods. When depending on wild foods for survival, the margin for error is thin.

Additional wild plant foods gathered by the Cherokee and earlier Native Peoples:

- Hickory nuts
- Sunflower seeds
- Hawthorn
- Amaranth
- Honey locust pods
- Knotweed
- Ragweed
- Bearsfoot (*Polymnia uvedalia*)

Additional wild plant foods gathered by European-American families:

- Violet leaves
- Holly leaves (for tea)
- Cut-leaved toothwort
- Blueberries
- Pokeweed
- Huckleberries
- Butternuts
- Gooseberries
- Beechnuts
- Wild cherries
- Buckeye nuts
- Haw apples
- White pine bark
- Paw-paws
- Maple syrup
Flying from Nova Scotia to south Florida can be exhausting, especially for a warbler or vireo that weighs less than half an ounce and travels under its own power at night, through unfamiliar terrain, dodging predators and storms along the way. So imagine, as dawn approaches, just how welcome a sight the Great Smoky Mountains must be, with their high ridge tops and 800 square miles of protected, verdant forest. It truly is the ideal place for a migrating flock to perch, rest, and refuel.

Southbound migrants travel at altitudes of around 10,000 feet, so being able to land atop a 6,000’ ridge saves a tired bird a significant amount of vertical flying. But the best thing about pulling over at the Smokies rest area is the all-you-can-eat buffet of energy-rich foods patiently awaiting the arrival of sojourning songsters.

With over 1,500 species of trees, shrubs, and other flowering plants, plus an even richer variety of insects, the Great Smoky Mountains are perfectly equipped to help the birds succeed in their trips from breeding area to wintering grounds. And for the plants it’s not all give and no take. The birds help the plants disperse their seeds and propagate their species by gobbling the berries and depositing the seeds elsewhere.

If you want to observe some of these migrating flocks, good places to watch are along Clingmans Dome Road and the Appalachian Trail. Newfound Gap, Look Rock, Mt. Collins, and Indian Gap are some of the best places to see songbirds feeding and restoring their fat reserves. The southbound migration starts in August and continues through October.

Other visiting migrants:
Tanagers (eat dogwood tree berries)
Crossbills (eat hemlock tree cones)
Pine siskins (eat hemlock tree cones)
if you love the smokies...

Friends of the Smokies

Since 1953, Great Smoky Mountains National Park is one of the few large national parks without an entrance fee. Most parks now charge $20 or $30 per vehicle. Without this supplemental income, it is difficult for the Smokies to adequately protect wildlife, preserve historic areas, and provide educational opportunities. You can help by using some of the money you saved at the entrance to support the park partners that support our park!

Association has supported the educational, scientific, and historical efforts of the National Park Service through cash donations and in-kind services. By the end of 2017 alone, the association will have provided more than $1.3 million in assistance that includes saving hemlock trees, living history demonstrations, environmental education programs, salaries for wildlife personnel, and historic preservation.

Association members receive a number of benefits to keep them informed about special events in the park and issues affecting the Smokies:

• Subscription to the semi-annual, full-color magazine Smokies Life
• Digital access to the award-winning quarterly park newspaper, Smokies Guide, and the association’s newsletter, The Bearpaw
• A 15-20% discount on books, music, gifts, and other products sold at park visitor centers and at our web store
• Special GSMA “Hiking 101” outings to Twentymile Loop, Porters Creek, Gregory Bald, Boogerman Trail, Charlies Bunion, cemeteries, and more. All hikes are led by knowledgeable staff who love to share the park with others.
• Groups are limited to 20 people. Also this year, ask us about “Gear Fest” programs and special gear discounts.

Join today using the coupon to the right or visit www.SmokiesInformation.org, or call us at 1-888-898-9102 x349. Membership starts at just $35. per year.

field school

An exciting variety of adventures awaits adults who long to get out and explore the park accompanied by expert guides. Programs are offered by the Smoky Mountain Field School and include Mt. Le Conte overnights, wildlife workshops, edible plants, wildflower photography, animal tracking, bird watching, salamanders, mountain cooking, and more. One-day programs start at as little as $79. Contact: (865) 974-0150 smfs.utk.edu.
**Yellows and Golds:**
Leaves turn yellow as trees stop producing green chlorophyll late in the summer. As chlorophyll breaks down, it reveals the yellow pigments carotin and xanthophyll, which were present all along but masked by the green.

- **Bronze yellow leaves:**
  - American beech (early October)

- **Golden yellow leaves:**
  - Hickories (late October)

- **Clear yellow leaves:**
  - Tuliptree (late September), yellow birch (early October), black birch (October)

**Reds:**
Leaves turn red when the green chlorophyll breaks down and reveals the reds created by leaves that have been converted into anthocyanins. The process is triggered by the shortening length of days and cooling temperatures, which signal trees to prepare for winter dormancy.

- **Red leaves:**
  - Witch hobble (early September), dogwood (late September), sourwood (early October), black gum (early October), Red maple (late October), scarlet oak (early November)

- **Red and/or gold leaves:**
  - Sassafras (late September), sugar maple (late October), sweetgum (October)
