Building a Better Park

Grand Teton National Park will be buzzing with activity over the next few years. On February 13, 2009, Congress passed the American Recovery and Reinvestment Act (ARRA) to help jump start the economy and create jobs. The park received over $23 million in ARRA funding to improve facilities and roads, while reducing environmental impacts. The park also received funding from other sources for park improvements.

Several projects are underway, causing some inconveniences. Construction delays will occur on the Teton Park and North Park roads. A new maintenance building at Colter Bay will allow mechanics to maintain park vehicles more safely. Trail crews are restoring and stabilizing the eroded Granite Canyon trail creating a safer, more pleasant backcountry experience.

In Moose, big changes are underway. Park headquarters will consolidate, removing many temporary and outdated facilities. The developed area will shrink by 8,000 square-feet, and energy consumption for headquarters will drop by 50 percent. Removing the temporary buildings will also allow for improved access to the Snake River launch for boaters.

Water system improvements and site work for new housing units will begin in Moose and Beaver Creek. At Gros Ventre Campground, a variety of improvements such as water/wastewater systems and new administrative sites will be ongoing.

Please be careful and patient as you visit the park. The inconveniences you experience today will allow for a more enjoyable experience for all visitors in the future.

See page 12 for road construction map & information.

Pets in the Park?

To ensure that you and your pet enjoy a safe visit, follow all pet regulations while inside the park. Wildlife may be drawn to pets and their owners; pets can wander away and may never be found—the park is a wild place!

Pets are allowed inside Grand Teton National Park under the following conditions: they must be physically restrained at all times and are not permitted on hiking trails, inside visitor centers or other facilities. Pets are not permitted on the multi-use pathway.

See page 4 for more information.

Annual Impacts of Vehicle Collisions with Wildlife

$155,000 Personal property damage
100 Large animals killed annually

Slow Down! Stay Alert!

As You Drive, Keep Them Alive!

ROADSIDE BEARS!

Bears feeding along roads quickly become habituated to cars and people, increasing their chances of being hit. Do not stop on the road to get closer to bears for their safety and yours.

- Use designated turnouts and stay in your car.
- Use binoculars or spotting scopes to view bears safely.
- Approaching wildlife is prohibited by law.
- Follow food storage regulations.
- Never feed a bear!

See page 5 for more information.
FEW LANDSCAPES IN THE WORLD are as striking and memorable as that of Grand Teton National Park. Rising abruptly from the valley floor, the Tetons offer a testament to the power and complexity of nature. The mountains, valleys, lakes, rivers and skies are home to diverse and abundant plants and animals.

People have been living in the shadow of the Teton Range for more than 11,000 years. The human history of this area is extensive, beginning with prehistoric American Indians, to the early Euro-American explorers, and the more recent frontier settlers. Today, more than 800 historic structures remain in the park.

This spectacular mountain range and the desire to protect it resulted in the establishment of Grand Teton National Park in 1929. Through the vision and generous philanthropy of John D. Rockefeller, Jr., additional lands were added, creating the present day park in 1950.

Grand Teton National Park is truly a special and unique place. With thoughtful use and careful management, it can remain so for generations to come. As with other sites in the National Park System, Grand Teton preserves a piece of the natural and cultural heritage of America for the benefit and enjoyment of future generations.

While you are here, take a moment to put your cares aside, stroll through a sagebrush meadow, hike a park trail, sit on a quiet lakeshore, and lose yourself to the power of nature.

We hope you will be refreshed and restored during your visit, and stay connected to this magnificent landscape long after you have returned home.

THE NAME TEEWINOT comes from the Shoshone word meaning “many pinnacles.” The name Teewinot may have once applied to the entire Teton Range, rather than just a single peak as it does today. Frithof Fryxell and Phil Smith named Teewinot when they successfully completed the first ascent of the mountain in 1929. This jagged peak towers above Cascade Canyon and Jenny Lake.

Teton Weather

Lightning Safety

Follow these guidelines to avoid lightning-related injuries.

- Afternoon storms are common in summer, get to a safe place before storms hit.
- Avoid mountain tops, ridges, open areas and lone trees, forested areas with trees of similar height are safer.
- Do not stand on tree roots.
- If boating, get off the water.
- The National Oceanic and Atmospheric Administration (NOAA) provides a variety of material and links through their website at http://www.lightningsafety.noaa.gov/outdoors.htm. This site contains critical lightning safety and medical information.

From September through October the average daily temperature in the valley is 62°F, but nighttime temperatures often drop below freezing. Warm sunny days can alternate with rain and snow.

Dress in layers when recreating and be prepared for changing conditions. Since 1999, there have been more than 20 injuries and two fatalities in the park due to lightning. Avoid mountain tops, ridges and open areas during storms.

NOAA weather forecasts are available at www.weather.gov/riverton, on NOAA Weather Radio at 162.525 MHz, or by calling the National Weather Service at 1-800-211-1448.

For Wildlife Observers & Photographers

BE A RESPONSIBLE WILDLIFE OBSERVER. Approaching wildlife stresses animals and can endanger you and your family. During the summer of 2005, a child was suddenly kicked by a moose and seriously injured. Use binoculars, spotting scopes or long lenses for close views and photographs.

Always maintain a safe distance of at least 100 feet from large animals such as bears, bison, moose and elk. Never position yourself between an adult and its offspring. Females with young are especially defensive. It is illegal to feed wildlife, including ground squirrels and birds. Feeding wild animals makes them dependent on people, and animals often bite the hand that feeds them.

Let wildlife thrive undisturbed. Harassment is any human action that causes unusual behavior, or a change of behavior, in an animal. Repeated encounters with people can have negative, long-term impacts on wildlife, including increased levels of stress and the avoidance of essential feeding areas. Please remember, nesting birds are easily disturbed. For wildlife, raising young is a private affair. If an adult bird on a nest flies off at your approach, circles you, or screams in alarm—you are too close to the nest. Unattended nestlings readily succumb to predation and exposure to heat, cold and wet weather.

Allow other visitors a chance to enjoy wildlife. If your actions cause an animal to flee, you have deprived other visitors of a viewing opportunity. Use an animal’s behavior as a guide to your actions, and leave the time you spend with wildlife. Follow all park regulations and policies, they are designated for the wildlife’s and your safety.

REDUCE YOUR USE OF DISPOSABLE PLASTIC BOTTLES

Park concessioners are joining Grand Teton National Park to reduce the sale and use of disposable plastic bottles by selling reusable containers. Save money, energy and reduce waste by using reusable bottles for water.

PARK CAMPGROUNDS

Colter Bay Campground*
350 individual sites, 9 walk-in ($8 per night), 11 group
Open: May 27 to Sept. 26
$20 per night, (800) 628-9988
Filling Time: evening

Colter Bay RV Park
112 RV sites
Open: May 27 to Sept. 26
$42-$55 per night, (800) 628-9988
Filling Time: call for information
RV hookups available

Flagg Ranch Campground
175 individual sites, hook-ups
Open: May 27 to Sept. 19
$35-$60 per night, (800) 443-2311
Filling Time: call for information
RV hookups available

Gros Ventre Campground*
350 individual sites, 5 group
Open: May 7 to Oct. 8
$20 per night, (800) 628-9988
Filling Time: rarely fills

Jenny Lake Campground
(tees only)
49 individual sites, 10 walk-in sites
Open: May 14 to Oct. 3
$20 per night, (800) 628-9988
Filling Time: evening

* dump station available

CAMPGROUNDS

All five park campgrounds and two trailer villages are operated by park concessioners.

CAMPGROUNDS

Drive-in campground fees start at $20 per night per site and half price for Senior/Access cardholders. Jenny Lake, Colter Bay and Lizard Creek have walk-in sites available. All campgrounds provide modern comfort stations, but do not include utility hookups (except for Colter Bay RV Park and Flagg Ranch Campground).

The maximum length of stay is seven days per person at Jenny Lake and 14 days at all other campgrounds—no more than 30 days in the park per year. These campgrounds operate on a first-come, first-served basis and advance reservations are not accepted, except for group camping reservations, Colter Bay RV Park and Flagg Ranch Campground.

For campground status, contact entrance stations or visitor centers. Additional camping facilities are available in nearby national forests and other areas outside the park. Camping is not permitted within the park along roadsides, in overlooks or in parking areas. Doubling up in campsites is not permitted and there are no overflow facilities.

There are eight free campsites on Grassy Lake Road that have pit toilets but no potable water.

GROUP CAMPING

Reservations are available for group camping at Colter Bay and Gros Ventre campgrounds. The sites range in capacity from 10 to 100 people. Advance reservations are required and may be made through the Grand Teton Lodge Company at (888) 628-9988 or (307) 343-1100.

PUBLIC SHOWERS

The only public shower facilities in the park are located at Colter Bay Village in the laundromat.

RECYCLING CENTERS

Park concessioners Grand Teton Lodge Company and Signal Mountain Lodge collectively recycle more than 170 tons of material annually. When you stay in a park campground, please use the recycling containers to help keep Grand Teton National Park clean and pleasant for other campers and conserve resources.

Safety & Regulations

FIREARMS
Wyoming state regulations apply. Carrying or possessing firearms is prohibited in buildings where notice is posted. Firearms may not be discharged in a national park, except by permitted individuals during legal hunting seasons.

FIREFWORKS
Fireworks and other pyrotechnic devices are prohibited at all times in the park.

CAMPFIRES
Campfires are allowed without a permit at designated campgrounds and picnic areas within metal fire grates, unless fire restrictions are in effect. A permit may be obtained for campfires below the high water line of Jackson Lake at the Colter Bay Visitor Center. Campfires are prohibited in all other areas.

PLANTS & ANIMALS
All plants and animals are part of natural processes and are protected within the park and parkway. Leave plants and animals in their natural setting for others to enjoy. Even picking wildflowers is prohibited. Keep a respectful distance from all animals to avoid disturbing their natural routines. Large animals are quick, powerful and unpredictable. Getting too close can result in serious injury. Take special care to avoid encounters with wildlife and to help maintain their natural fear of humans. Many small animals can carry diseases and should never be touched or handled. Allow them to find their own food. Their natural diet ensures their health and survival. No matter how tempting it may be to give food to animals, feeding is prohibited.

PETS
Pets must be restrained on a leash (6 feet or less) at all times. Pets are not allowed in visitor centers, on park trails or in the backcountry (which begins six feet from roadways), in boats on the Snake River or lakes other than Jackson Lake. Pets are not allowed on-river or off-trail, vessels. Destroying the landscape by opening gates. Pets are not permitted on the multi-use pathway.

BIKING
Bicycles are permitted on public roadways, the multi-use pathway and on the Colter Bay Marina breakwater. Ride on the right side of the road in single file and wear a helmet at all times. Riding bicycles or other wheeled vehicles in the backcountry, on- or off-trail, is prohibited. Roadway shoulders are narrow—ride at your own risk.

MULTI-USE PATHWAY
Only NON-MOTORIZED METHODS of transportation are permitted on the multi-use pathway. Persons with physical disabilities may use electric and battery operated transportation. The multi-use pathway is closed from dusk to dawn for wildlife and public safety.

PETS
PETS ARE NOT PERMITTED on the park pathway. Guide dogs—used for the sole purpose of aiding a person with physical disability—may travel on the pathway. Ask at a visitor center for suggestions on where to exercise your pet.

AQUATIC NUISANCE SPECIES
Protect park waters and native fish by learning how you can prevent the spread of exotic species. Inspect, clean and dry all equipment including boats, boots and waders before entering a new body of water. Never empty containers of bait, fish, plants or animals into park waters. Ask at a permits office for information on the new Wyoming state law requiring boaters to purchase a sticker to display on their boat.

PERSONAL FLOATATION DEVICES (PFDs)
PFDs are strongly recommended for all persons in a private floating/boating party, and required in commercial vessels.

BOATING
Motorboats are permitted on Jenny (10 horsepower maximum) and Jackson lakes. Human-powered vessels are permitted on Jackson, Jenny, Phelps, Emma Matilda, Two Ocean, Taggart, Bradley, Bearpaw, Leigh and Stringer lakes. Sailboats, water skis, swimming and windsurfers are allowed only on Jackson Lake. For motorized craft, the fee is $20 for a 7-day permit and $40 for an annual permit for non-motorized craft, the fee is $10 for a 7-day permit and $20 for an annual permit. Jet skis are prohibited on all waters within the park. Permits may be purchased at the Craig Thomas Discovery, Jenny Lake or Colter Bay visitor centers.

FLOATING THE SNAKE RIVER
Only human-powered rafts, canoes, dories and kayaks are allowed on the Snake River within the park and parkway. Registration ($10 for a 7-day permit, $20 for an annual permit) of non-motorized vessels is required and may be completed at the Craig Thomas Discovery, Jenny Lake or Colter Bay visitor centers. Read the launch site bulletin boards for current river conditions. On the surface, the Snake River may not seem very powerful, but only experienced floaters should attempt this swift, cold river that has many braided channels and debris jams.

FISHING
Whitefish and cutthroat, lake, and brown trout inhabit lakes and rivers of the park and parkway. Obtain fishing regulations at visitor centers.

A Wyoming fishing license is required to fish in the park and parkway and may be purchased at Signal Mountain Lodge, Colter Bay Marina, Colter Bay Village Store, Dorman’s and Flagg Ranch Lodge. Fishing in Yellowstone National Park requires a separate permit (fee charged), purchase permits at Yellowstone visitor centers and ranger stations. The use of non-native baitfish is prohibited in all parks.

JACKSON LAKE
Contact visitor centers for information on the availability of services at Leek’s, Signal Mountain and Colter Bay marinas. Low water levels will increase the risk of boats striking submerged objects and landforms that are normally well beneath the surface.

SWIMMING
Swimming is permitted in all lakes. There is a designated swimming beach at Colter Bay with picnic facilities; however, there are no lifeguards. The Snake River is a swift and cold river presenting numerous dangers, swimming is not recommended.

HOT SPRINGS
Thermal water can harbor organisms that cause a fatal meningitis infection and Legionnaires’ disease. Exposing your head to thermal water by immersion, splashing, touching your face, or inhaling steam increases your risk of infection.

HIKING
Hikers are reminded to stay on trails; short-cutting is prohibited because it damages fragile vegetation and causes erosion. A $25 fine will be assessed for use of topographic maps and trail guides. Know your limitations when traveling in the backcountry. If you travel alone, let a friend or relative know your planned destination, route, and expected time of return. These precautions will greatly increase your chance of survival in an emergency. Permits are not required for day hiking. Trailhead parking areas fill early during the day in July and August, so start your hike early to avoid parking problems. In early summer, many trails are snow-covered and you may need an ice axe.

BACKPACKING
Grand Teton National Park has more than 230 miles of trails of varying difficulty. Obtain the required, free backcountry permit overnight trips at the Craig Thomas Discovery or Colter Bay visitor centers or the Jenny Lake Ranger Station. One-third of backcountry campsites in high use areas may be reserved in advance from January 5, May 15, there is a fee of $25 per reservation. Pets are not allowed on park trails or in the backcountry. Backpackers must use park-approved bear-resistant food canisters or lockers when camping below 10,000 feet. Obtain a free canister for use in the park when registering for your trip.

CLIMBING
There are many risks and hazards associated with climbing and mountain travel. Experience and good judgment are essential. The Jenny Lake Ranger Station is staffed from late May to late September by climbing rangers who can provide up-to-date weather and route conditions. Registration is not required for day climbs or cross-country hiking. Backcountry permits are required for all overnight climbs. The park DOES NOT check to see that you get safely out of the backcountry. Leave an agenda with friends or family. Solo backcountry travel is not advised.

Interested in Working in the Park?

To view and apply for vacancies for all federal jobs visit www.usajobs.gov. For a list of available jobs in the Department of Interior, including the National Park Service see http://www.DOI.gov/dojob/Jobs.html. Positions posted for Grand Teton National Park can be found under jobs listed in Moose or Moran, Wyoming. You can also learn about vacancies at h://www.nps.gov/jrft/supportyourpark/employer.htm. For jobs in fire management, log on to www.tetonfires.com and click on the Employment link. Go to www.nps.gov/jrft/supportyourpark/upload/OF110-fredes.pdf to learn how to apply for federal jobs.

Floating the Snake River

THE SNAKE IS A COMPLEX RIVER TO FLOAT.

The beauty and lack of whitewater falls makes river run-inattentiveness. A tangle of channels and constant shifting of logjams present difficulties. Accidents are common. Use caution whenever you float.

Even boaters frequently floating the Snake should check conditions before every trip, as the river can change overnight. River float varies greatly throughout the summer. Water depth averages two to three feet, although it exceeds 10 feet in some locations. Boulders and bottom irregularities can cause standing waves up to three feet high.

For information on Snake River flows, call 1-800-658-5771. For floating regulations and river information, stop by a visitor center and request a floating bulletin.
Both grizzly bears and black bears live in the park and parkway. Color is misleading – both species can vary from blonde-black.

**Don’t Feed the Bears—Food Storage Required!**

**BEARS & FOOD**

Bears can be anywhere in the park at any time. Bears may become aggressive after just one taste of human food. Odors attract bears into campgrounds and picnic areas. Regulations require that all food, garbage, toiletries, pet food, coolers and food containers (empty or full), and coolware (clean or dirty) be stored in a hard-sided vehicle with the windows rolled up or bear-resistant food locker when not in immediate use, day or night.

The park requires campers to store food in approved bear-resistant food canisters or food lockers while backcountry camping below 10,000 feet. Failure to follow regulations is a violation of federal law and may result in citations and fines.

**Do not leave food, garbage or coolers in the open bed of a truck or on the exterior of any vehicle.**

**KEEP A CLEAN CAMP**

- Keep a clean camp! Improperly stored or unattended food will be confiscated and you could be fined.
- Treat odorous products such as soap, toothpaste, fuel products, suntan lotion and bug repellent in the same manner as food.
- Never store food, garbage or toiletries in tents or sleeping bags.
- Place all trash in bear-resistant garbage dumpsters.
- Pets must be kept on a leash (6’ or less in length) and never left unattended.
- Immediately report careless campers and all bear sightings to the campground kiosk or nearest ranger.
- Bears that receive human food often become aggressive and must be killed.

**Help keep park bears wild!**

**Stay Safe in Bear Country**

**BE BEAR AWARE**

Follow these guidelines to protect yourself. They are for your safety and for the preservation of the bear, a true sign of wilderness.

**Make Noise in Bear Country**

Grizzly and black bears live in the park and parkway. Some of the most popular trails travel through prime bear habitat. Bears will usually move out of the way if they hear people approaching, so make noise. Don’t surprise bears! Bear bells are often not sufficient. Calling out and clapping your hands at regular intervals are the best ways to make your presence known. Some trail conditions make it hard for bears to hear, see, or smell approaching hikers. Be particularly careful near streams, when it’s windy, in dense vegetation, or in any circumstance that limits line of sight (i.e. a blind corner or rise in the trail).

**Never Approach a Bear**

Individual bears have their own personal space requirements that vary depending on their mood. Each bear will react differently and their behavior is unpredictable. All bears are wild and dangerous and should be respected equally.

- Avoid hiking early in the morning, late in the day or when it’s dark.
- Never leave your backpack unattended!
- Never allow a bear to get human food. If approached by a bear while eating, put food away and retreat to a safe distance.
- Never abandon food because of an approaching bear. Always take food with you.
- Never throw your pack or food at a bear in an attempt to distract it.

**If You Encounter a Bear**

Do not run! Bears can easily outrun you. Running may cause an otherwise non-aggressive bear to attack.

- If the bear is unaware of you, keep out of sight and detour behind and downwind of the bear.
- If the bear is aware of you but has not acted aggressively, slowly back away.
- Do not drop your pack! This teaches bears how to obtain human food and often results in the removal or death of a bear.
- Do not climb trees. All black bears, all grizzly cubs and some adult grizzlies can climb trees.

**If a Bear Approaches or Charges You**

Do not run! Most bear attacks result from surprise encounters when the bear is defending their young or defending a food source such as a carcass. Some bears will bluff their way out of a threatening situation by charging, then veering off or stopping abruptly. Bear experts generally recommend standing still until the bear stops and then slowly backing away. If you are attacked, lie on the ground completely flat on your stomach. Spread your legs slightly and clasp your hands over the back of your neck. Do not drop your pack as it can protect your back if attacked. Do not move until you are certain the bear has left.

In rare cases, bears have attacked at night or after stalking people. These types of attacks are very serious because it may mean the bear views you as prey. If you are attacked at night or if you feel you have been stalked and attacked as prey, fight back. Use your bear spray, or shout and try to intimidate the bear with a stick or rock. In this type of situation, do whatever it takes to let the bear know you are not easy prey.

Please stop by a park visitor center for more information.

**If You Carry Bear Spray**

Bear spray has been shown to be extremely effective in deterring bear attacks.

- Use bear spray. Personal self-defense pepper spray is not effective.
- Keep the canister immediately available, not in your pack.
- Wind, rain, cold temperatures, and using expired canisters can decrease the effectivity of bear spray.
- Follow the manufacturer’s instructions, know how to use the spray, and be aware of its limitations, including the expiration date.
- If you use the spray to stop a bear, leave the area immediately.
- It is not a repellent! Do not spray it on people, tents or backpacks.
- Under no circumstances should bear spray create a false sense of security or serve as a substitute for standard safety precautions in bear country.

**Remember:**

It all smells to a bear. Please take care. Lock it up!

**Help us keep our bears wild and healthy. Don’t leave backpacks, coolers, or bags containing food unattended for ANY amount of time.**

**WHAT KIND OF BEAR DID YOU SEE?** Both grizzly bears and black bears live in the park and parkway. Color is misleading – both species can vary from blonde-black.
Moose District

Visit Moose District

Moose is located 12 miles north of Jackson, Wyoming. Please see the park map on page 16 to help you plan your trip to the Moose District. Enjoy a variety of trails, activities, scenic drives and ranger programs as well as unique historic districts and iconic views of the Teton Range.

CRAIG THOMAS DISCOVERY & VISITOR CENTER
Visit the Discovery Center for trip planning, weather, permits and camping information. Experience the video rivers and talk to a park ranger about what to see and do. Shop at the Grand Teton Association bookstore for gifts, educational books and postcards. The visitor center is open daily June 7 – September 26, 8 a.m. to 7 p.m.; September 27 – October 11, 8 a.m. to 5 p.m.

MENOR’S FERRY HISTORIC DISTRICT
Take a self-guided tour around the historic district and learn about Jackson Hole history through pictorial displays at the Maud Noble Cabin. Visit the General Store (open May 28-Sept. 26 daily 9 a.m. to 4:30 p.m.) and purchase turn-of-the-century-themed goods. Join a ranger for a guided walk through the district to learn more, see program schedule below.

“Mormon Row” was a community of homesteads, a church, school and swimming hole. Members of the Church of Latter-Day Saints settled this area around the turn of the last century.

MULTI-USE PATHWAY
Bike, walk or rollerblade on the multi-use pathway. Access the pathway from Moose or Taggart Lake Trailhead. The pathway extends from Dornan’s to South Jenny Lake. Bike rentals are available at Dornan’s near Moose or in the town of Jackson. Special regulations apply, see page 4.

Jenny Lake District

Explore Jenny Lake District

South Jenny Lake is located 8 miles north of Moose. Please see the park map on page 16 to help you plan your trip to the Jenny Lake District. Explore Jenny Lake for convenient access to two glacially-formed lakes and invigorating hikes while enjoying dramatic mountain scenery.

PARKING
Parking at South Jenny Lake is highly congested and often full from 10 a.m. to 2 p.m. Plan accordingly. Watch for pedestrians.

SOUTH JENNY LAKE
Visit the Jenny Lake Visitor Center for trip planning, weather and camping information. Learn about Teton Range geology through interactive exhibits and a short geology film. Shop at the Grand Teton Association retail area for gifts, educational books and postcards. The visitor center is open daily Sept. 7-26 from 8 a.m. to 5 p.m. The South Jenny Lake area includes a general store, restrooms, trailhead access, boat launch, the Exum Mountain Guide office and a ranger station. Take a shuttle boat across Jenny Lake (Roundtrip/One-way: adult $10/$7, child (2-11) $5/$5, under 2 and over 80 free), closes September 30.

The Jenny Lake Ranger Station provides backcountry and climbing information and overnight permits. The ranger station is open from May 15-Sept. 17 from 8 a.m. to 5 p.m. NORTH JENNY LAKE
Swim in the seasonally warm waters of String Lake and then enjoy a picnic along the shore at the String Lake picnic area. Flush and pit restrooms available. Park at the String Lake Trailhead and hike across a rustic wooden bridge through a burned area and view the regeneration of a forest. Launch your canoe or kayak from the String Lake canoe launch, look for the launch area sign just after the String Lake Trailhead parking lot. Or enjoy lunch at the Jenny Lake Lodge located just past the North Jenny Lake Junction on the scenic one-way road.

**Spend Time in Colter Bay District**

Colter Bay is located 25 miles north of Moose. Please see the park map on page 16 to help you plan your trip. The Colter Bay District provides some of the best wildlife viewing opportunities in the park as well as a wide range of visitor services and trails.

**Experience the Laurance S. Rockefeller Preserve**

The Preserve is located four miles south of Moose on the Moose-Wilson Road. The Preserve provides a unique opportunity to connect with nature in an environment designed to reduce congestion and provide an opportunity for solitude and reflection.

</table>
The American pika—a small rabbit-like mammal that lives on rocky slopes—can often be heard while hiking in the park. Pikas live at elevations ranging from 6,600-11,500 feet. Research indicates global warming may have contributed to localized extinctions of pika populations in the far west. They are an indicator species for climate change effects due to their narrow temperature tolerance and rather limited habitat range.

Grand Teton is part of a large-scale interagency program to monitor the effects of climate change on pikas and their habitat. The park has other ongoing climate-change-related studies looking at fire, plants, meadows, butterflies, birds, glaciers and alpine lakes. The park is committed to reducing its ecological footprint and greenhouse gas emissions. Through energy and water conservation measures, green purchasing, green building, education and outreach, and an expanded recycling program, we are well on our way to reducing our greenhouse gas emissions by at least 20 percent by 2012.

You can help with these efforts! Purchase and use refillable water bottles, reduce idling by turning your car off (especially during construction stops), recycle when possible, and drive the speed limit to conserve gas (and save wildlife). Over three million people visit the park each year, your actions can make a difference to help protect pikas, the park and our planet.

---

**WHAT CAN YOU DO WHILE VISITING GRAND TETON NATIONAL PARK AND AT HOME?**

<table>
<thead>
<tr>
<th>CONSERVATION MEASURE</th>
<th>WHY IS IT IMPORTANT?</th>
<th>WHAT YOU CAN DO</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Recycle</strong></td>
<td>Recycled materials use 55-95% less energy than products made from raw materials.</td>
<td>The park recycles:</td>
</tr>
<tr>
<td>Bits are located at visitor centers and campgrounds.</td>
<td>■ Newspaper/magazines/catalogs</td>
<td>■ Office paper</td>
</tr>
<tr>
<td>Ask at any visitor center or entrance station for recycling station locations throughout the park.</td>
<td>■ Corrugated cardboard</td>
<td>■ #1/2 plastic bottles</td>
</tr>
<tr>
<td></td>
<td>■ Aluminum/tin/steel</td>
<td>■ One-pound propane canisters</td>
</tr>
<tr>
<td><strong>Reduce/Reuse</strong></td>
<td>Reduce waste by using your own cups, bottles and bags, and buying products made from recycled materials. Reusable products can save you money and help save your natural resources.</td>
<td>Say “No, thank you” to bags at store checkout, bring a reusable bag</td>
</tr>
<tr>
<td></td>
<td>■ Avoid disposable bottles and cups and use or purchase reusable water bottles or coffee mugs instead.</td>
<td></td>
</tr>
<tr>
<td><strong>Practice No Idling</strong></td>
<td>The majority of pollution in national parks is from personal vehicles. Idling for just 10 seconds burns more gasoline than turning your car off and on again.</td>
<td>■ Turn the car off if you are idling more than 10 seconds—especially in construction zones.</td>
</tr>
<tr>
<td></td>
<td>■ Consider walking, biking or carpooling to your destination.</td>
<td></td>
</tr>
<tr>
<td><strong>Conserve Energy</strong></td>
<td>Reducing energy consumption helps reduce the carbon footprint of the park.</td>
<td>At your hotel or in your camper:</td>
</tr>
<tr>
<td></td>
<td>■ Limit heating and cooling by dressing appropriately for the weather.</td>
<td>■ Turn off lights when leaving</td>
</tr>
<tr>
<td><strong>Conserve Water</strong></td>
<td>Large amounts of energy and chemicals are needed to treat both tap water and waste water.</td>
<td>At your hotel or in your campsite:</td>
</tr>
<tr>
<td></td>
<td>■ Turn the faucet off when brushing your teeth.</td>
<td>■ Take shorter showers</td>
</tr>
<tr>
<td></td>
<td>■ Report leaky faucets, pipes or other water-wasters.</td>
<td></td>
</tr>
<tr>
<td><strong>Increase Your Knowledge</strong></td>
<td>Learn what you can do to help protect Grand Teton National Park, your own community and the planet!</td>
<td>Go to these websites for more information:</td>
</tr>
<tr>
<td></td>
<td>• Go to these websites for more information:</td>
<td></td>
</tr>
</tbody>
</table>

---

**PLAN FOR DELAYS**

While no one enjoys waiting in traffic, preparing for the delays will make your trip more enjoyable.

Short on time? Plan ahead. If your trip becomes delayed due to road construction, take a moment to enjoy scenery and keep an eye out for wildlife. A traffic delay may just provide a great opportunity to spot elk, pronghorn, bears, moose or even a coyote hunting for prey.

GET ROAD CONSTRUCTION UPDATES. Check the road information hotline for the most up to date information on road construction. Call (307) 739-3614.

BE GREEN. REDUCE IDLING. Turn off your engine during delays. Idling your engine for 10 minutes uses as much fuel as it takes to travel five miles.

GIVE THEM A BRAKE. Obey reduced speed limits and stay alert for workers along the roadway.

---

**FALL ROAD CONSTRUCTION PROJECTS (Subject to Change)**

Pacific Creek Road
Weekday closures will occur from 9 a.m. to 3 p.m. daily. The road will be open on Saturdays and Sundays.

US 26/287 Togwotee Pass
Weeknight closures are scheduled in the Togwotee Pass area just east of the park boundary (outside the park). Week night closures occur from 10 p.m. to 1 a.m. and from 1:30 a.m. to 4:30 a.m. Closures will occur from 10 p.m. to midnight on Saturdays with no closures on Sundays night.
Fire has been a part of the Greater Yellowstone Ecosystem for thousands of years. Its presence is important for wildlife habitat, nutrient cycling, plant diversity and overall landscape health. Grand Teton National Park fire managers seek to strike a balance between restoring and maintaining natural processes associated with fire, and protecting human life and property.

FIRE ECOLOGY IN THE PARK
Fire naturally changes the forest by creating diverse-aged tree stands, recycling nutrients into the soil and stimulating new plant growth. Fire ecology research shows that many plant and animal species benefit from the rejuvenating effects of fire.

Evidence of large fires is prevalent in Grand Teton and Yellowstone national parks. Burned areas provide an opportunity for the forest to regenerate, evident in the plants, trees and wildlife present. Previously burned areas near popular hikes include: the 2009 Bearpaw Bay Fire that burned between Leigh Lake and Jackson Lake, the 1999 Alder Fire near Jenny Lake, the 2000 Teton Complex across from Colter Bay, the 1983 Beaver Creek Fire near Taggart Lake and the 1974 Waterfall Canyon Fire.

HOW WE MANAGE FIRES
Fire managers at Grand Teton National Park and surrounding agencies are guided by comprehensive fire plans. Sometimes crews monitor fires closely but take minimal action so a fire can take its natural course, allowing fire-adapted plants to resprout from the roots, seed in open areas or open serotinous (heat-dependent) cones for seed dispersal. When appropriate, firefighters immediately suppress all or portions of a fire to reduce risk to life and property. Occasionally firefighters apply fire to the landscape under specific conditions to help maintain a healthy and safe forest ecosystem. These planned ignitions, called prescribed fires, create a mosaic of diverse habitats for plants and animals. Burning accumulated fuels also minimizes risk to developments and cultural resources.

In developed areas, fire crews lower the risk of losing structures to wildfire by thinning trees and removing dead wood and brush from the forest floor. This improves firefighter and public safety in the event of a wildfire. Firefighters pile the slash and let it dry for a year before burning it during wet weather in late spring or fall.

Specialized fire crews monitor burned areas to learn more about fire’s effect on the ecosystem. This data is not only used for fire management decisions, but is also shared with wildlife biologists, vegetation ecologists, historic preservation specialists, and other land management agencies to achieve common goals for a healthy ecosystem.

YOUR ROLE IN FIRE PREVENTION
Fire season in the park coincides with the visitor season, which means you may see fires throughout the park.

We invite you to become an annual member-at-large entitled to a 15% discount on purchases at all GTA visitor center outlets, as well as on catalog and web-site orders. Many cooperating association stores nationwide offer reciprocal discounts.

As You Drive Keep Them Alive
Every year drivers kill about 100 large animals, causing property damage and personal injury. Drive at or below all posted speed limits, and drive cautiously during dawn and dusk when animals are most active. Moose, deer, elk, bison, wolves and grizzly and black bears cross roadways and can be especially difficult to see at night.

Park in Designated Turnouts
It may be tempting to park on the roadway to take photographs or watch wildlife, but this practice is not safe. Pull over in a designated turnout for your safety and that of other motorists.

Road Work Delays
Road improvements will take place in Grand Teton and Yellowstone national parks throughout the 2010 season. Changes in schedule may occur at any time. For the most up-to-date information about road conditions in Grand Teton National Park call (307) 344-2117 or visit www.nps.gov/yell. For information about conditions in Grand Teton National Park and drive cautiously during dawn and dusk when animals are most active.
