LIVING WITH WILDLIFE challenges all of us. Whether you visit Grand Teton National Park on vacation or live in the valley of Jackson Hole, encountering wildlife in their own environment is thrilling and potentially dangerous.

Observing and photographing wildlife draws many to this beautiful place; seeking out the smallest calliope hummingbird or the largest grizzly bear. We all share a responsibility to protect ourselves and the park’s animals. Always maintain a distance of at least 100 yards from bears and wolves, and 25 yards from all other animals. Never position yourself between an adult and its offspring. Females with young are especially defensive. Let wildlife thrive undisturbed. If your actions cause an animal to flee, you are too close.

It is illegal to feed wildlife in the park including ground squirrels and birds. Feeding wildlife makes them dependent on people and often results in poor nutrition. Odors may entice bears and other animals into your campsite, picnic area or residence. Allowing bears to obtain human food even once often results in aggressive behavior. The bear becomes a threat to human safety and must be relocated or killed. For the sake of wildlife follow all food storage regulations.

Whatever brings you to this special place, remember the spectacular mountains and the diverse wildlife you see. We hope you will be refreshed and restored during your visit and remain connected to this place long after you return home.

### John D. Rockefeller, Jr. Memorial Parkway 40th Anniversary

The John D. Rockefeller, Jr. Memorial Parkway commemorates the contributions to conservation by Rockefeller on behalf of America’s National Park System. Established August 25, 1972, the 24,000-acre parkway connects Grand Teton and Yellowstone national parks.

In 1926, Rockefeller visited the valley and was dismayed by haphazard development marring the landscape. With a vision to protect the spectacular scenery, Rockefeller began buying land, later donating over 32,000 acres to expand the park. His philanthropy ensured that views of the Teton Range would be preserved for future generations.
FEW LANDSCAPES IN THE WORLD are as striking and memorable as that of Grand Teton National Park. Rising abruptly from the valley floor, the Tetonss offer a testament to the power and complexity of nature. The mountains, valleys, lakes, rivers and skies are home to diverse and abundant plants and animals.

People have been living in the shadow of the Teton Range for more than 11,000 years. The human history of this area is extensive, beginning with prehistoric American Indians, to the early Euro-American explorers, and the more recent frontier settlers. Today, more than 300 historic structures remain in the park.

This spectacular mountain range and the desire to protect it resulted in the establishment of Grand Teton National Park in 1929. Through the vision and generous philanthropy of John D. Rockefeller, Jr., additional lands were added, creating the present day park in 1950.

Grand Teton National Park is truly a special and unique place. With thoughtful use and careful management, it can remain so for generations to come. As with other sites in the National Park System, Grand Teton preserves a piece of the natural and cultural heritage of America for the benefit and enjoyment of future generations.

While you are here, take a moment to put your cares aside, stroll through a sagebrush meadow, bike a park trail, sit on a quiet lakeshore, and lose yourself to the power of this place.

We hope you will be refreshed and restored during your visit, and stay connected to this magnificent landscape long after you have returned home.
What’s New

WIRELESS INTERNET
Free wireless internet access is available for the public at the Craig Thomas Discovery and Visitor Center in Moose.

MULTIMEDIA PRESENTATIONS
The Grand Teton National Park website offers a variety of audio, video and digital image products including panoramic images: www.nps.gov/go/aig/photosmultimedia/multimedia.htm.

VIDEO PODCASTS
Plan your trip, view wildlife, learn about safety in bear country, understand the powerful forces that shaped these mountains, and learn about the Murie family who helped preserve this landscape from the multi-media page.

Fall Film Festival
Join us for three days of exciting films at the Craig Thomas Discovery & Visitor Center Auditorium. The festival, hosted by Mark Madison and John Garbowska, will feature films about living with nature, history, indigenous peoples and the Americas West.

THURSDAY, September 13th
FRIDAY, September 14th
SATURDAY, September 15th
Check at visitor centers for more information, or call (307) 739-3399.

Learn & Discover
Developed in partnership with the Grand Teton National Park Foundation our new website highlights the park’s history, geology, wild communities and Junior Ranger program.
Visit our fun and educational website: www.discovergrandteton.org.

Like us on Facebook to get park updates, or share photos and your thoughts: www.facebook.com/GrandTetonNPS.
Follow us on Twitter: twitter.com/GrandTetonNPS.

Campgrounds

All five park campgrounds and two trailer villages are operated by park concessioners.

CAMPGROUNDS
Campground fees are $20.50 per night per site. Colter Bay, Jenny Lake and Gros Ventre campgrounds charge $10 for Senior/Access cardholders. Signal Mountain and Lizard Creek campgrounds charge $10.25 for Senior/Access cardholders. Jenny Lake and Colter Bay have walk-in sites available. All campgrounds provide modern comfort stations, but do not have hookups (except Colter Bay RV Park and Headwaters RV Sites).

The maximum length of stay is seven days per person at Jenny Lake and 14 days at all other campgrounds—no more than 30 days in the park per year. The park’s campgrounds operate on a first-come, first-served basis, advance reservations are not accepted except for group camping, the Colter Bay RV Park and the Headwaters Campground & RV Sites at Flagg Ranch.

For campground status, contact entrance stations or visitor centers. Additional camping facilities are available in nearby national forests and other areas outside the park. Camping is not permitted within the park along roadways, in overflows or in parking areas. Doubling up in campgrounds is not permitted and there are no overflow facilities.

There are eight free campsites on Grassy Lake Road with pit toilets but no potable water.

GROUP CAMPING
Advanced reservations are required for group camping at the Colter Bay and Gros Ventre campgrounds. The sites can accommodate 10 to 100 people. Call the Grand Teton Lodge Company at (800) 628-9988 or (307) 543-3100 for reservations.

PUBLIC SHOWERS
The only public shower facility in the park is located at the Colter Bay Village Laundromat.

RECYCLING CENTERS
The Grand Teton Lodge Company and Signal Mountain Lodge collectively recycle more than 170 tons of material annually. When you stay in a park campground, please use the recycling containers to help keep the park clean and pleasant and conserve resources.

PARK CAMPGROUNDS
Colter Bay Campground*
350 individual, 9 walk-in, 11 group
Open: May 24 to Sept. 23
$25.50 per night, (800) 628-9988
Filling Time: evening
No reservations

Colter Bay RV Park
112 RV sites
Open: May 24 to Sept. 23
$37 per night, (800) 628-9988
Filling Time: call for information, reservations advised
RV hookups available

Gros Ventre Campground*
86 tent sites, 1 RV hookup site
Open: May 4 to Oct. 5
$25.50 per night, (800) 628-9988
Filling Time: rarely fills
No reservations

* dump station available

Headwaters Campground & RV Sites at Flagg Ranch
80 RV sites, $64
68 tent sites, $35
20 camper cabins, $70
Open: June 1 to Sept. 30
(800) 443-2311
Filling Time: call for information, reservations advised

Jenny Lake Campground (tents only)
49 individual sites, 10 walk-in sites
Open: May 11 to Sept. 30
$20.50 per night, (800) 628-9988
Filling Time: 9 am
No reservations

Signal Mountain Campground*
86 individual sites, 1 RV hookup site
Open: May 11 to Oct. 14
$20.50 ($55 RV) per night, (800) 672-6012
Filling Time: noon or earlier
No reservations

* dump station available

REDUCE YOUR USE OF DISPOSABLE PLASTIC BOTTLES
Park concessioners are joining Grand Teton National Park to reduce the sale and use of disposable plastic bottles by selling reusable containers. Save money, energy and reduce waste by using reusable bottles for water.

Grand Teton National Park invites you to enjoy the Craig Thomas Discovery and Visitor Center Auditorium. The four movements represent a musical postcard set to the original composition of Grammy Award winner Jennifer Higdon.

Explore the visitor center. Everyone will love the engaging exhibits about the people, wild communities and preservation of this place. Discover wildlife hidden throughout. Learn how mountaineering has evolved in the Teton Range and place climbing protection gear on an interactive rock wall display. Enjoy a breath-taking view of the Teton Range from the lobby, and a bird’s eye view of the park by walking along the video river.
**Safety & Regulations**

**FIREARMS**
Wyoming state regulations apply. Carrying or possessing firearms is prohibited in buildings where notice is posted. Firearms may not be discharged in a national park, except by permitted individuals during legal hunting seasons.

**FIREFOWKS**
Fireworks and other pyrotechnic devices are prohibited at all times in the park.

**CAMPFIREs**
Campfires are allowed without a permit at designated campgrounds and picnic areas within metal fire grates, unless fire restrictions are in effect. Lakeshores and backcountry sites with fire grates include: Leigh, Bearpaw and Trapper lakes. A permit may be obtained for campfires below the high water line of Jackson Lake at the Colter Bay Visitor Center. Campfires are prohibited in all other areas.

**PlANTS & ANImALS**
All plants and animals are part of natural processes and are protected within the park and parkway. Leave plants and animals in their natural setting for others to enjoy. Picking wildflowers is prohibited. Maintain a distance of at least 100 yards from bears and wolves and 25 yards from all other wildlife. Large animals are quick, powerful and unpredictable. Getting too close can result in serious injury. Take special care to avoid encounters with wildlife and to help maintain their natural fear of humans. Many small animals can carry diseases and should never be touched or handled. Allow them to find their own food. Their natural diet is never be touched or handled. Allow them to find their own food. Their natural diet is

**Reptiles must be restrained on a lease (6 feet or less) at all times and must stay within 30 feet of roadways. Pets are not allowed in visitor centers, on park trails or in the backcountry, in boats on the Snake River or lakes other than Jackson Lake. Pets are not allowed on ranger-led activities. Kennels are available in Jackson. Properly dispose of pet feces in garbage cans. Pets are not permitted on the multi-use pathway.**

**BIKING**
Bicycles are permitted on public roadways, the multi-use pathway and on the Colter Bay Marina breakwater. Ride on the right side of the road in single file and a helmet at all times. Riding bicycles or other wheeled vehicles in the backcountry, on- or off-trail, is prohibited. Roadway shoulders are narrow—ride at your own risk.

**MULTI-USE PATHWAY**
Only NON-MOTORIZED METHODS of transportation are permitted on the multi-use pathway. Persons with physical disabilities may use electric and battery operated transportation. The multi-use pathway is closed from dusk to dawn for wildlife and public safety.

**PETS**
**ARE NOT PERMITTED** on the park pathway. Guided dogs—used for the sole purpose of aiding a person with physical disability—may travel on the pathway. Ask at a visitor center for suggestions on where to exercise your pet.

**AQUATIC NUISANCE SPECIES**
Help protect park waterways and native fish by learning how you can prevent the spread of exotic species. Inspect, clean and dry all equipment including boats, boots and waders before entering a new body of water. Never empty containers of bait, fish, plants or animals into park waters. Ask at a permits office about the Wyoming state law requiring boaters to purchase an Aquatic Invasive Species (AIS) sticker for display on the boat.

**PERSONAL FLOTATION DEVICES (PFDs)**
PFDs are strongly recommended for all persons in a private floating/bathing party, and required in commercial vessels.

**Boating**
Motorboats are permitted on Jenny (10 horsepower maximum) and Jackson lakes. Human-powered vessels are permitted on Jackson, Jenny, Phelps, Emma Matilda, Two Ocean, Taggart, Bradley, Bearpaw, Leigh and String lakes. Sailboats, water skiing and windsurfers are allowed only on Jackson Lake. A park permit is required: motorized craft $20 for 7 days and $40 for 1 year, non-motorized craft $10 for 7 days and $20 for 1 year. A Wyoming state AIS sticker is also required. Jet skis are prohibited on all waters within the park. Permits may be purchased at the Craig Thomas Discovery, Jenny Lake or Colter Bay visitor centers.

**FLOATING THE SNAKE RIVER**
Only human-powered rafts, canoes, dories and kayaks are allowed on the Snake River within the park and parkway. A permit is required ($10 for 7 days; $20 for 1 year) for non-motorized vessels and may be purchased at the Craig Thomas Discovery, Jenny Lake or Colter Bay visitor centers. Read the launch site bulletin boards for current river conditions. The Snake River is a complex river to float. Constantly shifting channels and hazardous conditions exist for boaters. Accidents are common. Check conditions and use caution whenever you float. For information on Snake River flows, call 1 (800) 658-5771.

**FISHING**
Cutthroat, lake, brown and trout, and whitefish inhabit lakes and rivers of the park and parkway. A Wyoming fishing license is required to fish in the park and parkway and may be purchased at Signal Mountain Lodge, Colter Bay Marina, Colter Bay Village Store, Dormans and Headwaters Lodge. Fishing in Yellowstone National Park requires a separate permit (fee charged); purchase permits at Yellowstone visitor centers and ranger stations. The use of non-native fish is prohibited in all parks.

**Jackson Lake**
Contact visitor centers for information on the availability of services at Leek’s, Signal Mountain and Colter Bay marinas. Low water levels will increase the risk of boats striking submerged objects and landforms that are normally well beneath the surface.

**Swimming**
Swimming is permitted in all lakes. There is a designated swimming beach at Colter Bay with picnic facilities; however, there are no lifeguards. The Snake River is a swift, cold river presenting numerous dangers; swimming is not recommended.

**Hot Springs**
Thermal water can harbor organisms that cause a fatal meningitis infection and Legionnaires’ disease. Exposing your head to thermal water by immersion, splashing, touching your face, or inhaling steam increases your risk of infection.

**HIking**
Hikers are reminded to stay on trails. Shortcutting is prohibited because it damages fragile vegetation and causes erosion. Visitor centers sell topographic maps and trail guides. Know your limitations when hiking in the backcountry. Let a friend or relative know your planned destination, route, and expected time of return. These precautions will greatly increase your chance of survival in an emergency. Permits are not required for day hiking. Trailhead parking areas fill early during the day in July and August. In early summer, many trails are snow-covered and you may need an ice axe.

**Backpacking**
Grand Teton National Park has more than 230 miles of trails of varying difficulty. Obtain the required, free backpacking permit for overnight trips at the Craig Thomas Discovery or Colter Bay visitor centers or the Jenny Lake Ranger Station. One-third of backpack campsites in high use areas may be reserved in advance from January 1-May 15. There is a fee of $25 per reservation. Permits are not allowed on park trails or in the backcountry. Park approved bear-resistant canisters are required for all overnight backcountry use. Let bear-resistant food storage boxes be provided. Ask at a visitor center for more details. Obtain a free canister for use in the park when registering your trip.

**CLIMBING**
There are many risks and hazards associated with climbing and mountain travel. Experience and good judgment are essential. The Jenny Lake Ranger Station is staffed from late May to September by climbing rangers who can provide up-to-date weather and route conditions. Registration is not required for day climbs or cross-country hiking. Backcountry permits are required for all overnight climbs. The Park DOES NOT check to see that you get safely out of the backcountry. Leave an agenda with friends or family. Solo travel is not advised.

**Don’t Get Hit!**
Follow these guidelines to avoid lightning related injuries:

- Afternoon storms are common in summer, get to a safe place before storms hit.
- Avoid mountain tops, ridges, open areas and lone trees; forested areas with trees of similar height are safer.
- Do not stand on tree roots.
- If boating, get off the water.
- The National Oceanic and Atmospheric Administration (NOAA) provides a variety of material and links through their website at: www.lightningsafety.noaa.gov/outdoors.htm. This site contains critical lightning safety and medical information.

---

**In September the high temperatures in the valley averages 69°F, but the temperatures drop as fall progresses. The nighttime temperatures often drop below freezing, and warm sunny days may alternate with rainy days and occasional snow showers.**

Dress in layers and always take rain gear when preparing and be prepared for changing conditions. Afternoon thunderstorms occur frequently during the summer, but are rare in fall. Since 1999, there have been 30 injuries and two fatalities in the park due to lightning. NOAA weather forecasts are available at www.weather.gov/riverton, on NOAA Weather Radio at 162.525 MHz, or by calling the National Weather Service at 1-800-211-1448.
GRIZZLY AND BLACK BEARS can be anywhere in the park at any time. Odors attract bears into campgrounds and picnic areas. Regulations require that all food, garbage, toiletries, pet food, coolers and food containers (empty or full), and cookware (clean or dirty) be stored in a hard-sided vehicle with the windows rolled up or bear-resistant food locker when not in immediate use, day or night. Failure to follow regulations is a violation of federal law and may result in a citation:

• Never leave your backpack unattended!
• Never allow a bear to get human food.
• If approached by a bear while eating, put food away and retreat to a safe distance.

Keep a Clean Camp
Improperly stored or unattended food will be confiscated and you could be fined.

• Treat odorous products such as soap, toothpaste, fuel products, suntan lotion, and bug repellent in the same manner as food.
• Never store food, garbage or toiletries in tents.
• Place all trash in bear-resistant garbage dumpsters.
• Immediately report careless campers and all bear sightings to the campground kiosk or nearest ranger.
• Bears that receive human food often become aggressive and must be killed.

Make Noise in Bear Country
Grizzly and black bears live in the park and parkway. Bears will usually move out of the way if they hear people approaching, so make noise. Don’t surprise bears! Calling out and clapping your hands at regular intervals are the best ways to make your presence known. Bear bells are not substitute for standard safety precautions in bear country.

Hike in Groups
If possible, hike in groups of three or more people. Typically, larger groups of people make more noise and appear more formidable to bears. Keep your group together and make sure your children are close at all times. Avoid hiking when bears are more active; early in the morning, late in the day or when it is dark. Trail running is strongly discouraged; you may startle a bear.

Never Approach a Bear
All bears are wild and dangerous. Each bear will react differently and their behavior cannot be predicted.

If You Encounter a Bear
Do not run! Bears can easily outrun you. Running may cause an otherwise non-aggressive bear to attack. If the bear is unaware of you, or if the bear is aware of you but has not acted aggressively, slowly back away. Do not drop your pack! This teaches bears how to obtain human food and often results in the death of a bear. Do not climb trees. All black bears, all grizzly cubs and some adult grizzlies can climb trees.

If a Bear Approaches or Charges You
Do not run! Most bear attacks result from surprise encounters when the bear is defending their young or a food source, such as a carcass. Some bears will bluff their way out of a threatening situation by charging, then veering off or stopping abruptly. Bear experts generally recommend standing still until the bear stops and then slowly backing away. If you are attacked, lie on the ground completely flat on your stomach. Spread your legs slightly and clasp your hands over your chest. Do not move until you are certain the bear has left.

If You Carry Bear Spray
• Personal self-defense pepper spray is not effective.
• Bear spray is not a repellent! Do not spray it on people, tents or backpacks.
• Under no circumstances should bear spray serve as a substitute for standard safety precautions in bear country.

Park visitor centers offer bear safety programs and can recycle your bear spray. Come visit for more information.

WHAT KIND OF BEAR DID YOU SEE? Both grizzly bears and black bears live in the park and parkway.

Black Bear
- Color ranges from blonde to black
- No distinctive shoulder hump
- Face profile is straight from nose to tip of ears
- Ears are tall and pointed
- Front claws are short and curved (1-2” long)

Grizzly Bear
- Color ranges from blonde to black
- Distinctive shoulder hump
- Face profile appears dished in
- Ears are short and rounded
- Front claws are long and less curved (2-4” long)

Let’s Get Moving in Grand Teton
Let’s Move Outside encourages kids, families and all park visitors to engage in outdoor activity that gets hearts pumping and bodies moving.

Part of First Lady Michelle Obama’s national Let’s Move campaign to end childhood obesity within a generation, the program is now underway in national parks all over the country. Look for Let’s Move Outside ranger programs in Grand Teton this summer. From biking and biking, to swimming, paddling and horseback riding, Grand Teton National Park provides ways for everyone to have fun and get healthy!

Shuttle Bus to the Park
Alltrans, Inc. runs a daily shuttle service from the town of Jackson to Grand Teton National Park. Visitors may access multiple destinations throughout the park for one daily fare (park entrance fees not included). Check at visitor centers and bus stops for current schedule or call Alltrans, Inc. for more information, 1 (800) 443-6133.

Cost to ride the shuttle is $14 per person, per day for an unlimited number of rides. Drivers accept payment by cash, Visa, or MasterCard. Season passes are also available; price depends on month purchased. For more information, call Alltrans, Inc. or visit their website: www.alltransparkshuttle.com.

Fall Elk Reduction
The Jackson elk herd is the largest in the world ranging from southern Yellowstone National Park, to Grand Teton National Park, the Gros Ventre River drainage, and the Teton and Gros Ventre wilderness areas. Currently the herd numbers over 11,000 animals with 2,000 elk summering in Grand Teton National Park.

When Grand Teton National Park expanded in 1950, Congress authorized an elk reduction program to continue management of the herd. Today the reduction program runs from early-October through early-December in the eastern portion of Grand Teton National Park and in the John D. Rockefeller, Jr. Memorial Parkway. Please stop by a visitor center for additional information.
**Visit Moose**

Moose is located 12 miles north of Jackson, Wyoming. Please see the park map on page 12 to help you plan your trip to Moose. Enjoy a variety of trails, activities, scenic drives and ranger programs as well as historic districts and iconic views of the Teton Range.

Spend Time at Colter Bay
Colter Bay is located 25 miles north of Moose. Please see the park map on page 12 to help you plan your trip. Colter Bay provides some of the best wildlife viewing opportunities in the park as well as a wide range of visitor services and trails.

Enjoy lunch on the lakeshore at the picnic area or take a hike on one of the area trails for great opportunities to see wildlife. You will also find an RV park, cabins, restaurant, general store, laundromat, service station and showers.

JACKSON LAKE LODGE
Even if you are not staying overnight at the Jackson Lake Lodge, the historic building is worth a visit. Large mural windows showcase views of Jackson Lake and the northern Teton Range. Wildlife such as black and grizzly bears, elk and moose are frequently seen from the lodge. Access trails, a corral, gift stores and restaurants.

Experience the Laurance S. Rockefeller Preserve
Located four miles south of Moose on the Moose-Wilson Road, the Preserve Center offers unique sensory exhibits and trails leading to Phelps Lake, providing extraordinary views of the Teton Range. *Due to the narrow road, trailers and oversized vehicles are not permitted on the Moose-Wilson Road.

Laurance S. Rockefeller Preserve Ranger Programs
Visit the Center to learn more about Mr. Rockefeller’s vision for the Preserve and his legacy of conservation stewardship.

LAURANCE S. ROCKEFELLER PRESERVE CENTER
Visit the Center to learn more about Mr. Rockefeller’s vision for the Preserve and his legacy of conservation stewardship. The Center will orient you to the area with unique sensory exhibits that highlight the visual, auditory and tactile qualities of the Preserve’s plants and wildlife. Learn about the innovative design techniques and features that make the Center a model for energy and environmental design. Open daily September 4-23 from 9 am to 6 pm. The Preserve adheres to the principles of “Leave No Trace”—plan to pack out your trash. No sales area and no permits issued.

PRESERVE TRAILS
The Preserve offers an 8-mile trail network that provides access to extraordinary views of Phelps Lake and the Teton Range, as well as other scenic and ecological features. Immerse yourself by quietly walking the trails and opening your senses to the sights, sounds, smells and textures of the various natural communities found within the Preserve. The trails will lead you along Lake Creek, Phelps Lake and adjacent ridges, and through aspen and conifer forests, wetlands and sagebrush meadows. Watch for deer, elk, moose, black and grizzly bears. Composting toilets and benches are available at Phelps Lake.

RANGER PROGRAMS
Join a ranger for a deeper understanding of Laurance S. Rockefeller’s vision and gift. Program times are listed below.

PARKING
Parking lot often fills from 10 am to 3 pm—consider carpooling or biking (note: the roadway is quite narrow) to help alleviate congestion and reduce our environmental footprint.

Event Description Meeting Place Date/Time Duration Sun Mon Tues Wed Thu Fri Sa
Explore the Preserve Hike Open your senses and immerse yourself in the pristine setting of the Preserve. Hike the Lake Creek Trail through forest and meadows to the shore of Phelps Lake which affords dramatic views of the Teton Range. Reservations recommended; call (307) 739-3654. Bring water, rain gear, sunscreen and insect repellent. RUND TRIP DISTANCE: 3 MILES. DIFFICULTY: Easy/Moderate. TRAVEL: 2 TO 2½ HOURS. Laurnce S. Rockefeller Preserve Center Porch Sept 4-16 9:30 am up to 2½ hours
Autumn at the Preserve Join a ranger to hear about the interesting adaptations that occur in animals and plants with the changing of the seasons. Wheelchair accessible. Stop by anytime between 10:30 am and 11:45 am. Laurnce S. Rockefeller Preserve Center Porch Sept 4-23 10:30-11:45 am
Fireside Chat Pull up a chair by our fireplace for a ranger program on a variety of subjects including wildlife of the Preserve, history of the JY Ranch, environmental topics, conservation and literature. Wheelchair accessible. Laurnce S. Rockefeller Preserve Center Resource Room Sept 4-23 4 pm 30 minutes

Special Ranger Programs
SHOSHONEAN DAYS, Sept 7th & 8th Colter Bay Visitor Center. Learn about the Shoshone culture; includes presentations by Shoshone tribe members and video presentations & art demonstrations. Check at visitor centers for details.

Grand Teton Guide [Fall 2012] 7
Interested in Working in the Park?

HAVE YOU EVER THOUGHT ABOUT SPENDING A SUMMER WORKING IN A NATIONAL PARK? Summer seasonal positions are recruited during the winter months. A wide variety of positions provide unique challenges, and many rewards. Imagine yourself fighting wild fires, maintaining backcountry trails, patrolling the Snake River in a boat, providing guided ranger hikes or assisting a park biologist with wolf research.

To view and apply for vacancies for all federal jobs visit www.usajobs.gov. For a list of available jobs in the Department of Interior, including the National Park Service go to www.doi.gov/public/findajob.cfm. Positions posted for Grand Teton National Park can be found under jobs listed in Moose or Moran, Wyoming. You can also learn about vacancies at www.nps.gov/gtir/supportyouropark/employ.htm. For jobs in fire management, log on to www.tetonfires.com and click on the Employment link. Go to www.nps.gov/gtir/supportyouropark/upload/OF510-fedres.pdf to learn how to apply for federal jobs.

Five Reasons to Drink Grand Teton National Park Water

By Grand Teton National Park Green Team

- 6,500 FEET
The average elevation of Grand Teton National Park’s valley floor. At high elevation, your body loses water twice as fast as at sea level. Drink extra water for your body to function properly here.

- 5,000 SINGLE-USE PLASTIC BOTTLES
The number of single-use plastic bottles entering the waste stream every day in Jackson Hole, only 40 percent of these bottles are recycled. Every year people spend over $100 billion on bottled water worldwide. Purchasing eight, 16 oz. bottles of water—one gallon—may cost $8. Instead, consider using refillable bottles or a backpack with a water reservoir. You will save money and help your body cope with the elevation.

- 100% PURE
The park has retrofitted many of its drinking fountains in high traffic areas to be quick and easy water bottle filling stations. The water from these filling stations is tested more regularly than bottled water and is some of the purest water in the country. Please keep in mind, water taken directly from lakes or streams must be treated before drinking.

- CONVENIENCE
Filling up your reusable water bottle is easier than purchasing a bottle of water. Water bottle filling stations are found throughout Grand Teton National Park. Locations include the Craig Thomas Discovery & Visitor Center, South Jenny Lake, String Lake picnic area, Colter Bay Visitor Center, Flagg Ranch Information Station, and Signal Mountain, Jackson Lake and Jenny Lake lodges. The water filling stations provide a clean and safe source of water as an alternative to buying bottled water.

- COMMITMENT
The National Park Service and its partners are committed to preserve and protect Grand Teton National Park for you and for future generations. With three million visitors every year, we need your help! The park has committed to reducing greenhouse gas emissions 20 percent by 2020. By providing a wide range of reusable water bottles for purchase—including a low-cost, BPA free, recyclable plastic bottle with the "reduce, reuse, refill" logo—and water bottle filling stations, we can help reduce our waste stream. In addition, the park purchases 100 percent green power, provides recycling for visitors and employees, and works with the U.S. Green Building Council to ensure all new construction in the park is Leadership in Energy and Environment Design (LEED) certified. With these initiatives and your help, we can reach our greenhouse gas reduction goals and protect the park for future generations.

Where to Look for Wildlife

A LI ANIMALS REQUIRE FOOD, WATER AND SHELTER. Each species also has particular living space or habitat requirements. To learn more about wildlife habitats and behavior, attend ranger-led activities. While observing wildlife, please park in designated turnout, not on the roadway.

WILLLOW FLATS
North of the Jackson Lake Dam moose browse on willow shrubs. At dawn and dusk, elk graze on grasses growing among willows. Predators such as wolves and grizzly bears pursue elk calves in early summer. Beavers create ponds by damming streams that also harbor muskrats and waterfowl.

Always maintain a distance of at least 100 yards from wolves and bears and 25 yards from all other wildlife. Do not feed or harass wildlife of any kind.

ELK RANCH FLATS
Stop at the Elk Ranch turnout on highway 26/89/191 just north of Cunningham Cabin. Here you may see pronghorn, bison, elk and even domestic animals using a grazing permit. The open grasses here attract a variety of animals.

SNAKE RIVER
Jackson Lake Dam south to Moose. Elk and bison graze in grassy meadows along the river. Bison also eat grasses on the sagebrush benches above the river. Bald eagles, ospreys and great blue herons build large stick nests within sight of the river. Beavers and moose eat willows lining the waterway.

BLACKTAIL PONDS
Half-mile north of Moose on Highway 26/89/191. Old beaver ponds have filled with sediment and now support grassy meadows where elk graze during the cooler parts of the day. Several species of ducks feed in the side channels of the Snake River while moose browse on willows.

TIMBERED ISLAND
A forested ridge southeast of Jenny Lake. Small bands of pronghorn, the fastest North American land mammal, forage on nearby sagebrush throughout the day. Elk leave the shade of Timbered Island at dawn and dusk to eat grasses growing among the surrounding sagebrush.

ANTELOPE FLATS & MORMON ROW
East of Highway 26/89/191, one mile north of Moose Junction. Bison and pronghorn may be seen grazing. Watch for coyotes, Northern harriers and American kestrels hunting mice, Uinta ground squirrels and grasshoppers. Sage grous, sage thrashers and sparrows also frequent the area.

OXBOW BEND
One mile east of Jackson Lake Junction. Slow-moving water provides habitat for fish such as suckers and trout that become food for river otters, ospreys, bald eagles, American white pelicans and common mergansers. Look for beavers and muskrats swimming past. Moose browse on abundant willows at the water’s edge. Elk occasionally graze in open aspen groves to the east, while grizzly bears occasionally look for prey.
Fire has been a part of the Greater Yellowstone Ecosystem for thousands of
years. Its presence is important for wildlife
habitat, nutrient cycling, plant diversity
and overall landscape health. Grand Teton
National Park fire managers seek to strike
a balance between restoring and maintaining
natural processes associated with fire, and
protecting human life and property.

**FIRE ECOLOGY IN THE PARK**
Fire naturally changes the forest by creating
diverse-aged tree stands, recycling nutrients
into the soil and stimulating new plant
growth. Fire ecology research shows that
many plant and animal species benefit from
the rejuvenating effects of fire.

Evidence of large fires is prevalent in Grand
Teton and Yellowstone national parks.
Burned areas provide an opportunity for the
forest to regenerate, which is evident in the
plants, trees and wildlife present. Previously
burned areas include: the 2009 Bearpaw
Bay Fire that burned between Leigh Lake
and Jackson Lake, the 2000 Teton Complex
cross from Colter Bay, the 1999 Alder Fire
near Jenny Lake, the 1985 Beaver Creek Fire
near Taggart Lake and the 1974 Waterfall
Canyon Fire.

**HOW WE MANAGE FIRES**
Fire managers at Grand Teton National Park
and surrounding agencies are guided by
comprehensive fire plans. Sometimes crews
monitor fires closely but take minimal action
so a fire can take its natural course. This
allows fire-adapted plants to resprout from
roots or opens serotinous (heat-dependent)
cones for seed dispersal. In some cases, fire
opens areas so native plants can re-establish.
When appropriate, firefighters immediately
suppress all or portions of a fire to reduce
risk to life and property.

Occasionally firefighters apply fire to the
landscape under specific conditions to help
maintain a healthy and safe forest ecosystem.
These planned ignitions, called prescribed
fires, create a mosaic of diverse habitats for
plants and animals. Burning accumulated
fuels also minimizes risk to developments and
cultural resources.

In developed areas, fire crews lower the risk
of losing structures to wildfire by thinning
trees and removing dead wood and brush
from the forest floor. This increases firefighter
and public safety in the event of a wildfire.
Firefighters pile the
slash and let it dry for a
year before burning it during wet weather in
late spring or fall.

Specialized fire crews monitor burned
areas to learn more about fire’s effect on the
ecosystem. This data is not only used for fire
management decisions, but is also shared
with wildlife biologists, vegetation ecologists,
historic preservation specialists and other
land management agencies to achieve
common goals for a healthy ecosystem.

YOUR ROLE IN FIRE PREVENTION
Fire season in the park coincides with the
historic preservation specialists and other
land management agencies to achieve
common goals for a healthy ecosystem.

**ARTISTS IN THE ENVIRONMENT**
Jackson Hole attracts artists from all over the
world. Watch professional artists demonstrate
techniques while capturing the essence of
Grand Teton National Park. Sharon Thomas:
September 8, 9 am-12 pm @ Menors Ferry.

**WRITERS IN THE ENVIRONMENT**
Local writers share their talents by offering
writing exercises for park visitors. Workshop
leaders are inspiring writers and teachers who
draw on the park in their published works.
Meet at the flagpole in front of the Craig
Thomas Discovery & Visitor Center in Moose.
Bring a journal, water and a portable chair.
Matt Daly: September 8, 9 am-12 pm

We invite you to become a member entitled to a
15% discount on purchases at all GTA visitor
outlets, as well as on catalog and website orders. Many cooperating
association stores nationwide offer reciprocal discounts.

- $35 Individual Annual Member with discount privileges and a unique
  member gift
- $50 Family Annual Member with discount privileges and a choice of member
  gifts
- Additional annual memberships: $100 Supporting Member, $250 Sustaining
  Member, $500 Gold Member with discount privileges and additional gifts
- $1000 Platinum Member, a three-year membership includes an Interagency
  Annual Pass (see page 2)

Yes! I would like to be a part of the
future of Grand Teton National Park.

VISITOR CENTERS

- Dates Subject to Change
- OPEN SEASON 2012

- Albright Visitor Center, Mammoth Hot Springs: Open Year-round
- Old Faithful Visitor Center: April 20 – Nov. 4
- Canyon Village: May 12 – Oct. 14
- Fishing Bridge: May 23 – Sept. 30
- Grant Visitor Center: May 26 – Sept. 30
- West Thumb Information Station: May 26 – Sept. 30
- Museum of the National Park Ranger: May 26 – Sept. 30
- Norris Information Station: May 23 – Sept. 30
- West Yellowstone Visitor Information Center (open year-round): Dates staffed by NPS Rangers
- Madison Information: May 23 – Sept. 30

NPS CAMPGROUNDS

- First-come, First-served
- OPEN SEASON 2012

- Indian Creek: June 18 – Sept. 10
- Lewis Lake: June 15 – Nov. 4
- Mammoth: Year-round
- Norris: May 18 – Sept. 24
- Pebble Creek: June 15 – Sept. 24
- Slough Creek: June 15 – Oct. 31
- Tower Fall: May 18 – Sept. 24

XANTERRA CAMPGROUNDS

- Reservations – (866) 439-7375
- OPEN SEASON 2012

- Bridge Bay: May 25 – Sept. 9
- Canyon: May 1 – Sept. 3
- Fishing Bridge RV: May 11 – Sept. 23
- Grant Village: June 21 – Sept. 23
- Madison: May 4 – Oct. 21
- Campground & Lodge fill times: (307) 344-2114

ROAD CLOSING DATES 2012

- Please check at an entrance station or visitor center for road construction and road closure information.
- Tower-Roosevelt to Canyon Village (Dunraven Pass): Oct. 9
- Remaining roads EXCEPT Mammoth Hot Springs to Cooke City, MT: Nov. 4

ROAD CONSTRUCTION DELAYS

- Call the 24-hour Current Road Report hotline at (307) 344-2117 for the latest information on conditions affecting roads within the park.
