Welcome to Grand Teton National Park

Few landscapes in the world are as striking and memorable as that of Grand Teton National Park. The Teton Range, the central feature and focus of the park, draws the eyes for miles, captivating park visitors and local residents alike. For generations, the Teton’s have touched all who have witnessed their beauty.

Rising abruptly from the valley floor, the Teton’s offer a testament to the power and complexity of nature. The mountains, valleys, lakes, rivers, and skies are home to diverse and abundant plants and animals. People have been living in the shadow of the Teton Range for almost 11,000 years. The human history of this area is extensive, beginning with American Indian prehistoric life, to the early Euro-American explorers, and the more relatively recent frontier settlement, which left more than 300 historic structures.

This spectacular mountain range and the desire to protect it resulted in the establishment of Grand Teton National Park in 1929. Over time, through the vision and generous philanthropy of John D. Rockefeller, Jr., additional lands were added, creating the present-day park. This area continues to be protected through the combined efforts of the National Park Service, the local community, and Greater Yellowstone Ecosystem partners. Grand Teton National Park is a dynamic example of people from all walks of life working together to protect a mountain range and its surrounding landscape of natural and human communities.

Grand Teton National Park is truly a special and unique place. With thoughtful use and careful management, it can remain so for generations to come. As with other sites in the National Park System, Grand Teton preserves a piece of the natural and cultural heritage of America for the benefit and enjoyment of future generations.

While you are here, take a moment to put your cares aside, stroll through a grassy meadow, hike a park trail, sit on a quiet lakeshore, and lose yourself to the power of this place. We hope you will be refreshed and restored during your visit, and stay connected to this magnificent landscape long after you have returned home.

Caring for the American Legacy

Grand Teton National Park is one of nearly 400 park sites administered by the National Park Service (NPS). The NPS preserves the natural and cultural resources and values of the National Park System for the enjoyment, education, and inspiration of this and future generations. The NPS also cooperates with partners to extend the benefits of natural and cultural resource conservation and outdoor recreation throughout this country and the world.

On August 25, 1916, President Woodrow Wilson signed the act creating the National Park Service, a new federal bureau in the Department of the Interior responsible for protecting the 40 national parks and monuments then in existence, as well as those yet to be established.

The Organic Act of August 25, 1916, states that “The Service thus established shall promote and regulate the use of Federal areas known as national parks, monuments, and reservations – by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”

The National Park Service strives to meet those original goals, while filling many other roles as well: guardian of diverse cultural and recreational resources; environmental advocate; world leader in the parks and preservation community; and pioneer in the drive to protect America’s open space.

Please join us in protecting Grand Teton National Park by following park regulations and watching out for your own safety and the safety of others.
Gros Ventre
Camping Gros Ventre Campground May 1-Oct 15 (307) 543-3100 (800) 628-9988 360 sites, dump station, First-come, first-served.

Moose
Visitor Center Moose Visitor Center Year-round (307) 739-3399 Located at Moose Visitor Center.
Lodging Dornan’s Ranch May-Sept (307) 733-2222 One- and two-bedroom cabins with kitchens, located on the Snake River.
Food Service Dornan’s Chuck Wagon Year-round (307) 733-2415 x203 Traditional western fare. Open daily for breakfast, lunch, and dinner.
Dornan’s Trading Post Year-round (307) 733-2415 x201 Gourmet items, groceries, cheeses, and deli. Deli open May-September.
Dornan’s Grocery Store May-Sept (307) 733-2415 x200 10 a.m.-9 p.m., June-Sept 10 a.m.-10 p.m., Oct-Apr 10 a.m.-6 p.m.
Camp Store/Gift Shops Dornan’s Gift Shop Year-round (307) 733-2415 x301 8 a.m.-May 8 p.m., June-July 8 a.m.-8 p.m., Oct-April 10 a.m.-5 p.m.
Camp Store/Gift Shops Dornan’s Gift Shop Year-round (307) 733-2415 x203 Located at Dornan’s. Mountainviewing and mountain equipment. 9 a.m-8 p.m.
Service Station Dornan’s Service Station Year-round (307) 733-2415 x201 Auto-repair, 24 hours a day, seven days a week.
Other Snake River Anglers May-Oct (307) 733-3699 Provided by

South
Jenny Lake
Ranger Station Jenny Lake Ranger Station May -Sept (307) 739-3344 Located at Jenny Lake Ranger Station.
Lodging Jenny Lake Campground May 15-Sept 25 (307) 543-3100 (800) 628-9988 51 sites, tents only. First-come, first-served.
Camp Store/Gift Shops General Store May 13-Sept 18 (307) 734-9227 Camp and hiking supplies, groceries, film and gifts.

North
Jenny Lake
Food Service Lodge Dining Room June 3-Sept 9 (307) 733-4647 Breakfast 7:30-9 a.m., lunch 12:30-1:30 p.m., dinner 6-8:45 p.m. Reservations required for dinner.
Gift Shops Jenny Lake Lodge June 3-Sept 9 (307) 733-4647 Gifts, books, and apparel.

Signal Mountain
Lodging Signal Mountain Lodge May 7-Oct 16 (307) 543-2831 Lakefront suites, motel units, and log cabins.
Food Service Peaks Dining Room May 7-Oct 12 (307) 543-2861 Open daily for dinner. 5:30-10 p.m. Hours vary during shoulder seasons.
Camp Store/Gift Shops Needles Gift Store May 7-Oct 16 (307) 543-2861 Hook-ups available.
Service Stations Timbers Gift Store May 7-Oct 16 (307) 543-2861 Open daily 6 a.m.-10:30 p.m.
Marina Marina May 21-Sept 18 (307) 543-2861 Open daily 6 a.m.-10:30 p.m.

Jackson Lake Lodge
Lodging Jackson Lake Lodge May 23-Oct 3 (307) 543-3100 (800) 628-9988 350 sites, dump station, propane, laundry and showers nearby.
Food Service Mural Room May 23-Oct 3 (307) 543-2861 Breakfast 7:30-9 a.m., lunch 11:30 a.m.-1:30 p.m., dinner 5:30-9:30 p.m. Dinner reservations recommended.
Camp Store/Gift Shops Pioneer Grill May 23-Oct 3 (307) 543-2861 Open daily 6 a.m.-10:30 p.m.
Gift Shops Blue Heron May 23-Oct 3 (307) 543-2861 Open daily 11 a.m.-midnight.
Service Station Jackson Lake Lodge May 23-Oct 3 (307) 543-2861 Sundries, magazines, books, gifts, souvenirs, and apparel.
Horseback Riding Jackson Lake Lodge Corral May 24-Oct 3 (307) 543-2861 Breakfast and dinner rides, wagon safes available. Trail rides.

Leek’s Marina
Food Service Leek’s Pizzeria May 26-Sept 11 (307) 543-2944 (800) 543-2946 Pizza and sandwiches. Open daily 11 a.m.-10 p.m. Dependent on water levels.
Lizard Creek Camp Store/Gift Shops Lizard Creek Campground May 3-June 5 (307) 543-2831 (800) 672-6012 60 sites, 30-foot vehicle max. First-come, first-served.

Flagg Ranch
Lodging Flagg Ranch Information Station May 6-Sept 5 (307) 543-2372 (800) 463-2311 NPS visitor center and museum, open 8 a.m.-7 p.m. May 28-Sept.  Otherwise 8 a.m.-5 p.m.
Food Service Flagg Ranch Resort May 15-Oct 10 (307) 543-2861 Open daily 8 a.m.-6 p.m. Log-style units.
Flagg Ranch Resort May 15-Oct 10 (307) 543-2861 Open daily 6 a.m.-10:30 p.m. Home-style menu, breakfast, lunch, and dinner. Essentials for camping and fishing, diesel, and snowmobile rentals.
Horseback riding Flagg Ranch Resort June-August (307) 543-2861 One-hour trail rides. Guided snowmobile and snowcoach trips into Yellowstone.

Other Services
Jackson Information
Lodging Jackson Hole Chamber of Commerce May 1-Sept 30 (307) 733-3316 Located in Jackson. All services available, visitor center located at 532 N. Cache.
Environmental Education
Teton Science School May-August (307) 733-4765 Field natural history seminars. One- to four-day field trips.
Horseback Riding
Rodeo Hole Trail Rides May-August (307) 733-6942 Two- and four-hour trail rides from Teton Village.
Mountaineering
Exum Mountain Guides Year-round (307) 733-2397 Daily basic and intermediate schools. AMGA accredited.
JH Mountain Guides Year-round (307) 733-4797 Guide service for individuals or small groups. AMGA accredited.
Snake River Float Trips
Barker-Ewing Float Trips May-August (307) 733-1800 10-mile scenic trips. Departures throughout the day.
Flagg Ranch Resort May-August (307) 543-2861 10-mile scenic trips. Departures throughout the day.
Snake River Angler May-August (307) 733-2853 Scenic rafting trips depart daily. Guided fishing trips. 10-mile scenic trips, guided fishing trips.
Grand Teton Lodge Co. May-August (307) 543-2811 Guided fishing trips, fly or spin.
Jack Dennis Fishing Trips May-August (307) 543-2477 10-mile scenic trips. Departures throughout the day.
National Park Float Trips May-August (307) 733-6445 10-mile scenic trips. Departures throughout the day.
O.A. Miller Float Trips May-August (307) 343-4672 10-mile scenic trips. Departures throughout the day.
Signal Mountain Lodge May 21-Sept 25 (307) 543-2831 10-mile scenic trips. Departures throughout the day.
Triumph X River Trips May-August (307) 543-2811 10-mile scenic trips.
Recycling Recycling stations are located throughout the park. Please check at any visitor center for more information.

Medical Services
Medical Emergencies St. John’s Medical Center May 23-October 3 (307) 543-3636 Located in Jackson.
JH Medical Center May 23-October 3 (307) 543-2514 Located at Jackson Lake Lodge. Open daily 10 a.m.-6 p.m.

Worship Services
Interdenominational Various Park Campgrounds May-August (307) 733-4765 Provided by A Christian Ministry in the National Parks.

Chapel of the Transfiguration May 29-Sept 25 (307) 733-2603 Located at Teton Science School. Saturday, 8:30 a.m. and 10 a.m.
L.D.S.
Jackson Lake Lodge May 22-Sept 25 Open daily 7-9 a.m., 11 a.m.-5 p.m., Sunday School 7 p.m., Priesthood/Relief Society 7:45 p.m.
Roman Catholic
Chapel of the Sacred Heart May 16-Sept 30 (307) 733-2516 Saturday 9 a.m.-10 a.m., Holy Days 5:30 p.m.

Open/close dates and hours of operation subject to change at any time. Facilities listed north to south.
Reading the Landscape

The Teton Range dominates the skyline of Grand Teton National Park, attracting the attention of all who pass through Jackson Hole. The geologic events that created the dramatic scenery of Jackson Hole indirectly account for the distribution and abundance of wildlife and plants found here. Herbivores – plant-eating animals like moose, mule deer, and elk – inhabit areas where their food sources exist. Carnivores – meat-eating animals such as bears, coyotes, and weasels – follow the herbivores they prey upon.

The Teton Range is rich with canyons and basins now filled by Leigh, Jenny, Bradley, and Oxbow lakes. Ridges of glacial debris, called moraines, surround these lakes and mark the edge of the glaciers’ flow.

While small glaciers flowed within the Teton Range, an icefield covered much of the area. Beginning 90,000-25,000 years ago, lobes from this icefield flowed south, gouging out the depression that Jackson Lake fills today, and carrying debris as far as Snake River. As the climate warmed, glacial ice melted and broke through the moraines, flowing south through the valley and carrying away soil. Sagebrush, grasses, and wildflowers adapted to thrive in this rocky, dry landscape. Some mammals and birds favor the sagebrush flats, bison graze on grasses there, and pronghorn eat sagebrush itself. Sage grouse, large chicken-like birds, eat sagebrush leaves.

For the past 10,000 years or so, the Snake River has cut through glacial moraines to flow through the southern end of Jackson Hole. Old river terraces parallel today’s Snake River indicate that it once carried much more water. Cottonwood and spruce trees, home to bald eagles, grow along the Snake River. Beavers occasionally dam side channels of the Snake River, establishing ponds that Canada geese and ducks use for nesting and feeding. Moose and bears eat willows that flourish in wetlands along the river. Willows and other wetland plants provide cover and nest sites for a multitude of songbirds.

As you explore Grand Teton National Park, read its landscape. Note the work of glaciers on the mountains and canyons, and the old river terraces carved by the Snake River. Watch for the wildlife that provides clues to the ancient processes that formed and shaped this area.

Peak Names

Static Peak
In the Teton Range north of Death Canyon. Named because it is often hit by lightning.

Buck Mountain
Named for George A. Buck, recorder for T.M. Bannon’s 1898 mapping party. Bannon gave the name “Buck Station” to the triangulation station he and George Buck established on the summit in 1898.

Grand Teton
Highest mountain in the Teton Range. Named by French trappers. Upon viewing the Teton Range from the west, the trappers dubbed the South, Middle, and Grand, Les Trois Tetons, meaning “the three breasts.” Wilson Price Hunt called them “Pilot Knobs” in 1811 because he had used them for orientation while crossing Union Pass. In His Journal of a Trapper, Osborne Russell said that the Shoshone Indians named the peaks “Hoary Headed Fathers.”

Mount Owen

Teewinot
Towers above Cascade Canyon and Jenny Lake. Its name comes from the Shoshone word meaning “many pinnacles.” Teewinot probably once applied to the entire Teton Range, rather than just this one peak. Fredrik Fryxell and Phil Smith named the peak when they successfully completed the first ascent of the mountain in 1929.

Mount Saint John
Between Cascade and Paintbrush canyons. A series of peaks of nearly equal height. Named for Dostie St. John, geologist of Hayden’s 1877 survey, whose monographs of the Teton and Wind River ranges are now classics.

Mount Moran
Most prominent peak in the northern end of the Teton Range. Named by Ferdinand V. Hayden for the landscape artist Thomas Moran, who traveled with the 1872 Hayden expedition into Yellowstone and into Pierre’s Hole on the western side of the Teton Range. He produced many sketches and watercolors from these travels.

From the book Origins by Hayden and Nielson.

John D. Rockefeller, Jr. Memorial Parkway

Located at the heart of the Greater Yellowstone Ecosystem, the Rockefeller Parkway connects Grand Teton and Yellowstone national parks. The late conservationist and philanthropist John D. Rockefeller, Jr. made significant contributions to several national parks including Grand Teton, Acadia, Great Smoky Mountains, and Virgin Islands. In 1972, Congress dedicated a 24,000-acre parcel of land as the John D. Rockefeller, Jr. Memorial Parkway to recognize his generosity and foresight. Congress also named the highway from the south boundary of Grand Teton to West Thumb in Yellowstone in honor of Rockefeller. The Rockefeller Parkway provides a natural link between the two national parks and contains features characteristic of both areas. In the parkway, the northern Teton Range tapers to a gentle slope, while rocks born of volcanic flows from the north line the Snake River and form outcroppings scattered atop hills and ridges.
Where to Look For Wildlife
Always Keep a Safe Distance When Viewing Wildlife

All animals require food, water, and shelter. Each species also has particular living space, or habitat, requirements. To learn more about wildlife habitats and animal behavior, attend ranger-led activities.

OXWYR REND
One mile east of Jackson Lake Junction. Slow-moving water provides habitat for fish such as suckers and trout, which become food for river otters, ospreys, bald eagles, American white pelicans, and common mergansers. Look for swimming beavers and muskrats. Moose browse on abundant willows at the water's edge. Elk occasionally graze in open aspen groves to the east.

TIMBERED ISLAND
A forested ridge southeast of Jenny Lake. Small bands of pronghorn antelope, the fastest North American land mammal, forage on nearby sagebrush throughout the day. Elk leave the shade of Timbered Island at dawn and dusk to eat the grasses growing among the surrounding sagebrush. View wildlife from your vehicle.

MORMON ROW
East of Highway 26/89/191, one mile north of Moose Junction. Along Mormon Row and Antelope Flats Road, bison and pronghorn can be seen grazing in spring, summer, and fall. Also watch for coyotes, Northern harriers, and American kestrels hunting Unita, Uinta ground squirrels, and grasshoppers in open fields. Sage grouse, sage thrashers, and sparrows also frequent the area.

SNAKE RIVER
Jackson Lake Dam south to Moose. Elk and bison graze in grassy meadows along the river. Bison also eat grasses in the sagebrush flats on the benches above the river. Bald eagles, ospreys, and great blue herons build large stick nests within sight of the river. Beavers and moose use willows that line the waterway.

CASCADE CANYON
West of Jenny Lake. Look for, but do not feed, golden-mantled ground squirrels at Inspiration Point. Pikas and yellow-bellied marmots live in scattered boulder fields. Mule deer and moose occasionally browse on shrubs growing at the mouth of the canyon. Listen for the numerous songbirds that nest in the canyon.

BLACKTAIL PONDS
Half-mile north of Moose on Highway 26/89/191. Old beaver ponds have filled in and now support grassy meadows where elk graze during the cooler parts of the day. Several kinds of ducks feed in the side channels of the Snake River. Moose browse on willows growing along the river.

Give Wildlife a Brake®
Moose, bison, elk, mule deer, pronghorn, black and grizzly bears — a host of large animals inhabit Grand Teton National Park, the Rockefeller Parkway, Yellowstone National Park, and surrounding areas. Animals are on roads and highways at any time of the day or night. For your own safety and for the protection of wildlife, please drive carefully and stay alert.

What Kind of Bear Is That?
Grizzly Bear
Color
Ranges from blond to nearly black, sometimes have silver-tipped hairs that give them a grizzled appearance.

Physical Features
Grizzly bears have a dishel, or concave, facial profile and a large hump of heavy muscle above the shoulders. Their claws are long and relatively straight, extending two or more inches (5 cm) beyond their toes.

Black Bear
Color
Color is not a reliable indicator of the species. Contrary to their name, black bears are often brown, cinnamon, and/or blond in color.

Physical Features
Black bears have a straight facial profile and lack a large hump above the shoulders. Their claws are short and curved, usually not extending more than 1.5 inches (4 cm) beyond their toes.
Natural Communities in the Park

The natural systems of Grand Teton National Park and Jackson Hole create a magnificent environment showcasing an incredible diversity of vegetation and wildlife. Many natural communities in the park are defined by the plants and animals that live within them.

ALPINE COMMUNITIES

Plants and animals in the alpine community survive in the harshest of Grand Teton’s environments. High elevation, long winters, and short summers present special challenges to the inhabitants above tree line. Summer is short and intense, with long, bright days and cold nights. Lichens cling to rocks and miniature, low-growing mat-forming plants, such as phlox and pasquefoots, guard themselves from wind and cold by growing only inches above the soil. Since bees are infrequent, many alpine flowers have unpleasant odors to attract pollinating flies and other insects. The insects in turn attract horned larks and white-crowned sparrows. The alpine forget-me-not rewards birders with its vibrant blue color. Yellow-bellied marmots often sun themselves on rocky hillides as Clark’s nutcrackers fly overhead. Tiny rabbit-like pikas spend the warm months collecting and storing food for the long winter. Golden eagles sometimes overhead. Tiny rabbit-like pikas spend the warm months collecting and storing food for the long winter. Golden eagles sometimes

FOREST COMMUNITIES

There are a number of forest communities in Grand Teton National Park. Because of the variations in the height of trees, shrubs, and grasses, forests support a wide variety of animal species. The most extensive of the forest communities is the lodgepole pine forest community, which extends from the southern portion of Yellowstone National Park and along the lower elevations of the Tetons to the south end of the range. Elk and mule deer find shade here during sunny, summer days. Red squirrels inhabit the trees, gathering seeds and storing them for the long winter. Snowshoe hares, deer mice, and red-backed voles are among the small mammals found on the forest floor. Black and grizzly bears, short-tailed weasels (ermine) and pine martens prey upon smaller animals. Colorful western tanagers fly through the less dense parts of the forest canopy.

Other forest communities include Douglas fir and spruce-fir forest communities. Stands of Douglas fir are found on either dry, south-facing slopes up to about 8,000 feet or on dry north-facing slopes at lower elevations. Voles, mice, and gophers also live here; they are hunted by great horned owls. Other birds found amongst the Douglas fir include chickadees, nuthatches, pine siskins, Cassin’s finches, and dark-eyed juncos.

Spruce-fir forests are dominated by Engelmann spruce and subalpine fir and are often located at higher elevations. Moose feed extensively on subalpine fir in the winter months and elk and deer use these forests at other times during the year. Other mammals can be found here, including long-tailed weasels, pine martens, mountain lions, and the rare wolverine. Williamson’s sapsuckers, hairy woodpeckers, Steller’s and gray jays, olive-sided flycatchers, and mountain chickadees are among the birds occupying this forest type.

SAGEBRUSH COMMUNITIES

The sagebrush community is the most visible community in Grand Teton, covering most of the valley floor. Rocky, well-drained soils make it difficult for most plants to survive, but hardy big sage, low sage, antelope bitterbrush, and more than 20 species of grasses thrive here. Though it appears barren and sparse, this is a surprisingly diverse community.

Sage grouse use sage for food, shelter, and nesting sites. Arrowleaf balsamroot and spring beauty add spring color to the silvery green of the flats. Small mammals such as Uinta ground squirrels, deer mice and least chipmunks make their homes here. Badgers can sometimes be seen digging burrows while coyotes and wolves may lope across the cobbly plains. Pronghorn are summer residents on the sagebrush flats; they must migrate south to avoid deep winter snows. Large herds of elk feed on the grasses during the morning and evening hours of spring, summer, and fall. Areas where bitterbrush is abundant are good foraging places for moose, especially in fall and winter. Birders can find western meadowlarks, sage thrashers, green-tailed towhees, vesper and Brewer’s sparrows, and raptors of many kinds among the sage.

WET MEADOW COMMUNITIES

Wet meadows and willow flats are covered by water for at least part of the year. A high water table and good soil make an abundance of grasses, sedges, and forbs possible. Small mammals and birds that rely on this type of vegetation are common here. Willows also provide critical habitat for moose, which feed heavily on them, especially in late winter.

Whatever the community, it is important to remember that the wildlife, plants, and habitats within Grand Teton National Park are protected. While birding or watching animals, please keep a respectful distance. Please do not pick or disturb the vegetation. In order to continue to enjoy this national park, we must all work to preserve it.
A FEED BEAR IS A DEAD BEAR
Bears become aggressive after even one encounter with human food. Unfortunately, people often feed bears without realizing it. Bears often get food from backpacks and coolers that are left unattended in campgrounds or along trails. Remember, bears can be anywhere in the park at any time, even if you can’t see them. Help keep park bears wild and safe. Keep your food items safe from bears by locking them in your car or a bear box. Failure to follow regulations is a violation of federal law and may result in citations and fines.

KEEP A CLEAN CAMP
After eating and before leaving camp or sleeping, assure that you have a clean, bear-proof campsite:

I All food, containers, and utensils must be stored in a bear box or hidden in a closed, locked vehicle with windows rolled up. The only exceptions are during the transport, preparation, and eating of food.

I Trash and garbage must be stored in the same manner as food, or placed in bear-resistant trash cans or dumpsters.

I Treat odorous products such as soap, deodorant, toothpaste, suntan lotion, and perfumes in the same manner as food.

I For your safety, absolutely no food, foodstuffs, garbage, or odorous products may be stored in tents or sleeping bags.

I Ice chests, thermoses, water containers, barbecue grills, stoves, dishes, and pans must be stored in the same way as food – hidden inside a locked auto or bear box.

BEAR ETIQUETTE
I If you encounter a bear, do not run. If the bear is unaware of you, detour quickly and quietly. If the bear is aware but has not acted aggressively, back slowly away while talking in an even tone.

I Never approach a bear for any reason.

I Never allow a bear to get human food. If approached while eating, put food away and retreat to a safe distance (100 yards/91 meters).

I Never abandon food because of an approaching bear. Always take it with you.

I Never throw your pack or food at a bear in an attempt to distract it.

I Never bury food scraps, containers, or fish entrails. Put them in garbage cans.

I Never leave food, containers, or garbage unattended in camp. Bears are active day and night.

Help us keep our bears wild and healthy. Don’t leave backpacks, coolers, or bags containing food unattended for ANY amount of time. Take them with you or put them in a car or bear box. Even food that is left out accidentally can mean removal or death for a bear. Report all bear sightings and incidents to a visitor center or ranger station.

This is Bear Country

HELP SAVE OUR BEARS!

CASCADe CANYON TRAIL
Follow part or all of the Cascade Canyon Trail. From the east shore boat dock to Inspiration Point the distance is 5.8 miles roundtrip (2.2 miles via shuttle boat).

CUNNINGHAM CABIN TRAIL
Cunningham Cabin is located 6 miles south of Moran. Take a 1/4-mile walk to learn about the early ranching history of Jackson Hole.

FLAAG RANCH AREA
The Polecat Creek Loop Trail (2.3 miles) and nearby Flagg Canyon Trail (5.0 miles roundtrip) offer scenic hiking opportunities. Leaflets available at visitor centers.

MENOR’S FERRY TRAIL
A 1/2-mile loop begins at the Chapel of the Transfiguration parking lot in Moose, and passes Bill Menor’s cabin and ferry, and an exhibit of historic photographs at the Maud Noble cabin.

TAGGART LAKE TRAIL
The 3.2-mile Taggart Lake Trail traverses a major portion of the 1,028-acre Beaver Creek fire of 1985. The trail begins at the Taggart Lake parking area, 3 miles northwest of Moose.

ACCESS TRAIL AT STRING LAKE
A paved trail follows the shore of String Lake for 1/4-mile. Wayside exhibits explain the formation of glacial lakes.

COLTER BAY AREA
A variety of trails lead from the vicinity of the Colter Bay Visitor Center, including the Lakeshore Trail, paved for 1/2-mile.

FIRE WAYSIDES
Interpretive signs at Cottonwood Creek picnic area, String Lake, and Jackson Lake overlook explain various aspects of fire ecology and local fire history.

SCENIC TURNOUTS
Consult interpretive signs at scenic turnout to learn about the natural history and geology of the Teton Range and Jackson Hole.

Sample the cultural history, natural history, and mystery of Jackson Hole. Obtain free trail guides at visitor centers and trailheads. Expanded versions of the trail guides for Cascade Canyon, Taggart Lake and the Colter Bay area are also sold at park visitor centers.

Self-Guiding Trails around the Park

Visiting the Park

Help us keep our bears wild and healthy. Don’t leave backpacks, coolers, or bags containing food unattended for ANY amount of time. Take them with you or put them in a car or bear box. Even food that is left out accidentally can mean removal or death for a bear. Report all bear sightings and incidents to a visitor center or ranger station.

### Walks & Hikes

#### Moose/Jenny Lake Area

**Inspiration Point Hike**
- Learn about the creation of this magnificent landscape on a hike to Hidden Falls and a viewpoint above Jenny Lake. We will take the boat across Jenny Lake. This activity is first-come, first-served and is limited to 25. Please obtain a token for each member of your group at the Jenny Lake Visitor Center prior to meeting the ranger. Boat fare (Roundtrip/One-way): adult $7.50/$5, child (5-12) $3.50/$4, and under free. **DISTANCE:** 2 miles. **DIFFICULTY:** Moderate uphill. **TIME:** 2½ hours.
- Jenny Lake Visitor Center Flagpole June 6-Sept 5 8:30 a.m. **EVENT**

**A Walk Into The Past**
- Discover the story of Menor’s Ferry Historic District and find out how early settlers crossed the Snake River on a cable ferry. Wheelchair accessible trail. **DIFFICULTY:** Easy. **TIME:** 45 minutes.
- Menor’s Ferry Dock June 6-Sept 5 11 a.m. 2 p.m. **EVENT**

**Wildflower Walk**
- Learn about the flowers that add color to the valley. **DISTANCE:** 2 miles. **DIFFICULTY:** Easy. **TIME:** 2 hours.
- Taggart Lake Trailhead June 6-July 31 9:30 a.m. **EVENT**

**Young Naturalists**
- Children 8-12 years old are invited to explore the natural world of Grand Teton with a ranger. Make reservations at the Moose, Jenny Lake, or Colter Bay visitor centers. Wear old clothes and bring water, rain gear, insect repellent, and curiosity. Parents, please pick up your children promptly at 3 p.m. at the same location. Group size 12. **DISTANCE:** 2 miles. **DIFFICULTY:** Easy, level. **TIME:** 1½ hours.
- Jenny Lake Visitor Center Flagpole June 12-Aug 20 1:30 p.m. **EVENT**

**Naturalist’s Choice**
- Activity will vary depending on the naturalist. Reservations may be required. Please check with the Moose Visitor Center for specifics.
- Moose Visitor Center June 6-Sept 5 Dates/times vary. **EVENT**

#### Colter Bay Area

**Swan Lake Hike**
- Unravel mysteries and sharpen your senses as you hike with a ranger through forest, meadows and along ponds east of Colter Bay. Bring water, binoculars, camera, rain gear and insect repellent. **DISTANCE:** 3 miles. **TIME:** 3 hours.
- Colter Bay Visitor Center Flagpole June 6-Sept 5 8:00 a.m. **EVENT**

**Young Naturalists**
- See Young Naturalists description above.
- Colter Bay Visitor Center June 13-Aug 19 1:30 p.m. **EVENT**

**Lakeshore Stroll**
- Join the ranger for a leisurely one-hour stroll to enjoy panoramic views of the Teton Range and learn about the creation of the landscape.
- Colter Bay Visitor Center Flagpole June 6-Sept 5 1:30 p.m. **EVENT**

**Naturalist’s Choice**
- Activity will vary depending on the naturalist. Reservations may be required. Please check with the Colter Bay Visitor Center for specifics.
- Colter Bay Visitor Center June 6-Sept 5 Dates/times vary. **EVENT**

<td>Moose/Jenny Lake Area</td>
<td>Inspiration</td>
<td>Learn about the creation of this magnificent landscape on a hike to Hidden Falls and a viewpoint above Jenny Lake. We will take the boat across Jenny Lake. This activity is first-come, first-served and is limited to 25. Please obtain a token for each member of your group at the Jenny Lake Visitor Center prior to meeting the ranger. Boat fare (Roundtrip/One-way): adult $7.50/$5, child (5-12) $3.50/$4, and under free. <strong>DISTANCE:</strong> 2 miles. <strong>DIFFICULTY:</strong> Moderate uphill. <strong>TIME:</strong> 2½ hours.</td>

### Indian Arts Museum

Located in the Colter Bay Visitor Center, the Indian Arts Museum houses the David T. Vernon Collection, a spectacular assemblage of Native American artifacts. Native American art has spiritual significance in addition to beauty and function. The artifacts in the museum are vivid examples of the diverse art forms of Native Americans. From June to September, interpretive activities such as craft demonstrations by tribal members and ranger-led museum tours enhance appreciation of Native American culture.

### Menor’s Ferry Historic District

Located just north of the Moose Visitor Center. Includes a self-guiding path and the historic Menor Store, which is open daily 9:00 a.m. to 4:30 p.m. from May 23 through September 26. Inquire at the Moose Visitor Center.

### Artists in the Environment

Jackson Hole attracts artists from all over the world. This summer you can observe professional artists demonstrating their techniques and capturing the essence of Grand Teton National Park. Check at visitor centers for demonstration times and locations. Sponsored by Grand Teton Natural History Association. Program dates: June 11, July 9, August 13, September 10.

### Writers in the Environment

Local writers will share their talents by offering writing exercises for park visitors in various areas of the park. All workshop leaders are inspiring writers and teachers who draw on the natural and cultural values of the park in their published works. Check at visitor centers for times and locations. Sponsored by Grand Teton Natural History Association. Program dates: June 11, July 9, August 13, September 10.
Wildflowers

During late spring and summer, colorful wildflowers provide breathtaking displays throughout the park. Blooming follows snowmelt, so the show moves upslope as the season progresses.

June brings flowers to the southern half of Jackson Hole. Clumps of arrowleaf balsamroot, a yellow, daisy-like flower with arrow-shaped leaves - add vivid splashes of color to the sagebrush flats. Spikes of blue-purple lupines, a member of the pea family, flower along streams.

During July, the meadows along Highway 89/394/287 north of Colter Bay, and those near Two Ocean Lake, reach peak flowering. Look for yellow mountain sunflowers, pink mountain hollyhock, purple lupines, pink sticky geraniums, and purple upland larkspur.

As snow melts in the canyons between the Teton peaks, hikers are treated to meadows with an exquisite mix of colors: yellow columbine, bluebells, red paintbrush, pink daisies, and lavender asters. Along canyon streams, the vegetation is lush and includes deep purple monkshood and tall cow parsley, with its immense, flat-topped white flower clusters. Canyons with especially magnificent wildflower displays include upper Olen, Cascade, and aptly named Paintbrush.

In high alpine areas above tree line, the flowers are diminutive, but worth stooping for. Alpine flowers grow in ground-hugging cushions to avoid wind and to cope with cold temperatures and the short growing season. Look for pink moss campan and blue alpine forget-me-not, the official flower of Grand Teton National Park. Alpine plants are well adapted to their environment, but they are extremely vulnerable to human disturbance. Be sure to stay on established trails.

Recently burned areas offer spectacular displays of wildflowers due to increased access to sunlight and the fertilizing effect of nitrogen-rich ash. At the Taggart Lake area, three miles north of Moose, a fire burned in 1985 and today wildflowers bloom amid stands of aspen saplings and numerous young lodgepole pines. Look for magenta fireweed, yellow heartleaf arnica, and flowering shrubs, especially pink spreading dogbane and snowbrush ceanothus, with its sweet-scented blossoms.

Sections of the Rockefeller Parkway burned in 1988 when a number of fires ignited throughout the Greater Yellowstone Ecosystem. Today look for fireweed, purple asters, yellow groundsel, and sticky geranium in a lush carpet of green grasses.

To help you enjoy the flowering plants of Grand Teton National Park, you may attend ranger-led hikes starting in June, or consult field guides and other books on display at visitor centers. Please leave wildflowers for others to appreciate. Do not pick any vegetation in the park and parkway.
Along with protecting significant natural and cultural features and providing for their enjoyment, Congress recognized the value of national parks as some of the world's most important outdoor laboratories. Grand Teton National Park is no exception in providing an unparalleled research setting. As part of the Greater Yellowstone Ecosystem, Grand Teton is an integral component of the world's largest intact temperate ecosystem. Below are just a few of the park's dozens of ongoing research projects that are conducted by park staff, universities, and private research institutions. The results of these studies and many others like them furnish park managers with critical information needed for long-term conservation planning.

**Population Structure, Habitat Use, and Distribution of Grizzly Bears**

Ten years ago, grizzly bears, a threatened species, were rarely seen in Grand Teton. Today, however, they are common, especially in the northern half of the park. As part of an ecosystem effort, this project aims to determine the health of the grizzly population, their distribution in the park, and which habitats are most important. Information from this study will help managers protect important habitats and plan for visitor use patterns that minimize disturbance to grizzlies.

**Brucellosis in Bison**

Since at least 1915, some bison and elk in the Yellowstone ecosystem have had brucellosis, a disease brought to the U.S. by cattle imported from Europe. While the disease is relatively unimportant in wildlife, it can devastate domestic cattle herds. Because a small potential exists for bison or elk to transmit the disease to uninfected cattle, researchers are interested in several aspects of how the disease exists and is transmitted among wild bison. The results of this project will help managers avoid conflicts with cattle that graze on public lands.

**Wolves Are Here!**

Wolves were restored to Yellowstone National Park in 1995 after being eliminated in the early 1900s. The reintroduction of wolves is part of the larger goal of the recovery and conservation of endangered species in the U.S. The Yellowstone-Grand Teton population now consists of over 200 wolves. In the winter of 1998-99 three groups of wolves frequented Grand Teton National Park. Two of these groups stayed in the area and produced pups - the first wolves to die in Jackson Hole in 50 years!

**Wolverine Ecology**

This elusive predator is believed to occur in low densities in the park. Researchers will attempt to determine the status and distribution of the wolverine in this part of the Yellowstone ecosystem, and how it responds to visitor use patterns. Park managers will use information obtained by this study to develop plans and take necessary steps for long-term wolverine conservation.

**Using Global Positioning Systems to Track Bear Movements**

Grand Teton National Park biologists are using global positioning system (GPS) technology to track the movements of bears. The study, which has been made possible by financial assistance from the National Park Foundation, will provide park managers with a better understanding of how human activities affect bears, and provide them with the tools necessary to assure long-term conservation of their populations.

The red dots on the map show locations of an adult female black bear fitted with a GPS radio collar from August 2000 to June 2001. This bear lived in the Jenny Lake area and became a nuisance bear after learning to seek human foods that were stored improperly. After her first small human food reward, she quickly became more aggressive in her raids, ripping into tents that contained food, breaking into coolers left in canoes, and stealing unattended daypacks. During the summer of 2000, she taught her two cubs these same behaviors.

In an effort to break this pattern, the entire family was trapped and moved to a remote area of the park in August of that year. Unfortunately, the bears quickly returned to their home range near Jenny Lake, and resumed their unnatural way of life. Disturbingly, it was the continued availability of unsecured human foods, in spite of an escalated ranger patrol and education program, that made this possible. By the end of the summer of 2002, all three bears were dead. One cub died of natural causes soon after emerging from the family’s den - possibly because of poor nutrition the previous year. The other cub and its mother were both destroyed after their aggressive actions became a threat to human safety.

Monitoring this bear family reaffirmed that moving problem bears seldom resolves a bad situation, and highlighted the need for visitors to keep food secure at all times. It also provided insights into habitat characteristics that are important for bears. Using this and similar information from other bears, park managers will employ measures to minimize bear-human conflicts and help assure bear populations remain wild and healthy.

**Path of the Pronghorn**

Migration is considered by many to be one of the most interesting ecological adaptations in the animal kingdom. The pronghorn that summer in Jackson Hole have the second largest terrestrial mammal migration remaining in the Western Hemisphere.

Researchers at Grand Teton National Park, in collaboration with the Wildlife Conservation Society, have recently completed a study to investigate the movements of pronghorn and the exact route they traveled. In October 2003, radio collars were deployed on ten adult female pronghorn. The radio collars were programmed to fall off after one year. A total of 11,480 positions were collected and a fascinating migration story unfolded. The data illustrated the use of an ancient, invariant and narrow corridor through the upper Green and Gros Ventre River drainages.

As human development expands, the migrations of many animals will continue to be threatened. Researchers hope that data collected from this project will lead to the protection of the "path of the pronghorn."
# Talks & Evening Programs

See page A for visitor center information and a list of walks and talks offered throughout the park. Additional ranger activities will be offered during the summer. Check at a visitor center for special hikes and programs not listed here.

</table>
For Your Safety

PLANTS & ANIMALS
All plants and animals are part of the natural processes and are protected within the park and parkway. Leave plants and animals in their natural setting for others to enjoy. Even picking wildflowers is prohibited. Keep a respectful distance from all animals to avoid disturbing their natural routines. Larger animals are quick, powerful, and unpredictable. Getting too close can result in serious injury. Take special care to avoid encounters with bears and to help maintain their natural fear of humans. Many small animals can carry diseases and should never be touched or handled. Allow them to find their own food. Throwing food to bears threatens their health and survival. No matter how convincingly the animals beg, feeding is prohibited.

HIKING
Hikers are reminded to stay on trails; shortcuts are prohibited because it damages fragile vegetation and causes erosion. Visitor centers and the Jenny Lake Ranger Station sell topographic maps and inexpensive trail guides. Sturdy footwear is essential. Know your limitations when traveling in the backcountry. If you are traveling alone, letting a friend or relative know your planned destination, route, and expected time of return will greatly increase your chance of survival in an emergency. Permits are not required for day hiking. Trailhead parking areas fill early during the day in July and August, so start your hike early to avoid parking problems. In spring, meadows are snow-covered and you may need an ice axe.

FISHING
Whitefish and cutthroat, lake, and brown trout inhabit lakes and rivers of the park and parkway. Obtain fishing regulations at the Moose, Jenny Lake, or Colter Bay visitor centers. A Wyoming fishing license is required for fishing in the park and parkway and may be purchased at Signal Mountain Lodge, Colter Bay Marina, Colter Bay Village Store, and Flagg Ranch Lodge. Fishing in Yellowstone National Park requires a separate permit (fee charged); purchase permits at Yellowstone visitor centers and ranger stations. The use of non-native baitfish is prohibited in all parks.

JACKSON LAKE
Continued drought conditions are causing low water levels in Jackson Lake. Contact visitor centers for information on the availability of services at Leeks’s Marina and Colter Bay Marina. Low water levels will increase the risk of boats striking submerged objects and landforms that are normally well beneath the surface. Use caution when boating.

BOATING
Motorboats are permitted on Jenny (no horsepower maximum), Jackson, and Phelps lakes. Human-powered vessels are permitted on Jackson, Jenny, Phelps, Emma Matilda, Teo Ocean, Taggart, Bradley, Bearpaw, Leigh, and String lakes. Sailboats, water skiing, and windsurfers are allowed only on Jackson Lake. For motorized craft, the fee is $10 for a 7-day permit and $20 for an annual permit; for non-motorized craft, the fee is $5 for a 7-day permit and $10 for an annual permit. Jet skis are prohibited on all waters within the park. Permits may be purchased at the Moose or Colter Bay visitor centers.

FLOATING THE SNAKE RIVER
Only human-powered rafts, canoes, and kayaks are allowed on the Snake River within the park and parkway. Registration ($5 for a 7-day permit; $10 for an annual permit) of non-motorized vessels is required and may be completed at the Moose Visitor Center or Colter Bay Visitor Center. Launch the site bulletin boards for current river conditions. On the surface, the Snake does not seem very powerful, but only experienced floaters should attempt this swift, cold river that has many braided channels and deep jams.

BACKPACKING
Grand Teton National Park has more than 390 miles of trails of varying difficulty. Obtain the required, free backcountry permit for overnight trips at the Moose or Colter Bay visitor centers or the Jenny Lake Ranger Station. One-third of backcountry campsites in high use areas may be reserved in advance from January 1 - May by writing the park; there is a fee of $5 per reservation. Pets are not allowed on park trails or in the backcountry.

CAMPFIRES
Campfires are allowed without a permit at designated campgrounds and picnic areas within designated or fenced fire rings, unless fire restrictions are in effect. A permit may be obtained for campfires below the high water line of Jackson Lake at the Colter Bay Visitor Center. Campfires are prohibited in all other areas of the park and parkway.

SWIMMING
Swimming is permitted in all lakes. There is a designated swimming beach at Colter Bay with picnic tables, showers, and life guards. The Snake River is a swift and cold river presenting numerous dangers; swimming is not recommended.

HOT SPRINGS
Thermal water can harbor organisms that cause a fatal meningoencephalitis infection and Legionnaires’ disease. Exposing your body to thermal water by immersion, splashing, touching your face, or inhaling steam increases your risk of infection. Obtain more information at any ranger station or visitor center.

PETS
Pets must be restrained on a leash at all times. Pets are not allowed on park trails or in the backcountry (which begins 50 feet from roadways), in boats on the Snake River, in boats on lakes other than Jackson Lake, or in visitor centers. Pets are not allowed on ranger-led activities. Kennels are available in Jackson.

CLIMBING
There are many risks and hazards associated with climbing and mountain travel. Experience and good judgment are essential. The Jenny Lake Ranger Station, the center for climbing in Grand Teton National Park, is staffed from late May to mid-September by climbing rangers who can provide up-to-date weather and route conditions. Registration is not required for day climbs and cross-country hiking. Backcountry permits are required for all overnight climbs. The park DOES NOT check to see that you get safely out of the backcountry. Leave a plan with family and friends before going on a climb. Backcountry climbing and travel is not advised.

BIKING
Bicycles are permitted on public paved and unpaved roadways with automobiles and on the Colter Bay Marina breakwater. Ride on the right side of the road in single file and wear a helmet at all times. Riding bicycles or other wheeled vehicles in the backcountry, on- or off-trail, is prohibited.

Make the Most of Your Park Visit

Short on time? Wondering how to make the most of your time in Grand Teton National Park? Take a look at a few of the suggestions below to help plan your visit. Use the map on page 12. The distance from the southern entrance of Yellowstone National Park to the south boundary of Grand Teton National Park is 56 miles; approximate driving time with stops is 1 ½ hours. Please follow posted speed limits, watch for wildlife on roads, and be prepared for occasional delays due to road construction.

Menor’s Ferry/Chapel of the Transfiguration
Turn off the Park Road 1 ½ miles south of Moose on Highway 26/89/191, turn east. Follow the road to the small town of Kelly. To see the Gros Ventre Slide, turn at the sign marked “Gros Ventre Road.” The Gros Ventre Slide occurred in 1875 when earthquakes and rain caused the north end of Sheep Mountain to slide and dam the Gros Ventre River, forming Lower Slide Lake. Follow the Antelope Flats Road along the abandoned hayfields and ranches to rejoice Highway 26/89/191.

Signal Mountain Summit Road
This 5-mile drive starts one mile south of Signal Mountain Lodge and Campground. The road winds to the top of Signal Mountain, 800 feet above the valley. Summit overlooks provide a panoramic view of the entire Teton Range, Jackson Lake, and most of Jackson Hole. The road is narrow and parking at overlooks is limited. Trailers or large motor homes are not permitted.

Jackson Lake Dam Overlook
Jackson Lake Dam, one mile west of Jackson Lake Junction on the Teton Park Road, raises the level of Jackson Lake a maximum of 39 feet. In addition to being a magnificent sight, Jackson Lake is also a natural lake formed by an immense glacier that once flowed from the Yellowstone plateau. Park on the southwest side of the dam and take a short walk for a peaceable view of Jackson Lake and Mt. Moran.

Oxbow Bend
Located one mile east of Jackson Lake Junction, this cut-off meander of the Snake River attracts a wide variety of wildlife. Mt. Moran, the most distinctive peak in the Teton Range, dominates the background.

Willow Flats
Stop at the Willow Flats turnout, six miles south of Colter Bay for a view of an extensive wetlands that provides excellent habitat for birds, beavers, and moose. Jackson Lake and the Teton Range form the backdrop.

Colter Bay Visitor Center/ Indian Arts Museum
Visit the museum to view art created by native people and get a glimpse of nineteenth-century Native American life. Native American and wildlife videotapes are shown throughout the day.

Ranger-Led Activities
During summer, join a ranger for a visitor center talk, museum tour, stroll, hike, or evening program. Attend these activities to learn more about the natural and human history of the park and parkway.

Take a Hike
Over 250 miles of hiking trails in the park and parkway range from easy and scenic trails on the valley floor to steep, arduous trails into the mountains. At visitor centers, ask a ranger for recommended hikes and look at, or purchase, maps and trail guides.

Raft Trips on the Snake River
Park and parkway concessioners operate trips on the Snake River in cooperation with rafting rangers who can provide up-to-date weather and route conditions. Registration is not required for day trips and cross-country hiking. Backcountry permits are required for all overnight trips. The park DOES NOT check to see that you get safely out of the backcountry.

Ride a Bike
The Jenny Lake Scenic Drive has wide shoulders and superb views of the Tetons. The Antelope Flats Loop is another great riding opportunity on secondary roads. Wear helmets and use caution. Ride bikes only where cars can legally go. Bicycles are not allowed on trails in the backcountry.

Horseback Riding
Park concessioners offer horseback rides at Colter Bay, Jackson Lake Lodge, and Flagg Ranch.
Camping in the Park

There are two trailer villages and five campgrounds in Grand Teton National Park and John D. Rockefeller, Jr. Memorial Parkway. All are operated by park concessioners. There are eight campsites on Grassy Lake Road that have no potable water and are free of charge.

**CAMPGROUNDS**
The campground fee is $15 per night per site and $7.50 for Golden Age/Golden Access cardholders. Jenny Lake and Colter Bay have hiker/biker sites available for $5 per night. Jenny Lake Campground is open only for tent camping. All campgrounds have modern comfort stations, but do not have utility hookups.

The maximum length of stay is seven days per person at Jenny Lake and 14 days at all other campgrounds – no more than 30 days in the park per year. These campgrounds operate on a first-come, first-served basis and advance reservations are not accepted. Campgrounds often fill during July and August. Approximate filling times are listed. For status of campgrounds, contact entrance stations or visitor centers.

Additional camping facilities are available in nearby national forests and other areas outside the park. Camping is not permitted along roadsides, in overlooks, or in parking areas. Doubling up in campsites is not permitted, and there are no overflow facilities.

**GROUP VILLAGES**
Reservations are available for group camping at Colter Bay and Gros Ventre campgrounds. The sites range in capacity from 10 to 100 people. The nightly use fee is $3 per person plus a $15 nonrefundable reservation fee. Organized groups such as youth, religious, and educational groups may use the group campsites. Advance reservations are required and may be made through the Grand Teton Lodge Company at (800) 628-9988 or (307) 543-3100.

**TRAILER VILLAGES**
Colter Bay and Flagg Ranch trailer villages have full hook-ups, showers, and laundry. Colter Bay has 112 sites. Flagg Ranch has 100 trailer and 75 tent sites. Advance reservations are advisable. See page 2 for details.

Check at park visitor centers for information concerning additional trailer parks or campgrounds located outside the park.

**RECYCLING CENTERS**
All campgrounds in Grand Teton National Park and John D. Rockefeller, Jr. Memorial Parkway are managed by authorized concessioners. Grand Teton Lodge Company operates the campgrounds at Colter Bay, Jenny Lake and Gros Ventre, while Signal Mountain Lodge operates Lizard Creek and Signal Mountain campgrounds.

These concessioners fund campground improvements as a part of their contracts. Improvements for 2005 include the placement of recycling containers in park campgrounds. Collectively, these two concessioners recycle more than 170 tons of material annually. When you stay in any park campground, please use the recycling containers to help keep Grand Teton clean and pleasant for other campers.

Water Warning

Cool, crystal clear stream water looks tempting to drink. As more and more people camp and hike in the backcountry, the incidence of intestinal infection from drinking untreated water has increased throughout the West. Giardia, campylobacter, and other harmful bacteria may be transmitted through untreated water. Drinking untreated water can make you ill. Carry sufficient water from approved sources, such as water spigots and drinking fountains in the park and parkway, when hiking or enjoying any outdoor activity. If you must use water from lakes or streams, boil water 3-5 minutes to kill harmful microorganisms or filter with an approved device.

Backcountry Comfort

Pit toilets are provided at many trailheads, but there are no toilets in the backcountry. Be sure to urinate at least 200 feet from streams and lakes. To prevent contamination of waterways, bury feces in a hole 6-8 inches deep at least 200 feet from streams and lakes. Pack out used toilet paper, tampons, sanitary napkins, and diapers in sealed plastic bags. Do not bury or burn them.
Entrance Fees 2005

All Americans support national parks through tax dollars. Congress allocates some of those tax dollars to each park area. However, costs for achieving National Park Service goals in Grand Teton and other national parks have greatly increased in recent years. Operational funding has not kept pace with escalating needs. Unfortunately, funding available through the appropriation process is sufficient only to conduct the yearly operation of the park. Money is not available for major maintenance projects involving roads, trails, facilities, and infrastructure. In 1997, Congress authorized the Recreational Fee Demonstration Program, which allowed selected national parks – including Grand Teton and Yellowstone national parks – and other federal sites to increase entrance and other fees. The parks were authorized to keep 80 percent of the fees collected in the park to address the backlog of projects. In 2005, money generated through the program in Grand Teton National Park will be used for:

- On-going trail rehabilitation projects.
- Rehabilitation and improvements to wastewater treatment facilities in Colter Bay, Beaver Creek, and Flagg Ranch.
- Resurfacing roads in the north district of the park, including roads between Colter Bay and the south entrance of Yellowstone, and the Pacific Creek Road.
- Replacement panels for interpretive exhibits.

Thank you for supporting the protection of America's national parks.

Fee Schedule for Grand Teton National Park

<table>
<thead>
<tr>
<th>Fee Schedule for Grand Teton National Park</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Entrance Fee</strong></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>$20 per vehicle + $10 per person (single hiker or bicyclist) + $15 per motorcycle</td>
</tr>
<tr>
<td>Allows entrance to Grand Teton and Yellowstone national parks for 7 days.</td>
</tr>
</tbody>
</table>

- **Golden Eagle Passport** $65
  - Allows entrance to most national park areas and some other federal fees for 12 months from purchase; non-transferable.

- **National Parks Pass** $50
  - Allows entrance to most national park areas for 12 months from purchase; non-transferable.

- **Parks Specific Pass** $40
  - Allows entrance to Grand Teton and Yellowstone national parks for 12 months from purchase; non-transferable.

- **Golden Age Passport** $10 (one-time fee)
  - Allows lifetime entrance to all National Park System areas to American citizens 62 years old or older; non-transferable.

- **Golden Access Passport - Free**
  - Allows lifetime entrance to all National Park System areas to American citizens who can provide proof of permanent disability; non-transferable.

**Park Partners**

Grand Teton Natural History Association was established in 1937 as the park's primary partner to increase public understanding, appreciation, and enjoyment of Grand Teton National Park and the Greater Yellowstone area. Since that time, the Association has been a nonprofit organization dedicated exclusively to raising money for projects that protect, preserve, and enhance Grand Teton National Park.

The Association has grown to operate interpretive and educational bookstores in five outlets in Grand Teton National Park and the John D. Rockefeller, Jr. Memorial Parkway, and several outlets in Bridger-Teton National Forest, Caribou-Targhee National Forest, and National Elk Refuge information facilities. When you make a purchase at an Association bookstore, profits are returned to the park in the form of donations to support park programs. Your purchase also supports the publication of this newspaper, books, and the free educational handouts available at visitor centers and entrance stations.

Be sure to check out the on-line bookstore at www.grandtetonpark.org for all your trip-planning needs and complete the coupon below to become a member.

---

The Tetons Science Schools, founded in 1967, provide and encourage experiential education in natural sciences and ecology while fostering an appreciation for conservation ethics and practices. The secluded campus, operated in cooperation with Grand Teton National Park, is located on a historic dude ranch in the park. The Greater Yellowstone region serves as the school's outdoor classroom and model for year-round programs that offer academic, professional, and personal benefits to students of all ages.

Summer programs include two- to five-week residential field ecology and field natural history courses for high school and junior high students, and weeklong, nonresidential programs for third through eighth grades. A one-year, masters-level graduate program in environmental education and natural science is also available. This summer the Teton Science Schools are offering 37 field seminars for adults and seven seminars for families. Workshops and seminars for teachers and other professionals are also offered.

---

The Murie Center is a nonprofit organization located on the historic Murie Ranch, home of famed conservationist Marty Murie. The Murie Center’s mission is to develop new constituencies for wilderness, emphasizing the importance of human connections with nature. The center is funded entirely through the generosity of individuals and the commitment of foundations. Please call if you are interested in visiting the center or attending a seminar.

---

The AMK Research Station is a field operation of the University of Wyoming based at the historic AMK Ranch in Grand Teton National Park. The research station facilitates research in the diverse aquatic and terrestrial environments of Grand Teton and Yellowstone national parks and the Bridger-Teton and Caribou-Targhee national forests.

---

The Murie Center’s mission is to develop new constituencies for wilderness, emphasizing the importance of human connections with nature. The center is funded entirely through the generosity of individuals and the commitment of foundations. Please call if you are interested in visiting the center or attending a seminar.
Managing Fire in Grand Teton National Park

Today, federal fire management policy reflects both a commitment to public safety and an understanding that fire – a dynamic and natural process – is important to the health of the ecosystem. Grand Teton National Park’s comprehensive fire management program balances the preservation of natural and cultural resources with concerns for public health and safety by using the latest science, technology, and a highly trained workforce to evaluate conditions and consider management options. Through fire effects monitoring, vegetation mapping, and GIS data collection, fire managers have a range of modern tools to assist them in making decisions.

Some lightning-ignited fires, when they meet agency criteria, can be managed for resource benefits. These fires are carefully managed to ensure they stay within pre-determined geographic areas and weather and fire effects guidelines. This action, referred to as wildland fire use, is critical to fire-adapted plants that rely on natural fire cycles to resprout from roots or open cones for seed dispersal.

Fire can be applied to the landscape to promote natural conditions and reduce buildup of dead wood and brush. A prescribed fire targets specific objectives like restoring early successional vegetation, creating diverse habitats for plants and animals, while minimizing risks to developments and cultural resources.

Grand Teton National Park manages fire to protect human lives, personal property, and irreplaceable natural and cultural resources. Fire suppression is a key component of the fire management plan. Specific park areas are identified where fire suppression is critical to visitor and resource protection.

Park fire crews mechanically reduce vegetation in developed areas. Fuels around buildings are reduced by thinning trees and removing dead wood and brush from the forest floor. This debris, called slash, is piled and dried for at least a year, then burned during wet weather in spring or late fall. Piles of brush and logs waiting to be burned should be left undisturbed. These piles contain mostly green branches that do not make good firewood.

For more information about fire management in Grand Teton National Park, visit www.nps.gov/gttn/fire/fire.htm.

Take A Look Around

Fire has been an essential and natural part of the Grand Teton National Park ecosystem for thousands of years. The presence of fire within the park is one of the significant factors contributing to the diversity of flora and fauna and overall health of the park ecosystems. As we understand fire’s necessary role in the ecosystem, we must also accept occasional hazy skies and patches of blackened landscape. These short-term consequences bring with them healthy changes that sustain the area’s natural ecological balance.

Many opportunities exist in the park to view changes over time after a fire. The park staff invites you to view the different stages of revegetation and explore the diverse fire-adapted vegetation unique to this landscape. Though charred trees or shrubs may no longer be visible in areas that have burned, a noticeable change in the height, density, or type of vegetation can be a clue that fire was present.

Teton Science School
A prescribed fire was completed west of the Teton Science School in 2001. The fire has increased the amount of native grasses and forbs in the area and provides important habitat and forage for a number of species.

North Jenny Lake
The lightning-caused Alder Fire was managed for resource benefits for several weeks in September 1999 before strong winds caused it to grow rapidly, and the fire was suppressed. Four years later, the area is now rich in grasses, and many lodgepole pine seedlings are established in the open spaces.

Blacktail Butte
In 1998, Grand Teton National Park conducted a prescribed fire on the south end of Blacktail Butte in order to benefit vegetation and wildlife habitat.

North Jenny Lake
The lightning-caused Alder Fire was managed for resource benefits for several weeks in September 1999 before strong winds caused it to grow rapidly, and the fire was suppressed. Four years later, the area is now rich in grasses, and many lodgepole pine seedlings are established in the open spaces.

Blacktail Butte
In 1998, Grand Teton National Park conducted a prescribed fire on the south end of Blacktail Butte in order to benefit vegetation and wildlife habitat.

The change in height and density of the sagebrush can be noted from the highway. Elk, moose, and sage grouse are frequently seen feeding in the area. Further south of the prescribed fire site is the area that burned by a lightning-ignited fire in 2003. Here, grasses and forbs are returning to the area.

Antelope Flats
A lightning strike on the sagebrush flats near Mormon Row in 1994 has allowed grasses and wildflowers to again populate the area. Even ten years later, bison, pronghorn, and elk are still drawn to this part of the valley floor. Near the fire’s northeast end, a large area of aspen trees has vigorously resprouted.

Beaver Creek
Stimulated by a 1985 fire in mixed conifers, the area near Taggart Lake is now rich in young lodgepole pines, aspen trees, and snowbrush ceanothus. The Taggart Lake Trail winds through stands of young lodgepole pine.

Waterfalls Canyon
This fire, along the west shore of Jackson Lake, burned in 1974. Only a few burned trees remain standing. Thirty years later, many shrubs and trees are well established. In 2000, two separate wildland fires naturally burned into the 1974 fire area and fire behavior moderated, aiding control efforts.

Please do your part to prevent human-caused fires:

- Build campfires only in designated areas, monitor them, and make sure they are properly extinguished.
- Smoke safely. Grind out cigarettes, cigars, or pipe tobacco, then properly dispose of them. Ashtrays should be used while smokers are in a vehicle and should never be dumped on the ground.
- Do not use fireworks or other pyrotechnic devices. They are prohibited at all times within the park.
- Obey posted restrictions. Restrictions may change during dry summer conditions.

The story of fire can be confusing. While the public is asked to prevent wildfires, fire managers sometimes conduct prescribed fires and manage lightning-caused fires for resource benefits. Fire specialists carefully plan the size and timing of these fires, allowing for a natural restoration of the ecosystem while providing for public and firefighter safety.
Yellowstone National Park

All opening and closing dates and hours of operation are subject to change due to weather and other variables. Check at park entrance stations and visitor centers for updated information.

Yellowstone Roads

SPRING 2005 OPENING SCHEDULE

Spring weather is unpredictable; roads may be closed temporarily by snow or other weather conditions. Snow tires or chains may be required. Weather and snow conditions permitting, tentative road opening dates for automobiles are:

April 22: Mammoth to Old Faithful, Madison Junction to West Entrance
April 22: Norris Junction to Canyon
May 6: Canyon to Lake
Lake to East Entrance: May 13
Lake to South Entrance: May 6
Canyon to Lake: April 22
Norris Junction to Tower Fall: May 27
Beartooth Highway: Tower Fall to Chittenden Road

CONSTRUCTION

- Dunraven Pass and Chittenden Road south to Canyon are closed for construction until mid- to late August.

- Elevator Lake to the East Entrance will be closed 8 p.m. - 8 a.m. daily.

AUTUMN 2005 CLOSING SCHEDULE

The only park road that remains open to wheeled vehicles all winter is the road from Gardiner, MT at the North Park Entrance to Silver Gate and Cooke City near the Northeast Park Entrance. All other park roads close at 8 a.m. on November 7. All opening and closing dates and hours of operation listed are subject to change due to weather and other variables. Check at park entrance stations and visitor centers for updated information.

Visitor Services

All dates are subject to change at any time.

ACCOMMODATIONS

Old Faithful Inn (undergoing renovation) _______, 1903-Sept 11
Old Faithful Lodge (undergoing renovation) _______ May 6 - Oct 23
Old Faithful Lodge _______ May 6 - 2 Oct
Grant Village _______ May 27 - Oct 2
Lake Yellowstone Hotel _______ May 20 - Oct 10
Lake Lodge _______ May 20 - Oct 10
Lake Lodge _______ June 10 - Sept 25
Canyon Lodge _______ June 3 - Sept 18
Rosseau Lodge _______ June 10 - Sept 5
Mammoth Hot Springs Hotel _______ May 14 - Oct 11

RESTAURANTS, GENERAL STORES AND SERVICE STATIONS

The following locations have restaurants or cafeterias, general stores and service stations: Old Faithful, Canyon, Grant Village, Lake, Tower-Roosevelt, Mammoth Hot Springs, and Fishing Bridge.

PUBLIC SHOWERS

Showers are available to the public (fee charged) at Old Faithful Lodge, Grant Village Campground, Fishing Bridge RV Park, Campground and Mammoth Hot Springs Hotel during the summer season.

VISITOR CENTERS AND MUSEUMS

Information, publications, exhibits, movies/videos, and ranger programs are available. For details visit www.nps.gov/yell or www.travelyellowstone.com.

Camping in Yellowstone

Camping or overnight vehicle parking in pullouts, parking areas, picnic areas or any place other than a designated campground is prohibited; there are no overflow camping facilities. All camping is limited to 14 days between June 15 and September 15 and to 30 days during the rest of the year, except at Fishing Bridge RV Park (no limit). Check out time for all campgrounds is 10 a.m.

GROUP CAMPING

Group camping areas are available for large organized groups with a designated leader such as youth groups, etc. Fees range from $4-$8 per night depending on the size of the group. Advance reservations are required and can be made year-round by writing to Xanterra Parks & Resorts, P.O. Box 165, Yellowstone Park, Wyoming 82190 or by calling (307) 344-7391.

Yellowstone Today

An illustrated guide to all visitor services in Yellowstone National Park. Available year-round, 8 a.m.-8 p.m. daily. Winter services are limited.

Xanterra Parks & Resorts

Xanterra Parks & Resorts, P.O. Box 165, Yellowstone Park, Wyoming 82190 or by calling (307) 344-7391.
Road Information

Road Work Delays
Road improvements will take place in Grand Teton and Yellowstone national parks throughout the 2005 season. For the most up-to-date information about road conditions in Grand Teton National Park call (307) 739-3614 or visit www.nps.gov/grte. For information about Yellowstone roads call (307) 344-2117 or visit www.nps.gov/yell.

Move Over and Slow Down
A new state law requires motorists in Wyoming to move over and slow down when passing stopped emergency vehicles with flashing lights. The law aims to reduce the danger of these vehicles getting hit by passing vehicles. In the last five years, stopped Wyoming Highway Patrol cars were struck on 27 different occasions.

Under the law, motorists on Wyoming interstates must move over to the travel lane farthest away from a stopped emergency vehicle before they pass. On two-lane highways, passing motorists must slow to 20 mph below the speed limit. These actions are required unless a law enforcement officer otherwise directs motorists. Violations can result in fines of up to $200, jail terms of up to 20 days, or both.

Recycling
Recycling stations are located throughout the park. Check at park visitor centers for more information.
