This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16).

Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries. Use letter quality printers in 12 pitch. Use only 25% or greater cotton content bond paper.

4. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property does meet the National Register criteria. See continuation sheet.

[Signature of certifying official] 3/15/90

State or Federal agency or bureau

In my opinion, the property does meet the National Register criteria. See continuation sheet.

[Signature of commenting or other official] 2/28/80

State or Federal agency or bureau

5. National Park Service Certification

I, hereby, certify that this property is:

- entered in the National Register. See continuation sheet

Carol D. Smith 4-23-90

- determined eligible for the National Register. See continuation sheet

- determined not eligible for the National Register

- removed from the National Register

| other       | wooden, covered, deck porches on houses |

Describe present and historic physical appearance.

The Old Administrative complex is a historic district consisting of five houses with associated garages, an office building and three large office/warehouse buildings. The district is set on the eastern edge of forests that stretch west from there to the foot of the Tetons. On the other three sides the district is surrounded by relatively flat tablelands with a few trees that overlook the Snake River bottomlands. East of the district is Grand Teton Park Road that runs generally north to south through Grand Teton National Park.

The buildings are built in a style referred to as Rustic, defined by the National Park Service as being in harmony with the surrounding environment and at Grand Teton characterized by log construction with some other wood products, such as board and batten siding, used for additions. Trim is of rough cut "millwaste" type lumber and decoration is minimal. The buildings all are one or one and one-half stories and tend to be rectangular in shape. The designs of six (two sets of three) of the buildings are identical, except for the door placement and type on the three warehouses. The overall complex clearly evidences the attempt by the National Park Service to achieve the feeling of pre-industrial log structures built with a high degree of craftsmanship. Earthtones are the predominate colors with brown stained walls and green wood shingles. The buildings are organized around the central loop road with the housing area south and west of the loop and the warehouses north of it, with the administration building being the only contributing resource within the loop. The housing area is at a slightly higher elevation than the warehouses.

The district today appears much as it did during the period of significance, except that the buildings have been upgraded (mostly on the interior) for modern housing use causing the interior fabric and character to be changed, especially with the recent addition of wood stoves and other energy conservation related items. Those changes make the interiors insignificant. The exterior feeling, design, and character have not been lost. The contributing resources have not been altered on the exterior to any significant degree. The major changes have been the loss of one warehouse, evidenced by the concrete pad it once sat on remains in place and the attachment of one garage to one of the houses and small additions to the office building. It is not felt that those alterations have compromised either the character, design, workmanship, or feeling of the district. The quality that sets the district aside from its surroundings is the rustic architecture of the buildings in the district. There are ten contributing buildings, two non-contributing buildings, and two non-contributing sites within the district. The two non-contributing buildings are not rustic style and the two sites are the locations of removed buildings. Functionally all buildings but one house serve the same purposes today as they did historically.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

The Old Administrative Area Historic District is significant under Criteria C because it remains as a clear statement of the NPS Rustic style of the 1930s at Grand Teton National Park. Further, the houses, warehouses, and administrative building there are the only examples of those particular building plans in the Park. The Old Administrative Area Historic District is associated with the Rustic Architecture context of the Grand Teton National Park Multiple Property form.

The complex was built during the period 1934-1939 by the Public Works Administration and the Civilian Conservation Corps for the National Park Service using Service developed plans for natural parks. Keith Matson of the Service designed the overall site. The district served as the headquarters and heart of Grand Teton National Park until completion of the newer headquarters complex a few miles away at Moose, Wyoming, during the 1960s. The buildings within the district follow the practices typical of depression-era rustic architecture with much use of labor intensive building techniques. The log buildings, with their emphasis on hand craftsmanship, and harmony with their surroundings, including front porch (house) orientations to view the Grand Teton, make them nearly planbook examples of the style as outlined by National Park Service director Stephen Mather in 1918, eleven years before Congress established the Park. All contributing resources within the historic district fulfill the registration requirements set forth in the multiple property documentation in that they are in their original or historic location, are fifty years old, and are of primarily log material. They are rustic in character. They convey their design, materials, workmanship, and function/character individually and within the district. The alterations have not impaired the historic fabric of the district. The setting, with the addition of trailers and other barracks type buildings after World War II just north of the district has altered the surroundings and district exterior, but the feeling of the district during the period of significance has not been lost by these changes. Verbal Boundary Description

The boundary of the nominated property is delineated by the polygon whose vertices are marked by the following UTM reference points: A 12 521550 4836620, B 12 521020 4836810, C 12 521120 4837000, D 12 521300 4836880, E 12 521360 4836930, and F 12 521520 4836930. The district can be found on the Moose, Wyo., 7.5' U.S.G.S. quadrangle map.

— See continuation sheet

Boundary Justification

The boundary as described includes the district and its setting and encloses all contributing resources associated with the property type at the Old Administrative Area complex.

— See continuation sheet

name/title Steven F. Mehls, Principal Investigator
organization Western Historical Studies, Inc. date 03/20/88
street & number 1225 Atlantis Ave. telephone (303)-666-6208
city or town Lafayette state CO zip code 80026
List of Contributing Resources in the Old Administrative Area Historic District

The following buildings and structures (by number) are considered contributing to the historic district:

1, 2, 6, 7, 8, 10, 16, 17, 18, 21, 22, 23, 24, 26, 32

Note that more building numbers are listed here than on the nomination cover sheet because National Park Service property systems require each building to be numbered while for National Register counts buildings such as detached garages are not counted separately from the main house.

Negatives on file at Grand Teton National Park
In addition to the overall architectural significance of the district, one structure is also associated with the conservation context and considered significant for that association. The Old Administrative Building, built during the 1930s, served as the headquarters and main offices of the Park for nearly thirty years. During that time crucial changes took place that led to the expansion of Grand Teton National Park to its present size. During that period the headquarters of the park served as something of a command post for local forces interested in the expansion of the Park. Because of that it is felt that this building does meet the significance requirements for a conservation property.
