National Park Service 1994 Inventory of Historic Lighthouses
First order fresnel lens which served as the original optic at Block Island Southeast Light, Washington County, Rhode Island. Drawing courtesy of the Historic American Engineering Record/Patricio Del Real, delineator, 1988.
Acknowledgments

The lighthouse inventory has been a cooperative effort involving numerous individuals in Federal, State, and local agencies, as well as private organizations. Kevin Foster, the National Park Service’s maritime historian and chief of the National Maritime Initiative program provided overall supervision for the project. James Delgado and Lynn Cullivan, formerly with the Initiative, along with Foster initiated the inventory at the San Francisco Maritime Museum in early 1988.

Also within the National Park Service, John Byrne and Orden Lantz of the National Register Information System assisted in determining which light stations were included in the National Register of Historic Places. Georgette Wilson provided access to the files of the Historic American Buildings Survey/Historic American Engineering Record (HABS/HAER). The cover was designed by Todd Croteau of the Historic American Engineering Record.

At the U.S. Coast Guard, we wish to thank Dr. Robert Browning, U.S. Coast Guard Historian, who generously provided access to Historian’s Office files and photo collection. Other U.S. Coast Guard personnel providing information or assistance include LCMDR Robert Garrett; BMCM Michael J. Goulding, National Aids to Navigation School, Reserve Training Center Yorktown; Captain J.G. Milo and Lieutenant Carl Uchytil, Civil Engineering Unit Miami; Commander R.E. Cox, Civil Engineering Unit Providence; Captain C.C. Beck, Aids to Navigation Branch, First Coast Guard District; and Gary Nelson, Civil Engineering Unit, Ninth Coast Guard District.

At the U.S. Fish and Wildlife Service, Kevin Kilcullen provided contacts for the light stations owned by that agency. Wayne Wheeler and Tanya Rabbit at the U.S. Lighthouse Society in San Francisco graciously allowed us access to their files and library. David Cook shared his detailed files on lighthouses all over the country. Ross Holland provided many helpful formatting suggestions. Bruce Roberts shared many of his lighthouse photos.

At the various State Historic Preservation Offices (SHPOs), we wish to thank the following staff persons for their review and comments: Claire L. Ross, Historic Field Services Division, New York State Office of Parks, Recreation, and Historic Preservation; Kirk Mohney, Maine Historic Preservation Commission; Orlando V. Ridout, Office of Research, Survey & Registration, Maryland Historical Trust; Dave Poirier, Connecticut Historical Commission; Michael Steinitz, Massachusetts Historical Commission; David Hansen, Office of Archeology & Historic Preservation, Washington Department of Community Development; Bill Thurston, Division of Historical Resources, Florida Department of State; Kenneth H. Thomas, Office of Historic Preservation, Georgia Department of Natural Resources; Ann V. Swallow, Illinois Historic Preservation Agency; Jonathan Fricker, Division of Historic Preservation, Louisiana Office of Cultural Development; Thomas H. Hruby, Minnesota Historical Society; Richard J. Caithson, Historic Preservation Division, Mississippi Department of Archives & History; Terry Karschner, Historic Preservation Office, New Jersey Department of Environmental Protection & Energy; Claudia R. Brown, Survey & Planning Branch, North Carolina Department of Cultural Resources; Elizabeth Walton Potter, State Historic Preservation Office, Oregon Parks & Recreation Department; Elsa Gilbertson, Vermont Division for Historic Preservation; and Joe DeRose, Survey & Registration Section, State Historical Society of Wisconsin.

A special thanks to the many individuals directly connected with the light stations who provided information, photos, or reviewed our material. These individuals are included in the following list by state.

**Alabama:** Captain Hal Pierce, Middle Bay Lighthouse Centennial Commission. **California:** Stephen Haller, Golden Gate National Recreation Area (NRA); Mack Shaver, Channel Islands National Park (NP); Nadine Tugel, Crescent City Lighthouse; Richard Coleman, San Francisco Bay Refuge; Janice Kern, American Youth Hostel, Pigeon Point; John Sisto, Point Arena Lighthouse; Julia McIver, California Coastal Conservancy; Terry DiMattio, Cabrillo National Monument (NM); Stephen Bailey, Pacific Grove Museum of Natural History; John Dell'osso, Point Reyes National Seashore (NS); Beverly Ewoldsen & Fred Maurer, Point Sur State Historic Park; Marlene Greenway, Bureau of Land Management (BLM) Ukiah District Office; Carolyn Moffatt, Port San Luis Harbor District; Guy Towers, St. Georges Reef Lighthouse Preservation Society; LTJg. Walt Grudzinski, U.S. Coast Guard, 11th District.
Connecticut: Paul Casey, Stewart B. McKinney National Wildlife Refuge (NWR); Bernie Somers & Phil Valley, Lighthouse Park (New Haven); Joseph Siciliano, Parks & Recreation (Greenwich); Alice Dimock; Carmelina Como Kanzler, New London Ledge Lighthouse Foundation. Delaware: Paul Pepper, Friends of Fenwick Island Lighthouse. Florida: Jeff Winkle, Barrier Islands Geo Park; John Froebutt, Bill Baggs Cape Florida State Recreation Area; Carolyn Wiley and Scott Eckert, Dry Tortugas NP; Susan Clark, Loxahatchee Historical Museum; Susan Olsen, Key West Art & Historical Society; Ann Caneer, Ponce De Leon Inlet Lighthouse Preservation Association; Lou Hinds, J.N. "Ding" Darling NWR; Dempsey Corbett, Lighthouse Museum (St. Augustine); Joe White, St. Marks NWR. Georgia: Kent Cave, Fort Pulaski NM; Buddy Sullivan, McIntosh County; Pat Morris, Museum of Coastal History (St. Simons Island); Rebecca Hughes, Tybee Museum Association.

Hawaii: Everett Fox, Hawaii Maritime Center. Illinois: Donald Terras, Gross Point Light Station. Maine: Len Bobinchok, Acadia NP; John Spear, Town of Vinalhaven; Roger Moody, Town of Camden; Terry Cole, Fort Point State Park; Tom Bradbury, Kennebunkport Conservation Trust; David Caron, Grindle Point Lighthouse & Museum Commission; Benjamin Russell; Jeffrey Burke; Steven Kress & Susan Schueler, National Audubon Society; Edward Deci, Monhegan Museum; Mary Norton Orrick, Fisherman's Museum; Margaret Anderson, Petit Manan NWR; Maureen Stormont, Ram Island Preservation Society; Anne Webster, Friends of Seguin Island; William Bayreuther, Spring Point Museum. Maryland: Richard Dodds, Calvert Marine Museum; John Vailant, Chesapeake Bay Maritime Museum; Robin Melton, Point Lookout State Park; Rick Smith, Elk Neck State Park.

Massachusetts: Greg Stone, The Lighthouse Inn; Horace Kinney, Marion Conservation Trust; Nancy Salzman; Gordon Russell, Truro Historical Society; John Frayer, Salem Maritime National Historic Site (NHS); William Marks, Vineyard Environmental Research Institute; David Wadsworth, Cohasset Historical Commission; Ed Moses, Monomoy NWR; Lois Ennis, Town of Mattapoisett; Joseph Lebherz, Maritime Research Center; Frank Ackerman, Cape Cod NS; Tim Smith, Ipswich River Wildlife Sanctuary. Michigan: Gregg Bruff, Pictured Rocks National Lakeshore (NL); Richard Kelly, Charlevoix Public School District; Linda & Jeff Gamble; Susan Van Dyke, Big Sable Point Lighthouse Keepers Association; Thomas Friggens, Museums Section, Michigan Department of State; Clarence Monette, Keewewaen County Historical Society; Loren Graham; David McCormick, Grand Traverse Lighthouse; Liz Amberg, Isle Royale NP; Peter Lundborg, Silver Lake State Park; George Kilborn, Harbor Point Association; Martha Hamilton, Mackinac Island State Park Committee; Mary Shultz, Peninsula Township Park Board; Steve Romzek, Huron County Roads Commission; Dan McGee, Presque Isle Lighthouse Historical Society; Jim Stebbins; Thomas Pleffelfmann, Friends of Round Island Light; Lusher Barrett, Delta County Historical Society; Marilyn Fischer, Sulliver Historical Society; Charles Brockman, Save Our South Channel Lights Association; Dick Moehl, Great Lakes Lighthouse Keepers Association; Douglas Spencer, Shawsaskets NWR; Karen McDonnell, White River Light Station Museum; Thomas Famquist, Great Lakes Shipwreck Historical Society.

Minnesota: Lee Radzak, Minnesota Historical Society; Jeff McMorrow, Lake County Historical Society. Mississippi: Val Hulsey, Seafood Industry Museum. New Jersey: Robert Preston; Mark Canale, Barnegat Lighthouse State Park; Douglas Winturich, Mid-Atlantic Center for the Arts; Jim Gowdy, Maurice River Historical Society; Walt Ford, Supawna NWR; Lewis C. Maul; Thomas Lavery, Twin Lights State Historical Site; Louis Vento, Sandy Hook Unit, Gateway NRA; Nancy Machines, Sea Girt Lighthouse Citizens Committee. New York: Mary Brust; Faith Scott; Harold Lawson, Dunkirk Historical Lighthouse & Veterans Park Museum; Arlene Fitzpatrick, Save Esopus Lighthouse Commission; Gayle Haines & Steven Czarnecki, Fire Island Lighthouse Preservation Commission; Brian Leigh Dunnigan, Old Fort Niagara; Clifford Bensfield, Southold Historical Society; John Kelly, Save the Huntington Lighthouse, Inc.; CW04 Alvin Penny, USCG (Ret.); Dana Brancato, Montauk Point Lighthouse Museum; Barbara Swartz, Old Field Village; A. H. Mueller, Charlotte Genesee Lighthouse Historical Society; Lynn Beman, Hudson River Maritime Museum; Cliff Steen, Saugerties Lighthouse Conservancy; Jim Walker; Richard Palmer, Sodus Bay Historical Society; Thomas Harris, Golden Hill State Park; Helen Allan, Clinton County Historical Association.

North Carolina: Donna Ray, Old Baldy Foundation; Bebe Woody, Cape Hatteras NS; William Parker & Debbie Westner, Outer Banks Conservationists, Inc. Ohio: Gordon Amsbary, The Great Lakes Marine & U.S. Coast Guard Memorial Museum; John Laczko, Fairport Harbor Marine Museum; Albert Doane, Black River Historical Society; Earl Wiseman, Ottawa Historical Society. Oregon: Em2 K.J. Owens, U.S. Coast Guard ANT Coos Bay; Daryl Abiston, BLM, Tioga Resource Area; Linda Klekne, U.S. Army COE Portland District; Kit Cromwell, Bullards Beach State Park; Paul Keeper, Friends of Yaquina Bay Lighthouse, Inc.; Steven J. Gobat, Yaquina Head Outstanding Natural Area, BLM. Pennsylvania: Bruce Doherty, City of Erie Park Department. Rhode Island: Charlotte Head, Parks Association of Rhode Island; Gerald Abbott, Block Island Southeast Lighthouse Foundation; Sarah Lundin; Leonard Lesko; Shirley Silvia & Lawrence Bradner, Friends of Plum Beach Lighthouse, Inc.; Russel & Cathy Shippee; Charlotte Johnson, Rose Island Lighthouse Foundation; Susanne Knisley, Watch Hill Lighthouse Keepers Association. South Carolina: George Garris, Cape Romain NWR; Charles Pigg, Greenwood Development Corporation; Joseph Anderson, Hunting Island State Park. Texas: George Fred Rhodes, Calhoun Historical Commission. Virginia: John Schroer, Chincoteague NWR; Gretchen Schneider, Association for the Preservation of Virginia Antiquities; Leona Kemper, Mount Vernon Chapter of the DAR; Greg Howland, George Washington Memorial Parkway. Wisconsin: Louis Janda & Marian Augustine, Cana Island Light; Dave Snyder, Apostle Islands NL; Michael Cooper, Village of Wind Point.
Introduction

Lighthouses are among the most romantic reminders of our country's maritime heritage. Marking dangerous headlands, shoals, bars, and reefs, these structures played a vital role in indicating navigable waters and supporting this nation’s maritime transportation and commerce. Sixteen lighthouses were already in place when the American colonies formed the United States and lighthouses were one of the new government’s first priorities. Hundreds more lighthouses have subsequently been built along our sea coasts and on the Great Lakes, creating the world’s most complex aids to navigation system. No other national lighthouse system compares with that of the United States in size and diversity of architectural and engineering types.

National Maritime Initiative

The National Maritime Initiative, a program within the History Division of the National Park Service (NPS), is responsible for the survey and evaluation of historic maritime resources preserved around the country. Inventories for three types of maritime resources are currently maintained by the Initiative: large vessels, lighthouses, and shipwrecks and hulks. In addition, an inventory of small craft has been developed in cooperation with the Museum Small Craft Association.

The Initiative’s first survey efforts focused on large preserved vessels, resulting in the NPS publication, 1990 Inventory of Large Preserved Historic Vessels, and the popular guidebook, Great American Ships, published by the National Trust for Historic Preservation’s Preservation Press in 1991. The inventory of large vessels was produced in tandem with the large vessel phase of the National Historic Landmark (NHL) Theme Study, "Maritime Heritage of the United States," now nearing completion with 118 vessels designated and 38 vessels and shipwrecks being studied.

Criteria for Inclusion

The lighthouse inventory contains 611 existing historic light stations encompassing 631 existing historic towers. A light station generally consisted of a complex of mutually-supporting structures. The light required fuel and maintenance that could only be provided by keepers. Keepers in turn required housing and transportation; hence a station might include a fireproof oil house, a keeper’s dwelling, a cistern, and perhaps a boathouse, stable, or garage, in addition to the tower. If a fog signal was required, a separate structure might be built to house it as well. At the very least a station would have a tower supporting an optic and housing for the keeper; in many instances, one structure would serve both functions.

All stations included here are at least fifty years old and most have been evaluated for inclusion in the National Register of Historic Places, the "official list of the Nation’s cultural resources worthy of preservation." The National Register is administered by the National Park Service and includes districts, sites, buildings, structures, and objects that are significant in American history, architecture, archeology, engineering, and culture. Of the historic light towers included in this inventory, 366 are individually listed in the National Register for Historic Places; 42 are
part of a larger listing; 23 have been determined eligible for listing by the Keeper of the National Register, and 12 have been determined eligible by a State Historic Preservation Office (SHPO). We have attempted to highlight those stations listed in the National Register by providing longer entries and whenever possible, a photo.

Lighthouses are evocative symbols that have been used for religious, commercial, or memorial purposes. This inventory does not include those structures whose primary function is not, or was not, to serve as an active aid to navigation. Nor do we include sites of former lighthouse stations in the main body of the inventory, although we have a brief listing of those we encountered in our research in Appendix B.

Database Characteristics

Created in 1988, the lighthouse database is maintained on a personal computer using Dbase III Plus software. Each historic light tower has a record in the database and each record contains the following fields:

**Location:**
- Location of station (body of water, harbor, strait, etc.)
- U.S. Coast Guard District (refers to modern configuration)
- Nearest town or city
- County

**Dates:**
- Year station was established and first lit
- Year station was automated and hence no longer required a keeper

**Existing Historic Tower:**
- Year construction completed
- Whether historic tower continues as an active aid to navigation
- Year the tower was deactivated as an active aid to navigation or period in which the tower was out of commission (frequently the Coast Guard has returned an optic to the historic tower after it has been out of commission for decades)
- Foundation materials
- Major construction materials
- Markings or patterns that might identify the tower’s location during the day (daymark)
- Shape of the tower
- Relationship to other structures (attached, integral, or separate). All light stations had a tower supporting the optic; however this tower may also be attached or integral to a keepers dwelling or, in fewer cases, a fog signal building.
- Height in feet, generally to top of the ventilator
- Original optic and the year it was installed
- Current optic and the year it was installed
- Height in feet of the focal plane above high water

**Modern Tower:**
- Whether a newer structure has replaced the historic tower as the active aid to navigation at the station and some of its general characteristics

**Fog Signal Building:**
- Whether a fog signal building is extant on the station. (We know that a fog signal building is extant at 138 of the stations.)
- Year of construction
- Major construction materials
- Architectural style
- Current fog signal type

**Keepers Quarters:**
- Whether a keepers dwelling is extant on the station. (We know that a keepers quarters is extant at 397 of the stations.)
- Year of construction
- Number of stories
- Architectural style
- Major construction materials

**Other Structures:**
- Listing of oil houses, cisterns, barns, catwalks, storage buildings, boathouses, or any other structures which are still extant at the station

Above: Horton Point Light, Southold, New York, is an example of an attached relationship between the tower and dwelling. Courtesy of Clifford J. Bensfield/Mike Richter, 1993. Below: Piney Point Light, St. Mary's County, Maryland, is an example of a separate relationship between the tower and dwelling. Courtesy NPS National Maritime Initiative/Candace Clifford, 1993.
Ownership:

- Owner or current manager of the property. Often the Coast Guard still maintains the aid to navigation but leases the buildings or property to an outside entity. See appendix for addresses of these agencies or organizations.

Current Use:

- How the station currently functions
- Whether and when it is open to the public
- How the station might be accessed
- Phone number to call for additional information and to confirm accessibility. (Hours and access information are subject to change.)

Significance/Evaluation:

- National Register Status: A station can be listed on the National Register of Historic Places individually or as part of a multiple property submission (MPS), formerly referred to as a thematic resource submission (TR). If we are aware that the light station falls within the boundaries of a historic district that has been listed in the National Register, we have indicated that the lighthouse is "part of listing" and provided the name of that listing. In other cases we indicated that the lighthouse has been determined eligible for listing in the National Register by the Keeper of the National Register (Keeper) or the State Historic Preservation Office (SHPO) although no formal nomination has been prepared. Wherever possible, we have included a photo for those included in the National Register.
- Whether the station has been designated a National Historic Landmark (NHL). These properties are designated by the Secretary of the Interior as possessing exceptional national significance.
- Whether the station is included on a State Inventory or Register and, if known, the year listed
- Whether the station has been documented by the Historic American Buildings Survey (HABS) of the Historic American Engineering Record (HAER) and the HABS/HAER code for the submission to the HABS/HAER collection available to researchers in the Library of Congress.

Miscellaneous:

- Any additional information not covered by the above fields that might be useful

SIMPLE PLANO-CONVEX LENS

A PLANO-CONVEX LENS HAS ONE PLAT FACE AND ONE CONVEX FACE. ITS SURFACE IS A SPHERICAL SEGMENT. LENSES TAKE ADVANTAGE OF THE FACT THAT OPTICALLY TRANSPARENT, DENSER-THAN-AIR MATERIALS BEND, OR REFRACT, LIGHT RAYS. BY THEIR GEOMETRY, PLANO-CONVEX LENSES CAN BEND LIGHT EMITTED FROM A POINT SOURCE ON ONE SIDE OF THE LENS IN SUCH A MANNER THAT A BEAM IS Created PARALLEL TO THE LENS AXIS ON THE OTHER SIDE.

EIGHTEENTH-CENTURY LIGHTHOUSE OPTICS DEPENDED ON PARABOLIC METALLIC REFLECTORS TO COLLECT AND FOCUS LIGHT FROM BEAMS THAT WOULD HAVE BEEN INSUFFICIENT TO BE SEEN BY SHIPS. THESE REFLECTORS REQUIRED FREQUENT CLEANING AND POLISHING, AND WERE INEFFECTIVE TO THE EXTENT THAT THEY TRANSMITTED EFFECTIVELY ONLY 1/6 OF THE LIGHT PRODUCED BY A LAMP.

SIMPLE GLASS LENSES OF GREAT SIZE WERE INSTALLED IN SEVERAL MID-EIGHTEENTH CENTURY LIGHTHOUSES IN ENGLAND AND IRELAND, BUT THE SIZE AND THICKNESS OF THE GLASS ABSORBED TOO MUCH OF THE AVAILABLE LIGHT. IN ADDITION, SUCH LENSES WERE HEAVY, THUS DIFFICULT TO MANUFACTURE, INSTALL, AND MAINTAIN.

BUFFON LENS (ca. 1748)

AS EARLY AS 1748, GEORGE LOUIS LECLERC, COMTE DE BUFFON, HYPOTHESES THAT THE EXCESSIVE WEIGHT AND LIGHT ABSORPTION OF LARGE GLASS LENSES COULD BE GREATLY REDUCED BY GRINDING A CAST SLAB OF GLASS (1220 mm (48") DIAMETER BY 65 mm (2.6") THICK) INTO A SHAPE AS SHOWN AT RIGHT. THE CURVED SURFACES OF BUFFON'S HYPOTHETICAL LENS RESULTED WHEN THE SURFACE OF A SIMPLE SPHERICAL LENS WAS COLLAPSED IN A SERIES OF CONCENTRIC STEPS. MARIE-J.A.N. DE CARITAT, MARQUIS DE CONDORCET, SUGGESTED IN 1773 THAT SUCH A LENS WOULD BE EASIER TO MANUFACTURE IN SEVERAL PIECES, RATHER THAN FROM ONE LARGE LENS. NEITHER MAN, HOWEVER, CONSIDERED EMPLOYING SUCH A LENS IN LIGHTHOUSES, NOR DID THEY DEVELOP CALCULATIONS THAT WOULD OPTIMIZE THE PERFORMANCE OF SUCH LENSES.

FRESNEL LENS (1821)

UNAWARE OF THE WORK OF BUFFON AND CONDORCET, AUGUSTIN-JEAN FRESNEL (FRESH-NEL) DESIGNED EIGHT THEORETICALLY IDENTICAL LENSES COMPOSED OF INDIVIDUALLY MANUFACTURED ANNUAL PRISMS FOR USE IN AN EXPERIMENTAL LIGHT AT THE RENOWNED CORDOUAN LIGHTHOUSE IN FRANCE. UNLIKE THE LENSES OF HIS PREDECESSORS, FRESNEL'S LENS INCLUDED CORRECTIONS BASED ON FORMULAS HE HAD DEVELOPED FOR SPHERICAL ABERRATIONS, LIGHT WAVE INTERFERENCE, DOUBLE-REFRACTION AND POLARIZATION. IN SECTION, EACH ANNUAL PRISM HAS A UNIQUE RADIANT POINT WHICH LIES OFF THE LENS AXIS DUE TO THE SYMMETRY OF A FRESNEL LENS. THE DIAGRAM AT RIGHT SHOWS RADIAL POINTS FOR ONLY HALF OF A LENS. THE METRIC DIMENSIONS GIVEN ARE FOR A "FIRST-ORDER" LENS, SUCH AS THE LENS APPARATUS IN USE AT THE BLOCK ISLAND SOUTHEAST LIGHT IN 1966. THE PLANAR CONVEX LENS FORM WAS CHOSEN BY FRESNEL BECAUSE ITS FLAT BACK PERMITTED EASY ASSEMBLY OF LENS PIECES ON A FLAT TABLE, WHERE THEY WERE GLUED TOGETHER AND MOUNTED IN BRONZE FRAMES.

THE CORDOUAN LENSES WERE GROUND BY A PARISIAN OPTICIAN, JEAN-BAPTISTE FRANCOIS, FROM CROWN GLASS PRODUCED BY THE ROYAL GLASSWORKS AT ST. GOBAIN NEAR PARIS. CROWN GLASS POSSESSES SEVERAL ADVANTAGES OVER "FLINT" GLASS, WHICH COULD ALSO HAVE BEEN USED FOR LENSES. ALTHOUGH CROWN GLASS IS HARDER THAN "FLINT" GLASS, IT IS MORE TIGHT AND HAS A LOWER INDEX OF REFRACTION THAN FLINT GLASS. CROWN GLASS IS HARDER, LESS DENSE, AND LESS REACTIVE WITH ATMOSPHERIC CONTAMINANTS THAN "FLINT" GLASS. LIGHTHOUSE LENSES HAVE EMPLOYED CROWN GLASS ALMOST EXCLUSIVELY SINCE THE 1820 S.

THE ORDERS

The diagram here shows the relative sizes of first through fourth order lenses superimposed, with the exception of the 3rd order size which was developed after the original orders were standardized. Fresnel established four orders of lights based upon the number of concentric cylindrical wicks in their lamps—the 1st order having four wicks, the 2nd order having four wicks, the 3rd order four wicks, and the 4th order large size. These orders each had two sizes: Fresnel's original 3rd and 4th order large sizes correspond to the present 3rd and 5th order lenses, and the original 3rd and 4th order small sizes are now known as the 4th and 6th order lenses (in the United States).

DEVELOPMENT OF UPPER AND LOWER REFLECTING PANELS

When Fresnel first developed his lens design in 1822 he relied upon metallic reflectors to capture and redirect light escaping above and below the lens panels. After his death in 1830, banks of reflecting glass prisms were substituted for the reflectors, because they absorbed less light and required less maintenance. Ultimately, a complete glass lens with central drum and upper and lower prisms transmitted 5/6 of the available lamp light, a considerable improvement over the 1/6 emission capabilities of pre-1822 metallic reflector lights. As an additional improvement (along with greater visibility of the light as seen from the sea), the lamps constructed for these lenses consumed less fuel.

LENS MANUFACTURERS

Several French companies in the vicinity of Paris were responsible for all the Fresnel lenses used in the United States: Le Verre Demaché, Henry-Lépaute, L. Sauteur & Co. (later Barber, Lefort, and Sautter), and L. Lemaire et Compagnie. Several French companies in the vicinity of Paris were responsible for all the Fresnel lens manufacturers. As lamp technology progressed, kerosene lamps were substituted for the reflectors, because they absorbed less light and required less maintenance. Ultimately, a complete glass lens with central drum and upper and lower prisms transmitted 5/6 of the available lamp light, a considerable improvement over the 1/6 emission capabilities of pre-1822 metallic reflector lights. As an additional improvement (along with greater visibility of the light as seen from the sea), the lamps constructed for these lenses consumed less fuel.

LAMPS AND LAMP FUELS

Mid-eighteenth century European lighthouses used primarily coal and rapeseed oils in their lamps, while the United States relied heavily on sperm whale oil until sperm whale became scarce. As a result, the United States imported kerosene lamps and then the incandescent oil vapor (COV) lamps were developed. Electric lamps were developed in the United States in the 1870s by several French manufacturers of electric lamps, such as the 1000 watt 120 volt quartz-iodide lamp often used today.

NOTES TO TABLE

1. Total height includes interior metal, frame, and glass.
2. Comparative brilliance of lights is based upon a table in Plate 5, "Losses." 3. Weight of light is not given as lamp design is constant but varies slightly with height, providing a secondary. 4. Weight of lens and lamp is not given as lamp design is constant but varies slightly with height, providing a secondary. 5. All optical design and production are conducted in the metric system worldwide, hence metric dimensions are given as primary figures, English conversions as secondary. 6. 4th order and hyperbolic (330mm) orders not shown (not extant in 1873).

RSA COLLEGE OF PHYSICS: HISTORIC AMERICAN ENGINEERING RECORDS NATIONAL PARK SERVICE NAME OF DOCUMENT: DATE OF DRAWING: 1994 INVENTORY OF HISTORIC LIGHTHOUSES
Database Statistics

Of the stations included in the inventory, 5% were established before 1800, 33% between 1800 and 1849, 47% between 1850 and 1899, and 15% between 1900 and 1943. Of the existing historic towers, 2% were built before 1800, 9% between 1800 and 1849, 62% between 1850 and 1899, and 28% between 1900 and 1943. Only one station in the inventory, Cleveland East Ledge Light in Massachusetts, was built after the U.S. Lighthouse Service was incorporated into the U.S. Coast Guard in 1939.

The most common construction material for existing historic towers is brick; the second, cast iron. Many of the cast iron towers, however, have a brick lining.

The U.S. Coast Guard has jurisdiction at 457 of the stations. There are, however, many different ways the Coast Guard interacts with an outside organization, be it another Federal agency, state or local government, historical society or research institution, or private individual. The second entity either 1) leases and manages the entire station from the Coast Guard which generally continues to maintain the optic; 2) owns the historic tower and associated buildings while the Coast Guard owns the newer tower; 3) owns or leases the entire station with the exception of the historic tower as the Coast Guard continues to maintain it as an active aid to navigation; 4) has a license or permit from the Coast Guard to use the property; or 5) owns or manages all or some of the buildings.
Sources of Information

The information included in the lighthouse inventory was gathered primarily from the National Register of Historic Places, the U.S. Coast Guard Historian’s Office, the U.S. Lighthouse Society, State Historic Preservation Offices, and survey forms from the owners and managers of the individual light stations. Another primary research tool was the Light List published by the U.S. Coast Guard and its predecessors. Please refer to the Acknowledgments section for a list of contributors to the inventory and to the Bibliography for a list of secondary sources.

Lighthouse Preservation

Technological changes in the 20th century ultimately doomed the manned light station. Today, all stations but one, Boston Harbor Light, are automated, eliminating the need for a keeper to maintain the light and its associated structures. Of the existing lights, we know that 406 are operational aids to navigation. The majority of these are operated by the U.S. Coast Guard; however, we know that 17 serve as private aids to navigation. Many additional stations continue in operation with the optic placed outside the tower’s lantern, generally mounted on a steel pole.

Automation has permitted the Coast Guard to lease many stations to state, local, and private groups for use as museums, parks and recreation areas, research laboratories, and nature preserves. Finding an adaptive use for those stations in isolated, inaccessible locations has proved challenging.
Lighthouses in accessible locations have become popular tourist attractions and educational resources. Some lighthouses report annual visitation in the tens of thousands. Approximately 250 stations are accessible to the public. At some locations, a person may enter the tower and climb the stairs to the lantern room; in others only the grounds outside the buildings are open. Thirty-five light stations fall within boundaries of national parks.

As the U.S. Coast Guard and other caretakers look for new uses for the obsolete towers and nature takes its toll, the issues surrounding lighthouse preservation have become more critical. The popular appeal of lighthouses has created a tremendous body of support for their preservation, especially at the local level. State and national groups have also organized to promote the cause of lighthouse preservation. This inventory is intended to support lighthouse preservation organizations by providing a means for coordinating their activities and assembling a baseline for comparison.

**National Historic Landmark Study of Lighthouses**

The next step after compiling an inventory is to survey and evaluate light stations for the National Register of Historic Places and, if exceptionally noteworthy, for the National Historic Landmark (NHL) survey. This Inventory will serve as a starting point for researching and selecting candidates for study as part of the lighthouse phase of the NHL theme study, "Maritime Heritage of the United States." National Historic Landmarks are recognized as our Nation’s most important historic and cultural resources and possess exceptional significance in illustrating or interpreting the heritage of the United States.

Currently only three lighthouses are designated NHLs: Boston Harbor Light on Little Brewster Island in Massachusetts, Sandy Hook Light on New York Lower Bay in New Jersey, and Old Cape Henry Light at the entrance to Chesapeake Bay in Virginia. After a context study is completed on the development of the architecture and engineering of lighthouses within the U.S. lighthouse system, the Initiative plans to select approximately 50 of the most significant lighthouses for study as potential NHLs. For each property, the Initiative will gather information on its history, significance, appearance, and integrity; make an onsite inspection; and prepare a formal nomination to be presented to the National Park System Advisory Board, which in turn makes recommendations to the Secretary of the Interior.

In addition to the NHL study, the National Park Service plans to work cooperatively with the U.S. Coast Guard and other agencies to provide standards and guidelines for preservation treatments for light stations. A small number of lighthouse condition assessments are also planned by the National Park Service, U.S. Coast Guard, and Department of Defense to serve as models for this resource type.

**Corrections to the Inventory**

In creating this inventory, we have consulted a multitude of sources and have often encountered conflicting data. We realize that errors may exist in our data. We welcome your comments; please bring any mistakes or inconsistencies to our attention, as well as any information we may have overlooked or not discovered. This inventory is an ongoing project and will continue to be maintained by the Initiative. Please direct all comments and revisions to National Maritime Initiative, National Park Service (418), P.O. Box 37127, Washington, DC 20013-7127.
MOBILE MIDDLE BAY LIGHT

Location: MOBILE HARBOR/MOBILE BAY
U.S.C.G. District: 8
Nearest City: MOBILE; County: MOBILE

Year Station Established: 1885; Year Automated: 1935

Year Existing Historic Tower Constructed: 1905
Is the Light Operational? NO; Deactivated: 1967
Foundation Materials: SCREW PILING W/PLATFORM
Construction Materials: WOOD
Markings/Patterns: WHITE DWELLING/RED PILES
Shape: HEXAGONAL W/O LANTERN
Relationship to Other Structures: INTEGRAL
Tower Height: 54; Height of Focal Plane: 54
Original Optic:
Present Optic: 155 MM (HAZARD WARNING)

Is there a Newer Tower? NO
Is there an Existing Fog Signal Building? NO
Current Fog Signal Type: NONE

Is there an Existing Keepers Quarters? YES
Year Constructed: 1905; Number of Stories: 1.5
Architectural Style: INTEGRAL TO TOWER
Construction Materials: WOOD

Owner/Manager: ALABAMA HISTORICAL COMMISSION
Current Use:
Open to the Public? NO; Access: OFFSHORE/BOAT

National Register Status: LISTED: MIDDLE BAY LIGHT; On State List/Inventory? YES
Documented by HABS? YES (AL-999)

BUILT AS REPLICA OF HOOPER’S STRAIT LIGHTHOUSE; DAMAGED IN 1916 HURRICANE; RESTORED BY MIDDLE BAY LIGHT CENTENNIAL COMMISSION IN 1984; STABILIZATION UNDERTAKEN IN 1993

MOBILE POINT (RANGE REAR) LIGHT

Location: MOBILE BAY ENTRANCE
U.S.C.G. District: 8
Nearest City: GULF SHORES; County: BALDWIN

Year Station Established: 1821; Year Automated: 1981

Year Existing Historic Tower Constructed: 1873
Is the Light Operational? NO; Deactivated: 1966
Foundation Materials: CONCRETE
Construction Materials: IRON
Markings/Patterns: BLACK
Shape: SKELETAL
Relationship to Other Structures: SEPARATE
Tower Height: 30; Height of Focal Plane: Original Optic: FOURTH ORDER (1858)
Present Optic: REMOVED TO FORT MORGAN MUSEUM (1966)

Is there a Newer Tower? YES; Year Constructed: 1966
Construction Materials: STEEL
Markings/Patterns: RED & WHITE BOARD
Shape: SKELETAL
Tower Height: 120; Height of Focal Plane: 125
Current Optic: DCB 24 (1981)

Is there an Existing Fog Signal Building? NO
Is there an Existing Keepers Quarters? YES
Year Constructed: 1872; Number of Stories: 2
Architectural Style: BUNGALOW
Construction Materials: WOOD

Other Structures: SMALL BRICK BUILDING, POSSIBLY OIL HOUSE

National Park Service 1994 Inventory of Historic Lighthouses
MOBILE POINT (RANGE REAR) LIGHT cont.

Owner/Manager: U.S. COAST GUARD/ALABAMA HISTORICAL COMMISSION
Current Use: STATE HISTORIC SITE
Open to the Public? YES; GROUNDS ONLY
Access: FORT MORGAN STATE HISTORIC SITE/ROUTE 180

National Register Status: PART OF LISTING: FORT MORGAN; On State List/Inventory? YES
1873 TOWER DISMANTLED 1979, TOWER LATER RIGHTED AND RESTORED NEAR ENTRANCE TO FORT MORGAN'S VISITOR PARKING LOT

SAND ISLAND LIGHT

Location: OFF MOBILE POINT SOUTH OF FORT; U.S.C.G. District: 8
Nearest City: GULF SHORES
County: BALDWIN

Year Station Established: 1838
Year Automated: 1921

Year Existing Historic Tower Constructed: 1873
Is the Light Operational? NO
Deactivated: 1933
Foundation Materials: STONE
Construction Materials: BROWNSTONE
Markings/Patterns: UNPAINTED GOTHIC TOWER W/BLACK LANTERN
Shape: OCTAGONAL
Relationship to Other Structures: SEPARATE
Tower Height: 131; Height of Focal Plane: 132
Original Optic: SECOND ORDER (1873)
Present Optic: REMOVED (1933)

Is there a Newer Tower? NO
Is there an Existing Fog Signal Building? NO
Is there an Existing Keepers Quarters? NO (DESTROYED)

Owner/Manager: U.S. COAST GUARD
Current Use:
Open to the Public? NO
Access: BOAT FROM DAUPHIN ISLAND

National Register Status: LISTED: SAND ISLAND LIGHT

ORIGINAL LENS MOVED TO FORT MORGAN MUSEUM; U.S. COAST GUARD PLANS TO TRANSFER PROPERTY TO BUREAU OF LAND MANAGEMENT

Courtesy U.S. Coast Guard, 1963.
CAPE DECISION LIGHT

Location: SUMNER STRAIT/SHAKEN BAY
U.S.C.G. District: 17
Nearest City: KUIU ISLAND
Year Station Established: 1932; Year Automated: 1974
Year Existing Historic Tower Constructed: 1932
Is the Light Operational? YES
Foundation Materials: ROCK
Construction Materials: CONCRETE
Markings/Patterns: WHITE ART DECO
Shape: SQUARE
Relationship to Other Structures: INTEGRAL
Tower Height: 75; Height of Focal Plane: 96
Original Optic: THIRD ORDER (1932)
Present Optic: DCB 24
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Access: BOAT/HELICOPTER
National Register Status: NONE
LAST LIGHT STATION ESTABLISHED IN ALASKA; ORIGINAL LENS IN CLAUSEN MUSEUM IN PETERSBURG; BOATHOUSE BURNED 1989

CAPE HINCHINBROOK LIGHT

Location: ENTRANCE TO PRINCE WILLIAM SOUND
U.S.C.G. District: 17
Nearest City: CORDOVA
County: VALDEZ/CORDOVA
Year Station Established: 1910; Year Automated: 1974
Year Existing Historic Tower Constructed: 1934
Is the Light Operational? YES
Foundation Materials: CONCRETE/SURFACE ROCK
Construction Materials: REINFORCED CONCRETE
Markings/Patterns: WHITE ART DECO
Shape: OCTAGONAL ATTACHED TO FOG SIGNAL BUILDING
Relationship to Other Structures: ATTACHED
Tower Height: 67; Height of Focal Plane: 235
Original Optic: THIRD ORDER (1910)
Present Optic: DCB 224
Is there an Existing Fog Signal Building? YES
Current Fog Signal Type: HORN
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Access: BOAT/HELICOPTER
National Register Status: NONE

Light Stations by State
EAGLE HARBOR LIGHT

Location: WEST END OF HARBOR/LAKE SUPERIOR  
U.S.C.G. District: 9  
Nearest City: EAGLE HARBOR; County: KEWEENAW

Year Station Established: 1851; Year Automated: 1980

Year Existing Historic Tower Constructed: 1871  
Is the Light Operational? YES  
Foundation Materials: DRESSED STONE/TIMBER  
Construction Materials: BRICK  
Markings/Patterns: WHITE TOWER ON RED DWELLING  
Shape: OCTAGONAL  
Relationship to Other Structures: INTEGRAL  
Tower Height: 44; Height of Focal Plane: 60  
Original Optic: FOURTH ORDER, FRESNEL (1857)  
Present Optic: DCB 224 (1968)

Is there an Existing Keepers Quarters? YES  
Year Constructed: 1851; Number of Stories: 1.5  
Architectural Style: ATTACHED TO TOWER  
Construction Materials: BRICK

Other Structures: BRICK OIL HOUSE, 4 CEMENT BLOCK CAR GARAGES, WOODEN ASSISTANT KEEPER (RELOCATED FROM LIFESAVING STATION ACROSS THE HARBOR), RADIOBEACON

Owner/Manager: U.S. COAST GUARD LEASE TO KEWEENAW COUNTY HISTORICAL SOCIETY  
Current Use: MUSEUM  
Open to the Public? YES; Access: OFF RT. 26

National Register Status: LISTED: EAGLE HARBOR LIGHT STATION (U.S. COAST GUARD LIGHTHOUSES AND LIGHT STATIONS ON THE GREAT LAKES TR)  
FOG HORN ON DISPLAY AT MUSEUM IN SAULT STE MARIE

EAGLE RIVER LIGHT

Location: EAGLE RIVER/LAKE SUPERIOR  
U.S.C.G. District: 9  
Nearest City: EAGLE RIVER; County: KEWEENAW

Year Station Established: 1854

Year Existing Historic Tower Constructed: 1874  
Is the Light Operational? NO  
Deactivated: 1908  
Construction Materials: WOOD  
Markings/Patterns: WHITE  
Shape: SQUARE W/CONICAL LANTERN  
Relationship to Other Structures: INTEGRAL

Is there an Existing Fog Signal Building? YES  
Year Constructed: 1895  
Construction Materials: STEEL FRAME  
Architectural Style: RECTANGULAR

Is there an Existing Keepers Quarters? YES  
Year Constructed: 1874; Number of Stories: 1.5  
Architectural Style: INTEGRAL TO TOWER  
Construction Materials: WOOD

Owner/Manager: PRIVATE OWNER  
Current Use: MUSEUM  
Open to the Public? NO

National Register Status: PART OF LISTING: EAGLE RIVER HISTORIC DISTRICT

ESCANABA LIGHT

Location: MARKS SHOAL/LAKE MICHIGAN  
U.S.C.G. District: 9  
Year Station Established: 1938; Year Automated: 1976

Year Existing Historic Tower Constructed: 1938  
Is the Light Operational? YES  
Foundation Materials: CRIB  
Construction Materials: STEEL  
Markings/Patterns: WHITE; Shape: SQUARE  
Relationship to Other Structures: SEPARATE  
Tower Height: 35; Height of Focal Plane: 45  
Present Optic: 375 MM

Owner/Manager: U.S. COAST GUARD  
Current Use: ACTIVE AID TO NAVIGATION  
Open to the Public? NO; Access: BOAT

National Register Status: NONE
MICHIGAN

FORT GRATIOT LIGHT

Location: LAKE HURON/ST. CLAIR RIVER
U.S.C.G. District: 9
Nearest City: PORT HURON; County: ST. CLAIR

Year Station Established: 1825; Year Automated: 1933

Year Existing Historic Tower Constructed: 1829
Is the Light Operational? YES
Foundation Materials: DRESSED STONE/TIMBER
Construction Materials: BRICK
Markings/Pattems: WHITE
Shape: CONICAL ATTACHED TO WORKROOM
Relationship to Other Structures: SEPARATE
Tower Height: 82; Height of Focal Plane: 86
Original Optic: 
Present Optic: RANGE

Is there a Newer Tower? NO

Is there an Existing Fog Signal Building? NO
Current Fog Signal Type: HORN

Is there an Existing Keepers Quarters? YES
Year Constructed: 1875; Number of Stories: 2
Architectural Style: DUPLEX
Construction Materials: BRICK

Other Structures: RADIOBEACON

Owner/Manager: U.S. COAST GUARD (TOWER)/CITY OF PORT HURON (GROUNDS)
Current Use: ACTIVE AID TO NAVIGATION/COAST GUARD HOUSING
Open to the Public? YES; GROUNDS ONLY; Access: LIGHTHOUSE PARK/OMAR & GARFIELD STREETS

National Register Status: LISTED: FORT GRATIOT LIGHTHOUSE

OLDEST SURVIVING LIGHTHOUSE IN MICHIGAN; FIRST ON LAKE HURON; ORIGINALLY 65 FEET, EXTENDED TO 86 FEET IN 1861

FORTY MILE POINT LIGHT

Location: LAKE HURON; U.S.C.G. District: 9
Nearest City: ROGERS CITY; County: PRESQUE ISLE

Year Station Established: 1897; Year Automated: 1969

Year Existing Historic Tower Constructed: 1897
Is the Light Operational? YES
Foundation Materials: WOOD PILINGS
Construction Materials: BRICK
Markings/Pattems: WHITE W/BLACK LANTERN
Shape: SQUARE
Relationship to Other Structures: ATTACHED
Tower Height: 52; Height of Focal Plane: 66
Original Optic: FOURTH ORDER, FRESNEL
Present Optic: FOURTH ORDER (1935)

Is there a Newer Tower? NO

Is there an Existing Fog Signal Building? YES
Year Constructed: 1897
Construction Materials: BRICK
Architectural Style:
Current Fog Signal Type: DIAPHONE (REMOVED)

Is there an Existing Keepers Quarters? YES
Year Constructed: 1897; Number of Stories: 2.5
Architectural Style: DUPLEX (ATTACHED)
Construction Materials: RED BRICK

Other Structures: OIL HOUSE (1897), 2 PRIVIES (1897), BARN (1896), BATH HOUSE
### Fourteen Foot Shoal Light

**Location:** Cheboygan Harbor Entrance/Lake Michigan; U.S.C.G. District: 9  
**Nearest City:** Cheboygan; County: Cheboygan  
**Year Station Established:** 1930  
**Year Existing Historic Tower Constructed:** 1930  
**Is the Light Operational?** Yes  
**Foundation Materials:** Pneumatic/Submerged  
**Construction Materials:** Reinforced Concrete/Steel  
**Markings/Patterns:** White w/Red Trim  
**Shape:** Conical on Rectangular House  
**Relationship to Other Structures:** Integral  
**Height of Focal Plane:** 55  
**Original Optic:** Fourth Order, Fresnel  
**Present Optic:** 250 MM  
**Is there an Existing Fog Signal Building?** Yes (Integral to Tower)  
**Current Fog Signal Type:** Diaphone  
**Owner/Manager:** U.S. Coast Guard  
**Current Use:** Active Aid to Navigation  
**Open to the Public?** No; Access: Offshore  
**National Register Status:** None  

**Description:** Station was never manned, but operated by radio control—an early experiment in off-site operations.

### Fourteen Mile Point Light

**Location:** Between Ontonagon/Keweenaw Waterway; U.S.C.G. District: 9  
**Year Station Established:** 1894  
**Year Existing Historic Tower Constructed:** 1894  
**Is the Light Operational?** No  
**Deactivated:** 1934  
**Construction Materials:** Brick  
**Markings/Patterns:** Red Brick  
**Shape:** Square  
**Relationship to Other Structures:** Integral  
**Tower Height:** 55; Height of Focal Plane: 55  
**Original Optic:** Fourth Order, Fresnel (1894)  
**Present Optic:** Removed  
**Is there a Newer Tower?** No  
**Is there an Existing Fog Signal Building?** Yes  
**Year Constructed:** 1894  
**Construction Materials:** Brick  
**Current Fog Signal Type:** Steam Whistles  
**Other Structures:** Oil House  
**Owner/Manager:** Private Owner  
**Current Use:**  
Open to the Public? No; Access: Boat  
**National Register Status:** None
### FOX ISLAND LIGHT

*Location: LAKE MICHIGAN; U.S.C.G. District: 9*

- **Year Station Established:**
- **Year Existing Historic Tower Constructed:** 1868
- **Is the Light Operational?** NO; Deactivated:
  - Construction Materials: BRICK
  - Shape: SQUARE
  - Relationship to Other Structures: ATTACHED
  - Tower Height: 30

- **Is there a Newer Tower?** YES; Year Constructed: 1934
  - Construction Materials: STEEL
  - Shape: SKELETAL

- **Owner/Manager:** UNKNOWN
- **Current Use:** UNKNOWN
- **Open to the Public?** UNKNOWN
- **National Register Status:** NONE

---

### FRANKFORT NORTH BREAKWATER LIGHT

*Location: LAKE MICHIGAN; U.S.C.G. District: 9*

- **Nearest City:** FRANKFORT; County: BENZIE
- **Year Station Established:** 1873; **Year Automated:**
- **Year Existing Historic Tower Constructed:** 1932
- **Is the Light Operational?** YES
- **Foundation Materials:** PIER
- **Construction Materials:** STEEL
- **Markings/Patterns:** WHITE
- **Shape:** PYRAMIDAL SQUARE
- **Relationship to Other Structures:** INTEGRAL
- **Other Structures:** RADIOBEACON

- **Tower Height:** 67; **Height of Focal Plane:** 72
- **Original Optic:** FIFTH ORDER, FRESNEL
- **Present Optic:** FOURTH ORDER, ELECTRIC

- **Owner/Manager:** U.S. COAST GUARD
- **Current Use:** ACTIVE AID TO NAVIGATION
- **Open to the Public?** NO; **Access:** PIER

- **National Register Status:** NONE

---

### GRAND HAVEN SOUTH PIERHEAD ENTRANCE LIGHT

*Location: GRAND RIVER/LAKE MICHIGAN*
  - **U.S.C.G. District:** 9
  - **Nearest City:** GRAND HAVEN; County: OTTAWA
- **Year Station Established:** 1871; **Year Automated:** 1969

- **Year Existing Historic Tower Constructed:** 1922
- **Is the Light Operational?** YES
- **Foundation Materials:** STONE
- **Construction Materials:** STEEL
- **Markings/Patterns:** RED; **Shape:** SQUARE
- **Relationship to Other Structures:** INTEGRAL
- **Tower Height:** 36; **Height of Focal Plane:** 42
- **Original Optic:** SIXTH ORDER
- **Present Optic:** 190 MM

- **Is there an Existing Fog Signal Building?** YES
  - **Year Constructed:** 1875
  - **Construction Materials:** WOOD/STEEL
  - **Current Fog Signal Type:** HORN
  - **Other Structures:** ELEVATED WALKWAY, RADIOBEACON

- **Owner/Manager:** U.S. COAST GUARD
- **Current Use:** ACTIVE AID TO NAVIGATION
- **Open to the Public?** UNKNOWN; **Access:** PIER

- **National Register Status:** NONE

- **LANTERN IS ON GABLE OF FOG SIGNAL BUILDING; BUILDING MOVED IN 1905 AND SHEATHED IN STEEL IN 1922**

---

### GRAND HAVEN SOUTH PIERHEAD INNER LIGHT

*Location: GRAND RIVER/LAKE MICHIGAN*
  - **U.S.C.G. District:** 9
  - **Nearest City:** GRAND HAVEN; County: OTTAWA
- **Year Station Established:** 1839; **Year Automated:** 1969

- **Year Existing Historic Tower Constructed:** 1905
- **Is the Light Operational?** YES
- **Foundation Materials:** PIER

- **Construction Materials:** CAST IRON
- **Markings/Patterns:** RED
- **Shape:** CONICAL
- **Relationship to Other Structures:** SEPARATE
- **Tower Height:** 51; **Height of Focal Plane:** 52
- **Original Optic:** SIXTH ORDER, FRESNEL
- **Present Optic:** 250 MM

---

174 Light Stations by State
MICHIGAN

Is there a Newer Tower? NO
Is there an Existing Fog Signal Building? YES
Construction Materials: CAST IRON
Current Fog Signal Type: DIAPHONE

National Register Status: NONE

Other Structures: ELEVATED WALKWAY "CATWALK"

GRAND ISLAND EAST CHANNEL LIGHT

Location: LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: MUNISING; County: ALGER
Year Station Established: 1870
Year Existing Historic Tower Constructed: 1870
Is the Light Operational? NO
Deactivated: 1913
Construction Materials: WOOD FRAME
Shape: SQUARE

National Register Status: NONE

Relationship to Other Structures: ATTACHED
Owner/Manager: PRIVATE OWNER
Current Use:

REPLACED BY RANGE LIGHTS INSTALLED AT MUNISING 1908

GRAND ISLAND HARBOR RANGE REAR LIGHT

Location: LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: CHRISTMAS; County: ALGER
Year Station Established: 1868
Year Existing Historic Tower Constructed: 1914
Is the Light Operational? NO
Deactivated: 1969
Foundation Materials: CONCRETE PIER
Construction Materials: STEEL
Markings/Patterns: BLACK TOWER/WHITE LANTERN
Shape: CONICAL
Relationship to Other Structures: SEPARATE
Tower Height: 62; Height of Focal Plane: 70

National Register Status: LISTED: GRAND ISLAND HARBOR RANGE LIGHT

FRONT RANGE LIGHT TORN DOWN IN 1969 TO MAKE ROOM FOR BAY FURNACE DIRECTIONAL LIGHT

GRAND ISLAND NORTH (OLD NORTH) LIGHT

Location: GRAND ISLAND/LAKE SUPERIOR
U.S.C.G. District: 9
Nearest City: MUNISING; County: ALGER
Year Station Established: 1854; Year Automated: 1961
Year Existing Historic Tower Constructed: 1867
Is the Light Operational? NO
Deactivated: 1961
Foundation Materials: BRICK
Construction Materials: BRICK
Markings/Patterns: SQUARE BRICK TOWER ATTACHED TO DWELLING
Shape: SQUARE

Relationship to Other Structures: ATTACHED
Tower Height: 40
Original Optic: FOURTH ORDER, FRESNEL

Is there a Newer Tower? YES; Year Constructed: 1961
Construction Materials: STEEL
Markings/Patterns: DIAGONAL BLACK/WHITE STRIPE DAYMARK
Shape: POLE
GRAND ISLAND NORTH (OLD NORTH) LIGHT cont.

Is there an Existing Fog Signal Building? NO
Is there an Existing Keepers Quarters? YES
Year Constructed: 1867; Number of Stories: 2
Architectural Style: 
Construction Materials: BRICK
Other Structures: OIL HOUSE, STORAGE BUILDING, OUTHOUSE, WELL
Owner/Manager: PRIVATE OWNER
Current Use: SUMMER HOME
Open to the Public? NO; PRIVATE RESIDENCE
National Register Status: LISTED: GRAND ISLAND NORTH LIGHT STATION
RESTORED BUT NOT MODERNIZED

GRAND MARAIS HARBOR RANGE LIGHTS

Location: GRAND MARAIS HARBOR/LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: GRAND MARIAS; County: ALGER
Year Station Established: 1895

Year Existing Historic Tower Constructed: 1895
Is the Light Operational? NO
Foundation Materials: PIER
Construction Materials: STEEL
Shape: SKELETAL
Relationship to Other Structures: SEPARATE
Tower Height: 34

Is there a Newer Tower? YES; Year Constructed: 1898
Construction Materials: CAST IRON
Markings/Patterns: WHITE; Shape: SKELETAL
Tower Height: 55; Height of Focal Plane: 54
Original Optic: FIFTH ORDER
Owner/Manager: U.S. COAST GUARD
Current Use:
Open to the Public? NO
Access: OFF ROUTES 77 AND H58
National Register Status: NONE

1898 TOWER SERVED AS INNER RANGE, 1895 TOWER SERVED AS OUTER RANG

GRAND TRAVERSE (CAT'S HEAD POINT) LIGHT

Location: GRAND TRAVERSE PT/LEELANAU PENINSULA; U.S.C.G. District: 9
Nearest City: NORTHPORT; County: LEELANAU
Year Station Established: 1852; Year Automated: 1972

Year Existing Historic Tower Constructed: 1858
Is the Light Operational? NO; Deactivated: 1972
Foundation Materials: DRESSED STONE/TIMBER
Construction Materials: BRICK/WOOD/IRON
Markings/Patterns: WHITE W/BLACK TRIM
Shape: HEXAGONAL ON ROOF OF DWELLING
Relationship to Other Structures: INTEGRAL
Tower Height: 47; Height of Focal Plane: 50

Courtesy U.S. Coast Guard, 1956.
ORIGINAL OPTIC: FIFTH ORDER, FRENSNEL (1858)
PRESENT OPTIC: REMOVED

Is there a Newer Tower? YES; Year Constructed: 1972
Construction Materials: STEEL
Markings/Patterns: YELLOW, WHITE & ORANGE DIAMONDS; Shape: SKELETAL
Height of Focal Plane: 47
Original Optic: DCB 24 (1972)
Current Optic: DCB 24 (1972)

Is there an Existing Fog Signal Building? YES
Year Constructed: 1899
Construction Materials: BRICK
Architectural Style: FLEMISH REVIVAL
Current Fog Signal Type: DIAPHONE HORN

Is there an Existing Keepers Quarters? YES
Year Constructed: 1858; Number of Stories: 2.5
Architectural Style: MIDWEST VICTORIAN

Original Optic: DCB 24 (1972)
Present Optic: DCB 24 (1972)

Is there an Existing Fog Signal Building? YES
Year Constructed: 1899
Construction Materials: BRICK
Architectural Style: FLEMISH REVIVAL
Current Fog Signal Type: DIAPHONE HORN

Is there an Existing Keepers Quarters? YES
Year Constructed: 1858; Number of Stories: 2.5
Architectural Style: MIDWEST VICTORIAN

National Register Status: LISTED: GRAND TRAVERSE LIGHTHOUSE
On State List/Inventory? YES; Year Listed: 1991
FOURTH ORDER FRENSNEL LENS ON DISPLAY

GRANITE ISLAND LIGHT

Location: NORTHWEST END GRANITE ISLAND/LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: MARQUETTE; County: MARQUETTE

Year Station Established: 1868; Year Automated: 1939

Year Existing Historic Tower Constructed: 1868
Is the Light Operational? NO; Deactivated:
Foundation Materials: ROCK
Construction Materials: GRANITE
Markings/Patterns: NATURAL W/BLACK LANTERN
Shape: SQUARE
Relationship to Other Structures: ATTACHED
Tower Height: 40; Height of Focal Plane: 96
Original Optic: FOURTH ORDER, FRENSNEL (1868)
Present Optic:

Is there a Newer Tower? YES; Original Optic: 300 MM

Is there an Existing Keepers Quarters? YES

Owner/Manager: U.S. COAST GUARD

National Register Status: LISTED: GRANITE ISLAND LIGHT STATION (U.S. COAST GUARD LIGHTHOUSES AND LIGHT STATIONS ON THE GREAT LAKES TR)
On State List/Inventory? YES; Year Listed: 1969
ONE OF OLDEST SURVIVING LIGHTHOUSES ON LAKE SUPERIOR; LOST ITS USEFULNESS IN 1920s WHEN SHIPPING RAN LESS OFTEN BETWEEN ISLAND & SHORE

GRAVELLY SHOAL LIGHT

Location: APPROACH TO SAGINAW BAY/LAKE HURON; U.S.C.G. District: 9
Year Station Established: 1939; Year Automated: 1939
Year Existing Historic Tower Constructed: 1939
Is the Light Operational? YES
Foundation Materials: CRIB; Construction Materials: REINFORCED CONCRETE/STEEL
Markings/Patterns: WHITE
Shape: SQUARE W/O LANTERN
Relationship to Other Structures: INTEGRAL
Tower Height: 65; Height of Focal Plane: 75
Original Optic: 375 MM; Present Optic: 300 MM

Is there an Existing Fog Signal Building? YES
Construction Materials: REINFORCED CONCRETE
Architectural Style: INTEGRAL TO TOWER
Current Fog Signal Type: DIAPHONE

Other Structures: RADIOBEACON

Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Open to the Public? NO; Access: BOAT

National Register Status: NONE
GRAYS REEF LIGHT

Location: GRAYS REEF EAST CHANNEL
U.S.C.G. District: 9
Year Station Established: 1891; Year Automated: 1976

Year Existing Historic Tower Constructed: 1936
Is the Light Operational? YES
Foundation Materials: SUBMERGED STONE/CONCRETE CRIB
Construction Materials: REINFORCED CONCRETE/STEEL
Markings/Patterns: WHITE W/BLACK LANTERN
Shape: OCTAGONAL ON SQUARE DWELLING
Relationship to Other Structures: INTEGRAL
Tower Height: 65; Height of Focal Plane: 82
Original Optic: THIRD-AND-HALF ORDER
Present Optic: 190 MM

Is there an Existing Keepers Quarters? YES
Year Constructed: 1936
Architectural Style: INTEGRAL
Construction Materials: REINFORCED CONCRETE

Other Structures: RADIOBEACON
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Open to the Public? NO; Access: BOAT
National Register Status: NONE

REPLACED LIGHTSHIPS NO. 57, NO. 56, AND NO. 99

GROSSE ILE NORTH CHANNEL RANGE FRONT LIGHT

Location: DETROIT RIVER; U.S.C.G. District: 9
Year Station Established: 1894

Year Existing Historic Tower Constructed: 1906
Is the Light Operational? NO
Deactivated: 1963
Foundation Materials: CONCRETE PIER
Construction Materials: WOOD
Markings/Patterns: WHITE
Shape: OCTAGONAL

Relationship to Other Structures: SEPARATE
Tower Height: 40

Owner/Manager: GROSSE ILE HISTORICAL SOCIETY
Current Use: UNKNOWN
Open to the Public? UNKNOWN
National Register Status: NONE

REAR RANGE LIGHT LOST BEFORE 1940

GULL ROCK LIGHT

Location: WEST OF MANITOU ISLAND/LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: COPPER HARBOR; County: KEWEENAW
Year Station Established: 1867; Year Automated:

Year Existing Historic Tower Constructed: 1867
Is the Light Operational? YES
Foundation Materials: MASONRY
Construction Materials: BRICK
Markings/Patterns: YELLOW
Shape: SQUARE
Relationship to Other Structures: ATTACHED
Tower Height: 46; Height of Focal Plane: 50
Original Optic: FOURTH ORDER, FRESNEL (1867)
Present Optic: 250 MM

Is there an Existing Fog Signal Building? UNKNOWN
Is there an Existing Keepers Quarters? YES
Year Constructed: 1867; Number of Stories: 2
Architectural Style: ATTACHED TO TOWER
Construction Materials: BRICK

Other Structures:
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Open to the Public? NO; Access: BOAT
National Register Status: LISTED: GULL ROCK LIGHT STATION (U.S. COAST GUARD LIGHTHOUSES AND LIGHT STATIONS ON THE GREAT LAKES TR)

Construction Materials: BRICK

Other Structures:
Owner/Manager: U.S. COAST GUARD
Current Use: STATE PARK
Access: HOLLAND STATE PARK

National Register Status: LISTED: HOLLAND HARBOR LIGHTHOUSE
On State List/Inventory? YES; Year Listed: 1986

1936 WOODEN TOWER ADDED TO 1907 BRICK KEEPERS DWELLING AND COVERED W/STEEL PLATE; ORIGINAL LENS GIVEN TO THE NETHERLANDS MUSEUM
MICHIGAN

HURON ISLAND LIGHT

Location: WEST HURON ISLAND/LAKE SUPERIOR; U.S.C.G. District: 9
Nearest City: SKANEE; County: MARQUETTE

Year Station Established: 1868
Year Automated: 1972

Year Existing Historic Tower Constructed: 1877
Is the Light Operational? YES
Foundation Materials: SURFACE ROCK
Construction Materials: GRANITE/BRICK
Markings/Patterns: NATURAL W/WHITE LANTERN
Shape: SQUARE
Relationship to Other Structures: ATTACHED
Tower Height: 39
Height of Focal Plane: 197
Original Optic: KEROSENE LAMP (1868)
Present Optic: ELECTRIC OSCILLATOR LIGHT (1961)

Is there a Newer Tower? NO

Is there an Existing Fog Signal Building? NO; Year Constructed: 1868; Number of Stories: 1.5
Architectural Style: ATTACHED
Construction Materials: GRANITE

Owner/Manager: U.S. COAST GUARD PERMIT TO FISH & WILDLIFE SERVICE
Current Use: ACTIVE AID TO NAVIGATION IN NATIONAL WILDLIFE REFUGE
Open to the Public? NO; Access: BOAT TO SENEY NATIONAL WILDLIFE REFUGE

National Register Status: LISTED: HURON ISLANDS LIGHTHOUSE
ORIGINALLY A LIFEBOAT STATION

ISLE ROYALE LIGHT

Location: MENAGERIE ISLAND/LAKE SUPERIOR
U.S.C.G. District: 9
Nearest City: HOUGHTON; County: KEWEENAW

Year Station Established: 1875; Year Automated: 1913

Year Existing Historic Tower Constructed: 1875
Is the Light Operational? YES
Foundation Materials: ROCK
Construction Materials: RED SANDSTONE
Markings/Patterns: RED
Shape: OCTAGONAL

Relationship to Other Structures: ATTACHED
tower height: 61; Height of Focal Plane: 72
Original Optic: FOURTH ORDER, FRESNEL (1875)
Present Optic:

Is there a Newer Tower? NO
Is there an Existing Fog Signal Building? NO

Is there an Existing Keepers Quarters? YES
Year Constructed: 1875; Number of Stories: 2
Architectural Style: ATTACHED TO TOWER
Construction Materials: RED SANDSTONE
KEWEENAW WATERWAY LOWER ENTRANCE LIGHT

Location: PORTAGE RIVER ENTRANCE/PORTAGE LAKE; U.S.C.G. District: 9
Year Station Established: 1868; Year Automated: 1973

Year Existing Historic Tower Constructed: 1920
Is the Light Operational? YES
Foundation Materials: CRIB
Construction Materials: BRICK/REINFORCED CONCRETE
Markings/Patterns: WHITE
Shape: OCTAGONAL
Relationship to Other Structures: SEPARATE
Tower Height: 31; Height of Focal Plane: 68

Original Optic: FOURTH ORDER
Present Optic: FOURTH ORDER
Other Structures: RADIOBEACON
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Open to the Public? NO; Access: PIERHEAD
National Register Status: NONE
ALSO KNOWN AS PORTAGE LAKE LOWER ENTRANCE LIGHT

LANSING SHOAL LIGHT

Location: WESTERN SHORE LAKE MICHIGAN
U.S.C.G. District: 9
Year Station Established: 1900; Year Automated: 1976

Year Existing Historic Tower Constructed: 1928
Is the Light Operational? YES
Foundation Materials: CRIB
Construction Materials: REINFORCED CONCRETE/STEEL
Markings/Patterns: NATURAL
Shape: SQUARE
Relationship to Other Structures: INTEGRAL
Tower Height: 59; Height of Focal Plane: 69
Original Optic: THIRD ORDER, FRESNEL
Present Optic: 190 MM, SOLAR POWERED

Is there an Existing Keepers Quarters? YES
Year Constructed: 1928; Number of Stories: 3
Architectural Style: INTEGRAL
Construction Materials: REINFORCED CONCRETE
Owner/Manager: U.S. COAST GUARD
Current Use: ACTIVE AID TO NAVIGATION
Open to the Public? NO; Access: BOAT
National Register Status: NONE
SERVED BY LIGHTSHIPS NO. 55 AND NO. 98 1900-1928; THIRD ORDER LENS TO BE DISPLAYED IN LANSING
LITTLE POINT SABLE LIGHT

Location: EAST SHORE OF LAKE MICHIGAN
U.S.C.G. District: 9
Nearest City: MEARS; County: OCEANA

Year Station Established: 1874; Year Automated: 1955

Year Existing Historic Tower Constructed: 1874
Is the Light Operational? YES
Foundation Materials: WOOD PILINGS
Construction Materials: BRICK
Markings/Patterns: RED BRICK/ORG. WHITE
Shape: CONICAL
Relationship to Other Structures: ATTACHED
Tower Height: 107; Height of Focal Plane: 108
Original Optic: THIRD ORDER, FRESNEL (1874)
Present Optic: THIRD ORDER

Is there a Newer Tower? NO
Is there an Existing Fog Signal Building? NO
Is there an Existing Keepers Quarters? NO (DESTROYED)

Other Structures: NO LONGER STANDING

Owner/Manager: U.S. COAST GUARD (TOWER)/SILVER LAKE STATE PARK (GROUNDS); Current Use: STATE PARK; Open to the Public? YES; GROUNDS ONLY
Access: SILVER LAKE STATE PARK/RT. B15; Public Phone: 616-873-3083

National Register Status: LISTED: LITTLE SABLE POINT LIGHT STATION (U.S. COAST GUARD LIGHTHOUSES AND LIGHT STATIONS ON THE GREAT LAKES TR)

OLDEST BRICK TOWER ON GREAT LAKES; IMPORTANT ROLE IN GROWTH OF SHIPPING ON LAKE MICHIGAN

LITTLE TRAVERSE (HARBOR POINT) LIGHT

Location: LAKE MICHIGAN; U.S.C.G. District: 9
Nearest City: HARBOR SPRINGS; County: EMMET
Year Station Established: 1884

Year Existing Historic Tower Constructed: 1884
Is the Light Operational? NO
Deactivated: 1963
Foundation Materials: CUT STONE
Construction Materials: RED BRICK
Markings/Patterns: NATURAL W/BLACK LANTERN
Shape: SQUARE
Relationship to Other Structures: ATTACHED
Tower Height: 40; Height of Focal Plane:
Original Optic: FOURTH ORDER, FRESNEL (1884)
Present Optic: FOURTH ORDER, FRESNEL (1884)

Is there a Newer Tower? YES; Year Constructed: 1963
Construction Materials: STEEL
Markings/Patterns: WHITE; Shape: SKELETAL
