National Park System

The National Park System of the United States, now in the early years of its second century, comprises nearly 320 areas covering some 76 million acres in 49 States, the District of Columbia, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming "as a public park or pleasuring ground for the benefit and enjoyment of the people" and placed it "under exclusive control of the Secretary of the Interior." The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the Federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of the Department of Agriculture. No single agency provided unified management of the varied Federal parklands.

In an Act signed on August 25, 1916, Congress established in the Department of the Interior the National Park Service to provide cohesive administration of such areas under the Department's jurisdiction. The Act says: The service thus established shall promote and regulate the use of the Federal areas known as national parks, monuments and reservations . . . by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.

A Presidential executive order in 1933 transferred 63 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.
Congress declared in the General Authorities Act of 1970 "that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region . . . and that it is the purpose of this Act to include all such areas in the System. . . ."

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under Federal jurisdiction. The Secretary of the Interior is usually asked by Congress for his recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises him on possible additions to the System and policies for its management.

**Nomenclature of Park Service Areas**

The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park.

Although some titles are self-explanatory, others have been used in many different ways. For example, the title "national monument" has been given to great natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, Congress and the National Park Service have attempted, with some success, to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estuary, or river systems; they may contain "windows" on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns; and they may be habitats of abundant or rare wildlife and plantlife.
Generally, a **national park** covers a large area. It contains a variety of resources and encompasses sufficient land or water to ensure adequate protection of the resources.

A **national monument** is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first **national preserves**. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values.

Preserving shoreline areas and off-shore islands, the **national lakeshores** and **national seashores** focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

**National rivers** and **wild and scenic riverways** preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered by man. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

Although best known for its great scenic parks, more than half the areas of the National Park System preserve places and commemorate persons, events, and activities important in the Nation's history. These range from archaeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, **national historic site** has been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—**national military park**, **national battlefield park**, **national battlefield site**, and **national battlefield**—has been used for areas associated with American military history. But other areas such as **national monuments** and **national historical parks** may include features associated with military history. **National historical parks** are commonly areas of greater physical extent and complexity than national historic sites.
The title national memorial is most often used for areas that are primarily commemorative. But they need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas administered by National Capital Region whose titles do not include the words national memorial are nevertheless classified as memorials. These are John F. Kennedy Center for the Performing Arts, Lincoln Memorial, Lyndon Baines Johnson Memorial Grove on the Potomac, Theodore Roosevelt Island, Thomas Jefferson Memorial, and the Washington Monument—all in the District of Columbia.

Originally, national recreation areas in the Park System were units surrounding reservoirs impounded by dams built by other Federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service, U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed point-to-point travel. Besides the areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

Two areas of the National Park System have been set aside primarily as sites for the performing arts. These are Wolf Trap Farm Park for the Performing Arts, Va., America's first such national park, and the John F. Kennedy Center for the Performing Arts, D.C. Two historical areas, Ford's Theatre National Historic Site, D.C., and Chamizal National Memorial, Tex., also provide facilities for the performing arts.

Designation of Wilderness Areas

In the Wilderness Act of 1964, Congress directed three Federal agencies, including the National Park Service, to study certain lands within their jurisdiction to determine the suitability of these lands for inclusion in the National Wilderness Preservation System.
By subsequent legislation, Congress has designated wilderness areas in many units of the National Park System. This designation (noted in this booklet in the listing by States) does not remove wilderness lands from the parks. But it does ensure that they will be managed to retain their "primeval character and influence, without permanent improvements or human habitation. . . ."

The Act provides, generally, that "there shall be no commercial enterprise and no permanent road within any wilderness area . . . and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motorboats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and similar pursuits.

National Monuments in Alaska

On December 1, 1978, President Carter exercised his authority under the Antiquities Act of 1906 to proclaim 15 new national monuments in Alaska and substantial additions to two others. At this writing, legislation is now pending in Congress which may result in substantial revisions of the boundaries established by the proclamations and redesignation of many of the monuments as national parks, wild and scenic rivers or other types of parks.

Those monuments which were designated for National Park Service administration are included in this book. The Forest Service administers Misty Fjords and Admiralty Island National Monuments—the first time since 1933 that the Forest Service has had direct responsibility for any national monuments. The Fish and Wildlife Service will administer the two remaining monuments proclaimed by President Carter—Becharof and Yukon Flats.

Parks in the Nation's Capital

As the Nation's Capital, Washington has a unique park system. Most of the public parks are administered by the Federal Government through National Capital Region of the National Park Service.

National Capital Region has inherited duties originally assigned to three Federal Commissioners appointed by President Washington in 1790. The city's parks were administered by a variety of Federal
agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the Federal holdings, although the District of Columbia also operates parks, playgrounds, and recreational facilities.

National Capital Region also administers several National Park System units in Maryland, Virginia, and West Virginia, which are shown in this booklet in the listing by States.
**Administration**

The National Park Service administers the System through nine Regional Offices and an Area office for Alaska. The addresses of these offices and their areas of responsibility follow:

¹Acreages as of June 30, 1979.

²Administered in conjunction with associated National Park System units; not listed separately in this publication.
Stone House, shown here in a historic photograph, was used as a field hospital during both Battles of Manassas. Today it is part of Manassas National Battlefield Park in Virginia.
**Alabama**

Horseshoe Bend National Military Park
Route 1, Box 103
Daviston, AL 36256

Gen. Andrew Jackson’s forces broke the power of the Creek Indian Confederacy and opened Alabama and other parts of the Old Southwest to settlement after fierce fighting here Mar. 27, 1814, in the battle on the Tallapoosa River.

Authorized July 25, 1956.

Acreage—2,040.00, all Federal.

Natchez Trace Parkway (See Mississippi)

Russell Cave National Monument
Route I, Box 175
Bridgeport, AL 35740

An almost continuous archeological record of human habitation from at least 7000 B.C. to about A.D. 1650 is revealed in this cave.

Acreage—310.45, all Federal.

Tuskegee Institute National Historic Site
P.O. Box 1246
Tuskegee Institute, AL 36088

Booker T. Washington founded this college for black Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington’s home, and the George Washington Carver Museum. An antebellum mansion serves as park headquarters and visitor center.

**Alaska**

Aniakchak National Monument
c/o Alaska Area Office
National Park Service
540 West 5th Avenue, Room 202
Anchorage, AK 99501

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1933. The crater includes lava flows, cinder cones, and explosion pits, as well as the aptly named Surprise Lake, which cascades through a 1500-foot gash in the crater wall. NO FEDERAL FACILITIES.

Acreage—364,000 Federal: 350,000 Nonfederal: 14,000.

Bering Land Bridge National Monument
c/o Alaska Area Office
National Park Service
540 West 5th Avenue, Room 202
Anchorage, AK 99501

Located on the Seward Peninsula in northwest Alaska, the monument is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migrating birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. NO FEDERAL FACILITIES.

Acreage—2,848,000 Federal: 2,590,000 Nonfederal: 258,000.

Cape Krusenstern National Monument
c/o Alaska Area Office
National Park Service
540 West 5th Avenue, Room 202
Anchorage, AK 99501

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. Older sites are located inland, along the foothills. The monument includes a representative example of the arctic coastline along the Chukchi Sea. NO FEDERAL FACILITIES.

Acreage—677,000 Federal: 560,000 Nonfederal: 117,000.
Adjacent to Mount McKinley National Park, this monument includes the southern flanks of the mountain with its massive glaciers, the beautiful Cathedral Spires, and critical wildlife habitats. "Denali" is the ancient Athapascan Indian name for the mountain, meaning “the great one.” Proclaimed Dec. 1, 1978.
Acreage—3,993,000 Federal: 3,890,000 Nonfederal: 103,000.

Lying entirely north of the Arctic Circle, the monument includes a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, the monument, which is the Nation's second largest unit of the National Park System, is characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. The forested southern slopes contrast to the barren northern reaches of the monument at the edge of Alaska's “north slope.” NO FEDERAL FACILITIES. Proclaimed Dec. 1, 1978.
Acreage—9,432,000 Federal: 8,220,000 Nonfederal: 1,212,000.

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including brown and black bear, mountain goats, whales, seals, and eagles can be found within the park. Also included are Mount Fairweather, the highest peak in southeast Alaska, and the U.S. portion of the Alsek River. Proclaimed Feb. 25, 1925. Boundary changes: April 18, 1939; March 31, 1955; December 1, 1978.
Acreage—3,355,269.49 Federal: 3,355,071.54 Nonfederal: 197.95.
Land Area: 2,743,429.40.

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon which spawn in the monument's lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1917, Novarupta Volcano erupted violently, forming the ash filled “Valley of Ten Thousand Smokes” where steam rose from countless fumaroles in the ash. Today only a few active vents remain. Proclaimed Sept. 24, 1918. Boundary changes: April 24, 1931; Aug. 4, 1942; Jan. 20, 1969; Dec. 1, 1978.
Acreage—4,293,125.74 Federal: 4,159,096.73 Nonfederal: 134,029.01.

The monument, within 20 miles of Seward, includes one of the four major ice caps in the U.S., the Harding Icefield. Glaciers radiating from the 700-square-mile icefield continue to cut deep glacial valleys, many ending at tidewater. The coastal fjords and associated offshore islands are remnants of “drowned” mountains. Here a rich varied rainforest is home to sea lions, sea otters, seals, and tens of thousands of breeding birds, including puffins, murres, and auklets. NO FEDERAL FACILITIES. Proclaimed Dec. 1, 1978.
Acreage—672,000 Federal: 570,000 Nonfederal: 102,000.

Historic buildings in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park. LIMITED FEDERAL FACILITIES. Authorized June 30, 1976.
Acreage—13,270.49 Federal: 11,771.33 Nonfederal: 1,499.16.
Embracing the central valley of the Kobuk River, the monument, located entirely north of the Arctic Circle, includes a blend of biological, geological, and cultural resources. Here, in the northmost extent of the boreal forest, a rich array of arctic wildlife can be found, including critical caribou migration routes, grizzly and black bear, wolf, and fox. The 25-square-mile Great Kobuk Sand Dunes rise 100 feet above the surrounding arctic terrain, just south of the placid Kobuk River. Archeological sites revealing more than 10,000 years of human occupation, are among the most significant sites known in the Arctic. NO FEDERAL FACILITIES. Proclaimed Dec. 1, 1978.

Acreage—1,764,000 Federal: 1,710,000 Nonfederal: 54,000.

Located in the heart of the Chigmit mountains along the western shore of Cook Inlet, the park contains great geologic diversity, including jagged peaks, granite spires, glaciers, and two symmetrical active volcanoes. More than a score of glacial carved lakes rim the mountain mass. More than 40 miles long, Lake Clark is not only the largest lake here, but it is also the headwaters for the most important spawning ground in North America. Merrill and Lake Clark Passes cut through the mountains and are lined by dozens of glaciers and hundreds of waterfalls which cascade over rocky ledges. While there are no federal facilities, this area, which is across Cook Inlet from Anchorage, provides major recreation potential and is already popular with summer hikers and fishermen.

Acreage—2,930,000 Federal: 2,500,000 Nonfederal: 43,000.

Mount McKinley, at 20,320 feet, is the highest mountain in North America. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, timber wolves, and other wildlife are highlights of this national park.

Acreage—1,939,492.80, all Federal.

The Noatak River basin is the largest mountain-ringed river basin in the Nation still virtually unaffected by man. The monument includes landforms of great scientific interest, including the 65-mile-long Grand Canyon of the Noatak, a transition zone and migration route for plants and animals between subarctic and arctic environments, and an array of flora which is among the most diverse anywhere in the earth’s northern latitudes. Hundreds of archeological sites and rich wildlife populations add to the significance of the area. NO FEDERAL FACILITIES.

Acreage—5,800,000, all Federal.

The site of the 1804 fort and battle which marked the last major Tlingit Indian resistance to Russian colonization is preserved here. Tlingit totem poles are exhibited.

Acreage—107.71 Federal: 107.07 Nonfederal: 0.64.

The Chugach, Wrangell, and St. Elias mountain ranges converge here in what is often referred to as the “mountain kingdom of North America.” The largest unit of the National Park System, and a day’s drive east of Anchorage, the monument includes the continent's largest assemblage of glaciers and the greatest collection of peaks above 16,000 feet, including Mount St. Elias. At 18,008 feet it is the second highest peak in the U.S. Adjacent to Canada’s Kluane National Park, the monument is characterized by its remote mountains, valleys, and wild rivers, all rich in their concentrations of wildlife. NO FEDERAL FACILITIES.

Acreage—11,923,000 Federal: 10,950,000 Nonfederal: 973,000.
Yukon-Charley National Monument
Located along the Canadian border in central Alaska, the monument preserves 115 miles of the 1800-mile Yukon River and the entire 88-mile Charley River basin. Numerous old cabins and relics are reminders of the importance of the Yukon River during the 1898 gold rush. Paleontological and archeological sites here add much to our knowledge of man and his environment thousands of years ago. Peregrine falcons nest in the high bluffs overlooking the river, while the rolling hills that make up the monument are home to a rich array of wildlife. The Charley, clean and clear, is considered by many to be the best whitewater river in Alaska. NO FEDERAL FACILITIES.
Acreage—2,520,000 Federal: 1,720,000 Nonfederal: 800,000.

Arizona

Canyon de Chelly National Monument
At the base of sheer red cliffs and in caves in canyon walls are ruins of Indian villages built between A.D. 350 and 1300. Modern Navajo Indians live and farm here.
Acreage—83,840.00, all Nonfederal.

Casa Grande National Monument
Perplexing ruins of a massive four-story building, constructed of high-lime desert soil by Indians who farmed the Gila Valley 600 years ago, raise many unanswered questions for modern man.
Acreage—472.50, all Federal.

Chiricahua National Monument
The varied rock formations here were created millions of years ago by volcanic activity, aided by erosion.

Coronado National Memorial
Our Hispanic heritage and the first European exploration of the Southwest, by Francisco Vasquez de Coronado in 1540–42, are commemorated here, near the point where Coronado's expedition entered what is now the United States.
Acreage—4,674.16, all Federal.

Fort Bowie National Historic Site
Established in 1862, this fort was the focal point of military operations against Geronimo and his band of Apaches. The ruins can be reached only by trail.
Acreage—1,000.00 Federal: 999.45 Nonfederal: 0.55.

Glen Canyon National Recreation Area
(See Utah)
The park, focusing on the world-famous Grand Canyon of the Colorado River, encompasses the entire course of the river and adjacent uplands from the southern terminus of Glen Canyon National Recreation Area to the eastern boundary of Lake Mead National Recreation Area. The forces of erosion have exposed an immense variety of formations which illustrate vast periods of geological history.

Acreage—1,218,375.24 Federal: 1,189,636.18 Nonfederal: 28,739.06.

Preserved here are the archeological remains of the Hohokam culture. Hohokam is a Pima Indian word meaning "those who have gone." NOT OPEN TO THE PUBLIC.

Acreage—1,690.00, all Nonfederal.

This still active trading post illustrates the influence of reservation traders on the Indians' way of life.

Acreage—160.09, all Federal.

One of the best-preserved cliff dwellings in the United States, this 5-story, 20-room castle is 90 percent intact. Montezuma Well is also of archeological and geological interest.

Betatakin, Keet Seel, and Inscription House are three of the largest and most elaborate cliff dwellings known.

Acreage—360.00, all Federal.

Sonoran Desert plants and animals found nowhere else in the United States are protected here, alongside traces of a historic trail, Camino del Diablo.

Acreage—330,688.86 Federal: 329,199.10 Nonfederal: 1,489.76 Wilderness area: 312,600.

Trees that have petrified, or changed to multicolored stone, Indian ruins and petroglyphs, and portions of the colorful Painted Desert are features of the park.

Pipe Spring National Monument
Moccasin, AZ 86022
The historic fort and other structures, built here by Mormon pioneers, memorialize the struggle for exploration and settlement of the Southwest. Proclaimed May 31, 1923.
Acreage—40.00, all Federal.

Saguaro National Monument
P.O. Box 17210
Tucson, AZ 85731
Acreage—83,576.07 Federal: 81,919.08 Nonfederal: 1,656.99
Wilderness area: 71,400.

Sunset Crater National Monument
Route 3, Box 149
Flagstaff, AZ 86001
Its upper part colored as if by sunset glow, this volcanic cinder cone with summit crater was formed just before A.D. 1100. Proclaimed May 26, 1930; transferred from Forest Service, U.S. Dept. of Agriculture, Aug. 10, 1933.
Acreage—3,040.00, all Federal.

Tonto National Monument
P.O. Box 707
Roosevelt, AZ 85545
These well-preserved cliff dwellings were occupied during the 13th and 14th centuries by Salado Indians who farmed in the Salt River Valley. Proclaimed Dec. 19, 1907; transferred from Forest Service, U.S. Dept. of Agriculture, Aug. 10, 1933. Boundary change: Apr. 1, 1937

The park system of the Nation's Capital comprises parks, parkways, and reservations in the Washington metropolitan area, including such properties as the Battleground National Cemetery, the President's Parks (Lafayette Park north of the White House and the Ellipse south of the White House), the parks flanking the Great Falls of the Potomac, a variety of military fortifications, and green areas.

When Congress established a permanent National Capital in 1790, the city's Federal Commissioners were given the power "to purchase or accept such quantity of land as the President shall deem proper for the use of the United States." Under this authority the Commissioners purchased Washington's first 17 public reservations and accepted donations of other lands required for the street system of L'Enfant's plan. Today more than 300 park units derive from these lands. Office of Public Buildings and Public Parks of the National Capital was abolished and public reservations were transferred to National Capital Parks, National Park Service, Aug. 10, 1933.

For weary travelers on the Oregon Trail, Chimney Rock was a momentous landmark, for it was a visible sign that a good deal of the long journey was now behind them. Today this historic natural feature is a national historic site owned by the State of Nebraska.
Related Areas

Besides the National Park System three groups of areas exist—Affiliated Areas, the Wild and Scenic Rivers System, and the National Trail System—that are closely linked in importance and purpose to those areas already managed by the National Park Service. Because these units preserve important segments of the Nation's heritage, yet most are not officially recognized as units of the National Park System, they are given special recognition in this section.

Affiliated Areas

In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither Federally owned nor directly administered by the National Park Service but which utilize NPS resources.

The Affiliated Areas comprise a variety of properties in the United States and Canada that preserve significant resources outside the National Park System. Some of these properties have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial assistance from the National Park Service.

Wild and Scenic Rivers System

Public Law 90–542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment.

Components of the system, or portions of component rivers, may be designated as wild, scenic, or recreational rivers. Rivers are classified according to the natural qualities they possess and the evidence, as viewed from the river, of man's presence in the area. Thus, in a wild river there is little evidence of man's presence, the river is free of impoundments (dams) and generally inaccessible except by trail. A scenic river is one with relatively primitive shorelines, largely undeveloped, but accessible in places by road. A recreational river has more development along its shores, is readily accessible by road or railroad, and, may have undergone some impoundment in the past.

Once a river area is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency—local, State, or Federal—is to preserve or enhance the qualities which qualified the river for inclusion within the system. Recreational use of any river in the system must be compatible with the preservation of the resources.

State rivers and streams may become units of the Wild and Scenic Rivers System when established under State laws and developed with river management plans acceptable to the Secretary of the Interior. The Secretary may then designate the appropriate river area as a unit of the system.

Federally managed components of the system are designated by Acts of Congress. Usually, Congress first requires, by law, a detailed study to determine the qualification of a river area for the system, then makes the designation decision based on the findings of the study. Numerous rivers have been designated for study, some of which may never become components of the Wild and Scenic Rivers System.
Including the Allagash and several interconnected lakes in northern Maine, this is a major recreation resource. Authorized: July 19, 1970. Mileage: 95. Acreage—22,840, all Nonfederal.

The northern portion of the lower St. Croix is a unit of the National Park System. The southern portion, jointly administered by the states of Minnesota and Wisconsin, is a wide, gently flowing river which ends at the Mississippi River. Authorized: June 17, 1976. Mileage: 25. Acreage—6,065, all Nonfederal.

National Trail System

A national system of trails was authorized by Public Law 90–543 also on October 2, 1968. Under its terms, national scenic trails were authorized to provide access to, travel within, and enjoyment and appreciation of open-air, outdoor areas of the Nation. A decade later, on November 10, 1978, the law was amended to provide recognition of historic trails marking routes of commerce, exploration, and migration in America.

Generally, the National Scenic Trails are to be protected by Federal, State, and local agencies in such fashion as to assure public recreational access to the trails and to preserve their natural settings and to protect them from commercial or residential development which would disrupt public use of the trails.

The National Historic Trails are simply designated to recognize historically important routes. Where these trails cross Federal lands, the managing agency is responsible for marking and preserving the trail routes. State and local agencies may choose to take an active management role on those parts of the trails outside of Federal jurisdiction. No Federal funds will be spent to acquire additional lands for the historic trails without specific approval from Congress.

High sandstone cliffs along the shoreline of Pictured Rocks National Lakeshore in Michigan are viewed from a boat in Lake Superior.
This picture was taken in 1936 and shows Hettie Walker knitting a pair of socks. Hettie and her four sisters lived on land that had been in their family for several generations. When Great Smoky Mountains National Park was created, the sisters sold their land to the Park Service and received a lifetime lease and lived at the homeplace until the last one died in 1964. The heritage and way of life of the Walker sisters and their neighbors in the Smokies is of growing interest to people who visit the Southern Appalachians today.

The Grand Canyon's North Rim is about 1,000 feet higher than its companion to the south. The higher elevation produces a dramatically different climate with winters often seeing 10 feet of snow on the ground. The North Rim is more difficult to get to, but a visit here and to the South Rim, too, will give you a full and complete picture of the grandeur of this national park.
As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
