National Park Service, U.S. Department of the Interior

As the nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of

life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under United States administration.

Grand Canyon National Park

National Park System

Lincoln Memorial

The National Park System of the United States, now in the early years of its second century, comprises 337 areas covering some 79 million acres in 49 States, the District of Columbia, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming "as a public park or pleasuring ground for the benefit and enjoyment of the people" and placed it "under exclusive control of the Secretary of the Interior." The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of the Department of Agriculture. No single agency provided unified management of the varied federal parklands.

In an Act signed on August 25, 1916, Congress established in the Department of the Interior the National Park Service to provide cohesive administration of such areas under the Department's jurisdiction. The Act says: "The service thus established shall promote and regulate the use of the Federal areas known as national parks, monuments and reservations . . . by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

An Executive Order in 1933 transferred 63 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's

truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.

Congress declared in the General Authorities Act of 1970 “that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region . . . and that it is the purpose of this Act to include all such areas in the System. . . .”

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under federal jurisdiction. The Secretary of the Interior is usually asked by Congress for his recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises him on possible additions to the System and policies for its management.

Nomenclature of Park System Areas

The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park.

Although some titles are self-explanatory, others have been used in many different ways. For example, the title “national monument” has been given to great natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, Congress and the National Park Service have attempted, with some success, to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estu-

ary, or river systems; they may contain “windows” on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns, and they may be habitats of abundant or rare wildlife and plantlife.

Generally, a **national park** covers a large area. It contains a variety of resources and encompasses sufficient land or water to ensure adequate protection of the resources.

A **national monument** is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first **national preserves**. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values.

Preserving shoreline areas and off-shore islands, the **national lakeshores** and **national seashores** focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

National rivers and **wild and scenic riverways** preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered by man. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

National scenic trails are generally long-distance footpaths winding through areas of natural beauty.

Although best known for its great scenic parks, more than half the areas of the National Park System preserve places and commemorate persons, events, and activities important in the Nation's history. These range from archeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, **national historic site** has

been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—**national military park**, **national battlefield park**, **national battlefield site**, and **national battlefield**—has been used for areas associated with American military history. But other areas such as **national monuments** and **national historical parks** may include features associated with military history. **National historical parks** are commonly areas of greater physical extent and complexity than national historic sites. The lone **international historic site** refers to a site relevant to both U.S. and Canadian history.

The title **national memorial** is most often used for areas that are primarily commemorative. But they need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas administered by National Capital Region whose titles do not include the words national memorial are nevertheless classified as memorials. These are John F. Kennedy Center for the Performing Arts, Lincoln Memorial, Lyndon Baines Johnson Memorial Grove on the Potomac, Theodore Roosevelt Island, Thomas Jefferson Memorial, and the Washington Monument—all in the District of Columbia.

Originally, **national recreation areas** in the Park System were units surrounding reservoirs impounded by dams built by other federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service, U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed travel. Besides the areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

Two areas of the National Park System have been set aside primarily as sites for the **performing arts**. These are Wolf Trap Farm Park for the Performing Arts, Virginia, America's first such national park, and the John F. Kennedy Center for the Performing Arts, D.C. Two historical areas, Ford's Theatre National Historic Site, D.C., and Chamizal National Memorial, Texas, also provide facilities for the performing arts.

Designation of Wilderness Areas

In the Wilderness Act of 1964, Congress directed three federal agencies, including the National Park Service, to study certain lands within their jurisdiction to determine the suitability of these lands for inclusion in the National Wilderness Preservation System.

By subsequent legislation, Congress has designated **wilderness areas** in many units of the National Park System. This designation (noted in this booklet in the listing by states) does not remove wilderness lands from the parks, but it does ensure that they will be managed to retain their "primeval character and influence, without permanent improvements or human habitation. . . ."

The Act provides, generally, that "there shall be no commercial enterprise and no permanent road within any wilderness area . . . and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motorboats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and similar pursuits.

Parks in the Nation's Capital

As the Nation's Capital, Washington has a unique park system. Most of the public parks are administered by the Federal Government through National Capital Region of the National Park Service.

National Capital Region has inherited duties originally assigned to three Federal Commissioners appointed by President George Washington in 1790. The city's parks were administered by a variety of federal agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the federal holdings, although

Regional Offices

the District of Columbia also operates parks, playgrounds, and recreational facilities.

National Capital Region also administers several National Park System units in Maryland, Virginia, and West Virginia, which are shown in this booklet in the listing by states.

Large Additions in Alaska

The acreage of the National Park System has more than doubled during the past few years because of one factor—the huge additions made in Alaska. On June 30, 1977, the size of the Park System was approximately 31.3 million acres. On December 1, 1978, President Jimmy Carter exercised his authority under the Antiquities Act of 1906 to proclaim as units of the National Park System 11 new national monuments in Alaska and to make substantial additions to two existing monuments. The Alaska National Interest Lands Conservation Act, which became law on December 2, 1980, altered boundaries of those units and redesignated most of them as national parks and national preserves. Following that enactment, the acreage of the National Park System stood at approximately 79 million, with about 47.1 million of the new additions in Alaska.

Related Areas

Besides the National Park System three groups of areas exist—Affiliated Areas, the Wild and Scenic Rivers System, and the National Trails System—that are closely linked in importance and purpose to those areas managed by the National Park Service. Except for those wild and scenic rivers administered by the National Park Service, these areas are not units of the National Park System, yet they preserve important segments of the Nation's heritage. They are, therefore, given recognition in Part 3 of this book.

Descriptive Listing of National Park System Areas

Manassas National Battlefield Park

Alabama

**Horseshoe Bend
National Military Park**
Route 1, Box 103
Daviston, AL 36256

On March 27, 1814, at the "horseshoe bend" in the Tallapoosa River, Gen. Andrew Jackson's forces broke the power of the Upper Creek Indian Confederacy and opened large parts of Alabama and Georgia for settlement.
Authorized July 25, 1956.
Acreage—2,040, all federal.

**Natchez Trace
National Scenic Trail**
(See Mississippi)

Natchez Trace Parkway
(See Mississippi)

**Russell Cave
National Monument**
Route 1, Box 175
Bridgeport, AL 35740

An almost continuous archeological record of human habitation from at least 7000 BC to about AD 1650 is revealed in this cave.
Proclaimed May 11, 1961.
Acreage—310.45, all federal.

**Tuskegee Institute
National Historic Site**
P.O. Drawer 10
Tuskegee Institute, AL
36088

Booker T. Washington founded this college for black Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington's home, and the George Washington Carver Museum, which serves as park headquarters and visitor center. The college is still an active institution that owns most of the property within the national historic site.
Authorized Oct. 26, 1974.
Acreage—74.39 Federal: 24.09 Nonfederal: 50.30.

Alaska

Alagnak Wild River
c/o Katmai National Park
and Preserve, P.O. Box 7
King Salmon, AK 99613

The Alagnak River flows from Kukaklek Lake in Katmai National Preserve and offers 69 miles of outstanding white-water floating. The river is also noted for abundant wildlife and sport fishing for five species of salmon. Portions of the main stem lie outside and westward of Katmai.
Established: Dec. 2, 1980. Length: 69 miles.
Acreage—24,038, all federal.

**Aniakchak National
Monument and Preserve**
P.O. Box 7
King Salmon, AK 99613

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1931. The crater includes lava flows, cinder cones, and explosion pits, as well as Surprise Lake, source of the Aniakchak River, which cascades through a 1,500-foot gash in the crater wall. The site contains the Aniakchak Wild River.
NO FEDERAL FACILITIES.
Proclaimed as Aniakchak National Monument Dec. 1, 1978; established as a national monument and preserve Dec. 2, 1980.
Acreage—National monument: 139,500, all federal. National Preserve: 475,500 Federal: 470,000 Nonfederal: 5,500.

**Bering Land Bridge
National Preserve**
P.O. Box 220, Nome, AK
99762

Located on the Seward Peninsula in northwest Alaska, the preserve is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migratory birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. **NO FEDERAL FACILITIES.**

Proclaimed as Bering Land Bridge National Monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980.

Acreege—2,770,000 Federal: 2,507,000 Nonfederal: 263,000.

**Cape Krusenstern
National Monument**
P.O. Box 287
Kotzebue, AK 99752

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. Older sites are located inland, along the foothills. The monument includes a representative example of the arctic coastline along the Chukchi Sea. **NO FEDERAL FACILITIES.**

Proclaimed Dec. 1, 1978. Boundary change: Dec. 2, 1980.

Acreege—660,000 Federal: 540,000 Nonfederal: 120,000.

**Denali
National Park and Preserve**
P.O. Box 9
McKinley Park, AK 99755

The park contains North America's highest mountain, 20,320-foot Mount McKinley. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, and timber wolves are other highlights of this national park and preserve.

Established as Mt. McKinley National Park Feb. 26, 1917. Separate Denali National Monument proclaimed Dec. 1, 1978. Both incorporated into and established as Denali National Park and Preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Other boundary changes: Jan. 30, 1922; March 19, 1932. Designated a Biosphere Reserve 1976.

Acreege—National park: 4,700,000, all federal. National preserve: 1,330,000 Federal: 1,300,000 Nonfederal: 30,000. Wilderness area: 1,900,000.

**Gates of the Arctic
National Park and Preserve**
P.O. Box 74680
Fairbanks, AK 99707

Lying entirely north of the Arctic Circle, the park and preserve includes a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, this second largest unit of the National Park System is characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. The forested southern slopes contrast to the barren northern reaches of the site at the edge of Alaska's "north slope." The park-preserve contains the Alatna, John, Kobuk, part of the Noatak, the North Fork of the Koyukuk, and the Tinayguk Wild Rivers. And with adjacent Kobuk Valley National Park and Noatak National Preserve, it is one of the largest park areas in the world. **NO FEDERAL FACILITIES.**

Proclaimed Gates of the Arctic National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreege—National park: 7,500,000 Federal: 7,150,000 Nonfederal: 350,000. National preserve: 940,000, all federal. Wilderness area: 7,052,000.

Glacier Bay
National Park and Preserve
P.O. Box 1089
Juneau, AK 99802
or (in summer)
Bartlett Cove
Gustavus, AK 99826

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including brown and black bear, mountain goats, whales, seals, and eagles can be found within the park. Also included are Mount Fairweather, the highest peak in southeast Alaska, and the U.S. portion of the Alsek River.

Proclaimed Glacier Bay National Monument Feb. 25, 1925; established as a national park and preserve Dec. 2, 1980. Boundary changes: April 18, 1939; March 31, 1955; December 1, 1978. Wilderness designated Dec. 2, 1980.

Acreege—National park: 3,225,197.95 Federal: 3,225,000 Nonfederal: 197.95. National preserve: 55,000, all federal. Wilderness area: 2,770,000.

Katmai
National Park and Preserve
P.O. Box 7
King Salmon, AK 99613

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon that spawn in the many lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1912, Novarupta Volcano erupted violently, forming the ash-filled "Valley of Ten Thousand Smokes" where steam rose from countless fumaroles. Today only a few active vents remain. The park-preserve contains part of the Alagnak Wild River.

Proclaimed as Katmai National Monument Sept. 24, 1918; established as a national park and preserve Dec. 2, 1980. Boundary changes: April 24, 1931; Aug. 4, 1942; Jan. 20, 1969; Dec. 1, 1978; Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreege—National park: 3,716,000 Federal: 3,575,000 Nonfederal: 141,000. National preserve: 374,000, all federal. Wilderness area: 3,473,000.

Kenai Fjords National Park
P.O. Box 1727
Seward, AK 99664

The park, within 20 miles of Seward, includes one of the four major ice caps in the U.S., the 700-square-mile Harding Icefield and coastal fjords. Here a rich, varied rain forest is home to tens of thousands of breeding birds and adjoining marine waters support a multitude of sea lions, sea otters, and seals. LIMITED FEDERAL FACILITIES.

Proclaimed Kenai Fjords National Monument Dec. 1, 1978; established as a national park Dec. 2, 1980.

Acreege—670,000 Federal: 580,000. Nonfederal: 90,000.

Klondike Gold Rush
National Historical Park
P.O. Box 517
Skagway, AK 99840
(See also Washington)

Historic buildings in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park. LIMITED FEDERAL FACILITIES. Established June 30, 1976.

Acreege—13,191.35 Federal: 2,721.33 Nonfederal: 10,470.02.

Kobuk Valley National Park
P.O. Box 287
Kotzebue, AK 99752

Embracing the central valley of the Kobuk River, the park, located entirely north of the Arctic Circle, includes a blend of biological, geological, and cultural resources. Here, in the northmost extent of the boreal forest, a rich array of arctic wildlife can be found, including caribou, grizzly and black bear, wolf, and fox. The 25-square-mile Great Kobuk Sand

Dunes lie just south of the Kobuk River against the base of the Waring Mountains. Archeological sites revealing more than 10,000 years of human occupation are among the most significant sites known in the Arctic. The park contains the Salmon Wild River. NO FEDERAL FACILITIES.

Proclaimed Kobuk Valley National Monument Dec. 1, 1978; established as a national park Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreage—1,750,000 Federal: 1,702,000 Nonfederal: 48,000. Wilderness area: 190,000.

**Lake Clark
National Park and Preserve**
701 C Street, Box 61
Anchorage, AK 99513

Located in the heart of the Chigmit mountains along the western shore of Cook Inlet, the park-preserve contains great geologic diversity, including jagged peaks, granite spires, and two symmetrical active volcanoes. More than a score of glacial carved lakes rim the mountain mass. Lake Clark, more than 40 miles long, is not only the largest lake here, but it is also the headwaters for red salmon spawning. Merrill and Lake Clark Passes cut through the mountains and are lined by dozens of glaciers and hundreds of waterfalls that cascade over rocky ledges. The park-preserve contains the Chilikadrotna, Mulchatna, Tlikakila Wild Rivers. NO FEDERAL FACILITIES.

Proclaimed Lake Clark National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreage—National park: 2,874,000 Federal: 2,490,000 Nonfederal: 384,000. National preserve: 1,171,000, all federal. Wilderness area: 2,470,000.

Noatak National Preserve
P. O. Box 287
Kotzebue, AK 99752

The Noatak River basin is the largest mountain-ringed river basin in the Nation still virtually unaffected by man. The preserve includes landforms of great scientific interest, including the 65-mile-long Grand Canyon of the Noatak, a transition zone and migration route for plants and animals between subarctic and arctic environments, and an array of flora among the most diverse anywhere in the earth's northern latitudes. Hundreds of archeological sites and abundant wild-life populations add to the significance of the area. The preserve contains part of the Noatak Wild River. NO FEDERAL FACILITIES.

Proclaimed as Noatak National Monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve 1976.

Acreage—6,560,000 Federal: 6,550,000 Nonfederal: 10,000. Wilderness area: 5,800,000.

**Sitka
National Historical Park**
P.O. Box 738
Sitka, AK 99835

The site of the 1804 fort and battle that marked the last major Tlingit Indian resistance to Russian colonization is preserved here. Tlingit totem poles and crafts are exhibited. The Russian Bishop's House, built in 1842, is the oldest intact piece of Russian American architecture.

Proclaimed Mar. 23, 1910; designated a national historical park Oct. 18, 1972. Boundary changes: Feb. 25, 1952; Oct. 18, 1972.

Acreage—106.83 Federal: 106.17 Nonfederal: 0.66.

**Wrangell-St. Elias
National Park and Preserve**
P.O. Box 29
Glenn Allen, AK 99588

The Chugach, Wrangell, and St. Elias mountain ranges converge here in what is often referred to as the "mountain kingdom of North America." The largest unit of the National Park System and a day's drive east of Anchorage, the park-preserve includes the continent's largest assemblage of glaciers and the greatest collection of peaks above 16,000 feet, including Mount St. Elias. At 18,008 feet it is the second highest peak in the U.S. Adjacent to Canada's Kluane National Park, the site is characterized by its remote mountains, valleys, and wild rivers, all rich in their concentrations of wildlife. **NO FEDERAL FACILITIES.**

Proclaimed as Wrangell-St. Elias National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Designated a World Heritage Site Oct. 24, 1979.

Acreage—National park: 8,945,000 Federal: 8,145,000 Non-federal: 800,000. National preserve: 4,255,000, all federal. Wilderness area: 8,700,000.

**Yukon-Charley Rivers
National Preserve**
P.O. Box 64
Eagle, AK 99738

Located along the Canadian border in central Alaska, the preserve protects 115 miles of the 1,800-mile Yukon River and the entire Charley River basin. Numerous old cabins and relics are reminders of the importance of the Yukon River during the 1898 gold rush. Paleontological and archeological sites here add much to our knowledge of man and his environment thousands of years ago. Peregrine falcons nest in the high bluffs overlooking the river, while the rolling hills that make up the preserve are home to an abundant array of wildlife. The Charley, an 88-mile wild river, is considered by many to be the most spectacular river in Alaska. **NO FEDERAL FACILITIES.**

National Capital Parks

1100 Ohio Drive, SW
Washington, DC 20242
(Also in Maryland)

The park system of the Nation's Capital comprises parks, parkways, and reservations in the Washington metropolitan area, including such properties as the Battleground National Cemetery, the President's Parks (Lafayette Park north of the White House and the Ellipse south of the White House), the parks flanking the Great Falls of the Potomac, a variety of military fortifications, and green areas.

When Congress established a permanent National Capital in 1790, the city's Federal Commissioners were given the power "to purchase or accept such quantity of land as the President shall deem proper for the use of the United States." Under this authority the Commissioners purchased Washington's first 17 public reservations and accepted donations of other lands required for the street system of L'Enfant's plan. Today more than 300 park units derive from these lands. Office of Public Buildings and Public Parks of the National Capital was abolished and public reservations were transferred to National Capital Parks, National Park Service, Aug. 10, 1933.

Affiliated Areas

In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither federally owned nor directly administered by the National Park Service but which utilize NPS assistance.

The Affiliated Areas comprise a variety of locations in the United States and Canada that preserve significant properties outside the National Park System. Some of these have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial aid from the National Park Service.

Wild and Scenic Rivers System

Public Law 90-542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment. Components of the system, or portions of component rivers, may be designated as wild, scenic, or recreational rivers. Rivers are classified according to the natural qualities they possess and the evidence, as viewed from the river, of man's presence in the area. Thus, in a **wild river** there is little evidence of man's presence, the river is free of impoundments (dams) and generally inaccessible except by trail. A **scenic river** is one with relatively primitive shorelines, largely undeveloped, but accessible in places by road. A **recreational river** has more development, is accessible by road or railroad, and may have been dammed.

Once a river area is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency—local, state, or federal—is to preserve or enhance the qualities which qualified the river for inclusion within the system. Recreational use must be compatible with preservation. Rivers administered by the National Park Service are units of the National Park System. Those administered by the U.S. Fish and Wildlife Service are components of the National Wildlife Refuge System.

State rivers and streams may become units of the Wild and Scenic Rivers System when established under state laws and developed with river management plans acceptable to the Secretary of the Interior. The Secretary may then designate the appropriate river area as a unit of the system. Federally managed components of the system are designated by Acts of Congress. Usually, Congress first requires, by law, a detailed study to determine the qualification of a river area for the system, then makes the decision based on the findings of the study.

Acreages of the wild rivers entirely within larger units of the National Park System are not stated separately. Acreages of wild rivers within the National Wildlife Refuge System in Alaska and several others are yet to be determined.

Appalachian National Scenic Trail

National Trails System

On October 2, 1968, the Congress enacted Public Law 90-543, the National Trails System Act. The act calls for establishing trails in both urban and rural settings for persons of all ages, interests, skills, and physical abilities. Further, it promotes the public access to, travel within, and enjoyment and appreciation of those trails.

The System was initially composed of three classes of trails—scenic, recreational, and side or connecting. The law designated the Appalachian Trail and the Pacific Crest Trail, two long-distance trails winding through some of the most striking natural beauty in the country, as the first national scenic trails. The law further proposed that 14 other trails be studied to determine if they met the criteria for possible Congressional designation as future national scenic trails. Today, there are eight national scenic trails and other potential trails continue to be studied.

National Scenic and Historic Trails are designated by an act of Congress. The National Recreation Trails, which vary in length and are managed by public or private agencies, are designated by the Secretary of the Interior or, if within National Forests, by the Secretary of Agriculture.

A National Recreation Trail is a trail in the National Trails System that is fully developed and ready to be used at the time of designation. This action is certified by the administering agency, which also must assure that the trail will be opened for public use for at least ten years following designation.

As of this writing, 752 National Recreation Trails have been designated throughout the country. They are located in every state, the District of Columbia, and Puerto Rico with a total length of more than 8,100 miles. Sixty-two are managed by the National Park Service and provide 485 miles for hiking, nature study, biking, canoeing, horseback riding, and crosscountry skiing. Two of the trails are designed for use by the blind and nine are accessible to outdoor enthusiasts confined to wheelchairs.

As administrator of the National Trails System, the National Park Service encourages other public and private agencies to develop, maintain, and protect trails; expand and designate trails within the parks; and where feasible, cooperate with and support the efforts of the trails community nationwide.
