National Park Service, U.S. Department of the Interior
As the Nation’s principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering wise use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also promotes the goals of the Take Pride in America campaign by encouraging stewardship and citizen responsibility for the public lands promoting citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

Grand Canyon National Park
Seventy-five years ago President Woodrow Wilson signed the act creating the National Park Service, a new federal bureau in the Department of the Interior responsible for protecting the 40 national parks and monuments then in existence and those yet to be established. This “Organic Act” of August 25, 1916, states that “the Service thus established shall promote and regulate the use of Federal areas known as national parks, monuments and reservations . . . by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”

The National Park Service still strives to meet those original goals, while filling many other roles as well: guardian of our diverse cultural and recreational resources; environmental advocate; world leader in the parks and preservation community; and pioneer in the drive to protect America’s open space.

The National Park System of the United States comprises 357 areas covering more than 80 million acres in 49 States, the District of Columbia, American Samoa, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming “as a public park or pleasuring ground for the benefit and enjoyment of the people” and placed it “under exclusive control of the Secretary of the Interior.” The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of
the Department of Agriculture. No single agency provided unified management of the varied federal parklands.

An Executive Order in 1933 transferred 63 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.

Congress declared in the General Authori­ties Act of 1970 "that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region . . . and that it is the purpose of this Act to include all such areas in the System. . . ."

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under federal jurisdiction. The Secretary of the Interior is usually asked by Congress for his recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises him on possible additions to the System and policies for its management.

Nomenclature of Park System Areas

The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park.

Although some titles are self-explanatory, others have been used in many different ways. For example, the title "national monument" has been given to great natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, Congress and the National Park Service have attempted, with some success, to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estuary, or river systems; they may contain "windows" on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns, and they may be habitats of abundant or rare wildlife and plantlife.

Generally, a national park contains a variety of resources and encompasses large land or water areas to help provide adequate protection of the resources.

A national monument is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first national preserves. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values. National reserves are similar to the preserves. Management, however, is by local or state authorities. The first reserve, City of Rocks, was established in 1988.

Preserving shoreline areas and off-shore islands, the national lakeshores and national seashores focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

National rivers and wild and scenic riverways preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered by man. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

National scenic trails are generally long-distance footpaths winding through areas of natural beauty.

Although best known for its great scenic
parks, more than half the areas of the National Park System preserve places and commemorate persons, events, and activities important in the Nation's history. These range from archeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, national historic site has been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—national military park, national battlefield park, national battlefield site, and national battlefield—has been used for areas associated with American military history. But other areas such as national monuments and national historical parks may include features associated with military history. National historical parks are commonly areas of greater physical extent and complexity than national historic sites. The lone international historic site refers to a site relevant to both U.S. and Canadian history.

The title national memorial is most often used for areas that are primarily commemorative. But they need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas administered by National Capital Region whose titles do not include the words national memorial are nevertheless classified as memorials. These are John F. Kennedy Center for the Performing Arts, Lincoln Memorial, Lyndon Baines Johnson Memorial Grove on the Potomac, Theodore Roosevelt Island, Thomas Jefferson Memorial, and the Washington Monument—all in the District of Columbia.

Originally, national recreation areas in the Park System were units surrounding reservoirs impounded by dams built by other federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service, U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed travel. Besides the areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

Two areas of the National Park System have been set aside primarily as sites for the performing arts. These are Wolf Trap Farm Park for the Performing Arts, Virginia, America's first such national park, and the John F. Kennedy Center for the Performing Arts, D.C. Two historical areas, Ford's Theatre National Historic Site, D.C., and Chamizal National Memorial, Texas, also provide facilities for the performing arts.

Designation of Wilderness Areas

In the Wilderness Act of 1964, Congress directed three federal agencies, including the National Park Service, to study certain lands within their jurisdiction to determine the suitability of these lands for inclusion in the National Wilderness Preservation System.

By subsequent legislation, Congress has designated wilderness areas in many units of the National Park System. This designation (noted in this booklet in the listing by states) does not remove wilderness lands from the parks, but it does ensure that they will be managed to retain their "primeval character and influence, without permanent improvements or human habitation...."

The Act provides, generally, that "there shall be no commercial enterprise and no permanent road within any wilderness area ... and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motorboats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and similar pursuits.

Parks in the Nation's Capital

As the Nation's Capital, Washington, D.C., has a unique park system. Most of the public parks are administered by the Federal Government through the National Capital Region.
of the National Park Service.

National Capital Region has inherited duties originally assigned to three Federal Commissioners appointed by President George Washington in 1790. The city's parks were administered by a variety of federal agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the federal holdings, although the District of Columbia also operates parks, playgrounds, and recreational facilities.

National Capital Region also administers several National Park System units in Maryland, Virginia, and West Virginia, which are shown in this booklet in the listing by states.

**Related Areas**

Besides the National Park System three groups of areas exist—Affiliated Areas, the Wild and Scenic Rivers System, and the National Trails System—that are closely linked in importance and purpose to those areas managed by the National Park Service. Except for those wild and scenic rivers administered by the National Park Service, these areas are not units of the National Park System, yet they preserve important segments of the Nation's heritage. They are, therefore, given recognition in Part 3 of this book.

Descriptive Listing of National Park System Areas
Alabama

Horseshoe Bend
National Military Park
Route 1, Box 103
Daviston, AL 36256

On March 27, 1814, at the “horseshoe bend” in the Tallapoosa River, Gen. Andrew Jackson’s forces broke the power of the Upper Creek Indian Confederacy and opened large parts of Alabama and Georgia to settlement. Authorized July 25, 1956.

Acreage—2,040, all federal.

Natchez Trace
National Scenic Trail
(See Mississippi)

Natchez Trace Parkway
(See Mississippi)

Russell Cave
National Monument
Route 1, Box 175
Bridgeport, AL 35740

An almost continuous archeological record of human habitation from at least 7000 BC to about AD 1650—Early Archaic to Mississippian cultural periods—is revealed in this cave. Proclaimed May 11, 1961.

Acreage—310.45, all federal.

Tuskegee Institute
National Historic Site
P.O. Drawer 10
Tuskegee Institute, AL 36088

Booker T. Washington founded this college for black Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington’s home, and the George Washington Carver Museum, which serves as the visitor center. The college is still an active institution that owns most of the property within the national historic site. Authorized Oct. 26, 1974.

Alaska

Alagnak Wild River
c/o Katmai National Park
and Preserve, P.O. Box 7
King Salmon, AK 99613

The Alagnak River flows from Kukaklek Lake in Katmai National Preserve and offers 69 miles of outstanding white-water floating. The river is also noted for abundant wildlife and sport fishing for five species of salmon. Portions of the main stem lie outside and westward of Katmai. Established: Dec. 2, 1980. Length: 69 miles.

Acreage—24,038, all federal.

Aniakchak National Monument and Preserve
P.O. Box 7
King Salmon, AK 99613

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1931. The crater includes lava flows, cinder cones, and explosion pits, as well as Surprise Lake, source of the Aniakchak River, which cascades through a 1,500-foot gash in the crater wall. The site contains the Aniakchak Wild River.

NO FEDERAL FACILITIES.

Bering Land Bridge
National Preserve
P.O. Box 220, Nome, AK 99762

Located on the Seward Peninsula in northwest Alaska, the preserve is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migratory birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. LIMITED FEDERAL FACILITIES.

Cape Krusenstern
National Monument
P.O. Box 1029
Kotzebue, AK 99752

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. Older sites are located inland, along the foothills. The monument includes a representative example of the arctic coastline along the Chukchi Sea. LIMITED FEDERAL FACILITIES.

Denali
National Park and Preserve
P.O. Box 9
McKinley Park, AK 99755

The park contains North America's highest mountain, 20,320-foot Mount McKinley. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, and timber wolves are other highlights of this national park and preserve.

Gates of the Arctic
National Park and Preserve
P.O. Box 74680
Fairbanks, AK 99707

Lying entirely north of the Arctic Circle, the park and preserve includes a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, this second largest unit of the National Park System is characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. The forested southern slopes contrast to the barren northern reaches of the site at the edge of Alaska's "north slope." The park-preserve contains the Alatna, John, Kobuk, part of the Noatak, the North Fork of the Koyukuk, and the Tinayguk Wild Rivers. And with adjacent Kobuk Valley National Park and Noatak National Preserve, it is one of the largest park areas in the world. LIMITED FEDERAL FACILITIES.

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including brown and black bear, mountain goats, whales, seals, and eagles can be found within the park. Also included are Mount Fairweather, the highest peak in southeast Alaska, and the U.S. portion of the Alsek River.

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon that spawn in the many lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1912, Novarupta Volcano erupted violently, forming the ash-filled "Valley of Ten Thousand Smokes" where steam rose from countless fumaroles. Today only a few active vents remain. The park-preserve contains part of the Alagnak Wild River.

Acreage—National park: 3,716,000 Federal: 3,575,000 Nonfederal: 141,000. National preserve: 374,000, all federal. Wilderness area: 3,473,000.

The park includes one of the four major ice caps in the U.S., the 300-square-mile Harding Icefield and coastal fjords. Here a rich, varied rain forest is home to tens of thousands of breeding birds and adjoining marine waters support a multitude of sea lions, sea otters, and seals. The visitor center is in Seward, 10 miles from the park.

Historic buildings in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park.

Established June 30, 1976.

Acreage—13,191.35 Federal: 2,721.33 Nonfederal: 10,470.02.

Embracing the central valley of the Kobuk River, the park, located entirely north of the Arctic Circle, includes a blend of biological, geological, and cultural resources. Here, in the northmost extent of the boreal forest, a rich array of arctic wildlife can be found, including caribou, grizzly and black.

Lake Clark National Park and Preserve
4230 University Drive
Suite 311
Anchorage, AK 99508

Located in the heart of the Chigmit mountains along the western shore of Cook Inlet, the park-preserve contains great geologic diversity, including jagged peaks, granite spires, and two symmetrical active volcanoes. More than a score of glacial carved lakes rim the mountain mass. Lake Clark, more than 40 miles long, is not only the largest lake here, but it is also the headwaters for red salmon spawning. Merrill and Lake Clark Passes cut through the mountains and are lined by dozens of glaciers and hundreds of waterfalls that cascade over rocky ledges. The park-preserve contains the Chilkadotna, Mulchatna, and Tlikakila Wild Rivers. LIMITED FEDERAL FACILITIES. Proclaimed Lake Clark National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Acreage—National park: 2,636,839 Federal: 2,573,724.02 Nonfederal: 63,114.98. National preserve: 1,407,293 Federal: 1,288,259.61 Nonfederal: 119,033.39. Wilderness area: 2,470,000.

Noatak National Preserve
P. O. Box 1029
Kotzebue, AK 99752

Sitka National Historical Park
P.O. Box 738
Sitka, AK 99835

Wrangell-St. Elias National Park and Preserve
P.O. Box 29
Glennallen, AK 99588

The Chugach, Wrangell, and St. Elias mountain ranges converge here in what is often referred to as the “mountain kingdom of North America.” The largest unit of the National Park System and a day’s drive east of Anchorage, the park-preserve includes the continent’s largest assemblage of glaciers and the greatest collection of peaks above 16,000 feet, including Mount St. Elias. At 18,008 feet it is the second highest peak in the U.S. Adjacent to Canada’s Kluane National Park, the site is characterized by its remote mountains, valleys, and wild rivers, all rich in their concentrations of wildlife. LIMITED FEDERAL FACILITIES.

Yukon-Charley Rivers National Preserve
P.O. Box 167
Eagle, AK 99738

Located along the Canadian border in central Alaska, the preserve protects 115 miles of the 1,800-mile Yukon River and the entire Charley River basin. Numerous old cabins and relics are reminders of the importance of the Yukon River during the 1898 gold rush. Paleontological and archeological sites here add much to our knowledge of man and his environment thousands of years ago. Peregrine falcons nest in the high bluffs overlooking the river, while the rolling hills that make up the preserve are home to an abundant array of wildlife. The Charley, an 88-mile wild river, is considered by many to be the most spectacular river in Alaska. LIMITED FEDERAL FACILITIES.

American Samoa
The National Park of American Samoa
c/o Pacific Area Office
P.O. Box 50165
Honolulu, HI 96850

Two rain forest preserves and a coral reef are home to unique tropical animals including the Flying Fox, Pacific Boa, tortoises and an array of birds and fish. The park contains paleotropical rain forests, pristine coral reefs, and magnificent white sand beach. NO FEDERAL FACILITIES.

Acreage—9,000, all nonfederal.
Canyon de Chelly
National Monument
P.O. Box 588
Chinle, AZ 86503

At the base of sheer red cliffs and in canyon wall caves are ruins of Indian villages built between AD 350 and 1300. Modern Navajo Indians live and farm here. Authorized Feb. 14, 1931. Boundary change: Mar. 1, 1933. Acreage—83,840, all nonfederal.

Casa Grande
National Monument
P.O. Box 518
Coolidge, AZ 85228

These perplexing ruins of a massive four-story building, constructed of high-lime desert soil by Indians who farmed the Gila Valley 600 years ago, have raised many questions. Casa Grande Ruin Reservation authorized Mar. 2, 1889; proclaimed June 22, 1892; redesignated by proclamation Aug. 3, 1918. Boundary changes: Dec. 10, 1909; June 7, 1926. Acreage—472.50, all federal.

Chiricahua
National Monument
Dos Cabezas Route
Box 6500, Willcox, AZ 85643

Coronado
National Memorial
Rural Route 2, Box 126
Hereford, AZ 85615

Fort Bowie
National Historic Site
P.O. Box 158
Bowie, AZ 85605

Established in 1862, this fort was the focal point of military operations against Geronimo and his band of Apaches. The ruins can be reached only by trail. Authorized Aug. 30, 1964; established July 29, 1972. Acreage—1,000, all federal.

Glen Canyon
National Recreation Area
(See Utah)

Grand Canyon
National Park
P.O. Box 129
Grand Canyon, AZ 86023

The park, focusing on the world-famous Grand Canyon of the Colorado River, encompasses 177.7 miles of the river, with adjacent uplands, from the southern terminus of Glen Canyon National Recreation Area to the eastern boundary of Lake Mead National Recreation Area. The forces of erosion have exposed an immense variety of formations which illustrate vast periods of geological history. Grand Canyon Forest Reserve proclaimed Feb. 20, 1893; Grand Canyon Game Preserve proclaimed Nov. 28, 1906; Grand Canyon National Monument proclaimed Jan. 11, 1908; national park established Feb. 26, 1919; transferred from Forest Service, U.S. Dept. of Agriculture, Aug. 15, 1919.

Hohokam Pima National Monument
c/o Casa Grande National Monument, P.O. Box 518
Coolidge, AZ 85228

Preserved here are the archeological remains of the Hohokam culture. Hohokam is a Pima Indian word meaning “those who have gone.” NOT OPEN TO THE PUBLIC.

Acreage—1,690, all nonfederal.

Hubbell Trading Post National Historic Site
P.O. Box 150
Ganado, AZ 86505

This still-active trading post, established in 1878, illustrates the influence of reservation traders on the Indians’ way of life.

Acreage—160.09, all federal.

Lake Mead National Recreation Area
(See Nevada)

One of the best-preserved cliff dwellings in the United States, this 5-story, 20-room castle is 90 percent intact.

Montezuma Castle National Monument
P.O. Box 219
Camp Verde, AZ 86322

Betatakin, Keet Seel, and Inscription House (closed since 1968 due to its fragility) are three cliff dwellings of the Kayenta Anasazi.

Proclaimed Mar. 20, 1909. Boundary change: Mar. 14, 1912. Headquarters is on 244.59 acres of tribal land adjacent to the Betatakin section; used by agreement of May 1962. A right-of-way of 4.59 acres was granted to the Park Service in 1977.

Acreage—360, all federal.

Navajo National Monument
H.C. 71, Box 3
Tonalea, AZ 86044-9704

Sonoran Desert plants and animals found nowhere else in the United States are protected here as are traces of a historic trail, Camino del Diablo.

Organ Pipe Cactus National Monument
Route 1, Box 100
Ajo, AZ 85321

Trees that have petrified, or changed to multicolored stone, Indian ruins and petroglyphs, and portions of the colorful Painted Desert are features of the park.

Acreage—93,532.57, all federal. Wilderness area: 50,260.

Petrified Forest National Park
Petrified Forest National Park, AZ 86028

Trees that have petrified, or changed to multicolored stone, Indian ruins and petroglyphs, and portions of the colorful Painted Desert are features of the park.

Acreage—93,532.57, all federal. Wilderness area: 50,260.
Pipe Spring National Monument
Moccasin, AZ 86022
The historic fort and other structures, built here by Mormon pioneers, memorialize the exploration and settlement of the Southwest.
Proclaimed May 31, 1923.
Acreage—40, all federal.

Saguaro National Monument
36933 Old Spanish Trail
Tucson, AZ 85730
Giant saguaro cacti, unique to the Sonoran Desert, sometimes reach a height of 50 feet in this cactus forest, which covers the valley floor, rising into the Rincon and West Tucson mountains.

Sunset Crater Volcano National Monument
Route 3, Box 149
Flagstaff, AZ 86004
This volcanic cinder cone with summit crater was formed just before AD 1100. Its upper part is colored as if by a sunset.
Acreage—3,040, all federal.

Tonto National Monument
P.O. Box 707
Roosevelt, AZ 85545
These well-preserved cliff dwellings were occupied during the 13th and 14th centuries by Salado Indians who farmed in the Salt River Valley.
Acreage—1,120, all federal.

Tumacacori National Historical Park
P.O. Box 67
Tumacacori, AZ 85640
This historic Spanish Catholic mission building stands near the site first visited by Jesuit Father Kino in 1691.
Acreage—16.52 Federal: 15.88 Nonfederal: 0.64.

Tuzigoot National Monument
P.O. Box 68
Clarkdale, AZ 86324
Ruins of a large Indian pueblo that flourished in the Verde Valley between AD 1100 and 1450 have been excavated here.
Acreage—800.62 Federal: 57.78 Nonfederal: 742.84.

Walnut Canyon National Monument
Walnut Canyon Road
Flagstaff, AZ 86004-9705
These cliff dwellings were built in shallow caves under ledges of limestone by Pueblo Indians about 800 years ago.
Acreage—2,249.46 Federal: 2,011.62 Nonfederal: 237.84.

Wupatki National Monument
H.C. 33, Box 444A
Flagstaff, AZ 86004
Ruins of red sandstone pueblos built by farming Indians about AD 1065 are preserved here. The modern Hopi Indians are believed to be partly descended from these people.
Acreage—35,253.24, all federal.
Arkansas

Arkansas Post
National Memorial
Route 1, Box 16
Gillett, AR 72055

The park commemorates the first permanent French settlement founded in 1686, in the Lower Mississippi Valley.
Authorized July 6, 1960
Acreage—389.18, all federal.

Buffalo National River
P.O. Box 1173
Harrison, AR 72601

Offering both swift-running and placid stretches, the Buffalo is one of the few remaining unpolluted, free-flowing rivers in the lower 48 states. It courses through multicolored bluffs and past numerous springs along its 132-mile length.

Fort Smith
National Historic Site
P.O. Box 1406
Fort Smith, AR 72902
(Also in Oklahoma)

This was one of the first U.S. military posts in the Louisiana Territory and served as a base of operations for enforcing federal Indian policy from 1817 to 1896. The park contains the remains of two frontier military forts and a federal court. Judge Isaac C. Parker served here for 21 years protecting the rights of native Americans and helping to bring civilized society to lawless country.

California

Cabrillo National Monument
P.O. Box 6670
San Diego, CA 92106

Juan Rodriguez Cabrillo, Portuguese explorer who claimed the West Coast of the United States for Spain in 1542, is memorialized here. Gray whales migrate offshore during the winter. Old Point Loma Lighthouse is restored to its most active period—the 1880s. Tidepools found on the west side of the park are excellent for studying southern California coastal ecology.
The park consists of five islands off southern California: Anacapa, San Miguel, Santa Barbara, Santa Cruz, and Santa Rosa. Nesting sea birds, sea lion rookeries, and unique plants inhabit the area. Anacapa, Santa Barbara, and Santa Cruz Islands are administered by the National Park Service; San Miguel, by the U.S. Navy and the National Park Service. A permit is needed to visit the latter. Santa Rosa is private property. Proclaimed a national monument, Apr. 26, 1938; redesignated a national park, March 5, 1980. Boundary changes: June 10, 1949; May 15, 1978; Oct. 25, 1978. Washington, DC 20566

Plays, concerts, films, opera, and ballet are presented in this structure designed by Edward Durell Stone.

Acreage — 17.50, all federal.

A living memorial to the 36th President, the park overlooks the Potomac River vista of the Capital. The design features 500 white pines and inscriptions on Texas granite. Authorized Dec. 28, 1973; dedicated Sept. 27, 1974. Acreage—17, all federal.

The park system of the Nation's Capital comprises parks, parkways, and reservations in the District of Columbia, including such properties as the Battleground National Cemetery, the President's Parks (Lafayette Park north of the White House and the Ellipse south of the White House), a variety of military fortifications, and green areas. When Congress established a permanent National Capital in 1790, the city's Federal Commissioners were given the power "to purchase or accept such quantity of land as the President shall deem proper for the use of the United States." Under this authority the Commissioners purchased Washington's first 17 public reservations and accepted donations of other lands required for the street system of L'Enfant's plan. Today more than 300 park units derive from these lands. Office of Public Buildings and Public Parks of the National Capital was abolished and public reservations were transferred to National Capital Parks, National Park Service, Aug. 10, 1933. Acreage—6,467.85, all federal.

This landscaped park extending from the Capitol to the Washington Monument was envisioned as a formal park in the L'Enfant Plan for the city of Washington. Approved July 16, 1790, except for 42 acres transferred later from other agencies; 30 Seaton Park acres include some transfers from other agencies and Washington, D.C. Transferred from Office of Public Buildings and Public Parks of the National Capital Aug. 10, 1933. Acreage—146.35, all federal.

This site includes a portion of Pennsylvania Avenue and the area adjacent to it between the Capitol and the White House encompassing Ford's Theatre National Historic Site, several blocks of the Washington commercial district, the Old Post Office Tower, and a number of federal structures. In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither federally owned nor directly administered by the National Park Service but which utilize NPS assistance.

The Affiliated Areas comprise a variety of locations in the United States and Canada that preserve significant properties outside the National Park System. Some of these have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial aid from the National Park Service.

Wild and Scenic Rivers System

Public Law 90-542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment. Components of the system, or portions of component rivers, may be designated as wild, scenic, or recreational rivers. Rivers are classified according to the natural qualities they possess and the evidence, as viewed from the river, of man's presence in the area. Thus, in a wild river there is little evidence of man's presence, the river is free of impoundments (dams), and it is generally inaccessible except by trail. A scenic river is one with relatively primitive shorelines, largely undeveloped, but accessible in places by road. A recreational river has more development, is accessible by road or railroad, and may have been dammed.

Once a river area is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency—local, state, or federal—is to preserve or enhance the qualities which qualified the river for inclusion within the system. Recreational use must be compatible with preservation. Rivers administered by the National Park Service are units of the National Park System. Those administered by the U.S. Fish and Wildlife Service are components of the National Wildlife Refuge System.

State rivers and streams may become units of the Wild and Scenic Rivers System when established under state laws and developed with river management plans acceptable to the Secretary of the Interior. The Secretary may then designate the appropriate river area as a unit of the system. Federally managed components of the system are designated by Acts of Congress. Usually, Congress first requires, by law, a detailed study to determine the qualification of a river area for the system and then makes the decision.

Acreages of the wild rivers entirely within larger units of the National Park System are not stated separately. Acreages of wild rivers within the National Wildlife Refuge System in Alaska and several others are undetermined.

A note on organization: The first group of rivers, with addresses and brief descriptions, are those administered by the National Park Service. The second group, administered by a variety of federal, state, and local governments gives only the individual address to which you may write for further information.

Kern River
Sequoia National Park
Three Rivers, CA 93271
Sequoia National Forest
900 West Grand Avenue
Porterville, CA 93257
This river includes both the North and South Forks of the Kern. The South Fork is totally free-flowing. It descends through deep gorges with large granite outcroppings and domes interspersed with open meadows. It is home to the golden trout, the state fish of California. The upper 47.5 miles of the North Fork flow through Sequoia National Park and Golden Trout Wilderness, a scenic area with a wide variety of outstanding recreational opportunities, as well as cultural and historical associations.

Kings River
Kings Canyon National Park
Three Rivers, CA 93271
Sequoia National Forest
900 West Grand Avenue
Porterville, CA 93257
This river includes the entire Middle and South Forks, which are largely in Kings Canyon National Park. Beginning in glacial lakes above timberline, the rivers flow through deep, steepsided canyons, over falls and cataracts, eventually becoming an outstanding whitewater rafting river in its lower reaches in Sequoia National Forest. Geology, scenery, recreation, fish, wildlife, and history are all significant aspects.

Kobuk Wild River
Gates of the Arctic National Park and Preserve
P.O. Box 74680
Fairbanks, AK 99707
Kobuk Wild River is contained within Gates of the Arctic National Park and Preserve, Alaska. From its headwaters in the Endicott Mountains, the stream courses south through a wide valley and passes through two scenic canyons.

National Trails System

The National Trails System Act of 1968, as amended, calls for establishing trails in both urban and rural settings for persons of all ages, interests, skills, and physical abilities. The act promotes the enjoyment and appreciation of trails while encouraging greater public access. It establishes four classes of trails: national scenic trails, national historic trails, national recreation trails, and side and connecting trails.

National scenic trails are to be continuous, extended routes of outdoor recreation within protected corridors. The first two established under the National Trails System Act were the Appalachian and Pacific Crest trails. They wind through some of the Nation's most striking natural beauty. National historic trails recognize past routes of exploration, migration, and military action.

The term national recreation trail is given to an existing trail by the Federal Government, upon application, in recognition of its role as a component of the National Trails System. Today more than 780 of these trails have been designated throughout the country. They are located in every state, the District of Columbia, and Puerto Rico, totaling more than 9,000 miles in length. Most of them, 513, are on federal lands. Of the remainder, 147 are state trails, 82 are local, and 31 are on private lands, and 12 are managed by two or more entities.

Side and connecting trails provide additional access to and between components of the National Trails System. To date, two have been designated.

Since 1963, 33 long-distance trails have been studied for inclusion in the system, and 17 have been designated. The National Park Service administers 12 of them, the Forest Service administers four, and the Bureau of Land Management, one.

The National Trails System is administered by the National Park Service, U.S. Department of the Interior. The National Park Service encourages other public and private agencies to develop, maintain, and protect trails. With the cooperation and support of a nationwide trails community, the vision of an interconnected, crosscountry trail system will become a reality.

Appalachian National Scenic Trail
Appalachian National Scenic Trail
National Park System unit; see Maine.

Continental Divide National Scenic Trail
Forest Service, Region 1
Federal Building
P.O. Box 7669
Missoula, MT 59807

In close proximity to the continental divide, the trail extends from the Canadian border in Glacier National Park, Montana, through Idaho, Wyoming, Colorado, and New Mexico to Mexico.

Florida National Scenic Trail
Forest Service
227 N. Bronough St.
Suite 4061
Tallahassee, FL 32301

The trail runs north from Everglades National Park and through Big Cypress, the Kissimme Prairie, and various national and state forests. More than 300 miles have been developed for public use.

Ice Age National Scenic Trail
National Park Service
700 Rayovac Dr.
Suite 100
Madison, WI 53711

Winding through Wisconsin, the trail links together six of the nine units of the Ice Age National Scientific Reserve. The 1,000-mile hiking trail traverses significant features of Wisconsin’s glacial heritage. Approximately 425 miles are open to public use; additional miles are being developed.

Iditarod National Historic Trail
Anchorage District
Bureau of Land Management
6881 Abbott Loop Rd.
Anchorage, AK 99507

One of the Alaska Gold Rush Trails, this 2,300-mile trail extends from Seward to Nome and is composed of a network of trails and side trails developed during the gold rush era at the turn of the century.

Juan Bautista de Anza National Historic Trail
Western Region
National Park Service
600 Harrison Street,
Suite 600
San Francisco, CA 94107

This trail traces the path of a party of Spanish colonists, led by Col. Juan Bautista de Anza, who in 1776 sought to establish an overland route from Mexico to California.

Lewis and Clark National Historic Trail
National Park Service
700 Rayovac Dr.
Suite 100
Madison, WI 53711

The trail commemorates the route of the 1804-06 Lewis and Clark Expedition from the Mississippi River to the Pacific Ocean at the mouth of the Columbia River, and return. Approximately 4,500 miles of water routes, planned trails, and marked highways follow the outbound and return routes. Almost 500 public and private recreation and historic sites along the trail provide for public use and interpretation of the expedition, including eight National Park Service areas.

Mormon Pioneer National Historic Trail
Rocky Mountain Region
National Park Service
12795 West Alameda Parkway
Lakewood, CO 80225

This 1,300-mile trail follows the route over which Brigham Young led the Mormons from Nauvoo, Illinois, to the site of modern Salt Lake City, Utah, in 1847. An auto tour has been marked approximating the trail.
Nez Perce
National Historic Trail
Forest Service, Region 1
Federal Building
P.O. Box 7669
Missoula, MT 59807

North Country
National Scenic Trail
700 Rayovac Dr.
Suite 100
Madison, WI 53711

The route of the North Country Trail extends 3,200 miles from Crown Point, New York, to the Missouri River and Lake Sakakawea in North Dakota, where it intersects the Lewis and Clark National Historic Trail at Garrison Dam. Approximately 1,000 miles are open to public use. Additional miles are being developed. Established Mar. 5, 1980.

Santa Fe
National Historic Trail
Southwest Region
National Park Service
P.O. Box 728
Santa Fe, NM 87504

The route of the Santa Fe Trail extends 1,203 miles from a point near Arrow Rock, Missouri, through Kansas, Oklahoma, and Colorado to Santa Fe, New Mexico. NOT DEVELOPED FOR PUBLIC USE. Established May 8, 1987.

Trail of Tears
National Historic Trail
Southwest Region
National Park Service
P.O. Box 728
Santa Fe, NM 87504

The Trail of Tears marks the routes used for the forced removal of more than 15,000 Cherokees from their ancestral lands in North Carolina, Tennessee, Georgia, and Alabama to Oklahoma and Arkansas. The journey lasted from June 1838 to March 1839. Established 1987.
