The National Parks:
Index 1995
As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources, protecting our fish, wildlife, and biological diversity, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interest of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

Introduction

Grand Canyon National Park
On August 25, 1916, President Woodrow Wilson signed the act creating the National Park Service, a new federal bureau in the Department of the Interior responsible for protecting the 40 national parks and monuments then in existence and those yet to be established. This "Organic Act" of August 25, 1916, states that "the Service thus established shall promote and regulate the use of Federal areas known as national parks, monuments and reservations . . . by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

The National Park Service still strives to meet those original goals, while filling many other roles as well: guardian of our diverse cultural and recreational resources; environmental advocate; world leader in the parks and preservation community; and pioneer in the drive to protect America's open space.

The National Park System of the United States comprises 368 areas covering more than 83 million acres in 49 States, the District of Columbia, American Samoa, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming "as a public park or pleasuring ground for the benefit and enjoyment of the people" and placed it "under exclusive control of the Secretary of the Interior." The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of
the Department of Agriculture. No single agency provided unified management of the varied federal parklands.

An Executive Order in 1933 transferred 63 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.

Congress declared in the General Authorities Act of 1970 "that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region... and that it is the purpose of this Act to include all such areas in the System...."

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under federal jurisdiction. The Secretary of the Interior is usually asked by Congress for recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises on possible additions to the System and policies for its management.

Nomenclature of Park System Areas
The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park.

Although some titles are self-explanatory, others have been used in many different ways. For example, the title "national monument" has been given to great natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, Congress and the National Park Service have attempted, with some success, to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estuary, or river systems; they may contain "windows" on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns, and they may be habitats of abundant or rare wildlife and plantlife.

Generally, a national park contains a variety of resources and encompasses large land or water areas to help provide adequate protection of the resources.

A national monument is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first national preserves. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values. National reserves are similar to the preserves. Management may be transferred to local or state authorities. The first reserve, City of Rocks, was established in 1988.

Preserving shoreline areas and off-shore islands, the national lakeshores and national seashores focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

National rivers and wild and scenic riverways preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

National scenic trails are generally long-distance footpaths winding through areas of natural beauty.

Although best known for its great scenic parks, more than half the areas of the Na-
tional Park System preserve places and commemorate persons, events, and activities important in the Nation's history. These range from archeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, national historic site has been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—national military park, national battlefield park, national battlefield site, and national battlefield—has been used for areas associated with American military history. But other areas such as national monuments and national historical parks may include features associated with military history. National historical parks are commonly areas of greater physical extent and complexity than national historic sites. The lone international historic site refers to a site relevant to both U.S. and Canadian history.

The title national memorial is most often used for areas that are primarily commemorative. But they need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas administered by National Capital Region whose titles do not include the words national memorial are nevertheless classified as memorials. These are Lincoln Memorial, Lyndon Baines Johnson Memorial Grove on the Potomac, Theodore Roosevelt Island, Thomas Jefferson Memorial, and the Washington Monument—all in the District of Columbia.

Originally, national recreation areas in the Park System were units surrounding reservoirs impounded by dams built by other federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service, U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed travel. Besides the areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

One area of the National Park System has been set aside primarily as a site for the performing arts. This is Wolf Trap Farm Park for the Performing Arts, Virginia, America's first such national park. Two historical areas, Ford's Theatre National Historic Site, in Washington, D.C., and Chamizal National Memorial, Texas, also provide facilities for the performing arts.

Designation of Wilderness Areas
In the Wilderness Act of 1964, Congress directed three federal agencies, including the National Park Service, to study certain lands within their jurisdiction to determine the suitability of these lands for inclusion in the National Wilderness Preservation System.

By subsequent legislation, Congress has designated wilderness areas in many units of the National Park System. This designation (noted in this booklet in the listing by states) does not remove wilderness lands from the parks, but it does ensure that they will be managed to retain their "primeval character and influence, without permanent improvements or human habitation."

The Act provides, generally, that "there shall be no commercial enterprise and no permanent road within any wilderness area . . . and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motorboats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and similar pursuits.

Parks in the Nation's Capital
Washington, D.C., has a unique park system. Most public parks are administered by the Federal Government through the National Capital Area of the National Park Service.

National Capital Area has inherited duties originally assigned to three Federal Commissioners appointed by President George Wash-
ington in 1790. The city's parks were administered by a variety of federal agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the federal holdings, although the District of Columbia also operates parks, playgrounds, and recreational facilities. National Capital Area also administers several National Park System units in Maryland, Virginia, and West Virginia.

Related Areas
Besides the National Park System three groups of areas exist—Affiliated Areas, the Wild and Scenic Rivers System, and the National Trails System—that are closely linked in importance and purpose to those areas managed by the National Park Service. These areas are not units of the National Park System, yet they preserve important segments of the Nation's heritage. They are listed in Part 3 of this book.

Descriptive Listing of National Park System Areas by State

Wright Brothers National Memorial
Alabama

Horseshoe Bend
National Military Park
11238 Horseshoe Bend Road
Daviston, AL 36256
205-234-7111

On March 27, 1814, at the “horseshoe bend” in the Tallapoosa River, Gen. Andrew Jackson’s forces broke the power of the Upper Creek Indian Confederacy and opened large parts of Alabama and Georgia to settlement.

Authorized July 25, 1956.

Acreage — 2,040, all federal.

Little River Canyon
National Preserve
P.O. Box 45
2201-E Gault Ave. North
Fort Payne, AL 35967
205-997-9239

The preserve protects the natural, scenic, recreational, and cultural resources of the Little River Canyon of northeast Alabama. Little River flows atop Lookout Mountain for most of its length. Erosion has created a variety of superlative rock expanses, benches, and bluffs that create a unique environment for several threatened and endangered species and for recreational pursuits including kayaking and rock climbing. Hunting, fishing, and trapping are permitted. NO FEDERAL FACILITIES.

Acreage — 13,699, all nonfederal.

Natchez Trace
National Scenic Trail
(See Mississippi)

Natchez Trace Parkway
(See Mississippi)

Russell Cave
National Monument
3729 County Road 98
Bridgeport, AL 35740
205-495-2672

An almost continuous archeological record of human habitation from at least 7000 BC to about AD 1650—Transitional Paleo to Mississippian cultural periods—is revealed in this cave.

Acreage — 310.45, all federal.

Tuskegee Institute
National Monument
3729 County Road 98
Bridgeport, AL 35740
205-495-2672

Booker T. Washington founded this college for African Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington’s home, and the George Washington Carver Museum, which serves as the visitor center. The college is still an active institution that owns most of the property within the national historic site.

Alaska

Seven national park areas in Alaska have adjoining national preserves that are counted as separate units of the National Park System but managed jointly. They are: Aniakchak, Denali, Gates of the Arctic, Glacier Bay, Katmai, Lake Clark, and Wrangell-St. Elias. In this book these seven areas are listed as one entry each.

Alagnak Wild River
c/o Katmai National Park
and Preserve, P.O. Box 7
King Salmon, AK 99613
907-246-3305

The Alagnak River flows from Kukaklek Lake in Katmai National Preserve and offers 69 miles of outstanding white-water floating. The river is also noted for abundant wildlife and sport fishing for five species of salmon. Portions of the main stem lie outside and westward of Katmai.

**Aniakchak National Monument and Preserve**
P.O. Box 7  
King Salmon, AK 99613  
907-246-3305

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1931. The crater includes lava flows, cinder cones, and explosion pits, as well as Surprise Lake, source of the Aniakchak River, which cascades through a 1,500-foot gash in the crater wall. The site contains the Aniakchak Wild River. **NO FEDERAL FACILITIES.**

**Bering Land Bridge National Preserve**
P.O. Box 220, Nome, AK 99762  
907-443-2522

Located on the Seward Peninsula in northwest Alaska, the preserve is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migratory birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. **LIMITED FEDERAL FACILITIES.**

*Acreage—2,784,960  Federal: 2,690,179  Nonfederal: 94,781.*

**Cape Krusenstern National Monument**
P.O. Box 1029  
Kotzebue, AK 99752  
907-442-3890

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. Older sites are located inland, along the foothills. The monument includes a representative example of the arctic coastline along the Chukchi Sea. **LIMITED FEDERAL FACILITIES.**

**Denali National Park and Preserve**
P.O. Box 9  
McKinley Park, AK 99755  
907-683-2294

The park contains North America’s highest mountain, 20,320-foot Mount McKinley. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, and timber wolves are other highlights of this national park and preserve.  
Lying entirely north of the Arctic Circle, the park and preserve includes a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, this second largest unit of the National Park System is characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. The forested southern slopes contrast to the barren northern reaches of the site at the edge of Alaska's "north slope." The park-preserve contains the Alatna, John, Kobuk, part of the Noatak, the North Fork of the Koyukuk, and the Tinayguk Wild Rivers. And with adjacent Kobuk Valley National Park and Noatak National Preserve, it is one of the largest park areas in the world.

LIMITED FEDERAL FACILITIES.

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including grizzly bear, mountain goats, whales, seals, and eagles can be found within the park. Also included are Mount Fairweather, the highest peak in southeast Alaska, and the U.S. portion of the Alsek River.

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon that spawn in the many lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1912, Novarupta Volcano erupted violently, forming the ash-filled "Valley of Ten Thousand Smokes" where steam rose from countless fumaroles. Today only a few active vents remain. The park-preserve contains part of the Alagnak Wild River.

Kenai Fjords National Park
P.O. Box 1727
Seward, AK 99664
907-224-3175

The park includes one of the four major ice caps in the U.S., the 300-square-mile Harding Icefield, and coastal fjords. Here a rich, varied rain forest is home to tens of thousands of breeding birds, and adjoining marine waters support a multitude of sea lions, sea otters, and seals. The visitor center is in Seward, 10 miles from the park.

Klondike Gold Rush National Historical Park
P.O. Box 517
Skagway, AK 99840
(See also Washington)
907-983-2921

Historic buildings in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park. A visitor center is located in the Pioneer Square Historic District in Seattle, Wash.
Established June 30, 1976.
Acreage—13,191.35 Federal: 2,418.93 Nonfederal: 10,772.42.

Kobuk Valley National Park
P.O. Box 1029
Kotzebue, AK 99752
907-442-3890

Embracing the central valley of the Kobuk River, the park, located entirely north of the Arctic Circle, includes a blend of biological, geological, and cultural resources. Here, in the northmost extent of the boreal forest, a rich array of arctic wildlife can be found, including caribou, grizzly and black bear, wolf, and fox. The 25-square-mile Great Kobuk Sand Dunes lie just south of the Kobuk River against the base of the Waring Mountains. Archeological sites revealing more than 10,000 years of human occupation are among the most significant sites known in the Arctic. The park contains the Salmon Wild River. LIMITED FEDERAL FACILITIES.
Acreage—1,750,736.86 Federal: 1,669,643 Nonfederal: 81,093.86. Wilderness area: 190,000.

Lake Clark National Park and Preserve
4230 University Drive
Suite 311
Anchorage, AK 99508
907-781-2218

Located in the heart of the Chigmit mountains along the western shore of Cook Inlet, the park-preserve contains great geologic diversity, including jagged peaks, granite spires, and two symmetrical active volcanoes. More than a score of glacially carved lakes rim the mountain mass. Lake Clark, more than 40 miles long, is not only the largest lake here, but it is also the headwaters for red salmon spawning. Merrill and Lake Clark Passes cut through the mountains and are lined by dozens of glaciers and hundreds of waterfalls that cascade over rocky ledges. The park-preserve contains the Chilikadrotna, Mulchatna, and Tlikakila Wild Rivers. LIMITED FEDERAL FACILITIES.
The Noatak River basin is the largest mountain-ringed river basin in the Nation still virtually unaffected. The preserve includes landforms of great scientific interest, including the 65-mile-long Grand Canyon of the Noatak, a transition zone and migration route for plants and animals between subarctic and arctic environments, and an array of flora among the most diverse anywhere in the earth's northern latitudes. The preserve contains part of the Noatak Wild River. LIMITED FEDERAL FACILITIES.

Acreage—6,569,904.04 Federal: 6,275,935 Nonfederal: 293,969.04. Wilderness area: 5,800,000.

The site of the 1804 fort and battle that marked the last major Tlingit Indian resistance to Russian colonization is preserved here. Tlingit totem poles and crafts are exhibited. The Russian Bishop's House, built in 1842, is the oldest intact piece of Russian American architecture.

Acreage—106.83 Federal: 106.17 Nonfederal: 0.66.

Located along the Canadian border in central Alaska, the preserve protects 115 miles of the 1,800-mile Yukon River and the entire Charley River basin. Numerous old cabins and relics are reminders of the importance of the Yukon River during the 1898 gold rush. Paleontological and archeological sites here add much to our knowledge of the environment thousands of years ago. Peregrine falcons nest in the high bluffs overlooking the river, while the rolling hills that make up the preserve are home to an abundant array of wildlife. The Charley, an 88-mile wild river, is considered by many to
be the most spectacular river in Alaska. LIMITED FEDERAL FACILITIES.
Acreage—2,526,509.46 Federal: 2,183,093 Nonfederal: 343,416.46.

American Samoa
National Park of American Samoa
c/o Pacific Area Office
P.O. Box 50165
Honolulu, HI 96850
808-541-2693

Two rain forest preserves and a coral reef are home to unique tropical animals including the Flying Fox, Pacific Boa, tortoises, and an array of birds and fish. The park contains paleotropical rain forests, pristine coral reefs, and magnificent white sand beaches. NO FEDERAL FACILITIES. Authorized Oct. 31, 1988.
Acreage—9,000, all nonfederal.

Arizona
Canyon de Chelly National Monument
P.O. Box 588
Chinle, AZ 86503
520-674-5436

At the base of sheer red cliffs and in canyon wall caves are remains of American Indian villages built between A.D. 350 and 1300. Navajos live and farm here today. Authorized Feb. 14, 1931. Boundary change: March 1, 1933.
Acreage—83,840, all nonfederal.

Casa Grande Ruins National Monument
1100 Ruins Drive
Coolidge, AZ 85228
520-723-3172

These perplexing ruins of a massive four-story building, constructed of high-lime desert soil by American Indians who farmed the Gila Valley 600 years ago, have raised many questions. Casa Grande Ruin Reservation authorized March 2, 1889; proclaimed June 22, 1892; redesignated by proclamation Aug. 3, 1918. Boundary changes: Dec. 10, 1909; June 7, 1926.
Acreage—472.50, all federal.

Chiricahua National Monument
Dos Cabezas Route
Box 6500
Willcox, AZ 85643
520-824-3560

The varied rock formations here were created millions of years ago by volcanic activity, aided by erosion. Faraway Ranch, an early dude ranch, has been restored. Proclaimed April 18, 1924; transferred from Forest Service, U.S. Dept. of Agriculture, Aug. 10, 1933. Boundary changes: June 10, 1938; Nov. 10, 1978. Wilderness designated Oct. 20, 1976.
Acreage—11,984.73 Federal: 11,982.38 Nonfederal: 2.35. Wilderness area: 9,440.

Coronado National Memorial
4101 East Montezuma Canyon Road
Hereford, AZ 85615
520-366-5515

Our Hispanic heritage and the first European exploration of the Southwest, by Francisco Vasquez de Coronado in 1540-42, are commemorated here, near the point where Coronado’s expedition entered what is now the United States. Authorized as International Memorial Aug. 18, 1941; redesignated July 9, 1952; established Nov. 5, 1952. Boundary changes: Sept. 2, 1960; Nov. 10, 1978.
Acreage—4,750.22 Federal: 4,748.22 Nonfederal: 2.
Fort Bowie
National Historic Site
P.O. Box 158
Bowie, AZ 85605
520-847-2500

Established in 1862, this fort was the focal point of military operations against Geronimo and his band of Apaches. The ruins can be reached only by trail.
Acreage—1,000, all federal.

Glen Canyon
National Recreation Area
(See Utah)

Grand Canyon
National Park
P.O. Box 129
Grand Canyon, AZ 86023
520-638-7888

The park, focusing on the world-famous Grand Canyon of the Colorado River, encompasses 177.7 miles of the river, with adjacent uplands, from the southern terminus of Glen Canyon National Recreation Area to the eastern boundary of Lake Mead National Recreation Area. The forces of erosion have exposed an immense variety of formations which illustrate vast periods of geological history.
Acreage—1,217,158.32 Federal: 1,180,617.78 Nonfederal: 36,540.54.

Hohokam Pima
National Monument
331 Casa Grande Ruins
National Monument,
1100 Ruins Drive
Coolidge, AZ 85228-3200
520-723-3172

Preserved here are the archeological remains of the Hohokam culture. Hohokam is a Pima Indian word meaning “those who have gone.” NOT OPEN TO THE PUBLIC.
Acreage—1,690, all nonfederal.

Hubbell Trading Post
National Historic Site
P.O. Box 150

One of the best-preserved cliff dwellings in the United States, this 5-story, 20-room castle is 90 percent intact.
Betatakin, Keet Seel, and Inscription House (closed since 1968 due to its fragility) are three cliff dwellings of the Kayenta Anasazi.
Proclaimed March 20, 1909. Boundary change: March 14, 1912. Headquarters is on 244.59 acres of tribal land adjacent to the Betakin section; used by agreement of May 1962. A right-of-way of 4.59 acres was granted to the Park Service in 1977. Acreage—360, all federal.

Sonoran Desert plants and animals found nowhere else in the United States are protected here as are traces of a historic trail, Camino del Diablo.

Trees that have petrified, or changed to multicolored stone, Indian ruins and petroglyphs, and portions of the colorful Painted Desert are features of the park.

The historic fort and other structures, built here by Mormon pioneers, memorialize the exploration and settlement of the Southwest.

Giant saguaro cacti, unique to the Sonoran Desert, sometimes reach a height of 50 feet in this cactus forest, which covers the valley floor, rising into the Rincon and West Tucson mountains.

This volcanic cinder cone with summit crater was formed just before AD 1100. Its upper part is colored as if by a sunset.

These well-preserved cliff dwellings were occupied during the 13th and 14th centuries by Salado Indians who farmed in the Salt River Valley.

This park was originally a working cattle ranch owned by Capt. James Cook and known as Agate Springs Ranch. The park features renowned quarries that contain numerous, well preserved mammal fossils from the Miocene Epoch and represent an important chapter in the evolution of mammals. The park’s museum collection also contains more than 500 artifacts from the Cook Collection of Indian Artifacts. These items were given to Captain Cook by the Oglala Lakota Sioux and their leader, Chief Red Cloud. Authorized June 5, 1965. Acreage—3,055.22 Federal: 2,737.52 Nonfederal: 317.70.

This park, which includes the 160-acre claim filed by Daniel Freeman under The Homestead Act of 1862, is a memorial to the pioneers who settled the Great West. Among the features are a typical homestead cabin, a restored frontier school, and more than 100 acres of tallgrass prairie. Authorized March 19, 1936. Boundary change: Sept. 25, 1970. Acreage—195.11 Federal: 189.20 Nonfederal: 5.91.

Two stretches of the Missouri River are protected here. The portion originally set aside, from Gavins Point Dam near Yankton, S.D., to Ponca, Neb., still exhibits the river’s dynamic character in its islands, bars, chutes, and snags; it was authorized in 1978. The U.S. Army Corps of Engineers, Omaha District, manages the river through a cooperative agreement with the National Park Service. The second portion includes the land located adjacent to the free-flowing segment between Lewis and Clark Lake and Lake Francis Case. This section was authorized in 1991 and represents one of the best natural landscapes associated with the river along its entire course. Native floodplain forest, tallgrass and mixed grass prairies, and the river provide habitats for several endangered species. Recreational activities include fishing, hunting, and boating. The park also includes the lower 20 miles of the Niobrara River and 8 miles of Verdigre Creek. Authorized Nov. 10, 1978, with additional legislative action May 24, 1991. Length: 59 miles (original segment); 67 miles (1991 addition). Acreage—undetermined.

The upper portion of this river provides excellent canoeing. The river flows through a sparsely populated and very scenic area. The river’s greatest feature is that it flows through an ecological crossroads, between eastern woodlands and western grasslands with the respective flora and fauna. Authorized May 24, 1991. Length: 76 miles. Acreage—undetermined.

The park is a site of exceptional historic and archeological importance. Its strategic location between the Great Plains and the Rio Grande Valley has made it the focus of the region’s 10,000 years of human history. The park preserves the remains of the great Pecos pueblo, a major trade center and the ruins of two Spanish colonial missions dating from the 17th and 18th centuries. It also contains sites relating to the Santa Fe Trail. The Glorieta Unit protects key sites associated with the 1862 Civil War Battle of Glorieta Pass—a watershed event that ended the Confederate attempt to carry the war into the west. Two miles of pristine riparian habitat on the Pecos River are also protected. Authorized as Pecos National Monument June 28, 1965; redesignated June 27, 1990. Boundary changes: Oct. 21, 1976; June 27, 1990; Nov. 8, 1990.

In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither federally owned nor directly administered by the National Park Service but which utilize NPS assistance.

The Affiliated Areas comprise a variety of locations in the United States and Canada that preserve significant properties outside the National Park System. Some of these have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial aid from the National Park Service.

Owned by Congregation Shearith Israel, New York City. The National Park Service lends technical assistance for preservation of the building under a cooperative agreement with the two congregations.

101
Wild and Scenic Rivers System

Public Law 90-542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment. Components of the system, which may include only a portion of a river, are classified as wild, scenic, or recreational rivers. They are classified according to the degree of development on the river, shoreline, and adjacent lands. Thus a wild river shows little evidence of human activity, the river is free of dams, and it is generally inaccessible except by trail. A scenic river is one with relatively primitive shorelines but accessible in places by road. A recreational river has more development, is accessible, and may have been dammed or diverted in the past.

Once a river is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency is to preserve or enhance the features that qualified the river for inclusion within the system; any recreational use must be compatible with preservation. Rivers administered by the National Park Service are units of the National Park System. Those administered by the U.S. Fish and Wildlife Service are components of the National Wildlife Refuge System.

Rivers and streams that are in state-protected systems may become units of the National System if the state’s Governor asks for such inclusion. The Secretary of the Interior may then designate the river, if it is appropriate, as a unit of the system. Federally managed components of the system are designated by Acts of Congress. Usually Congress first authorizes a detailed study to determine the qualification of a river area for the system.

Acreages of the wild rivers entirely within larger units of the National Park System are not given separately. Acreages of wild rivers within the National Wildlife Refuge System in Alaska and several others are undetermined.

A note on organization: The first group of rivers, with addresses and brief descriptions, are those administered by the National Park Service. River mileages, refer only to mileage in parks where there is a jointly administered river. The second group, administered by a variety of federal, state, and local governments, provides only individual addresses to which you may write for further information.

Middle Delaware River
Delaware Water Gap National Recreation Area
Bushkill, PA 18324

This river includes both the North and South Forks of the Kern. The South Fork is totally free-flowing. It descends through deep gorges with large granite outcroppings and domes interspersed with open meadows. It is home to the golden trout, the state fish of California. The upper 47.5 miles of the North Fork flow through Sequoia National Park and Golden Trout Wilderness, a scenic area with a wide variety of outstanding recreational opportunities, as well as cultural and historical associations. Authorized Nov. 24, 1987. Length: 151 miles.

This river includes the entire Middle and South Forks, which are largely in Kings Canyon National Park. Beginning in glacial lakes above timberline, the rivers flow through deep, steepsided canyons, over falls and cataracts, eventually becoming an outstanding whitewater rafting river in its lower reaches in Sequoia National Forest. Geology, scenery, recreation, fish, wildlife, and history are all significant aspects. Authorized Nov. 3, 1987. Length: 55.5 miles.

Portions of the Maurice River and three of its main tributaries, the Manumuskin River and the Menantico and Muskee Creeks, were designated to protect critical habitat on the Atlantic Flyway. Authorized Dec. 1, 1993. Length: 35.4 miles.

Including the South Fork, this segment of the Merced flows through superlative scenery—glaciated peaks, lakes, alpine and subalpine meadows—in alternating pools and cascades. Wildflower displays are also spectacular. The South Fork possesses one of the few remaining pristine Sierra fisheries with self-sustaining populations of rainbow, eastern brook, and brown trout. Archeological and wildlife features are also noteworthy. Authorized Nov. 2, 1987. Length: 81 miles.

See Middle Delaware National Scenic River, Pennsylvania, a unit of the National Park System.
Mulchatna Wild River, which lies within Lake Clark National Park and Preserve, Alaska, is exceptionally scenic as it flows out of Turquoise Lake with the glacier-clad Chugmit Mountains to the east. Both moose and caribou inhabit the area. Authorized Dec. 2, 1980. Length: 24 miles.

National Trails System

The National Trails System Act of 1968, as amended, calls for establishing trails in both urban and rural settings for persons of all ages, interests, skills, and physical abilities. The act promotes the enjoyment and appreciation of trails while encouraging greater public access. It establishes four classes of trails: national scenic trails, national historic trails, national recreation trails, and side and connecting trails.

National scenic trails are to be continuous, extended routes of outdoor recreation within protected corridors. The first two established under the National Trails System Act were the Appalachian and Pacific Crest trails. They wind through some of the Nation's most striking natural beauty. National historic trails recognize past routes of exploration, migration, and military action.

The term national recreation trail is given to an existing trail by the Federal Government, upon application, in recognition of its role as a component of the National Trails System. Today more than 800 of these trails have been designated throughout the country. They are located in every state, the District of Columbia, and Puerto Rico, totaling more than 9,000 miles in length. Most of them, 525, are on federal lands. Of the remainder, 151 are state trails, 85 are local, and 31 are on private lands, and 12 are managed by two or more entities.

Side and connecting trails provide additional access to and between components of the National Trails System. To date, two have been designated.

Since 1968, 35 long-distance trails have been studied for inclusion in the system, and 19 have been designated. The National Park Service administers 14 of them, the Forest Service administers four, and the Bureau of Land Management, one.

The National Park Service encourages all public and private agencies to develop, maintain, and protect trails. With the cooperation and support of a nationwide trails community, the vision of an interconnected, cross-country trail system will become a reality.

for public inquiries:
Appalachian Trail Conference
P.O. Box 807
Harpers Ferry, WV 25425-0807

Approximately 2,150 miles of this scenic trail follow the Appalachian Mountains from Katahdin, Maine, through New Hampshire, Vermont, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Maryland, West Virginia, Virginia, Tennessee, and North Carolina, to Springer Mountain, Georgia. The trail is one of the two initial components of the National Trails System. It is also a unit of the National Park System.

California National Historic Trail
National Park Service
324 South State Street #250
Salt Lake City, UT 84145-0155

The California Trail is a system of overland routes, starting at five points along the Missouri River and ending at many locations in California and Oregon. Over these trails passed one of America's great mass migrations, seeking the promise of gold and a new life in California in the late 1840s and 1850s. Traces of their struggles and triumphs are still evident at many trail sites.

Continental Divide National Scenic Trail
Forest Service, Region 2
740 Simms
Golden, CO 80401

Running the length of the Rocky Mountains near the Continental Divide, this trail extends from Canada's Waterton Lake into Montana, along the Idaho border, and on to Wyoming, Colorado, and New Mexico, ending at the U.S.-Mexico border.

Florida National Scenic Trail
Forest Service
P.O. Box 13708
Tallahassee, FL 32304

The trail runs north from Big Cypress National Preserve and the Kissimee Prairie through various national and state forests to the gulf islands. More than 600 miles have been developed for public use.

Ice Age National Scenic Trail
National Park Service
700 Rayovac Drive
Suite 100
Madison, WI 53711

Winding over Wisconsin's glacial moraines, the trail links together six of the nine units of the Ice Age National Scientific Reserve. It traverses significant features of Wisconsin's glacial heritage. Approximately 475 miles are open to public use; additional miles are being developed.

Iditarod National Historic Trail
Bureau of Land Management
6881 Abbott Loop Rd.
Anchorage, AK 99507

One of Alaska's preeminent Gold Rush Trails, the Iditarod extends from Seward to Nome and is composed of a network of trails and side trails developed at the turn of the century.
Juan Bautista de Anza
National Historic Trail
Pacific West Area
National Park Service
600 Harrison Street
Suite 600
San Francisco, CA 94123-1308

This trail traces the path of a party of Spanish colonists, led by Col. Juan Bautista de Anza, who in 1776 sought to establish an overland route from central Mexico to the Golden Gate in California.

Lewis and Clark
National Historic Trail
National Park Service
700 Rayovac Drive
Suite 100
Madison, WI 53711

The route of the 1804-06 Lewis and Clark Expedition extends from the Mississippi River in Illinois to the Pacific Ocean at the mouth of the Columbia River in Oregon. Water routes, hiking trails, and marked highways follow the explorers' outbound and return routes. Almost 500 public and private recreation and historic sites along the trail provide for public use and interpretation of the expedition.

Mormon Pioneer
National Historic Trail
National Park Service
324 South State Street, #250
Salt Lake City, UT 84145-0155

This trail follows the route over which Brigham Young led the Mormons from Nauvoo, Illinois, to the site of modern Salt Lake City, Utah, in 1847-48. An auto tour route has been marked approximating the trail.

Natchez Trace
National Scenic Trail
c/o Natchez Trace Parkway
R.R. 1, NT-143
Tupelo, MS 38801

Sections of this trail are found along Natchez Trace Parkway near Natchez and Jackson, Mississippi, and Nashville, Tennessee. The trail is a unit of the National Park System.

Nez Perce
National Historic Trail
Forest Service, Region 1
P.O. Box 7669
Missoula, MT 59807

The Nez Perce Trail commemorates the flight of the "non-treaty" Nez Perce Indians in 1877. It begins in northeastern Oregon, extends across Idaho to central Montana, bisecting Yellowstone National Park in Wyoming and ending near the Bear Paw Mountains.

North Country
National Scenic Trail
National Park Service
700 Rayovac Drive
Suite 100
Madison, WI 53711

The trail connects seven northern tier states extending from Crown Point, New York, to Lake Sakakawea in North Dakota, where it connects with the Lewis and Clark National Historic Trail. Approximately 1,200 miles are open to public use. Additional miles are being developed.
Established March 5, 1980. Length: 3,200 miles.

Oregon
National Historic Trail
National Park Service
324 South State Street, #250
Salt Lake City, UT 84145-0155

Hundreds of thousands of pioneers followed this trail westward from Independence, Missouri, to Oregon City, Oregon, between 1841 and 1860.

Overmountain Victory
National Historic Trail
Southeast Area
National Park Service
75 Spring Street, SW
Atlanta, GA 30303-3378

This route follows the path of a band of Revolutionary War patriots who mustered in western Virginia and eastern Tennessee and came across the mountains of North Carolina to Kings Mountain, South Carolina, where they defeated British-led militia in 1780.

Trail of Tears National Historic Trail
National Park Service
Long Distance Group
P.O. Box 728
Santa Fe, NM 87504-0728

Extending from the Mexican border northward along the Sierra and Cascade peaks of California, Oregon, and Washington, the trail reaches the Canadian border near Ross Lake, Washington. The trail is one of the two initial components of the National Trails System.

For 18 months, 1860-61, mail riders on horseback traveled between St. Joseph, Missouri, and Sacramento, California, in just under 10 days, proving that a regular overground communications link to the Pacific coast was possible. Most of the 150 relay stations no longer exist.

This trail connects the tidewater regions along the Potomac to the Laurel Highlands in Pennsylvania. Areas open to the public include the C&O Canal towpath and George Washington Parkway's Mount Vernon Trail. The trail is a unit of the National Park System.

The route of the Santa Fe Trail extends from a point near Arrow Rock, Missouri, through Kansas, Oklahoma, and Colorado to Santa Fe, New Mexico. To date, 20 certified sites and segments are open for public use.

The Trail of Tears commemorates two of the land and water routes used for the forced removal of more than 15,000 Cherokees from their ancestral lands in North Carolina, Tennessee, Georgia, and Alabama to the Indian Territories of Oklahoma and Arkansas. The journey lasted from June 1838 to March 1839.
