About 60 species of birds have been recorded within the Big South Fork NRRA during the past two decades. Prior to the establishment of the national Area, some species of birds occurred within its present-day boundaries or nearby, but they have not been recorded since. The following species may one day be recorded in the area again but they are not expected at this time.

### Species Status Hab. Sp Su F W

### Status Codes
- PR Permanent Resident
- SR Summer Resident
- WR Winter Resident
- Tr Transient
- Ve Visitor (no pattern to occurrence)

### Habitat Obligates and Generalists
- G Largely confined to the gorge
- A Usually associated with aquatic habitats, such as rivers, lakes and ponds
- P Usually associated with upland pine forests
- O Usually associated with open habitats

### Seasons of Occurrence
- Sp Spring (March–May)
- Su Summer (June–July)
- Fa Fall (August–November)
- Wi Winter (December–February)

### Abundance Codes
- a Abundant (26+ likely to be identified in a day)
- c Common (11–25 likely to be identified in a day)
- fc Fairly common (3–10 likely to be identified in a day)
- u Uncommon (1–2 likely to be identified in a day)
- vu Very uncommon (1–5 records during a season)
- r Rare (1–3 records ever made)
