Before there were phones, computers or electricity, messages still needed to be sent quickly. In the early 1800s, Morse Code was developed in order to send messages over telegraph wires.

Imagine the world as you know it turned upside-down. Your country, state, town, and even your home have split into two. During the Civil War, the nation split as the northern and southern states fought against each other in the bloodiest war America had ever seen.

In the years leading up to the war, Boston fortified its harbor to protect its crucial trade routes and port. When it became clear that battle would never reach as far north as Boston, Fort Warren was given a new purpose: a Confederate prison. The fort’s great cannons were taken from the ramparts and sent overseas, and over 2,000 soldiers and prisoners from the south and west were locked up in the makeshift prison cells of Fort Warren.

Fort Warren continued to defend Boston Harbor throughout The First World War, the Second World War, and the Spanish American War. The island was used as a training facility well into the 20th century until its designation as a National Historic Landmark in 1970.
