Manhattan Project National Historical Park is a partnership park, with both the Department of Energy and the National Park Service. Together, they tell the stories of Los Alamos, NM; Hanford, WA; and Oak Ridge, TN. These three sites played a unique and crucial role during the Manhattan Project. We encourage you to visit all three locations.

### Did You Know?

Yellowstone National Park became the world's first national park in 1872. In the early years, most national parks were in the western states. This is why the badge has western symbols. Today, the National Park System includes seashores, battlefields, monuments (like the Statue of Liberty), huge wetlands, scenic rivers, islands, and urban parks (like Manhattan Project National Historical Park). Record how many arrowheads you see during your visit. Can you spot them on signs, cars, brochures, and uniforms?

List any other national parks you have visited.
