A Legacy of Service

ON A BALMY AUGUST AFTERNOON, THE PASSENGERS ON S.S. SEMINOLE scanned the horizon, eyes squinted against the sun, for a first view of the island. From your own journeys to Isle Royale, you probably remember that first sightling, feeling excitement for the adventure ahead, perhaps relief that the lake crossing was almost behind you and the inevitable worry that some critically important piece of equipment had been forgotten. The 20 men aboard Seminole were likely filled with similar anticipation as the vague outline of land resolved into a tapestry of greens, reds and browns. Crossing Siskiwit Bay, they looked for a good landing near Senter Point; but the rocky shore, dense underbrush and shallow waters defeated them and they were forced to wade ashore. It was 1935; Company 2699 of the Civilian Conservation Corps had arrived on Isle Royale.

Just two years earlier, the newly elected president Franklin Roosevelt had quickly enacted an emergency works program as the country reeled from the effects of massive unemployment. “Our greatest task” he declared, “is to put people to work...but at the same time accomplishing greatly needed projects to stimulate our economy and reorganize the use of our natural resources.” The resulting large mobilization of young men into the Civilian Conservation Corps (CCC) had lasting impacts on federal and state lands. The national parks saw an enormous influx of labor and expertise and labor. It is a legacy of service.

As war loomed, the CCC camps began to close. President Roosevelt was expansive in his praise. “The willingness with which you have performed your task and the fine spirit you have shown...merits the admiration of the entire country.” The closure of Camp Siskiwit in 1940 was noted in the log, “The morale of the entire camp is down after hearing the camp was ordered to disband...” The last CCCs departed from Isle Royale in September of 1941.

Today, the remains of their camps have been almost completely reclaimed by the island. But their legacy lives. The young faces of the “Hardy Boys” are mirrored in the dirt-smudged smiles of enrollees with the Minnesota Conservation Corps and AmeriCorps who assist with campground and trail work. The experience and dedication of the LEMs is still evident in the thoughtful frowns and sweaty brows of individual volunteers and groups who support park projects with their expertise and labor. It is a legacy of service.

On your voyage to Isle Royale this year, as you strain your eyes for that first glimpse, you may be focused on your upcoming adventure in this national park. But if you scan the shoreline, a trick of the light might reveal a group of young men dressed in long-ago fashion; their faces alive with anticipation. They wave in welcome. And somewhere, Franklin Roosevelt is smiling.

Did You Know?
Development of the system of National Park Service areas we enjoy today all started with the creation of Yellowstone, the world’s first national park, in 1872. Building this system to the almost 400 units took the passion and persistence of many people—including America’s leaders.

1) America’s fifth national park was named after the president who signed Yellowstone National Park into being. Who was this president? What is that park called today?
2) He was the only U.S. president to have served as a park ranger in the National Park Service. During his time in office, 18 new National Park Service units were added to the system.
3) The greatest addition in acreage to the National Park Service took place during this president’s term. The total acreage of National Park Service areas doubled in a single day. Who was this president? How much land was added?
4) This president signed the bill authorizing Isle Royale National Park on the day congress adjourned, March 3, 1931.

It was awful! Real wild and wooly, trees, rocks, bugs, wild animals, swamps. That’s all there was! ... But, that fall when it was time to leave it was like losing a good friend. Remembrance of a CCC enrollee stationed on Isle Royale

In the spring of 1940 I was asked to pack my bags and gear and leave for Isle Royale. It was not the Siberia...It was beautiful. A jewel in Lake Superior.

Eugene E. Stevenson
Former CCC enrollee

...In preserving wilderness we should guard against any sort of development which will reduce space or increase travel. All activities on Isle Royale should be judged in this light, and it should be remembered that the wilderness spirit is tender, easily marred and destroyed.

Adolph Murie 1935

Isle Royale National Park
Mr. President, Isle Royale was established as a national park for the central purpose of preserving its...value of wilderness. Yet with all of our parks we know that their great popularity as recreational resources is attracting more and more use, leading to pressures for more and more...developments. Isle Royale is increasingly in danger of the kind of slow erosion by which the wilderness becomes a summer resort.....We must take every precaution to hold fast to the wilderness value for which this national park was established.

Philip Hart, Michigan Senator 1973

To Better Serve...
Would you like to be able to spend a long weekend on Isle Royale no matter what transport you took? Should the park offer direct transit from Houghton to Windigo every week or every other week? The park is considering operating Ranger III trips to Windigo, altering our current schedule in order to transport supplies and remove garbage more efficiently from the island’s west end. Transporting visitors on these trips is an option, and would be conducted as part of a two-year pilot program to determine visitor use and interest as well as effects on visitor distribution on the island. I am interested in your comments on these potential changes.

Whether you are a backpacker hiking deep in the forest, a boater anchored in a protected harbor, or a lodge guest exploring a solitary beach, the wilderness setting of Isle Royale is an integral part of your park visit. Providing a quality wilderness experience for all has been the focus of management discussions as we ready to release the final Wilderness Plan this summer. Please take time to read the Executive Summary on our web site, as it becomes available, or ask for a CD copy of the final plan. As the plan is implemented, I want you to know that adaptive management will be the backbone of moving forward. This strategy considers problems and tries new methods to solve them and then measures whether the “solution” had the intended results. By utilizing this process, the park will strive to develop practices which better serve our visitors and match changing user trends.

Enjoy your visit to Isle Royale.

Phyllis Green
Superintendent
Isle Royale Natural History Association: The Next Fifty Years

Isle Royale was established as a national park in April 1940. Seventeen years later, in March 1957, a small group of Isle Royale residents and Park Service staff conceived a plan to form an association in order to “aid Isle Royale National Park in matters of interpretation – making the prehistory, history, geology, zoology and botany of Isle Royale known and available to Park visitors.”

The organization was named the Isle Royale Natural History Association. Its first president was H. R. Orsborn and its first executive secretary was Bob Linn. The minutes of their first meeting lists the tasks to be undertaken by the newly formed group:

- Aid to research projects leading to a better understanding of Isle Royale.
- Establishing sets of color slides depicting Isle Royale flora, fauna, geology, and scenes.
- Establishing a publications program, which will make what is known about Isle Royale readily available to all who seek it.

Fifty years later, the Isle Royale Natural History Association continues the work outlined for us in 1957. Our support for island research has grown substantially, the slide collection, once established, has now been saved to digital format and is still used for both programs and publications. The IRNHA publication program has been, by all accounts, a huge success.

Funding for initial publishing projects was hard to come by. In 1958, IRNHA secretary Bob Linn wrote to the Eastern National Park and Monuments Association requesting a loan “to undertake a publications program—desperately needed at Isle Royale National Park to make the interpretive program a well-rounded one.” In the letter, he cited the statistic that Isle Royale was the least visited of all National Parks, and expressed hope that visitation would increase due to “the recent completion of the Straights of Mackinac Bridge and the future completion of a 100-passenger boat between Houghton, Michigan, and Isle Royale.”

The bridge was completed, the ferry began running, and the loan was granted. The first manuscript published by the association in 1959, Fishes of Isle Royale, is still in print today. It was followed by a number of small 5-50 page booklets on island flora and fauna and tales of island residents. Since that beginning, IRNHA has published over 25 books. Included in that number are two National Park Service award winners, Isle Royale: Moods, Magic, and Mystique, in 1989 and The Island Within Us: Isle Royale Artists in Residence in 2005. The first complete nature guide for Isle Royale will be available in 2007.

We also print free publications, including this Greenstone, the boaters’ brochure, the Windigo and Rock Harbor area guides, and more.

All IRNHA publications, whether modest pamphlets or full color books, have been produced to fill a need in assisting visitors and to tell the stories of the natural and cultural history of Isle Royale. Today our publications are sold throughout the United States through national distributors and on the Internet.

Support for Isle Royale research continues to be another major IRNHA undertaking. Recently IRNHA has contributed funds and hands-on assistance for invasive aquatic species research and education, a loon nesting atlas, a non-native plant survey, inland lakes water testing, and the bi-annual beaver survey.

IRNHA also provides the park an average of 4,000 hours of volunteer services annually, assisting park visitors, helping to restore historic buildings, repairing park structures, and eradicating invasive plant species.

The Isle Royale Natural History Association began fifty years ago with a couple dozen visionary members. We have grown to become a national organization, with 1,200 members from every state of the country. Still our mission remains constant: To share the stories of Isle Royale, and in so doing encourage the public to preserve and protect this special park for future generations.

We invite you to join us as we begin our second half-century of support for Isle Royale National Park. A membership form can be found on page 12.

Jill Burkland, Executive Director
Isle Royale Natural History Association

Marian High – Teen Community Service

Marian High School, an all-girls Catholic school in Bloomfield Hills, Michigan, was one of the first high schools in the state of Michigan to require a community service experience as a graduation requirement. Since 1997, one service project available to Marian students has been a trip to Isle Royale National Park. These work trips have included painting of shelters, picnic tables, privies, ranger stations, maintenance facilities, and shower buildings. Other work performed by Marian students has included re-roofing small buildings, renovating an old ranger station, repairing picnic tables, salvaging lumber, conducting facility surveys, and trail maintenance.

For many students this provides their first camping experience and certainly their first experience in a wilderness area. In addition, the trips provided an opportunity for students to test themselves in a physically demanding environment. The majority of the students return from their experience with a newfound appreciation of wilderness and the national parks.

In the past 10 years, nearly 30 students have participated in the program. Each of these students were personally thanked by several park visitors during the duration of their student project, and every student was surprised at how appreciative park visitors were of their volunteer efforts. Many of the students involved in the program have returned to Marian to become leaders in the various environmental student organizations. I believe that through their experience a spark has been ignited that will lead them to become vocal and influential advocates for wilderness and for national parks.

John D. Dunn
Guidance Counselor
Marian High School
Interpretive Activities

Enjoyable and educational programs are offered on Isle Royale at Rock Harbor, Daisy Farm, and Windigo, and they are also presented on the National Park Service vessel, Ranger III. In addition, guided excursions explore such areas as Passage Island and Lookout Louise near Rock Harbor. Ranger guided programs are free, although those involving the tour boat MV Sandy include a transportation fee. Check at local bulletin boards for further details. For outdoor activities, dress for the possibility of cold or rain and wear sturdy footwear. Trails are slippery and muddy during or after wet weather, wear shoes with good ankle support, weatherproofing, and soles that grip well.

Hidden Lake/Lookout Louise ($)**

Greenstone Shuttle

A 4-mile boat trip on the MV Sandy to Hidden Lake Trailhead followed by a guided 2-mile round trip hike past Hidden Lake up 320 feet to Lookout Louise. View the south shore of Canada and the north shore of Isle Royale. Return with the group or bring a lunch and water and hike 0.4 miles back to Rock Harbor.

Passage Island ($)**

An 8-mile boat tour on the MV Sandy crosses one of Isle Royale’s popular shipping lanes. The 2-mile guided round-trip hike leads to Passage Island Lighthouse and explores an area of low moose presence.

North Side Cruise/Mining Mine ($)

Cruise two hours each way along Isle Royale’s north shore bays. Pass Blake Point and Amygdaloid Island, with a possible stop at Belle Isle. A guide may be available to lead a 3-mile hike from McCarige Cove to the historic Mining Mine. The hike includes difficult walking over steep piles of loose rock on an unmaintained trail. Trip may include a hike to Pine Mountain, offering excellent views of the Canadian shoreline. Bring lunch and beverage.

Edisen Fishery and Rock Harbor Light ($)

Visit the historic commercial fishery with the resident fishery demonstrator (July thru August), take a quarter-mile walk to the oldest lighthouse (1855) on Isle Royale and enjoy its maritime exhibits.

Captain’s Cruise ($)**

Explore with the Captain of the MV Sandy, scenic, out-of-the-way destinations, such as Middle Island Passage, Lorelei Lane, Rock Harbor Lighthouse, Davidson Island, and Stavros Point.

Raspberry Island/Sunset Cruise ($)**

Take a walk along a boardwalk through the spruce bog on Raspberry Island followed by a cruise on the MV Sandy around Scoville and Blake Points to view features like the Canada shoreline, the site of the Miwisch shipwreck, and a Lake Superior sunset (after Aug. 15, cruise only).

MV Sandy Tours from Rock Harbor

For all tours and programs involving the MV Sandy, obtain tickets and information at the Lodge Registration Office. MV Sandy Tours will operate from June 5 through September 7. Fare rates for the various tours are available at the Rock Harbor Lodge and Rock Harbor Visitor Center; children under 12 are charged half-price for the MV Sandy.
Wilderness Use

During Isle Royale’s early history, visitors risked much to get there. They did not come to vacation; they came to tame the wilderness through mining its copper, harvesting its fish, and logging its timber. The island was never tamed, the resource never conquered, but its landscape bears the scars of these early attempts.

Today Isle Royale has reverted back to a primitive wilderness. The environmental conditions historically viewed as a burden are now accepting a new welcoming. Today’s visitors, as in the past, can still adversely affect this sensitive resource.

To minimize your impact on park resources and other visitors, please read “Have No Trace” (for additional information request a copy of the park’s Leave No Trace booklet or visit www.Int.org). Where you place your feet is as important as how you treat and dispose of waste. Be part of the solution: help maintain the sense of solitude and preserve the wilderness flavor, a flavor that has the potential to change your life. Proper wilderness use begins with reading, planning, and putting into practice the following information.

Camping

Permits are required for all overnight stays at campgrounds, cross-country sites, docks, or anchor, regardless of group size or method of travel.

Partly Size Defined

The party size for camping at Isle Royale is divided into two categories. “Individual” parties are defined as a group of six or fewer people. “Group” parties are defined as seven to ten people. There are different requirements outlined below based on party size.

Individual Camping Permits — parties of six or fewer

Camping for individual parties is on a first-come, first-serve basis. Individual parties can apply permitting through the Ranger at upon arrival at Rock Harbor or Windigo Visitor Centers. For trip planning assistance, call (906) 482-0948, write to Isle Royale National Park, 800 East Lakeshore Drive, Houghton, Michigan 49931, or E-mail ISRO. Parkinfo@nps.gov

Group Camping Permits — parties of seven to ten

Advance reservations are required for group camping. For reservations and trip planning assistance call (906) 482-0948, write to Group Reservations, Isle Royale National Park, 800 East LakeShore Drive, Houghton, Michigan 49931, or E-mail ISRO. GroupReserve@nps.gov. If your party exceeds ten people, you must split into two groups, each independent and traveling on completely separate itineraries. Groups shall camp in group tent sites locations only (see chart on page six).

Group leaders shall carry medical information for each group member including known allergies, medical conditions, known medical conditions, and medications currently taken. Organizations may not have more than twenty people camping on the island at any one time and are limited to eighty people per year.

Where to Camp

All campsites on Isle Royale offer tent sites and/or hiked-sided shelters. Shelter and tent sites are available on a first-come, first-serve basis. Shelters may not be reserved and may not be used solely for cooking or storage of gear. Tents may not be erected on shelter sites. Be gentle with screen doors on shelters to minimize intrusive noise and to prevent damage. Expect crowded conditions at park campgrounds during mid-July through August. When sites are full, we ask campers to double up and share empty tent pad space.

Camps must stay in established camp sites unless off-trail (cross-country) arrangements are made at the time the permit is obtained. Off-trail hiking and camping is difficult at Isle Royale, and is only recommended for experienced campers.

Commercial Groups

Organization that charge trip participants a fee or compensate members or trip leaders in any way are commercial groups under federal law. This applies to both non-profit and for-profit organizations. Commercial groups must apply for and receive a Commercial Use License to conduct trips in the park. There is a fee for this permit. Applications are only accepted between January 2 and May 15; contact the park’s Chief Ranger’s Office at (906) 487-7448.

“Quiet, Please”

Most visitors to Isle Royale to hear the sounds of nature in a wild setting. Excessive human noise disturbs wildlife and other visitors. Sound travels easily over the water and on the trail. During quiet hours, between 10:00 p.m. and 6:00 a.m. EDT, if people in adjacent campsites can hear your activities, you are being too loud.

Respect Wildlife

Observe, photograph, and enjoy park wildlife from a safe distance. Use binoculars or a zoom lens “to get closer” to wildlife. If animals flee, become defensive, or change their natural activities in your presence, you are too close! Loons are especially susceptible to disturbance, and may abandon their nests when approached too closely by boats. Coyote moose with calves, particularly in the spring, and bull moose during the fall rut can be dangerous, give them a wide berth.

Keep wild animals wild by discouraging them from approaching humans. Practice proper food storage and keep a clean camp. It is illegal to feed, touch, tease, or intentionally disturb wildlife, their homes, nests, or activities. Animals, particularly fox and otter, when habituated to human food, may eventually overcome their natural wariness of humans and may have to be destroyed.

Human Waste

Proper disposal of human waste helps prevent pollution of water sources, mini-

izes aesthetic impacts to other visitors and reduces the spread of illness. Never defecate within 2000 feet (75 steps) of lakes, streams, trails, gullies, or camp- sites. In areas withoutouthouses, select a site that visitors are unlikely to discover. With a small trowel, dig a “cat hole” to 6 to 8 inches deep and to a 4 to 6 inches in diameter. Place used toilet paper and fecal material in the hole. Use toilet paper sparingly. After use, cover the “cat hole” with the excavated soil and disguise it with natural materials. Uurate on durable surfaces, such as rocks, gravel, or fallen logs, away from campsites and water sources. Pack out all used feminine-hygiene products, carrying them in plastic bags, doubled to contain odor.

Shower

The concession operation offers token-operated shower facilities at Rock Harbor (5/25 - 9/7) and Windigo (6/5 - 9/9).

Waste Water Disposal

Cleaning Cookware

Most cookware can be cleaned with hot water, a little elbow grease, and sand or other natural scrubbings. Clean cookware at least 200 feet (75 steps) from lakes, streams, trails, gullies, or campsites. Soap is unnecessary for most dishwashing jobs; if used, use it sparingly. Even biodegradable soaps take a long time to degrade. Use a small strainer or screen to remove food bits from the water and pack them out your garbage. The remaining gray water should be scattered or broadcast over a wide area away from camp sites and water sources.

Bathing/Cleaning Clothes

When bathing use soap only if necessary and use it sparingly. Get wet and rinse on land at least 200 feet (75 steps) away from water sources or camp sites. Rinse water can be carried in collapsible containers or pots. Clothes can be cleaned by taking them away from water sources and camp sites and thoroughly rinsing them with plain water.

Drinking Water

Potable water is only available at Rock Harbor and Windigo. All surface lake and stream water should be considered contaminated with natural parasites. Drinking contaminated water can make you very sick. Water collected in the park should be boiled for at least one minute or passed through a 0.4 micron water filter followed by chemical treatment. To be assured of no risk of contamination from small bacteria and viruses, all filtered water should be chemically treated. By itself, chemical treatment or filtering is not an effective method of water purification. If you boil your water, bring plenty of stove fuel. If filtering, bring a replacement cartridge for those filters that cannot be cleaned in the field. If you use a filter water from Lake Superior, change your filter or backflush several times with filtered water before using inland – this will assist in keeping Superior’s invasive species from entering the inland lakes.

Precautions should be taken to prevent filters from becoming clogged. Filter water from a pot rather than directly from a lake or creek. Allow the sediment in the pot to settle and filter only from the cleaner water on top.

Dehydration is a problem in hot weather. The Greenstone, Minong, and other trails become hot and dry, and creeks that once offered water may be dry. In addition, there is little or no dependable water available along many trails. To avoid dehydration, be sure to carry a minimum of a quart of water per per- son. Drink as much water as possible while near water sources. Start hiking early before the day heats up – on ridgetops it starts getting hot at 10:00 a.m. on sunny days and gets hotter by late afternoon. Hike at a slower pace than usual and rest in shady spots. Watch for early warning signs of dehydration such as thirst, heavy sweating, fatigue, and a red face. Watch for signs of severe dehydration such as reduced or no sweating, headache, long stretches without urinating, dizziness, and nausea.

Hantavirus

There have been no reported cases of Hantavirus at Isle Royale National Park. Generally, there is a low probability of infection. However, the death rate is very high among infected individuals. The first symptoms are flu-like; the primary symptom is difficulty in breathing and quickly progresses to an inability to breathe. The deer mouse is the primary carrier of the virus. An infected mouse carries the virus in its urine, saliva, feces, and in the carcass. The primary way humans become infected is through breathing in the virus. Infection can also occur by touching the mouth or nose after handling contaminated materials. To minimize risk, avoid coming into contact with rodent droppings and burrows, avoid sleeping on bare ground, and store food and garbage in rodent-proof containers. For additional information on Hantavirus contact the Centers for Disease Control and Prevention at 800-537-9929.

Pack It In, Pack It Out

It starts at home. Through careful meal planning and repackaging of food items, you can reduce food leftovers and trash in the backcountry. Please pack out everything you take in. Leftover food, food-scraps, orange peels, nutshells, apple cores, twist-ties, candy wrappers, fishing line, and cigarette butts must be packed out. If you have food leftovers, either save and eat them later or pack them out. Do not burn, bury or place trash, food scraps or garbage in outhous- es. Please help keep the backcountry clean by packing out what you packed in.
Distance-Elevation-Change-General Comment

Malone Bay - Siskiwit Lake – 0.3 miles, 40' gradual Slope

Siskiwit Lake - Intermediate Lake – 0.4 miles, 40' gradual

**MEDICAL TIPS**

- The island’s Wilderness and Lake Superior present challenges and potential hazards to the inexperienced or ill-prepared.
- Basic emergency services are available on the island, but contacting rangers for assistance can be difficult. Emergency response and evacuation may take time, requiring you to rely on your own skills and equipment. Most private boaters on Lake Superior have radios and can contact park rangers in an emergency.
- Bring a first aid kit, a sufficient supply of any needed medications, and clothing appropriate for the time of year.
- Filter with chemical treatment or boil all surface water. Drink plenty of water. When dehydrated, you tire more quickly, don’t think clearly, and are more prone to fall.
- Weather and lake conditions can deteriorate quickly and unexpectedly. Hypothermia can occur any time of the year, especially near Lake Superior, where water and air temperatures are cool to cold year-round. Fog and waves can quickly create dangerous conditions for boaters, especially for paddlers.
- Many people underestimate hiking travel times and overestimate their abilities. Plan shorter, realistic travel days; don’t turn your wilderness trek into a forced march.

For additional fish species, seasons, and creel limits, please review the Michigan Fishing Guide.
**Wilderness Use**

**Leave What You Find**
Enjoy your discoveries and take them home via photographs, drawings, and memories. Natural objects of beauty or interest such as moss anthers, plants, driftwood, cultural or archeological resources, greenstones, agates, datolite and others. Keep in mind that those found in Lake Superior must be left where they are so others can experience the same sense of discovery. Removing, possessing, or disturbing park resources is prohibited. This may seem like a harmless act, but the cumulative effect of many people doing the same can be quite damaging to park resources. Picking small quantities of berries and wild edibles for personal consumption is permitted.

**Insects**
Expect mosquitoes, black flies, gnats, and other insects to peak in June or July. During wet summers, mosquito populations can continue well into August. Bring insect repellant, netting, or other skin protection. Make sure your tent’s mosquito netting is in good repair and the zippers work. Dry summers will produce an abundance of yellow jackets. Bring an epinephrine kit if you or a member of your party is allergic to bee stings. For others, over-the-counter antihistamines may help counter minor swelling and itching.

**Minimize Use of Fires**
Campfires are permitted at only a handful of campgrounds. A backpacking stove is a must; these stoves are lightweight, dependable, easier to use, and less damaging to the park than wood fires. Twig-burning backpacking stoves are permitted. Where campfires are allowed, a metal fire ring is provided; never build your own ring. Gather only dead and down wood away from the camp area. Use small diameter wood no larger than an adult’s wrist, as this will burn completely and will eliminate the need to pack a hatchet or saw. Collect wood from a wide area and away from the immediate vicinity of camp. This keeps the camp area from becoming depleted of wood and potential nutrients. Do not cut branches or strip bark from standing trees, live or dead. Resist the temptation to gather driftwood or wood from beaver dams or lodges. Do not impinge firewood, insects and pathogens from an infected wood source could devastate Isle Royale’s forests. Do not burn trash in any form. The fire should be kept small. Once extinguished, make sure the flames and coals are dead out and cool to the touch, double check before going to bed or leaving camp.

**Canoeing/Kayaking**
Lake Superior is well known for its cold temperatures, fog, and sudden squalls that can generate waves that could easily swamp a canoe. This along with scarce outer shore landing sites adds to the potential danger. Small, open vessels are discouraged from entering these cold treacherous areas and are encouraged to use the numerous miles of waterways that the inland lakes provide. Canoeists and kayakers should be familiar with weather patterns and conditions. The Marine Forecast at ranger stations before embarking. Be prepared to adjust your schedule to the weather. A portable marine radio is recommended.

**Portages** – Canoe routes and portages are on the northeast half of the island. Portages are marked with a letter “P” on a post. PFD – Every canoeist and kayaker must have a U.S. Coast Guard approved flotation device. Wear it, your life may depend on it.

**Boat Rental** – Canoe, kayak, and motorboat rentals are available at Windigo and Rock Harbor.

**Loons**
Isle Royale National Park is the summer home for over 100 nesting pairs of Common Loons, supporting the only known population which still breeds on Great Lakes waters. These birds nest on land very close to the shoreline, making them highly susceptible to human disturbance. An adult loon who tremolos (the laughing call) is sending a message that you are too close. From mid-May through July 15 is “loon nesting season” so visitors are to stay at least 150 feet away from islands. Additional areas may be closed due to loon nesting, please check at the visitor centers for updated information.

**Non-Native Species**
Isle Royale waters, like all Lake Superior waters, face a growing threat from the invasion of non-native species. Once species like sea lamprey, zebra mussels, or spiny fin fever enter an area, they out-compete native species, causing large-scale changes in the ecosystem. Two invasive species, the sea lamprey, zebra mussels, or spiny fin fever flay, have already established a presence in Isle Royale waters. The spiny fin fever presently is found only in Lake Superior. The park is concerned it may enter the inland lakes. Once established, its spines harm predator fish and they disrupt the zooplankton population, the basic food source for many fish species (see related article, page 9). Zebra mussels have not established a presence in Isle Royale. Their potential to cause catastrophic problems cannot be overstated. If zebra mussels were to enter the inland lakes it is estimated they would over 5 years more than every habitable surface on an inland lake floor within two years. What do you need to do to stop the spread?

**Boaters**
Drain live wells and bilge on land - remove transom water, lake water, and unwanted bait from your boat - wash equipment with warm water and use a high-pressure sprayer or wait five days before launching for Isle Royale.

**Backpackers**
Prior to departure, clean your camping gear, clothing, and boots.

**Canoeists and Kayakers**
Remove weeds, algae, and other plant and animal materials from your boat - dry vessels a day before island departure - clean and dry watercraft when moving from Lake Superior waters to inland lakes.

**Anglers**
Clean fishing gear before island departure - When moving from Lake Superior to inland lakes, clean gear and change line spoons.

**Divers**
Wash all dive gear in warm chlorinated tap water - Disinfect your wetsuit with a special-purpose shampoo - dry all dive gear in the form wetsuit for seven days before island departure.

For additional information on invasive non-native species and the preventative measures that you can take - request the park’s brochure “Aquatic Invasives: Stop the Spread & Spread the Word.” Also available online at www.irnha.org.

**Wheeled Vehicles/ Devices**
Wheeled vehicles (except for wheelchairs) or other mechanical forms of transportation are not allowed on trails. This includes bicycles and portaging devices.

**Weapons, Traps, & Nets**
The use or possession of weapons, traps, and nets is prohibited. Weapons include any implements designed to discharge a projectile or missile in the air or water. Fireworks are prohibited.

**Pets**
Dogs, cats, and other pets are not allowed. This includes pets on boats within the park boundary, which extends 6.5 miles into Lake Superior from the outermost land areas of the park. Visitors bringing pets to Isle Royale will be required to leave immediately. Pets disturb wildlife and can transmit diseases, particularly to wolves. Special conditions apply to guide dogs. Please contact the park for further information.

**Marine Warning**
Boaters beware, Lake Superior levels are significantly down. Use caution in your travels, especially around docks and reefs.

**Boating**
All boaters staying overnight at anchor, at docks, or in campgrounds must first obtain a camping permit. Lake Superior offers challenging and often dangerous weather. Be prepared for strong wind, high waves, and thunderstorms. Combine this with rocky reefs, limited safe harbors, and Isle Royale’s remoteness, and it pays for you, your crew, and your boat to be shipshape. For additional information on boating and trip planning please request the park’s Isle Royale Boating Guide. In addition to Houghton, Rock Harbor, and Windigo, boaters may obtain Isle Royale camping permits and pay user fees while using our on-line service at https://www.pasty.com/isro/pnp.php. Please note: the U.S. Forest Service Ranger Station in Grand Marais, Minnesota has discontinued processing permits and collecting fees for Isle Royale National Park.

**Restricted Water Activities** - Water skiing and personal watercraft including vessels commonly referred to as jet skis, water- 

**Portage Passage Island, Duncan Bay, Five Finger Island, Lorelei Lane, Tobin Harbor, Merritt Lane, Hay Bay, Wright Island, Malone Bay, Chippewa Harbor, Conglomerate Bay, Moskey Basin, Lorette Lane, Tobin Harbor, Merritt Lane, Passage Island, Duncan Bay, Five Finger Bay, Lane Cove, Robinson Bay, Pickeral Cove, Belle Harbor, Crystal Cove, and McCarge Cove. Consult boater’s maps and brochures available at Park Visitor Centers and on-the-board Ranger III for specific information.

**Pollution Prevention** – Team-pump out service is available at Windigo and Rock Harbor when the concession operation is open. Federal regulations prohibit the discharge of any waste, including gray water, into park waters. Vessels carrying spare fuel in portable containers must use legally approved containers. Fuel may not be stored on docks.

**Cannons** – All vessels arriving from Cana (U.S. or Canadian) must clear U.S. customs at Windigo or Rock Harbor Ranger Stations.

**Dealers** – Please refer to your dive permit regulations concerning compressor use.

**Fuel** – Gasoline is sold from mid-June to Christmas at Windigo, gasoline and diesel fuel is sold from mid-June to mid-September at Rock Harbor. Diesel fuel is not available at Windigo. Early and late season service or fuel may be obtained at Windigo and Mott Island if personnel are available.

**Greg Blust**
Superior Park Ranger
Isle Royale Boaters Association’s Contribution

Visitors to Windigo have a new place to sit and relax, thanks to the Isle Royale Boaters Association. A new pavilion provides a picnic spot protected from the heat of the sun and a welcome shelter from the drizzle of an afternoon rain.

The Isle Royale Boaters Association (IRBA) is a not-for-profit corporation organized in 1996 to represent the interests of Isle Royale National Park users. Members have participated in a number of projects involving repair, maintenance and construction of infrastructure for the island. In 1999, IRBA members performed much needed repairs and maintenance to pavilions at Belle Isle and Daisy Farm. In 2002, IRBA members and National Park Service (NPS) personnel relocated and upgraded the picnic area at Malone Bay. During the summer of 2003, IRBA volunteers assisted park staff in constructing a building to house the Windigo oil spill containment boom.

During the 2003 project, the idea of constructing an open-air pavilion on the site of the former Windigo Ranger Station was discussed with Superintendent Phyllis Green (when we could get her away from the miter saw and cribbage games.) Following her approval, the project was underway. Richard Ojard, of the engineering firm Krech and Ojard of Duluth, volunteered his time to design and provide architectural drawings for the project. Through proceeds from fund-raising banquets and generous donations, all materials were acquired by the spring of 2006. The construction phase began over Memorial Day weekend, when a group of IRBA volunteers assembled the roof trusses. In July, vertical columns were set and the trusses were lifted in place by NPS personnel. IRBA volunteers and park staff then secured the trusses to the columns and installed the roof sheeting, shingles and trim boards. NPS personnel finished the summer’s work by adding some cosmetic touches to the site.

Immediately after its completion, visitors started putting the pavilion to use. It has become a popular spot: to eat a meal, chat with others or simply relax and take in the view of Washington Harbor. The pavilion is there for all to use. Enjoy.

Mark Rude
Isle Royale Boaters Association

Spiny Water Flea Update

If you visited Isle Royale last summer, you probably heard that invaders are poised to enter the park’s inland waters. The spiny water flea, an invasive zooplankton, is found in Lake Superior waters but is not yet in Isle Royale’s inland lakes. These tiny invertebrates reproduce at incredible rates. When they reach an uninfested lake, their population explodes and quickly changes the food web. Isle Royale is one of the few places in the country which still has intact inland aquatic ecosystems that have not been altered by introduced species.

All wilderness travelers moving from Lake Superior to inland lakes are potential carriers of spiny water flea. With just a few minutes of effort, you can assure that you are not transporting these aggressive invaders into inland waters. What should you do?

1) Prepare for your trip by packing cloths to wipe gear, gallon size Ziploc bags, an extra water filter, and extra fishing line.
2) Prior to your portage, empty out and wipe down all surfaces of camping and paddle craft gear that have been in Lake Superior.
3) If you fished in Lake Superior, replace the fishing line and wipe down all tackle.
4) If you filtered water from Lake Superior, change your filter or backflush several times with filtered water before using in an inland lake.
5) Use wipe cloths only once. Put wipe cloths and Lake Superior fishing line in a Ziploc bag to isolate them from the rest of your gear.

This summer look for new informational signs posted at portages from Lake Superior to inland waters. These signs review the steps you should take before proceeding inland.

Do not assume you will be able to see these tiny hitchhikers. Their 1/3 inch size and transparent color makes them easy to miss and their eggs are too tiny to notice. Treat all equipment as though it may be carrying spiny water fleas and you will be helping to preserve Isle Royale’s inland lakes.

Jean Battle
Chief, Natural Resources Division

Isle Royale National Park
INVASIVE SPECIES ALERT!

Do not assume you will be able to see these tiny hitchhikers. Their 1/3 inch size and transparent color makes them easy to miss and their eggs are too tiny to notice. Treat all equipment as though it may be carrying spiny water fleas and you will be helping to preserve Isle Royale’s inland lakes.

2007 – Your Guide To Isle Royale National Park 9
Fisheries at Isle Royale

A Michigan fishing license is required for fishing in Lake Superior, including narrow bays and harbors, and when transporting fish from the island to the mainland. If you are under 17 years of age, you may fish without a license. Licenses are not required to fish on the inland waters of Isle Royale; possession limits are the same as those set by the State of Michigan. Also, see additional information on this page regarding special brook trout regulations. Anglers should refer to the Michigan fishing regulations for possession limits and detailed license requirements for Lake Superior (also see the chart on page 7 for a brief guide to regulations). Only 1-hour licenses are available on the island and only when concession services are open. You may purchase a Michigan fishing license online at www.michigan.gov/dnr.

Fish Consumption Advisory

Contaminants discovered in the Park ecosystem remind us that although Isle Royale is remote, it is part of a global system. Ongoing research in six inland lakes (Sargent, Sikikwi, Eva, Sheshib, Wagner, and Angleworm) shows fish with mercury levels exceeding the State of Michigan fish consumption advisories. For information on fish consumption advisories check with park staff or visit the Michigan Department of Community Health website at: http://www.michigan.gov/mdch

Jay Glase, Fishery Biologist, and Larry Kangas, Chief, Law Enforcement Division

Disposal of Fish Remains

At Rock Harbor, please use the fish cleaning station. At other locations, the preferred method is to dump remains chopped into pieces 4" or less in deep (50' or deeper) water. This reduces the unsightly remains and odors around campgrounds and the unnatural large gathering of gulls at these sites. At inland lakes the preferred method of disposal is to chop fish remains into pieces 4" or less and deposit into deep water via canoe. If you do not have a canoe, you could request the assistance of a canoeist. The alternate method is to chop up remains into pieces 4" or less and move at least 20 feet (75 steps) from campgrounds and throw remains as far as possible into deep water. These steps will eliminate the potential for attracting and feeding wildlife at campgrounds. Please clean fish away from docks and campgrounds. Do not throw remains in shallow water near shore or throw remains to gulls.

Transporting Fish to the Mainland

You are allowed only one day's catch in your possession. While the license holder remains on the Island, Michigan Department of Natural Resources (DNR) allows those with DNR permits to ship legally-taken fish on the Ranger III, Isle Royale Queen IV, Wenonah, Voyager II and the seaplane. This one-time per year permit covers up to a single day's catch limit. Fish must be claimed when the ferry service arrives at their destination. Permits may be obtained by writing: Department of Natural Resources, 427 U.S. 41 North, Baraga, Michigan 49908-9627 or calling (906) 335-6651. Fishermen returning on the Ranger III must check in their fish with the ship's purser.

Rock Harbor Lodge and Windigo Store

Lodge Rooms

Sixty rooms are available; each accommodates four and offers private bath. Available 6/5 thru 9/7.

Housekeeping Rooms

Twenty duplex cottages accommodate six and are furnished with utensils, dishware, privy, fresh, double bed and two bunk beds. Available 5/25 thru 9/7.

Gift Shop and Dockside Store

Lodge Dining Room & Greenstone Grill

Hearty meals, including fresh Lake Trout. Visitors welcome for breakfast, lunch, and dinner. Food service open daily, 6/5 thru 9/7.

Marina and Water Taxi

Offers 490 feet of dock space in Rock Harbor, accommodating boats up to 65 feet. Electrical, fresh water hook-up, sewage pump-out, gasoline, and diesel fuel, motorboat, canoe, and kayak rental available. Water taxi service drops off or picks-up visitors, canoes, or kayaks at many island docks. Available 6/5 thru 9/7.

Fishing Charters and Sightseeing

Charters are fully equipped. For details on sightseeing trips refer to page 4.

Windigo Store and Marina

Offers groceries, cold sandwiches, camping supplies, stove fuel, daily fishing licenses and tackle, gifts and photo supplies. The marina offers gasoline, pump-out service, and motorboat, canoe and kayak rental. Shower and laundry facilities available. Open 6/5 thru 9/7.

The cost for utilities on Isle Royale is much higher than on the mainland. A utility surcharge will be added to the cost of all goods and services.

Contact Information – page 2
Ranger III Schedule Changes – We Need Your Input

Isle Royale National Park is looking for your input for two options which would potentially enhance Ranger III passenger service to the island. Currently it is insufficient for Ranger III passengers to get from Rock Harbor to Windigo and the current Ranger III schedule does not support most visitors’ needs for weekend travel. The park is considering these two options for altering the Ranger III schedule.

1. Offering a peak season weekly round-trip on Wednesday or Thursday. The goal of this trip would be to streamline logistical support to our Windigo operation, while providing off-setting cost by offering visitors passage. This would entail approximately 4 to 8 trips a season.

2. Altering our current round-trip Ranger III schedule from Tuesday-Wednesday and Friday-Saturday to Monday-Tuesday and Thursday-Friday. The park is considering a two year pilot program starting in 2008 to gauge the usefulness of these two alternative schedules. Our goal is to improve visitor service and park operations, while maintaining access similar to current levels.

Please let us know your thoughts on these potential changes by emailing BKO.Parkinfo@nps.gov, writing to Isle Royale National Park – 800 East Lakeshore Drive – Houghton, MI 49931, or calling (906) 482-0984.

Isle Royale’s Recreation Fee Demonstration Program

Fee Categories
- Daily User Fee: $8.00 per person per day
- Annual User Fee: $40.00 (valid for one year from date of purchase)
- Boat Rider Fee: $48.00 (October 31 of the year indicated)

Rate and Explanation
- Daily User Fee: $4.00 per person per day. Children 11 and under are exempt from the fee.
- Annual User Fee: $40.00 (valid for one year from date of purchase)
- Boat Rider Fee: $48.00 (October 31 of the year indicated)

(Individual) Season Pass
- $40.00

(Season) Boat Rider Pass
- $50.00

BOOKS, MAPS & MORE

Your purchases help support Isle Royale National Park!

**Coming Summer 2007! Isle Royale Nature Guide**
A complete guide to the flora and fauna of Isle Royale.
Full color. Authors: Ted Godomski & Janet Marr

**Trails Illustrated Map** $9.95
Topographic map includes valuable wilderness tips and Leave No Trace guidelines, along with updated trails, trailheads, points of interest, campgrounds, and much more. Printed on waterproof, tear-resistant material with a plastic coating for extreme durability. Measures 4” x 6” folded and 38” x 25” fully opened. Scale = 1:50,000. Updated 2004.

**NOAA Lake Charts** $19.75
Official navigation charts for Isle Royale, Lake Superior, Grand Portage, the Great Lakes, Keweenaw Peninsula, and Portage Canal. Soundings in feet. Folded or rolled. Add $3.00 for mailing tube if rolled.

**Isle Royale National Park:**
Foose Trails and Water Routes $15.05
The park's authoritative illustrated guidebook. All the information you need to plan everything from a series of day hikes to a week-long trek that circles the park. A must for those planning your backpacking or canoeing trip to Isle Royale. 136 pages. Third edition. Author: Jim DuFresne

**New!! Ecological Studies of Wolves on Isle Royale 2006-2007** $3.95
The year's report from the winter study on Isle Royale. Includes latest information on the island's wolf and moose populations.

Annual Reports from 1989-2005 also available.

Authors: Rolf Peterson

**Superior Wilderness:**
Isle Royale National Park $16.05
A natural history of Isle Royale for the layperson, emphasizing the ecology of the island. The relationship between its plants, animals and physical environment. Color photographs and an extremely readable text. Maps, photos, charts, illustrations. 171 pages.

Authors: Roper & Walton

**Fishes of Isle Royale** $5.95
This complete fishing guide includes information on the five fish habitats on Isle Royale, a full description of major species, illustrations, keys to fish identification, and an annotated list of fish. Charts. Maps. 58 pages.

Authors: K.F. Largier & C.R. Goldman

**Isle Royale: A Photographic History** $29.95
The history of Isle Royale from early exploration in the 1800s to the birth of the national park as told through historical photos and maps. Chapters: Exploration, Copper Mining, Navigation, Commercial Fishing, Recreation, and Creating a National Park. 160 pages. Authors: Tom & Kendra Gale

**Place Names of Isle Royale** $9.95
The origins, histories, and stories of over 250 Isle Royale locations. A history of Isle Royale in itself. Illustrated with over 50 photographs, drawings and maps, including a complete fold-out map of Isle Royale. 96 pages.

Authors: Parratt and Walker

**The Geologic Story of Isle Royale National Park** $10.95
A classic study of Isle Royale's geologic history and landscape, the shifting of rocks and specific minerals which produced one of the most beautiful islands in North America. Maps, photos, and illustrations. 66 pages. Author: N. King Huber

**Diaries of an Isle Royale Fisherman** $12.05
Reproductions of the journals and correspondence ofilling Seguin who fished from Isle Royale's Fisherman's Home between 1920 and 1932. These newspaper-format letters were sent home to his family in Chicago. Historic photos and cartoons. 185 pages. Editors: Jil Burkle & Robert Root

**Exploring Isle Royale**
**VHS** $17.95
**DVD** $21.95
Breathtaking footage of Isle Royale's shoreline, lakes, ridges, and forests, along with close-up shots of island wildlife. Set to classical music. 20 minutes. (Not compatible with Sony® DVD/VHS Combo players!)

**Isle Royale Impressions II**
**DVD** $18.95
More beautiful Isle Royale scenes set to classical music. Wildlife footage includes rare views of a pair of Isle Royale wolves. 20 minutes.

**Isle Royale National Park Pins & Hiking Stick Medallions** $4.95
Enamel 3/8” pins available in wolf, mouse, or loon designs. Medallion 1-3/8” available in wolf & loon designs.

**Isle Royale Wolf T-Shirt** $16.95
100% cotton, black with wolf art and “Isle Royale National Park.” Printed on front or back. Adult S, M, L, XL, XXL.

**Special Value Packages**

**Hiking & Canoeing Package** $25.00
Includes the Trails Illustrated map, the book: The Fishes of Isle Royale, and copies of Isle Royale fishing regulations and Aquatic Insects. Species brochure.

**Fishing Package** $24.00
Includes the Isle Royale Navigational Chart, the book: The Fishes of Isle Royale, and copies of Isle Royale fishing regulations and Aquatic Insects. Species brochure.
