Northeast Region
Topographic Maps of Pinto Basin, Coxcomb Mtns, Mission Millsite

Joshua Tree National Park
This document is the fifth in a series of five map books covering Joshua Tree National Park and the Morongo Basin. The extent of each book is based on a USGS 7.5 minute quadrangle grid. For display, each quadrangle has been divided into nine sections. This document covers the Northeast region of Joshua Tree National Park.

Information

Backcountry Regulations
If you will be out overnight, register at a backcountry board. These maps indicate the location of backcountry boards with a symbol (see Map Elements). An unregistered vehicle parked overnight at a backcountry board is a cause for concern about the safety of the vehicle's occupants. It is also subject to citation and/or towing.

Trails and corridors are often difficult to navigate. It is advised that you navigate the backcountry with these maps and a compass or GPS device. There is no reliable cell phone coverage in the park.

Carry a minimum of one gallon of water per person per day just for drinking. Two gallons in hot weather or if you are planning a strenuous trip. You will need additional water for cooking and hygiene. Other essential items include rain protection, flashlight, mirror, whistle, first-aid kit, pencil and paper, pocket knife, compass, and extra food.

Your backcountry campsite must be located at least one mile from any road and at least 500 feet from any trail. Make yourself aware of any day-use areas in the vicinity and make certain to camp outside of their boundaries. Day-use areas are indicated on these maps as well as on backcountry boards. Campsites must be at least 100 feet from any water sources (seeps, springs, oases). Avoid camping in open washes. It can be extremely dangerous in the event of a flash flood.

Campfires are strictly prohibited in the backcountry. They leave long-term scars on the land and can ignite destructive wildfires. Plan to use a stove or carry pre-cooked meals. All vegetation, living or dead, is protected. Collection of natural or historical resource for any purpose is strictly prohibited.

It is your responsibility to clean up after yourself. Pack out all trash, left-over food, and litter. Waste disposal involves pre-planning and some initiative in wildlands. Bury human waste in "cat holes" six to eight inches deep and at least 200 feet from water sources, campsites, and trails. Don’t leave human waste under rocks or alcoves where it decomposes slowly, and is unsightly and unsanitary. Plan ahead to pack out used toilet paper in a plastic bag. Leave no trace.

Map Notes
Produced by the GIS Office of Joshua Tree National Park in 2014

Roads data provided by U.S. Census and San Bernardino County. Photoinspected using NAIP imagery dated 2009.

Springs data provided by NPS Inventory and Monitoring. All springs considered intermittent or dry. No reliable source of water.

Contours and hillshade derived from five meter DEM.

North American Datum 1983 (NAD83), Projection and 1000-meter grid: Universal Transverse Mercator, zone 11N

Cartography Completed using ArcGIS Desktop 10.1

There are private inholdings within the federal boundaries shown on this map. Trespassing on private property is prohibited.
