Here are a few easy ways you can contribute to the stewardship of Lassen Volcanic National Park.

- **Plan a Volunteer Vacation:**
  - Volunteering your time and talents is a fantastic way to give something back to the Park. You get a chance to do essential work for the Park, have a great time meeting other members of the park “family,” and enrich your knowledge and experience. If you live nearby, consider volunteering your time to assist with visitor services, trail patrols, photography, administrative work, computer and website projects, or special projects throughout the year. Hours are flexible. For longer projects, the Park may be able to provide volunteers with free campsites.

- **Stay on Trails and Boardwalks, and Pay Attention to Posted Rules and Regulations:**
  - One of the greatest threats to national parks is being “loved to death.” Much of Lassen Volcanic is sparsely visited pristine havens of inspiration and solace. We go to them to recharge the wellsprings of our souls and to celebrate American heritage.

- **Be Familiar with Rules and Regulations:**
  - The National Park Service cannot fulfill its mission without your partnership. We invite you to become a park steward and help ensure that fair and wonderful things will indeed flourish today and in days to come.

- **Learn about the Park “Family” and Become a Steward:**
  - The National Park Service is dedicated to the protection of America’s special places. The National Park Service cannot fulfill its mission without your partnership. We invite you to become a park steward and help ensure that fair and wonderful things will indeed flourish today and in days to come.

- **Look Inside:***

  - **Contact Information:**
    - 2
  - **Visitor Services:**
    - 2
  - **Park Partners:**
    - 2
  - **You Need To Know:**
    - 3
  - **Your Dollars At Work:**
    - 3
  - **Camping:**
    - 4
  - **Climate Data:**
    - 4
  - **Ranger-Led Activities:**
    - 4
  - **Backcountry Camping & Permits:**
    - 5
  - **Wilderness Laboratory:**
    - 5
  - **Ski Area Restoration:**
    - 6
  - **Featured Hiking Trails:**
    - 6
  - **Area Roads:**
    - 6

- **Make Stewardship a Part of Your Plans:**
  - These are exciting times at Lassen Volcanic National Park. Numerous projects are underway to enhance protection of natural and cultural resources and improve visitor services. This issue of Peak Experiences highlights some of the many changes taking place and will give you information for a safe and enjoyable visit.

- **Peak Experiences:**
  - Welcome!

  - Your park visitor services will help you have a great time meeting other members of the park “family,” and enrich your knowledge and experience. If you live nearby, consider volunteering your time to assist with visitor services, trail patrols, photography, administrative work, computer and website projects, or special projects throughout the year.

  - Hours are flexible. For longer projects, the Park may be able to provide volunteers with free campsites.

  - If you have your own RV or plan to rent a place near the Park next summer, you may want to get involved in more long-term projects. Selection for the next summer’s season-long positions usually takes place between January and March.

  - For more information on volunteer positions, see p. 5.

  - **Observation, Experience, and Enjoy:**

  - You can help the National Park Service protect this wonderful park by being a keen observer. You can pick up trail report and wildlife sightings forms at Park Headquarters, Loomis Museum, or the Chalet information board. Fill them out at the end of your hike and drop them off at the nearest contact station.

  - If you end up not using the forms, please conserve resources by returning them to any contact station.

  - Park staff cannot be on all trails at all times, so your observations are vital sources of information. If you note safety hazards such as trees down across a trail, visitors engaging in dangerous or forbidden activities, or anything else unusual, please tell a ranger.

- **The Park Depends on You:**
  - The national parks exist for you to enjoy and learn about America’s special places. The National Park Service cannot fulfill its mission without your partnership. We invite you to become a park steward and help ensure that fair and wonderful things will indeed flourish today and in days to come.
Established as Cinder Cone and Lassen National Monument in 1907, Lassen Volcanic became a national park in 1916 because of its significance as an active volcanic landscape. Lassen Peak began erupting in 1914, had its most spectacular activity in 1915, and had minor activity until 1921. All four types of volcanoes in the world plus active geothermal areas are found in Lassen Volcanic's 106,000 acres. Lassen Peak may be the largest plug dome volcano in the world. It is considered to be dormant today.

The National Park Service cares for the special places saved by the American people so that all may experience our heritage.

A Little of Your Time...
You may experience a few delays in the Park this summer due to a number of ongoing construction projects. These projects are necessary for a safe park visit. We apologize for the inconvenience, but hope you will enjoy the improvements.

Expect delays at the Southwest Entrance due to a Federal Highway Improvement project. Road construction will be going on between the Southwest Entrance and Bumpass Hell throughout the summer and fall. The completion of the Bumpass Hell boardwalk will be completed this summer. Check at contact stations for information on construction schedules and sections of the boardwalk that may be closed temporarily.

...Means Big Improvements for the Park!

The Lassen Loomis Museum Association is dedicated to making your visit a memorable learning adventure. The Association publishes and sells books and other items on the flora, fauna, and history of the Park. Profits are used to supply books, posters, maps, and videos to the Park's libraries and visitor centers and to support the Park's mission, museum exhibits, and other special projects. Peak Experiences is published through LMA donations.

I want to invest in the Lassen Loomis Museum Association. I've checked my annual membership option below and will send my check to: Lassen Loomis Museum Association, P.O. Box 220, Mimeral, CA 96063.

You Need To Know.

For a Safe Visit

BE ALERT WHEN DRIVING IN THE PARK
- Drive defensively; other drivers often make unexpected maneuvers and stops
- Use established pullouts when available
- Observe speed limits; the Park Road is 35 m.p.h. unless posted otherwise
- Remain on established roads
- No off-road travel is permitted
- Watch for flaggers and traffic signals - road construction is going on in the Southwest Area

BE AWARE OF AND PREPARED FOR CHANGING WEATHER CONDITIONS
- Severe storms can occur suddenly
- Climb peaks and ridges early in the morning
- For head for lower elevation during lightning activity

Observe Wildlife at a Distance
- Feeding, harassing, and hunting wildlife is illegal
- Wildlife can be dangerous
- Rodents can transmit the plague to you and your pets
- Secure all food and garbage property at all times

Stay on Established Trails & Boardwalks
- Especially in thermal areas, where ground may be dangerously thin. Bumps and hills are named after a man who lost a leg after falling into boiling mud!
- Do not cut switchbacks or throw rocks
- Wear sturdy boots
- Carry plenty of water and food
- Wear sunscreen

OBSERVE WILDLIFE AT A DISTANCE
- Do not cut switchbacks or throw rocks
- Wear sturdy boots
- Carry plenty of water and food
- Wear sunscreen

Plan to Finish Hikes Well Before Sunset
- Sunset times are earlier in areas shaded by mountains
- Always carry a flashlight with spare batteries and warm clothing in case of unexpected delays
- Sunrise and set times for Chester:
  - 1st: 5:05/19:20 4:37/19:29 5:02/19:20 5:12/19:37

When to Watch the Wildlife
- Sunrise and sunset times for Chester:
  - Rise/Set Rise/Set Rise/Set Rise/Set Rise/Set

Cycling & Skating
- Bicycles are permitted on park roads and in campgrounds but prohibited elsewhere. Cyclists must obey all posted speed limits and traffic laws
- Helmets must be worn by all cyclists age 16 and younger
- There are no mountain biking trails in Lassen Volcanic National Park. Contact stations for routes outside the Park
- The use of any wheeled conveyance is limited to paved areas; no off-road travel is allowed
- Rollerskating, skateboarding, and in-line skating are not permitted anywhere in the Park

Do I Look Like a Couch Potato?!
- This box will be, if people keep feeding it junk food. Several park foxes are notorious for begging at campgrounds and even climbing to the top of Lassen Peak for handouts. Whatever you do, DO NOT feed these foxes or any other animals or birds in the Park. This behavior is not cute - it will likely become a death sentence for the animal you feed. Animals that beg are more likely to be hit by cars, contract diseases, or bite humans.

Feeding any animal in the Park is illegal and potentially dangerous

Lassen Volcanic’s foxes are believed to be Sierra Nevada red foxes, the only red foxes occurring naturally in California. Red foxes in the Sacramento Valley were probably introduced in the late 1800s. Sierra Nevada red foxes may be threatened with extinction and need all the protection we can give them.

How can you help? First of all, watch your food at all times and do not leave it out where a curious fox or other animal could get into it.

If you do see a red fox, gray fox, or any large carnivore, note whether the animal is wearing a radio collar or tag. Inform a ranger and fill out a wildlife observation report. These reports are entered into a database that helps us understand which animals occur in different areas of the Park. With your help and cooperation, we can learn more about these fascinating animals live, so they will survive in the wild for future generations to see and enjoy.

User Fee

Fee Dem onstration Projects in Progress
- Disturbed natural areas are being rehabilitated to preserve native plants and animals
- New wildlife exhibits are being designed and constructed and will be installed throughout the Park
- A new visitor center is being constructed in the Southwest Area
- Our park website is being enhanced for your virtual visit! Read about Fee Demonstration Projects at www.nps.gov/lassen/couch.htm

Completed Fee Demonstration Projects
- The plaza and parking lot at the Lassen Museum provides enhanced features to visitors, including a wheelchair-accessible ramp into the museum.
- A water treatment plant has been built to provide the potable water to campers at Butte Lake Campground
- New and improved trail and campground signs have been constructed and installed throughout the Park
- Permanent museum exhibits in Lassen Museum display Native American baskets, historical objects, and park memorabilia
- Bear-proof food storage lockers and trash receptacles have been installed in the campground to ensure the health and safety of park visitors and bears and other wildlife.
Camping
• Open and Close dates below are weather dependent. Campgrounds may open later or close earlier due to snow and freezing conditions
• Each campsite has a table and fire ring with a grill
• All campers are first come, first served; there are no reservations (except for sites at Butte Lake and Juni-per Lake for organized groups)
• Golden Age and Golden Access cardholders receive a 50% discount on camping
• Check-out time for campers is noon

Campsite Limit
- 6 adults, or 10 people total with children allowed per site
- Camping is limited to 14 days per year, with Summit Lake limited to 7 days per year

Vehicle
- 2-vehicle class A or B only
- Park only on designated parking pads

Quiet Hours
• Observed from 10 p.m. to 6 a.m.

Food Storage
• All food must be stored throughout the day and night in bear-proof boxes

RVs & Trailers
• Hookups are not available
• Some campgrounds have a limited number of sites available to accommodate trailers to 35’ (see chart)
• Dump Station near Manzanita Lake Campground (50 Fee)

Group Camping
• Groups of 10 or more people should camp in Butte Lake, Lost Creek, or Juniper Lake Group Campgrounds

Fire
• Open fires are prohibited except in metal fire rings provided
• Gather only dead and down wood do not cut tree limbs
• Use of chainsaws is prohibited

Bears and Your Food
Would you like to wake up early in the morning with a bear in your tent or trailer? Leave or store food and toiletries where they do not belong and you may have a wildlife encounter that you did not count on.

When animals get into food, your safety and property are jeopardized. Animals (such as rodents and foxes) can transmit diseases to humans and pets. The life of the animal may also be at risk due to malnutrition - most animals cannot properly digest human food. They may even forget how to obtain food naturally. Bears become aggressive and may harm people or ruin property that gets in the way of their search for people food. These bears may have to be killed as a last resort if they become dangerous.

It is your responsibility to store food, toiletries, and other scented items properly while in Lassen Volcanic National Park. Bear-proof lockers must be used day and night in all campgrounds. Store all food, coolers, and anything else with an odor in the lockers. Even toothpaste, lotions, and chapstick smells good to a bear! Where lockers are not provided, store items in the car trunk, sealed in plastic bags or containers to reduce odors. If the car has no trunk, put everything on the floor and cover it well. Make sure that all car windows and doors are tightly closed.

Keep a clean campsite and deposit garbage in garbage cans immediately. Improper storage of sensitive items, food or garbage may result in a citation or confiscation of the items.

Don’t let bears approach you or your food. Wave your arms and make noise. If that fails to make them leave, throw small rocks in their direction (avoid hitting their face or head). Keep a safe distance but be persistent.

Spring & Summer Weather
From elevations of 5650’ in Warner Valley to 10,497’ on top of Lassen Peak, a wide variety of weather conditions occur in Lassen Volcanic National Park. Expect a 5° temperature decrease for every 1000’ increase in elevation. Be prepared for your visit by bringing layered clothing, a raincoat, and sunscreen.

|| MONTH | AVERAGE HIGH | AVERAGE LOW | AVERAGE PRECIPITATION |
|---|---|---|---|
| May | 70/29 | 28° | 1” |
| June | 79/34 | 1.5” | 0.4” |
| July | 84/40 | 0.4” | 0.4” |
| August | 85/40 | 0.5” | 0.5” |
| September | 78/36 | 1.5” | 1.5” |
| October | 69/30 | 3.0” | 3.0” |

Data is for Manzanita Lake, at 5,890’ elevation.

Lassen Volcanic National Park Peak Experiences

"Welcome to Summit Lake!” Have a question about camping? Ask one of Lassen Volcanic’s volunteer Campground Hosts.

Bear Necessities
- Gather only dead and down wood; do not cut tree limbs
- See Park bulletin boards for more information and updates
- Fires
- Open fires are prohibited except in metal fire rings provided
- Gather only dead and down wood do not cut tree limbs
- Use of chainsaws is prohibited

Group Camping
- Groups of 10 or more people should camp in Butte Lake, Lost Creek, or Juniper Lake Group Campgrounds

Fire
- Open fires are prohibited except in metal fire rings provided
- Gather only dead and down wood do not cut tree limbs
- Use of chainsaws is prohibited

All campgrounds have campfire rings, bear-proof lockers, and picnic tables.

* Southwest Walk-In has water and toilets available 5/24-9/22. Water and toilets are available nearby at the Lassen Chalet the rest of the year.
** Manzanita Lake will be open without water from 9/22 until snow closure; Warner Valley will be open without water from 5/24-6/12 and 9/29 until snow closure.

Ranger-Led Programs
Regularly scheduled interpretation programs will be offered at the Loomis Museum and Manzanita Lake Amphitheater. Special evening talks will be held at Warner Valley. Check park bulletin boards or ask at the Loomis Museum or Park Headquarters for schedules. Programs offered this summer will include:

- Junior Ranger
- Manzanita Lake Evening Program
- Fault Talk
- Early Birds
- Warner Valley Talks
- Ask at contact stations about special programs and educational activities for curious visitors of all ages! The Park offers Junior Ranger, Volcano Club, Chipmunk Club, and Jr. Scientist programs.

Reservations are required for group campgrounds and should be made well in advance by contacting (530) 335-7029.
Into the Backcountry

Wildland Ethics

"A thing is right when it tends to preserve the integrity, stability, and beauty of the biotic community; it is wrong when it tends otherwise." - Aldo Leopold, A Sand County Almanac

Forester and philosopher Aldo Leopold expressed this sentiment in the 1930s. Today, increasing numbers of backcountry visitors are coming to the realization as they witness their favorite wilderness haunts being loved to death by recreationalists seeking adventure and solitude.

Simpler living, adventure and solitude can still be part of our backcountry travels, but in order to assure their continued existence we must take the responsibility to educate ourselves and to become equipped with skills and habits that enable us to Leave No Trace.

Principles of Leave No Trace include:

• Plan ahead and prepare
• Camp and travel on durable surfaces
• Pack it in, pack it out
• Properly dispose of what you can’t pack out
• Leave what you find
• Use a camp stove (no fires)
• Respect wildlife
• Be considerate of other visitors

These principles are recommended as a guide to minimizing the impact of your backcountry visits. Leaving no trace depends on attitude and awareness, more than on rules and regulations. Minimize your impact on the land and on other visitors. Protect and preserve your wildlands for this and future generations.

You can find more information on the Web at www.LNT.org or telephone 1-800-332-4100.

Required Permits

• A free backcountry permit is required for overnight camping in Lassen Volcanic National Park
• Limited to a maximum of 10 people per permit and per stay up to 20 people may be permitted per stay
• Camping limited to 14 days per year

Questions about permits?

• Ask at Entrance Stations or Information Stations

Permits are available in person during operating hours at:

Loomis Museum
Park Headquarters
Old Station Information Center
Alcove Ranger Station

Outside of operating hours you may self-register at the Lassen Chalet.

Follow instructions on the Backcountry Camping bulletin board. PERMITS ARE VALID ON ANY DATE!

Fire Are Prohibited

• Use only portable camp stoves

Food and Clothing

• Bring extra food, clothing, and water in case of emergencies or sudden weather changes
• Hang food and garbage out of animals’ reach for your safety and their health (Lassen Volcanic has black bears)

Wildlife Safety

National parks and wilderness areas are key places to conduct scientific studies because of their relatively pristine state. National Park Service staff and independent researchers study aspects of Lassen Volcanic National Park to better understand the geology, flora and fauna, natural processes, and human impacts on the Park. Below are some projects in progress this year.

Small Vertebrates Inventory and Monitoring:

For the past four years, small vertebrates have been monitored at 32 long-term study sites. Among the animals captured, marked, and released are salamanders, lizards, frogs and toads. Also captured in great numbers are squirrels, mice, voles, shrews and gophers.

Air Quality Monitoring:

Lassen contains over 78,900 acres of wilderness. Thus, it is managed as a “Class 1 air shed,” meaning it receives the greatest possible protection. The Park operates an air quality station in the Manzanita Lake area that is part of a nationwide monitoring system. The station checks ambient ozone levels, particulates (soot, dust, etc.), and acid deposition.

Bat Studies:

Very little is known about bats in the Lassen area. This study focuses on three sensitive bat species: pallid bats, western red bats and Townsend’s big-eared bats. The findings will provide park resource managers with information on the distribution, status, and roost site habitat characteristics of bats in Lassen Volcanic National Park and Lassen National Forest.

W ater

• Purify park surface waters before drinking to avoid giardia and cryptosporidium. Multiple purification technology is recommended:
  - Use a micron or bacter filter
  - Use iodine tablets
  - Boil water for a minimum of 5 minutes

• Do not trash clothing or utensils or use any cleaning agents in park waters
• Day latrine and bury human waste in toilet paper 7” deep, at least 100 ft. from trails, stream, and dry springs

Campsites

• Camp at least 300 ft. from other groups
• Do not camp in meadow, or on fragile vegetation
• Camp at least 100 ft. from high watershed or alpine springs, or streams
• Do not construct “vegetation mats” such as windowboxes, log bridges, etc.
• Camp at least one mile from developed road

Ask about: areas closed to camping

Stock

• Permits are required for use

No overnight stays in the backcountry. Orlando are available by reservation at www.recreation.gov

Lassen’s backcountry contains 150 miles of hiking trails, including 17 miles of the Pacific Crest Trail. Trails vary in length and difficulty, winding through coniferous forest, alpine tundra, and along waterways.

Please Leave No Trace behind!

Become a National Park Volunteer!

Would you like to help this and future generations continue to enjoy Lassen Volcanic National Park? Consider becoming a volunteer. You can make a difference in your life, the lives of others, and in the way the Park is managed and protected. You can develop new skills, gain experiences that will enrich your life, and make new friends. The Park offers a variety of volunteer positions and projects. If you are not a U.S. citizen or legal permanent resident, contact the Volunteer Coordinator at least two weeks before your trip to the U.S. to find out about required paperwork.

Campground Host: live and work in one of our campgrounds. Share park information with campers, check compliance of regulations, and keep statistics. A self-contained RV or motorhome is needed.

Interpretation Assistant: Learn about the Park’s cultural and natural history and share this information with others. Assist with visitor activities or help staff contacts.

Natural Resources Assistant: Collect and analyze data on water quality, vegetation, or wildlife. One drop-in invasive weed removal day is scheduled for July 9 from 9 a.m. to 1 p.m. Come for all or any part of the work day. Check at Park Headquarters or the Loomis Museum during the meeting place.

Cultural Resources/Park Collections Assistant: Assist in cataloging and caring for park administrative duties.

Volunteers in Parks Coordinator: Help staff contacts.

Group Projects: Help with various research and survey projects. A list of available projects and the hours and costs involved are available at Lassen National Park.

Lassen Volcanic National Park? Consider becoming a volunteer. You can make a difference in your life, the lives of others, and in the way the Park is managed and protected. You can develop new skills, gain experiences that will enrich your life, and make new friends. The Park offers a variety of volunteer positions and projects. If you are not a U.S. citizen or legal permanent resident, contact the Volunteer Coordinator at least two weeks before your trip to the U.S. to find out about required paperwork.
If your visit to Lassen Volcanic National Park takes you near the Southwest Entrance Station and Chalet, you may notice a lot of activity and heavy equipment on the slopes above and below the Park Road. The Park is beginning ecological restoration of the abandoned downhill ski area that used to exist near the Chalet. This project is necessary to enhance public health and safety, protect cultural resources and restore degraded natural resources. Current winter activities (including snow play, cross-country skiing and snowshoe walks) will not be affected by the project.

**WHY IS THIS AREA IN NEED OF ECOLOGICAL RESTORATION?**

The old ski runs and dirt access roads are highly visible to park visitors traveling the Park Road. The upper access road alters surface water flow and concentrates water in areas not suited for surface flow. The fine-grained, volcanic soils are highly susceptible to erosion. Soil removal, soil compaction, and the over-steepened cut and fill slopes are keeping natural vegetation from growing back. There are over 50 concrete ski-lift foundations visible. These pose a hazard to snow players in the winter. All of these human-made features need to be removed from the slope and the area returned to its natural condition.

**WHAT IS ECOLOGICAL RESTORATION?**

Ecological restoration seeks to restore natural processes to a site so that it can recover from past human development and activities. On the old abandoned ski area, access roads will be decompacted and recontoured, altered drainages will be realigned, and concrete ski lift footings will be removed. All this will be accomplished with heavy equipment (track-mounted excavators, bulldozers and dump trucks). Native vegetation will be replanted following the physical restoration work, in order to restore the natural red fir forest and mountain mule’s ear—mountain monardella dry meadow communities.

**WHAT WILL HAPPEN IF THE AREA IS NOT RESTORED?**

Delaying restoration would result in continued and significant resource damage to the water flow and ecology of this area. Without restoration, the abandoned downhill ski area would remain in a continually declining state, thereby compromising the Park’s resource protection and restoration mission and decreasing visitor enjoyment and safety. This project will restore an abandoned developed site to a stable, functioning ecosystem by using proven, established methods of physical restoration and revegetation.

The project will take two years to complete, with the first year including concrete foundation removal, recontouring of all access roads and revegetation. The second year will include final revegetation work.

Environmental compliance for this project was completed last winter and spring, including an Environmental Assessment and approved Finding of No Significant Impact statement, which was signed by the National Park Service Regional Director in May 2003.

For more information, please contact the Superintendent, Lassen Volcanic National Park, P.O. Box 100, Mineral, CA 96063, or call (530) 595-4444, ext. 5101 or 5170.
