features of the visitor center include: daylight harvesting to reduce the need for artificial light, the use of ultra long-lasting and energy-efficient LED lamps in the exhibit area, partial heating and cooling using a ground loop heat pump system, and the orientation of the building’s overhangs to generate shade in the summer and let more sun in during the winter. Parkwide energy saving improvements we have made include installing motion sensors in most outdoor lighting fixtures, reducing our number of vehicles, making plans to purchase hybrid vehicles, and upgrading buildings to energy-saving insulation. These energy and money saving activities are just the first steps towards our goal of becoming a carbon-free park by the year 2016.

“Impressive,” you respond, “but the National Park Service is a large government agency with a lot of resources and money at its fingertips. What can I do better as a private citizen and how do I get that free money you were talking about?”

“Just asking those questions is the first step,” says the ranger. “What if I told you that with a little bit of effort and a small investment you could reduce your energy needs by 25 percent or more?”

What Do You Have to Gain?

It seems like just another routine hike to Bumpass Hell when suddenly everything changes. You feel a tap on your shoulder, and then hear a voice whisper, “Psst, hey buddy, you want some free money?” As you turn around, a million thoughts race around in your head: Is this for real? What’s the catch? The person behind the voice comes into view. It is a park ranger. “Don’t worry, it’s legal” says the ranger quickly. “The only catch is you have to learn and care about preserving and protecting planet Earth for this and future generations.” Now curious, you ask the ranger to continue, and this is what you learned.

The National Park Service is tasked to preserve and protect some of the most incredible treasures on the face of the earth, but the earth is changing. Global temperatures are rising, causing the plants, animals, and places we love to be harmed. We know that climate change is a very complex and very real threat. The science is strong, but so is the cumulative effect each of us can make through our everyday decisions. We can make a difference and save some money doing it. The first step is asking a basic question. What can we do better?

At Lassen Volcanic, one of the many ways we are doing better is by conserving energy, thus saving money while reducing our carbon footprint. This was the central goal when we designed and built our new sustainable Kohm Yah-mah-nee Visitor Center. Energy saving features of the visitor center include: daylight harvesting to reduce the need for artificial light, the use of ultra long-lasting and energy-efficient LED lamps in the exhibit area, partial heating and cooling using a ground loop heat pump system, and the orientation of the building’s overhangs to generate shade in the summer and let more sun in during the winter. Parkwide energy saving improvements we have made include installing motion sensors in most outdoor lighting fixtures, reducing our number of vehicles, making plans to purchase hybrid vehicles, and upgrading buildings to energy-saving insulation. These energy and money saving activities are just the first steps towards our goal of becoming a carbon-free park by the year 2016.

“What if I told you that with a little bit of effort and a small investment you could reduce your energy needs by 25 percent or more?”

(Continued on page 9)
Welcome to Lassen Volcanic National Park

Entrance Fee Options

• 7-day pass for Lassen Volcanic National Park: $10 per vehicle/motorcycle or $5 per person on foot, bicycle, or bus.
• Annual pass for Lassen Volcanic National Park and Whiskeytown National Recreation Area: $25 admits all passengers in a private vehicle for one year from month of purchase.
• America The Beautiful pass: $80 Provides access to, and use of, Federal recreation sites that charge an entrance or standard amenity fee for a year, beginning from the date of sale. The pass admits the pass holder/s and passengers in a non-commercial vehicle at per vehicle fee areas and pass holder plus 3 adults, not to exceed 4 adults, at per person fee areas (children under 16 are admitted free). The pass can be obtained in person at the park, by calling 1-888-ASK-USGS, ext. 1, or via the Internet at http://store.usgs.gov/pass.
• Lifetime Interagency Passes: Senior (62 years old and over) $10.00
• Access: Permanently disabled Free

Kids In Parks

Lassen Volcanic National Park is a wonderful place where you and your children can discover and experience the natural world. Get outside and explore some of the parks 150 miles of trails. Climb up a volcano or take an unforgettable hike to Bumpass Hell, where the boardwalk winds through steaming fumaroles and bubbling mudpots. Lakes, streams, and flower-filled meadows provide beautiful learning experiences for children of all ages and abilities. You can observe waterfowl and songbirds during a quiet stroll around scenic Manzanita Lake. Visit the Devastated Area Interpretable Trail and become a Volcanologist looking for clues to solve the mysteries of Lassen Peak’s eruption. Time spent in the park and outdoors is stimulating and provides physical, psychological, and social benefits to children and their families.

The park offers a variety of scheduled ranger-led programs and activities to connect children with nature. These programs provide fun and challenging ways to learn and discover the area in a beautiful outdoor setting. Experience the wonders of a star-filled night sky at the Starry Nights program, or step back in time to 1853 along the Nobles Emigrant Trail at the pioneer program. Become a junior ranger and explore the forest with hands-on activities geared to children ages seven to twelve. Young children, ages four to six, can learn about wildlife “using all of their senses” in the park and outdoors.

These programs provide fun and challenging ways to learn and discover the area in a beautiful outdoor setting. Experience the wonders of a star-filled night sky at the Starry Nights program, or step back in time to 1853 along the Nobles Emigrant Trail at the pioneer program. Become a junior ranger and explore the forest with hands-on activities geared to children ages seven to twelve. Young children, ages four to six, can learn about wildlife “using all of their senses” in the Sense of Wonder program.

Getting children involved and immersed in the park is especially important to our national parks. Today’s youth are the future stewards of our treasured parks. Kids engaged in outdoor park activities build important connections that lead to lifelong appreciation of “America’s Best Idea.”

Get Involved!

Keeping active, meeting new people, learning new skills, or teaching others is not only fun and healthy, but a way to help accomplish work important for the resource preservation and visitor services at Lassen Volcanic National Park.

Contribute a few hours or a few months volunteer services build important connections that lead to lifelong appreciation of “America’s Best Idea.”

For more information contact the Park Volunteer Program Coordinator, Lassen Volcanic National Park, P.O. Box 100, Mineral, CA 96063-0100, telephone (530) 595-4444 ext. 5133, e-mail nancy.bailey@nps.gov.

Kids - Become Junior Park Rangers!

Are you between ages 7 and 12? Do you want to learn and have fun while exploring Lassen Volcanic National Park? Follow these 3 steps to earn your official Junior Ranger badge.

1. Pick up an activity book from the Loomis Museum or Kohm Yah-mah-nee Visitor Center.
2. Attend a Junior Ranger Program listed on page 3.
3. Complete the rest of your activity guide and bring it to the Loomis Museum or Kohm Yah-mah-nee Visitor Center to get your badge.

Get Involved!

Keeping active, meeting new people, learning new skills, or teaching others is not only fun and healthy, but a way to help accomplish work important for the resource preservation and visitor services at Lassen Volcanic National Park.

Contribute a few hours or a few months and assist park visitors and staff. Your time, energy, and talents would be very much appreciated. Perhaps you would like to assist with:

• Campground Hosting
• Visitor Contact Stations
• Visitor and Education Activities
• Natural Resource Field Surveys
• Non-Native Plant Removal Projects
• Groundskeeping
• Trail, Campground, & Building Maintenance
• Clerical & Library Work
• Computer Projects

* Photography
* Search & Rescue
* Ski Patrolling

Park Profile

Lassen Volcanic National Park was first established as Cinder Cone and Lassen Peak National Monuments in 1907. Lassen Volcanic became a national park in 1916 because of its significance as an active volcanic landscape.

Lassen Peak began erupting in 1914, had its most spectacular activity in 1915, and experienced minor activity until 1917. All four types of volcanoes in the world plus active hydrothermal areas are found in the park’s 106,000 acres. Lassen Peak is one of the largest plug dome volcanoes in the world. It is considered to be active today.

Elevations above sea level:
• Manzanita Lake: 5,900 feet (1,798 meters)
• Lassen Peak: 10,457 feet (3,187 meters)
• Butte Lake: 6,100 feet (1,859 meters)
• Warner Valley: 6,600 feet (1,707 meters)
• Juniper Lake: 6,800 feet (2,073 meters)
• Kohm Yah-mah-nee Visitor Center: 6,700 feet (2,042 meters)
• Road’s Summit: 8,512 feet (2,595 meters)

**Ranger Programs**

Programs run from June 19 to August 16, 2009 and are 45 minutes long unless otherwise noted. Check bulletin boards for a program schedule from August 17 to September 7, 2009.

**SUNDAY**

9:30 a.m. - **Sense of Wonder**
Meet outside the Manzanita Lake Camper Store.
A special program for young children ages 4 to 6. Emphasis on outdoor activities that promote nature awareness through the use of the senses. Parents are welcome but not required to attend. (90 minutes)

9:30 a.m. - **Junior Rangers**
Meet at the Manzanita Lake Amphitheater.
If you are 7 to 12 years old join this fun adventure and learn about the park through games, activities, and observations. Become a Junior Ranger. (2 hours)

11:00 a.m. - **Active Earth: Hydrothermal Areas of Lassen Volcanic NP**
Meet at the Sulphur Works Parking Area.
Mud pots, steam and gas vents, and boiling ponds… Such features remind us that our planet is alive and constantly transforming. With a ranger, discover where you can find fascinating hydrothermal features in the park, and learn how they were created.

1:00 p.m. - **A Land of Volcanoes**
Meet outside the Loomis Museum.
Did you know that every mountain in the park is a volcano or part of one? Learn about the geology and volcanic history of the park through this interesting program.

1:30 p.m. - **It's Easy Being Green**
Meet on the back patio of the Kohm Yah-mah-nee Visitor Center.
Learn how the effects of climate change have influenced the design of the new Kohm Yah-mah-nee Visitor Center and what you can do to lessen your impact on the planet whether you are at home or at the park.

2:30 p.m. - **Fault Talk**
Meet at the Seismograph Station by the Loomis Museum.
A talk and demonstration on how geologists monitor the park’s volcanic hazards and measure Lassen’s seismic activity.

**MONDAY**

10:30 a.m. - **On the Wild Side**
Meet outside the Loomis Museum.
Discover some of the “wilder sides” of the park. Topics vary from natural to cultural history.

1:30 p.m. - **Cougar: The American Mountain Lion**
Meet outside the Loomis Museum.
This majestic member of the cat family personifies strength, grace, mystery, and the wilderness spirit. Join a park ranger and discover little known secrets about the cougar and its lifestyle.

**TUESDAY**

9:30 a.m. - **Junior Rangers**
Meet at the Manzanita Lake Amphitheater.
If you are 7 to 12 years old join this fun adventure and learn about the park through games, activities, and observations. Become a Junior Ranger. (2 hours)

11:00 a.m. - **On the Wild Side**
Meet outside at the Kohm Yah-mah-nee Visitor Center Amphitheater.
Discover some of the “wilder sides” of the park. Topics vary from natural to cultural history.

2:30 p.m. - **Pioneers**
Meet at the Manzanita Lake Amphitheater.
It’s 1853 along the wagon road called the Noble’s Emigrant Trail. You will visit a pioneer camp and meet some rugged travelers who tell about their journey to California.

**WEDNESDAY**

10:00 a.m. - **Blown from a Volcano**
Meet outside the Loomis Museum.
Did you know that every mountain in the park is a volcano or part of one? Learn about the geology and volcanic history of the park through this interesting program.

10:00 a.m. - **Junior Ranger Discovery Walk**
Meet at the Kohm Yah-mah-nee Visitor Center Amphitheater.
If you are 7 to 12 years old, join a park ranger for outdoor adventure and discover the plants and animals that live in an old-growth red fir forest.

2:00 p.m. - **Bear Necessities**
Meet outside the Loomis Museum.
Learn about black bears and how you can help keep them wild in Lassen Volcanic National Park. Join us for this fun-filled program.

7:30 p.m. in July; 7:00 p.m. in August - **Summit Lake Evening Program**
Meet at the Summit Lake Amphitheater.
Join a park ranger for a lively program about the park’s natural or cultural history.

9:00 p.m. - **Starry Nights**
Meet at the Devastated Area Parking Area.
Join a park ranger for stars, planets, galaxies, and ancient myths under a brilliant night sky.

**THURSDAY**

9:30 a.m. - **It’s a Wildlife Neighborhood**
Meet at the Manzanita Lake Camper Store.
Join a park ranger for a casual walk on the Manzanita Lake Trail and learn about the many species of birds and mammals that call Manzanita Lake their home. (1 hour)

11:00 a.m. - **Before There Was a Park**
Meet at the Kohm Yah-mah-nee Visitor Center Amphitheater.
Native American tribes have called the Lassen area “home” for centuries, yet it is hard to imagine their past presence today. What happened to those people who had come before us? With a ranger, explore who those people were, where they came from, and what their lives were like.

11:30 a.m. - **Junior Firefighters**
Meet outside the Loomis Museum.
If you are 7 to 12 years old join in on an exciting program and discover wildfires role in our national parks. Become a Junior Firefighter.

1:30 p.m. - **Stories in Stone**
Meet outside the Loomis Museum.
Learn about the fascinating stories in stone that can be seen from the Manzanita Lake area. Examine the rocks that have shaped this volcanic landscape.

**FRIDAY**

10:30 a.m. - **Wildlife Connections**
Meet outside the Loomis Museum.
Learn about the park’s wildlife and hear stories about their amazing lifestyles.

11:00 a.m. - **Nature’s Splendor**
Meet at the Kohm Yah-mah-nee Visitor Center Amphitheater.
Lassen lies at a crossroads of three biologically diverse regions. Learn about this incredible environment.

1:00 - 3:00 p.m. - **Discovery Center**
Check out the exhibits and join a park ranger for ongoing short programs and demonstrations on various natural history subjects. Inquire at the Loomis Museum for directions to the Discovery Center.

1:30 p.m. - **On the Wild Side**
Meet outside the Loomis Museum.
Discover some of the “wilder sides” of the park. Topics vary from the natural to the cultural.

2:30 p.m. in July; 7:00 p.m. in August - **Summit Lake Evening Program**
Meet at the Summit Lake Amphitheater.
Join a park ranger for a lively program about the park’s natural or cultural history.

9:00 p.m. in June and July; 8:30 p.m. in August - **Evening Slide Program**
Meet at the Manzanita Lake Amphitheater.
Join a park ranger for an evening slide program about the park’s natural or cultural history.

**SATURDAY**

8:00 a.m. - **Early Birds**
Meet outside the Manzanita Lake Camper Store.
Take an easy walk and discover the birds of Manzanita Lake. (1 hour)

9:30 a.m. - **Junior Rangers**
Meet at the Manzanita Lake Amphitheater.
If you are 7 to 12 years old join this fun adventure and learn about the park through games, activities, and observations. Become a Junior Ranger. (2 hours)

10:00 a.m. - **Mill Creek Falls Discovery Hike**
Meet at the Kohm Yah-mah-nee Visitor Center Amphitheater.
Join a ranger for a moderate hike to the tallest park waterfall - 75 foot Mill Creek Falls. Discover the diversity of life through a red fir forest. (2 hours)

1:00 p.m. - **Predator and Prey the Biodiversity Way**
Meet outside the Loomis Museum.
Learn about predator and prey animals in the park and hear stories about their amazing connections in the web of life.

1:30 p.m. - **The Ghost of Brokeoff Volcano**
Meet at the Sulphur Works Parking Area.
There was once a volcano taller than Lassen Peak that towered over the landscape of what is now Lassen Volcanic National Park. Come and learn about the ghost of Brokeoff Volcano and other geologic features of the park.

2:30 p.m. - **Pioneers**
Meet at the Manzanita Lake Amphitheater.
It’s 1853 along the wagon road called the Noble’s Emigrant Trail. You will visit a pioneer camp and meet some rugged travelers who tell about their journey to California.
Services and Facilities

Accessibility
Accessible facilities include the Loomis Museum, Manzanita Lake Camper Store, and the Kohm Yah-mah-nee Visitor Center. Wheelchair-accessible restrooms are located at the Loomis Plaza, Summit Lake and Kings Creek picnic areas, Bumpass Hell parking area, Kohm Yah-mah-nee Visitor Center, Devastated Area Trail, and Sulphur Works. Campgrounds with accessible sites include Manzanita Lake, Summit Lake South, and Butte Lake. Wheelchair accessible paths include the Devastated Area Interpretive Trail, the Sulphur Works Area, and the Lassen Crossroads Information Area. Multiple scenic pullouts on the Main Park Road have wheelchair accessible wayside exhibits, as well as the Loomis Museum and visitor center. All ranger programs at the Loomis Museum are wheelchair-accessible.

Emergencies
Dial 911 to report any emergency, 24 hours a day.

Gasoline
Gasoline is available at the Manzanita Lake Camper Store during operating hours.

Lost and Found
If you lose or find an item, contact a ranger and report the item.

Phones
Cell phone coverage in the park is spotty. Pay phones are located outside the Manzanita Lake Camper Store and the Loomis Museum.

Picnic Areas
Picnic areas are found throughout the park (see the map on page 12).

Manzanita Lake Area
5900’ (1798 m.) elevation. 1 mile beyond the northeast park entrance.

INFORMATION
• Loomis Museum: Gifts and bookstore.
• Manzanita Lake Camper Store: Supplies, gifts, sandwiches, ice cream. 5/21 - 6/19 (Daily) 9 AM - 5 PM
6/20 - 9/6 (Daily) 8 AM - 8 PM
9/7 - 10/12 (Daily) 9 AM - 5 PM

Showers and Laundry
Coin-operated showers and laundry machines are available 24 hours a day at the Manzanita Lake Camper Store.

ATM
The Manzanita Lake Camper Store has an ATM.

Showers and Laundry
Coin-operated showers and laundry machines are available 24 hours a day at the Manzanita Lake Camper Store.

First-Come, First-Served

All campgrounds, except for the group sites, have designated first-come, first-served campsites. You cannot reserve these sites, but they can fill up. You may not hold a site for someone who has not arrived.

Reservable Sites

You can reserve a site at all campgrounds with a “R” on the chart and you must reserve a site with “RR” on the chart. Reservable sites can fill up. For reservations call 1-877-444-6777 or visit http://www.recreation.gov

Overflow Camping

No overflow camping exists in the park, however the park rarely fills all available campsites. Camping or overnight vehicle parking in pullouts, parking areas, picnic grounds, or any place other than a designated campground is not permitted.

Check-in & Check-out

Check-in any time, but sites may not be available until 12 NOON. Check-out time is 12 NOON.

Quiet Hours

Each visitor deserves to hear the natural sounds of this beautiful environment. Respect this by complying with the law: generator operation prohibited 8 PM - 8 AM; quiet hours 10 PM - 6 AM.

Stock Corrals

Stock corrals are available at Butte, Summit, and Juniper Lakes. Reservations are required: call (530) 335-7029.

Wilderness Camping?

A Permit Is Required

Campsites

Camp at least 300' from other groups, 100' from streams and lakes, and at least 1/2 mile from any developed area. Camping is prohibited within 1/4 mile, and/or within sight of the same, from ANY hydrothermal feature as well as the following: Cascade Springs, Kings Creek Falls, Cinder Cone, Painted Dunes, Lassen Peak, Cliff Lake, Little Willow Lake, Crags Lake, Mt. Harkness Summit, Crumbaugh Lake, Hat Creek Cabin, Echo Lake, trail from Summit Lake to Echo Lake, and the Upper and Lower Kings Creek Meadows.

Permits

A free wilderness permit is required for overnight camping in Lassen Volcanic’s backcountry wilderness. You are limited to a maximum of 10 people per permit per site; up to 20 people may hike together.

Permits are available in person during operating hours at the Loomis Museum, Kohm Yah-mah-nee Visitor Center, and the Summit Lake, Juniper Lake, Butte Lake, and Warner Valley Ranger Stations (self-registration). Permits are also available in advance through our website or by phone at (530) 395-4480.

Please use the food storage lockers provided to store all your food and anything that emits an odor (toothpaste, soap, cosmetics, toiletries) when camping. Bears are attracted to anything that has a scent. We recommend the use of portable food storage canisters while camping in the backcountry where storage lockers are not available. Be sure to place these containers at least 100 feet away from your campsite. Most importantly do not feed any bear or any other animal (including jays, ducks and geese). The old adage “a fed bear is a dead bear” is true. Problem bears are no longer captured and relocated. If a bear becomes a threat to human safety, it will have to be destroyed. If you do encounter a bear in a developed area such as a campground, be aggressive and yell and make loud noises to scare it away. You can also throw rocks or sticks at the bear (not at its head) to scare it. Be sure to report the incident to a campground host or any Park Service employee as soon as possible. If you happen to come across a bear when in an undeveloped area, do not approach the bear. Keep a distance of at least 50 yards and do not interfere with what the bear is doing. Take a step back and consider yourself lucky to have seen one of the bears of Lassen Volcanic.

Campfire Restrictions

Gather only dead and down wood. Open fires are restricted to metal fire rings only. Fires must be out cold before you leave.

Campsite Capacities

A maximum of two vehicles is allowed at each campsite, except at designated group sites. A motorhome, tow vehicle, any trailer, car or truck count as one vehicle. Campsite capacity is limited to six persons and three tents. Group campsite capacity is 25 persons per site. Group campsites at Juniper Lake Campground are restricted to tent camping only with a maximum of 15 persons per site.

Length of Stay

Camping is limited to 14 days per year per campground, except at Summit Lake, which is limited to 7 days per year.

Discounts

holders of Senior and Access passes receive a 50% discount on camping fees, except for group campsites.

Food storage lockers like this are found at all developed campsites
Hi, I'm Joe Pettegrew, Lassen Volcanic’s trail crew leader. We have over 150 miles of hiking trails here in the park. Our most popular day hikes are listed on this page. To help you choose, I've given them a rating, but keep in mind this is just one hiker’s opinion. If you are visiting in June or early July, some trails might still be closed by snow, so ask a ranger which trails are open. Please help us protect this special place by following a few rules:

Stay on established trails and boardwalks. This is especially important in thermal areas where the ground may be dangerously thin.

Pets are not allowed on park trails.

Leave all rocks, plants, animals, and artifacts undisturbed for the enjoyment of future users.

Plan Ahead
As a day hiker, no permits are required. You are entirely on your own, and cell phones may not work in the park. Your descent into Wilderness, however brief, marks your entry into a world in which preparation, self-reliance, and common sense are crucial. Wear sturdy boots, carry plenty of water and food, and wear sunscreen.

Weather Conditions Change
Severe storms can occur suddenly. Climb peaks and ridges early in the morning. Head for lower elevation during lightning activity.

Finish Hikes Before Sunset
Sunset times are earlier in areas shadowed by mountains. Please finish your hikes before sunset.

Help Save Lassen Peak!
Thousands of hikers each year make the trip to the summit of Lassen Peak. Hiking Lassen Peak can be one of the most memorable experiences of your lifetime, but please take only memories and leave only footprints on the designated trail. Shortcuts quickly erode volcanic soils and damage alpine plants such as the Lassen Peak Smelowskia, found in only one place in the world: Lassen Peak!
MANY THANKS TO OUR TWO PARK PARTNERS

The Lassen Association (LA) has assisted the National Park Service since 1939 in providing park visitors with interpretive and educational merchandise about the many and varied features of the park.

“Miles of its flanks are reeking and bubbling with hot springs, many of them so boisterous and sulphurous they seem ever ready to become spouting geysers…”

- John Muir “Mountains of California,” 1894

DID YOU KNOW? Lassen Volcanic National Park straddles a crossroads of four great geologic and biologic provinces—the Cascade Range, the Sierra Nevada, the Central Valley of California, and the Great Basin.

DID YOU KNOW? Lassen Volcanic National Park started as two separate national monuments designated by President Theodore Roosevelt in 1907: Cinder Cone National Monument and Lassen Peak National Monument.

These facts and more can be found in our publications. Come and explore today!

For information on how to join our mission visit our online membership program at www.lassenassociation.org. Or contact us directly at (530)595-3399 or lassenassociation@yahoo.com.

We provide books, maps, trail guides and videos about the natural and cultural history of Lassen Volcanic National Park. Additionally, we offer a large selection of educational gift merchandise to enhance your park experience and memories to take home.

Our publications are available at various sales outlets in the park or online at www.lassenassociation.org.

Enjoy the park’s boiling, bubbling, boisterous thermal areas as well as the many other features that are ready for your exploration much in the same condition as when visited by John Muir 112 years ago.

Make a Difference!

With generous contributions from Park visitors, the Lassen Park Foundation has helped support:

- Restoration of Lassen Peak Trail
- Lassen Crossroads Information Center
- Scientific research on bats and songbirds
- Camping trips for disadvantaged youth
- Winter snowshoe educational program
- The Park’s new Kohrn Yah-mah-nee Visitor Center*

Please become a Friend of Lassen by contributing to the Lassen Park Foundation! Contributions of $20 or more will receive a Lassen Park Foundation cap or polo shirt (depending on time of donation). Your donation is tax-deductible. Please make checks payable to Lassen Park Foundation.

To learn more visit www.lassenparkfoundation.org or email info@lassenparkfoundation.org. Lassen Park Foundation, P.O. Box 3135, Chico, CA 95927-3135. Phone (530) 895-9400.

*Only $95,000 remains to complete funding for this visitor center!
Ask a Ranger

Question: I only have a day or two to see the park, what should I do?

Answer: Lassen Volcanic National Park provides a wealth of fun activities that are as varied as the seasons of the park. Here is a sample of what the park has to offer based on your length of visit.

Several hours: The Main Park Road offers many scenic vistas and access to several of the most popular hiking trails. A one-way journey on the road will take approximately one hour without any stops in good weather. A moderate 3 mile (round-trip) hike to Bumpass Hell is a rewarding way to experience the park’s largest hydrothermal (hot water) area. The Devastated Area interpretive trail is a 30 minute stop that offers amazing views of the destruction caused by Lassen Peak’s eruptions of 1914-17. Sulphur Works is another quick stop showcasing an active hydrothermal area. Be sure to stop at the Loomis Museum to see historic artifacts and the Kohm Yah-mah-nee Visitor Center to view the park film and experience the interactive exhibits. If you brought your lunch, popular picnic spots include North Summit Lake, Kings Creek, and Lake Helen.

You can purchase food at the Manzanita Lake Camper Store or the Kohm Yah-mah-nee Visitor Center.

One day: Thousands of visitors hike Lassen Peak every year. This strenuous hike offers stunning views of the Cascade Mountains and the Sacramento Valley. At the top of the mountain it is easy to picture the devastation from the 1915 eruption. Here you can view the crater caused by the eruption and look down upon the Devastated Area from above. Be sure to start early and get a current weather forecast before you begin. If a strenuous hike does not appeal to you, you could drive the Main Park Road at a leisurely pace, stopping at the Sulphur Works and Devastated Area interpretive exhibits, at any one of our many picnic areas for lunch, and at Manzanita Lake for a gentle 1.8 mile stroll around the picturesque mountain lake. At the end of your day you should pitch a tent under the bright stars in one of our eight campgrounds. For additional recommended stops along the Main Park Road, see the map on page 12.

Two or more days: A longer visit to the park would not be complete without a trip to the Cinder Cone in the Butte Lake area. You can arrive the night before and camp at the Butte Lake Campground or get an early start to beat the heat and watch the morning sun rise above he beautiful Painted Dunes. After the hike, cool off with a dip in Butte Lake and catch your limit of rainbow trout for a tasty dinner. See page 6 for additional hiking trail descriptions and recommendations.

WHERE CAN I....

GO FISHING? Whether fishing from shore with the kids, or fly-fishing Manzanita Lake from a float-tube, Lassen Volcanic National Park has plenty of opportunities to land the big one. Trout have not been stocked in the park since the 1980s, but a healthy population of these feisty fish still remain in many lakes and streams (though not in all of them). Manzanita Lake is famous for its large rainbow and brown trout, but keep in mind it is catch and release only and you must use single-hook, barbless, artificial lures only. Butterfly Lake and Horseshoe Lake both have healthy populations of trout. A valid California fishing license is required to fish in the park.

GO BIRDWATCHING? Over 83 species of birds nest in the park. Raptors and other birds-of-prey are frequently sighted soaring above the rocky peaks between Brokeoff Mountain and Lassen Peak. The Manzanita Lake loop trail hosts many migratory birds and summer residents and is a favorite spot among bird watchers. The Cluster Lakes loop starting at Summit Lake is another trail popular among bird watchers.

RIDE A BICYCLE? Keep bikes on paved roads only, not on any trail.

GO BOATING? Non-motorized boats are allowed on most lakes within the park. You can rent kayaks for use on Manzanita Lake at the Camper Store. The following lakes are closed to all vessels: Boiling Springs Lake, Emerald Lake, Lake Helen, Reflection Lake, and Hat Lake.

GO PICNICKING? See picnic symbols on map (page 12). Never leave food unattended. Most sites have tables, and restrooms. Water is not available at most sites.

TAKE GREAT PHOTOS? Due to the bright mountain sun, sunrise and sunset are generally the best times to take photos in the park (see page 4 for these times). On a calm day, Manzanita Lake and Lake Helen can offer crystal clear reflections of Lassen Peak. The southern 10 miles of the park road offer sweeping vistas and views of craggy mountain peaks.

GO HIKING? See page 6 for more information about full day, half day, and short hiking trails in the park.

GO CAMPING? See page 5.

WALK A PET? Not on trails but leashed pets are allowed in developed areas such as campgrounds, picnic areas, paved roads, and parking lots. Ask a ranger about locations just outside the park where you can enjoy trails with your pet.

HAVE A FIRE? Campfires are only allowed in fire rings provided in developed campgrounds. Backcountry fires are not allowed.

CUT WOOD? No collecting or removal of any objects from the park. Leave everything to play its natural role in the ecosystem. Archeological sites and artifacts are protected by law.

FEED WILDLIFE? Not in the park! Animals become unnaturally dependent. Some can become dangerous and may have to be killed. Some can carry disease. Roadside boggans can be hit by cars. People food is unhealthy for them.
Become an Honorary Wildlife Biologist:  
Report Your Wildlife Sightings!

How would you like to become an Honorary Wildlife Biologist for Lassen Volcanic National Park? We need your help to monitor wildlife populations. Of particular importance are species of raptors (hawks, eagles, falcons and owls), forest carnivores (mountain lions, bobcats, martens, weasels, coyotes, red and gray foxes), and black bears.

Park staff survey wildlife, but we cannot be everywhere at once. You can assist. If you see an animal you think the park should know about, document the species you observed, and record the location, date, time, and what the animal was doing. The entrance stations, visitor centers, and Drakesbad Guest Ranch will have copies of the park’s wildlife sighting form for you to fill out and return. Or you can write down the information and give it to any park employee who will route it to our wildlife biologist. The observations you turn in will be entered into a database to document species occurrence. By turning in wildlife sighting forms you become an Honorary Wildlife Biologist and will help to preserve and protect the wildlife of Lassen Volcanic. Thank you for your cooperation. Now go be a Honorary Wildlife Biologist!

Climate Change

The role of national parks

Today, climate change has become a concern for our way of life. There are many different theories within the scientific community about what changes could occur, how they might occur, and their effects on wildlife, plant life, and human life. Currently, we are unable to predict beyond a reasonable doubt how ecosystems will react and adapt to our forecasted warming climate. We do know that climate change has always been a natural cyclic force of nature, however the majority of the global scientific community agrees that people’s lifestyles of consumption and demands for natural resources has thrown nature’s cycle out of balance thus rapidly speeding up climate warming at an un-natural pace.

Global mean temperature has raised .8°C (1.3°F) since 1880; more than 20% of this change has occurred since 1996. What evidence do we have that this increase in temperature affects our environment and what are its consequences? National parks can help answer these questions through research and by monitoring changes that occur in their ecosystems. The data collected will help indicate the direct and indirect effects on park resources and on the people who live and work in the surrounding environment.

Swarms of Earthquakes Occur Near Lassen Peak

Between March 17th and March 19th, 2009 at least 48 minor (M<2.2) earthquakes were recorded by the United States Geological Survey beneath the south flank of Lassen Peak. We asked USGS volcanologist Michael Cline a couple of questions to find out what these earthquakes mean.

Question: What caused the swarm of earthquakes? 
Answer: While it is impossible to determine exactly what happened, our best guess is that cold groundwater has found its way down to the hot rock located approximately 5 km below the ground. The cold water causes the hot rock to cool and contract which stresses the rock and causes it to crack and fail. This cracking and breaking of the rock is recorded as small earthquakes by our instruments.

Question: Do these earthquakes mean Lassen Peak is going to erupt again? Should we be worried? 
Answer: Short answer, No. Earthquake swarms are not unusual in this area, and this swarm appears to be within the norm of earthquake activity detected in the Lassen area since the modern seismic network was installed in 1980. Earthquakes usually have a signature, meaning we can determine what caused them by their characteristics. These earthquakes did not involve magma movement and were not long period events like those along fault lines. They were simply short, rock breaking earthquakes related to the shallow Lassen hydrothermal system.

Question: Is there anything else you would like to share? 
Answer: The USGS will continue to monitor Lassen Volcanic National Park closely as we do with all Cascade Volcanoes.

If you are like most visitors to Lassen Volcanic National Park you will drive on the Main Park Road during your visit. The Main Park Road extends over 29 miles between the southwest and northwest entrances. From the Southwest Entrance (elevation 6,646 feet) the road climbs to an elevation of 8,512 feet at its summit near Lassen Peak, and descends towards the Northwest Entrance (elevation 5,808 feet) near Manzanita Lake.

The road traverses active hydrothermal areas, sub-alpine forests, mountain meadows, and lava fields. It was designed to display the park’s most scenic and geologically interesting areas. Roadside amenities, including scenic pullouts, trailhead parking areas, and roadside markers were designed and located to enhance the motorists’ experience, to allow hikers access to the park’s extensive backcountry trail system, and to add to the visitor’s understanding of the dramatic geological processes that created the diverse volcanic landscape. The road offers distant views of the surrounding countryside within and beyond park boundaries, as well as a variety of distant and intimate views of the park’s major volcanic feature, Lassen Peak.

Here are some suggested “don’t miss” stops, refer to the map above for their locations:

Stop 1: Kohm Yah-mah-nee Visitor Center
Stop 2: Sulphur Works
Stop 3: Little Hot Springs Valley Scenic Overlook: Keep an eye out for the pull-out on the east side of the road after you pass the sharp curve of Diamond Point. Here you can find great views of the thermally active valley. Look closely, you might spot deer or an even a wandering bear on the valley floor.
Stop 4: Bumpass Hell Overlook: Although you can’t see Bumpass Hell, the views from this overlook located at the end of the parking lot can’t be beat. The spaceship looking device behind the hemlocks is a key part of Earthscope’s Plate Boundary Observatory Project. Very accurate GPS receivers like this one are measuring the movement of the plates on the Earth’s crust. Visit www.earthscope.org to read more.
Stop 5: Lassen Peak Parking Area
Stop 6: Kings Creek Meadow
Stop 7: Lake Almanor Basin Scenic Overlook(s): Several pull-outs are located along this stretch of road. Look towards the Southeast and locate Lake Almanor. The mountains south of Lake Almanor are the High Sierras while the mountains to the north are the Cascades.
Stop 8: North Summit Lake Picnic Area
Stop 9: Devastated Area Interpretive Trail
Stop 10: Chaos Crags and Jumbles Scenic Pull-out: Look for this pull-out on the north side of the road about 0.5 miles after you emerge from the forest. Located within the Chaos Jumbles, this pull-out has dramatic views of Chaos Crags.
Stop 11: Manzanita Lake and Loomis Plaza
