Welcome to Mojave!

As the new superintendent, I want to extend my personal welcome to Mojave National Preserve. Although I moved here from Glacier National Park in Montana, I began my National Park Service career in the desert southwest, so it’s great to be back!

Mojave National Preserve is a camper’s paradise. Developed campgrounds, roadside, and backcountry camping offer opportunities for individuals and groups of diverse ages, interests, and skills. Careful planning and knowledge of camping rules and regulations will help ensure an enjoyable and safe experience for you, future visitors, and the fragile desert environment...

3. Mojave Roads

Getting around Mojave National Preserve, the third largest unit of the National Park System in the contiguous United States, can be challenging. It need not be. Plan ahead and prioritize; familiarize yourself with Mojave’s paved and dirt roads, as well as the major sites to see along the way. And remember—you’ll never see it all in one day (but you can always come back)....

4. Looking Back

Glenn DeVoogt, now 86, remembers going to the one-room school house at Kelso during the Great Depression. Now, the National Park Service is in the process of renovating this historic structure, so visitors can learn about the lives of Glenn DeVoogt and others who lived and went to school in this desert frontier town.

6. Campgrounds

Mojave National Preserve is a camper’s paradise. Developed campgrounds, roadside, and backcountry camping offer opportunities for individuals and groups of diverse ages, interests, and skills. Careful planning and knowledge of camping rules and regulations will help ensure an enjoyable and safe experience for you, future visitors, and the fragile desert environment...

Welcome to Mojave!
A Hike with History

Chris Mills, Park Ranger

IF YOU WERE WONDERING HOW ANYONE COULD—or would want to—live in the remote desert that is now Mojave National Preserve, take a leisurely stroll along our newest park trail, the Rock Spring Loop, to find some answers. The trail starts at the Rock House, five miles east of Black Canyon Road on Cedar Canyon Road. At the Rock House, you will find a vault toilet and picnic table. The Rock House was constructed by Bert Smith in 1929, when he came to this area to recover from poison gas exposure suffered during World War I. Doctors told him he didn’t have long to live, but the dry desert air proved so beneficial to Smith’s health that he lived here for 25 more years. The second long-term resident was artist Carol Faber, who lived and worked at the Rock House in the 1960s, selling his artwork to passing travelers. A few minutes into the hike, the remains of a milling operation from the 1930s are visible near the trail. Rich mineral deposits of gold, silver, copper, and other precious metals have been found across this region. Rock from nearby Watson Wash was hauled here and crushed to release the copper. The project met with little success and didn’t last long. Prospectors often just walked away from such sites, leaving everything behind.

The trail continues to Rock Spring, one in a series of springs that dot the Mojave Desert every 20 to 30 miles, forming a natural travel corridor. This route eventually became known as the Rock Trail and later, the Mojave Road. Water means life in the desert, so humans and wildlife depended on this spring, as did the livestock later introduced by miners and ranchers. Exhibits near the spring describe the Mojave and Chemehuevi Indians who formerly lived in the area, and Camp Rock Spring, an army outpost active briefly in the 1860s to protect mail and early travelers that passed along the route. Water is almost always present here, whether it’s a slow trickle or several deep pools depends on recent rainfall. From the spring, the trail climbs a ridge, offering an expansive view of the Hidden Valley and New York Mountains.

As you walk back to your car, think about why you decided to hike this particular trail. Was it because of the spring? The presence of wildlife? Perhaps you found the hike an enjoyable experience. Whatever your reason, we are all fortunate to have these places saved by the American people so that all may experience our heritage.

Essential Information

Dates and Hours of Operation
The preserve is open all year. Information centers (see below) maintain regular hours of operation. Fees and Reservations
There are currently no entrance fees for Mojave National Preserve. See page 6 for information on campground reservations and fees.

Information Centers
Three information centers provide orientation, information, and trip-planning advice. Park rangers are on duty. Western National Parks Association (WNPA) bookstores offer books, maps, and other Mojave-related items.

Kelso Depot Visitor Center and the Beanery or lunchcounter
Located 34 miles south of Baker, Calif., on Kelbaker Road. Open daily, 9 a.m.–5 p.m.

Hole-in-the-Wall Information Center
Located near Hole-in-the-Wall Campground. Winter hours (October–April) Wednesday through Sunday, 9 a.m.–4 p.m. Summer hours (May–September) Open intermittently as staff is available.

Headquarters Information Center
Located at 2701 Barstow Road, Barstow, Calif. Open Monday through Friday, 8 a.m.–4:30 p.m.

Permits
Permits are required for all organized events, group events (more than 15 individuals or 7 vehicles), and commercial activities such as filming. Fees apply. Proof of insurance and posting of a bond might also be required. Call 760-252-6107 or visit www.nps.gov/moja for more information.

Lodging
There are no motels within Mojave National Preserve. Lodging may be available in Barstow, Nipton, Ludlow, Needles, Baker and Twenty-nine Palms, Calif., and in Primm and Searchlight, Nev.

Water
Drinking water is available only at Kelso Depot Visitor Center, Hole-in-the-Wall Information Center, Hole-in-the-Wall and Black Canyon Campgrounds, Mid-Hills Campground.

Gasoline
There are no gasoline stations within Mojave National Preserve—be sure to fill your tank before entering. Gasoline can be purchased along I-40 at Needles, Fenner and Ludlow, Calif., along I-15 at Baker, Calif., the Cima Road exit, and Primm, Nev., and along U.S. 95 at Searchlight, at the Nev. 163 junction south of Cal-Nev-Ari, Nev.

Pets
Although allowed inside information centers, pets are welcome elsewhere in the preserve. They must be confined to a leash no longer than six feet in length and never left unattended (including inside vehicles). Dogs used during hunting activities must be under the owner’s control at all times. Pet excrement must be collected and disposed of in garbage receptacles.

Hunting and Firearms
Hunting is permitted in accordance with state regulations. All hunting activities require a license; additional permits and tags may apply. Visit the California Department of Fish & Game website at http://www.dfg.ca.gov/ for more information.

Target shooting or “plinking” is prohibited. All firearms transported within the preserve must be unloaded, cased, and broken down, except during lawful hunting activities. No shooting is permitted within 1/2 mile of campgrounds, information centers, Kelso Dunes, and Fort Piute.

Collecting and Vandalism
Disturbing, defacing, or collecting plants, animals, rocks, historic or archeological objects is prohibited. Please leave these resources—all part of our national heritage—as you find them for everyone to enjoy. Metal detectors are not allowed.

Private Property
Private inholdings are found throughout the preserve. Please respect the rights of our neighbors. It is your responsibility to obtain permission before hunting, hiking, or entering private property.

Cattle and Fences
Most grazing within Mojave National Preserve occurs on public land. This land is open to you to explore, but please don’t disturb cattle, fences, or water tanks. Leave gates as you find them.

Bicycles
Bicycles are allowed on dirt and paved roads, but are not allowed on hiking trails unless they are former roads. Bicycles are not allowed in Wilderness Areas or for cross-country travel.

Firewood & Campfires
Wood is scarce in the desert. Cutting or collecting any wood, including downed wood, is prohibited. All firewood, including kindling, must be brought in. Firewood may be available for purchase in Fenner, California. Campfires are allowed in fire rings in campgrounds and other established sites. To minimize your impact, use a firepan and pack out the ashes. Please do not leave fires smoldering or unattended.
Avenues to Adventure

Mojave National Preserve is vast. At 1.6 million acres, it is the third largest unit of the National Park System in the contiguous United States. While much of Mojave’s wild and historic splendor is available only to those who travel its trails and unmaintained roads, the primary roads of the preserve offer endless opportunities for exploration (see map on page 8).

Kelbaker Road
A 56-mile paved road stretching from I-15 at Baker, Calif. to the north to I-40 east of Ludlow, Calif. in the south, Kelbaker Road winds past cinder cones, lava flows, Kelso Depot, Kelso Dunes, and the Granite Mountains.

Cinder Cones & Lava Flows
No signs or services.
About 14 miles southeast of Baker, Kelbaker Road traverses a 25,600-acre area of lava flows and volcanic cinder cones thought to range in age from 10,000 to 7 million years old. In 1973, this area was designated as Cinder Cones National Natural Landmark due to its scenic beauty and exceptional geological value. Aiken Mine Road (19 miles southeast of Baker, Calif.) offers an interesting side trip through the heart of the area and access to a lava tube. High clearance and four-wheel drive recommended.

Kelso Depot Visitor Center
Information, exhibits, orientation film, art gallery, bookstore, restrooms, water, prime area. Located 34 miles southeast of Baker, Kelso Depot began in operation in 1924 and served as train station, restaurant, and employee housing on the Los Angeles and Salt Lake route of the Union Pacific Railroad. Now Mojave National Preserve’s principal information center and museum, extensive exhibits describe the cultural and natural history of the preserve. Historically furnished rooms offer a glimpse into Kelso’s past.

Kelso Dunes
Self-guiding trail, vault toilets, no water. About 42 miles southeast of Baker (8 miles south of Kelso Depot), then 3 miles west on a graded dirt road, Kelso Dunes were created by winds carrying sand grains from the dried Soda Lake and Mojave River Sink located to the northwest. The Providence and Granite mountains that trapped the winds were later eroded. Created over the course of 25,000 years, the dunes are nearly 700 feet high and cover a 45-square-mile area. The Kelso Dunes form a “booming” or “singing” sound when sand with the right moisture content slides down the steep slopes. Try it for yourself—run down a dune slope (but don’t trample vegetation) to initiate the sound.

Granite Mountains
No signs or services.
An imposing jumble of granite marks the south entrance to the preserve, 50 miles southeast of Baker on Kelbaker Road. Portions of the Granite Mountains lie within the University of California’s Desert Research Center; please respect the signs that mark the boundary. High clearance and four-wheel drive recommended.

Clark Mountain
No signs or services.
The only portion of Mojave National Preserve north of I-15, Clark Mountain is also its highest point, at 7,929 feet. A relic white fir grove near the top is one of only three in the Mojave Desert. Check detailed maps or ask a ranger for access information. High clearance and four-wheel drive recommended.

Cima Road
About 28 miles east of Baker, Calif., the paved Cima Road connects I-15 with Cima, Calif., 16 miles to the southeast.

Cima Dome & Joshua Tree Forest
Self-guiding trail, no water.
The near-perfect symmetry of Cima Dome rises 1,500 feet above the surrounding desert and provides ideal habitat for the world’s largest concentration of Joshua trees. Although the top of the dome is located west of Cima Road near the Tontowi Trailhead, this unusual geo- logical feature is best seen from a distance. Try the view looking northwest from Cedar Canyon Road, 2.5 miles east of Cima Road.

Cedar Canyon & Black Canyon Roads
Mostly unpaved, the 20-mile Cedar Canyon Road connects Kelso Cima Road in the west with Ivanpah Road in the east, paralleling (and sometimes joining) the historic Mojave Road. Black Canyon Road (unpaved north of Hole-in-the-Wall) connects Cedar Canyon Road with Essex Road, 20 miles to the south.

Rock Spring
Wayside exhibits, vault toilet, picnic table.
A well-known watering hole for early travelers, Rock Spring is located 5.2 miles east of Black Canyon Road on Cedar Canyon Road, then ¾ mile south on a sandy, unmapped road. Four-wheel drive recommended.

Mid Hills
Campground, trailhead, vault toilets, water. Not recommended for RVs.
About 2 miles west of Black Canyon Road at the north end of Wild Horse Canyon Road, Mid Hills supports pinyon-juniper woodland habitat. The effects of a fire that swept through the area in June 2009 are evident, although several campsites in the popular campground still contain charred stands of pinyon pines and junipers.

Hole-in-the-Wall
Information center, bookstore, campground, picnic area, trailhead, restrooms, water, telephone.
Just north of the junction of Black Canyon and the south end of Wild Horse Canyon Roads, rhyolite cliffs riddled with holes and hollows are the backdrop for Hole-in-the-Wall.

Plute Spring
About 7.4 miles west of U.S. 95 on the unmarked and unpaved Plute Road, then 3 miles west on an extremely rough unmapped dirt road. High clearance and four-wheel drive recommended.

Fort Plute and Plute Spring Trails
Wayside exhibits, no signs or services.
Willows, cottonwoods, and rushes thrive along a half-mile section of Plute Creek. Fort Plute (still visible) was one in a string of military outposts built along the Mojave Road. Please don’t climb on the foundations or remove anything.

Zzyzx Road
Just southeast of Baker on I-15, Zzyzx Road leads 5 miles south into the preserve along the western shore of Soda Lake (dry).

Zzyzx/Soda Springs
Self-guiding trail, wayside exhibits, vault toilets, no-potable water, picnic area.
Historically known as Soda Springs and later renamed Zzyzx (pronounced Zye-zix), this oasis is home to the California State University Desert Studies Center. The buildings and pond were developed in the 1940s by Curtis Springer, who operated a health resort at the site. Zzyzx is open to the public—stroll around Lake Tuendae and along the shore of Soda Dry Lake. Please do not disturb participants when classes are in session.

Nipton, Ivanpah & Lanfair Roads
Eleven miles south of Primm, Nev., Nipton Road begins at I-15 and passes through Nipton, Calif., 11 miles east. Ivanpah Road (only the 10 northernmost miles paved) heads southeast of Nipton Road, through the Ivanpah and Lanfair valleys, eventually connecting with the paved Lanfair Road and the Fenner Valley. Together stretching 46 miles, Ivanpah and Lanfair Roads connect the northern preserve boundary (bordering Nipton Road) with the southern near Goffs, Calif.

Hole-in-the-Wall
Private-operated hotel, store, & campground. For info, call 760-856-2335 or email at stay@nipton.com.
Built in 1910, this charming hotel reflects the railroad, ranching, and mining history of the small community at Nipton.

Caruthers Canyon
Primitive camping, hiking, no signs or services.
About 9.5 miles west of Ivanpah Road on New York Mountains Road, then 2.7 miles north on an unsigned road, Caruthers Canyon is located in the rugged New York Mountains. Surrounded by mountains rising over 7,500 feet, a botanic “island” of chaparral plants remains from wetter times of the past. High clearance and four-wheel drive recommended.

Sand & Mud Driving Tips
• Be sure to carry plenty of drinking water and emergency supplies.
• Engage four-wheel drive before entering deep sand or mud.
• Don’t gun the engine—this will spin the tires, dig you deeper, and could bury your vehicle to the frame. Smooth, easy power is better than too much power, use low gearing, and just enough throttle to maintain forward movement.
• If you detect a loss of traction, turn the steering wheel rapidly from side-to-side—this might help to generate traction.
• If your vehicle gets stuck, place solid materials (such as floor mats) under the tires to provide traction.
• If you’re really stuck, it’s best to stay with your vehicle. A stationary, stranded vehicle is much easier to locate than a person traveling on foot. Avoid strenuous activity during the heat of the day; stay in the shade of your vehicle.

Launf Valley
No signs or services.
South of the New York Mountains along Ivanpah and Lanfair roads, this high valley shelters an impressive Joshua tree forest and was an early ranching and homesteading center. From 1893 until 1923, the Nevada Southern Railway ran up the valley from Goffs, providing services to homesteaders and ranchers in the valley and to miners in the mountains beyond. While little evidence remains of homesteads that once dotted the valley, tracts of private property still exist. Please respect the rights of landowners.

Dirt Road Driving
Prepare Your Vehicle
Ensure that your vehicle is in good condition: check tires, oil, and gas gauge.
For emergencies, carry tools, tire jack, tow rope, extra water, and fluids for your vehicle.

Know the Rules of the Road
All vehicles operating within Mojave National Preserve must be street-legal in accordance with California DMV requirements, including current registration and tags, lights and turn signals, and valid insurance. California “Green Sticker” and “Red Sticker” programs are not recognized within the preserve.
The off-pavement travel is allowed only on existing, open dirt roads. Do not travel cross-country or create new roads. This rule is strictly enforced; violators will receive citations. Driving in washes is not permitted. Watch for and respect Wildelands Boundary signs; motorized vehicles and bicycles are not allowed in designated Wilderness Areas.

Check Road Conditions
Road conditions vary widely. Dirt roads might be rough, sandy, or muddy, rendering them impassable and the unpaved motorist could be trapped many miles from help. Watch for cattle, burros, and other wildlife on roadways.

Not all roads are shown on all maps; traces and illegal shortcuts add to the confusion. Carry a good map, and ask a park ranger for current road conditions.

Preparing Your Vehicle
• Carry tools, a tire jack, water, and fluids for your vehicle.
• High clearance and four-wheel drive are recommended.
• Tires on your vehicle must be in good condition, and the correct size for the vehicle.
• Check the pressure in your tires. High pressure reduces traction. Low pressure makes the vehicle harder to control.
• Check the lights on your vehicle. Be sure they are working properly.
• Check the condition of your vehicle’s gas tank. To avoid flames, never refuel your vehicle in the preserve.

Driving Tips
• If you're really stuck, it’s best to stay with your vehicle. A stationary, stranded vehicle is much easier to locate than a person traveling on foot. Avoid strenuous activity during the heat of the day; stay in the shade of your vehicle.
• If you need a hand to help you move, ask another vehicle operator for assistance.
• If you see broken glass, a fallen tree, or a hole in the road, pull over to the side of the road and let others pass.
• If you come across a lost or injured animal, call a ranger at 760-856-2335 for assistance.

Directions to the Preserve
• Take Street 15 to I-15 and south to the Nevada state line.
• Take the Prim Road exit to the interesting mining ghost town of Prim. To continue south, take CA-178 south to CA-95. From CA-178, take CA-95 east to the Nevada state line.

Special Rules
• Stay on designated roads.
• No overnight parking.
• No camping.
• No pets allowed.

Tips for Driving
• Be prepared for all possible weather conditions.
• Be patient.
• Be courteous.
• Be alert.

Mojave National Preserve 3
New Books on History

**Phillip Gomez, Park Ranger**

The bookstore at the Kelso Depot Visitor Center has added two new titles focusing on the transcontinental railroads—the nation’s first rail systems to traverse the West, from the Great Plains to the Pacific Coast.

**Mojave National Preserve encompasses sandy, rugged terrain bisected by the Union Pacific, and traversed along its southern boundary by the Burlington Northern-Santa Fe (BNSF), the successor railroad to the Atchison, Topeka and Santa Fe. Historian and attorney Walter R. Borneman presents a dazzling account of how the western railroads got built in the aftermath of the Civil War. With the linkage of the Union Pacific and Central Pacific at Promontory Summit, Utah, in 1869, other railroads began engineering and laying a network of rails across the West. (The National Park Service commemorates the meeting of the two initial railroads at Golden Spike National Historic Site in north-central Utah.)

But Borneman pays particular attention to the ancestors of the red and yellow diesels seen today alongside old Route 66. Beginning in the 1860s as a small railroad in the Kansas Territory called the Leavenworth Pawnee & Western, it emerged toward the end of the 19th century as the Atchison, Topeka & Santa Fe. Its rails then linked Lake Superior with the Gulf of Mexico and the Missouri River with the West Coast. The southern route from Chicago to Los Angeles was the most famous route, passing as it did through the heart of the scenic Southwest, including the Mojave Desert. This route became, in Borneman’s words, “the most significant of the nation’s transcontinental railroads.”

The “race” in the book’s title was the rivalry among capitalists to be first to build across the desert Southwest on the most direct, most snow-free line, with tracks over the easiest grades to tidal waters on the Pacific Coast.

Still working as a conductor on U.P. freight trains, DeVoge recently stepped off a train briefly stopped at the depot to come inside and show a co-worker around his old haunts. Just as DeVoge Jr’s father once plodded to school on his horse and his grandfather swept the dust from his store, “living history” still haunts this desert oasis.

FOR THREE YEARS GLENN DEVOLVE’S FATHER, 86, ALSO

named Glenn, went to school at the “one-room” Kelso schoolhouse along the north side of Kelso-Cima Road, half a mile from the Kelso Depot Visitor Center.

That was during the Great Depression. He lived in a boarding house on the north side of the Union Pacific Railroad tracks and would ride a horse to school, his son said during a recent visit to the depot. Tiny Kelso, then and now, is a company town, owned by the Union Pacific Railroad—the corporate behemoth born during the Civil War with the word “Union” reflecting half its birth certificate.

For the past year or so, the National Park Service has been restoring the Kelso schoolhouse, which was shut down a half-century ago. But instead of school kids getting an education, park visitors will learn about what it was like to attend school on this 20th-century frontier in the Mojave Desert.

The Park Service financed the $24,000 restoration project from special project funding for maintaining historic structures said Linda Slater, Chief, Resource Interpretation. “Our goal is to staff the building with a park volunteer and allow people inside,” Slater said. She indicated that visiting school groups may soon get their “lessons” in the old schoolhouse taught by “living history” rangers presenting special programs.

However, the schoolhouse interior needs to be decorated and furnished appropriately to make it authentic. Before opening it on a permanent basis, the National Park Service will prepare a historic furnishings plan detailing how the schoolhouse would have looked during the 1940s when the population of Kelso was at its peak. In the meantime, park staff will allow access to the schoolhouse as circumstances afford.

Other old ruined buildings seen along Kelso-Cima Road are located on private property and are ineligible for restoration using public funds. The schoolhouse is the exception, it’s publicly owned, part of the preserve, and part of Kelso’s humble story connecting the community to the more grandiose Spanish Revival-style train depot.

President Abraham Lincoln, whose picture hung in many a classroom, spoke in the First Inaugural Address of the “mystic chords of memory” that united long-passed Americans with present generations. At places like Kelso, those chords are still strong, hardly frayed at all. Glenn DeVoge’s grandfather worked as the foreman of the Walking Box Ranch near Searchlight before running a general store on Kelso’s south side, where most residents live today. DeVoge’s father, after his schooling at Kelso, worked for the U.P. for 42 years, though not on the Kelso-Yermo line. Glenn DeVoge Jr. used to sleep in one of the upstairs rooms at the depot “clubhouse,” as it was then called, and took his meals at the Beany’s. That was in the early 1980s, shortly before the restaurant closed for business in 1985.

Looking Back

**Books and More!**

**Phillip Gomez, Park Ranger**

Western National Parks Association (WNPA) is one of at least 64 associations that work in partnership with the National Park Service to support park programs and to assist park visitors in making connections with the special places they come to experience.

Since 1936, Congress has recognized cooperating associations for supporting the Park Service in its educational and preservation goals, accomplished through bookstore sales, membership support, book and publication development, research funding, and special events.

WNPA donates a percentage of the revenue gained from sales, more than $4 million annually to 66 park affiliates. The association also operates an online store, at www.wnpa.org with more than 600 educational and inspirational products and publications that make park visits more meaningful and memorable.

The association has, as one of its founding goals, the publication of park-related information not readily available elsewhere.

Currently, more than 175 books have been published and kept in print, with many new publications introduced annually. Since its founding, WNPA has contributed $55 million to the parks.

Stop by the WNPA bookstores at Kelso and the Hole-in-the-Wall Visitor Centers and check out the wide array of books on geology, history, and ecology as well as other items available for purchase. Your purchases help parks by generating revenue for interpretative programs, educational outreach, and park research.

The visitor center has added two new titles focusing on the transcontinental railroads—the nation’s first rail systems to traverse the West, from the Great Plains to the Pacific Coast. The southern route from Chicago to Los Angeles was the most famous route, passing as it did through the heart of the scenic Southwest, including the Mojave Desert. This route became, in Borneman’s words, “the most significant of the nation’s transcontinental railroads.”

The “race” in the book’s title was the rivalry among capitalists to be first to build across the desert Southwest on the most direct, most snow-free line, with tracks over the easiest grades to tidal waters on the Pacific Coast.

Beware: The Male Tarantulas are Coming!

By Neal Darby, Wildlife Biologist

STARTING EVERY SEPTEMBER, the tarantulas crawl out of holes and crevasses scattered across the desert floor. They come out in force, just in time to add to your Halloween fright. They crawl across the Mojave searching for one thing, nothing impedes their search. On mountains and across valleys they search for fresh blood...well, actually, they search for female tarantulas.

Biologists recognize more than 800 different species of tarantulas worldwide. They are found everywhere except the Arctic and Antarctica. As the world’s largest spiders, some species grow over a foot long. Local Mojave tarantulas rarely get much larger than five inches. Their large size, large fangs or fangs, intimidating defense posture, and the fact that they are hairy has made them staples in Halloween horrors and nightmares. In reality, tarantulas are very docile and are even kept as pets.

Like most animals, however, they will defend themselves by biting, and the bites can leave a painful wound, much like a bee sting. North American species are famous for throwing urticating, or stinging hairs, found on the tarantula’s abdomen.

When threatened, the tarantula breaks the hairs from its body and kicks them towards the threat. It is even more painful if the hairs embed in the eyes or mucous membranes of the mouth and nose. The reaction to the stinging hairs depends on your sensitivity. Tarantulas are venomous, but not deadly.

Throughout the world, there has never been a confirmed human fatality from a tarantula bite or from contact with stinging hairs. Hydrocortisone cream can help relieve symptoms from an encounter with a tarantula.

You’ll rarely see tarantulas in the wild, as they spend almost all their time in burrows. At night they sit at burrow entrances or wander and wilderness ethics. Parents are encouraged to attend, but cannot hunt.

This year’s youth hunt will be held October 29 through October 30 at the Black Canyon Group and Equestrian Campground. Breakfast and dinner will be provided on Saturday. The event is limited to the first 25 participants who register. Late registrants will be placed on a waiting list. For more information or to register, contact Neal Darby, wildlife biologist for Mojave National Preserve at (760) 252-6146.

Hunting has long been part of the American culture and heritage. Mojave National Preserve is one of 69 national parklands in which hunting is permitted. In an effort to connect youth and families to their public lands, Mojave National Preserve, in cooperation with the California Department of Fish and Game Commission, Safari Club International, and others, is hosting the second annual Youth Quail and Chukar Hunt. Last year, seventeen young hunters bagged a total of two chukar and twenty-four Gambel’s quail.

The event is open to anyone 18 and younger who has successfully completed a hunter safety class and has the necessary licenses. An experienced hunter will act as a mentor and guide while young people pursue these elusive game birds. Participants will enjoy talks on the Mojave Desert, as well as lessons on gun, and backcountry safety. Experienced sportmen will talk about Mojave game birds, proper field and dressing techniques, and hunting and wilderness ethics. Parents are encouraged to attend, but cannot hunt.

This year’s youth hunt will be held October 29 through October 30 at the Black Canyon Group and Equestrian Campground. Breakfast and dinner will be provided on Saturday. The event is limited to the first 25 participants who register. Late registrants will be placed on a waiting list. For more information or to register, contact Neal Darby, wildlife biologist for Mojave National Preserve at (760) 252-6146.

Half a century before Howard Johnson forged a franchised chain of quality restaurants along the East Coast in the early 1930s, Fred Harvey was the household name in food service and lodging across the South West. But Harvey’s vast organization of “eating houses” and lodges was laid out before the advent of our car culture; the Fred Harvey Company contracted with the Santa Fe Railroad to provide rail passengers with its trademark customer service. “Harvey Girls” in black and white waitress garb served train passengers elegant meals with English silverware and fine Irish linens; Harvey and his audacious dining rooms established the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s, the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s, the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s, the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s, the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s, the first national chain of lunchrooms, hotels, gift and curio shops—before McDonald’s.

Mike Williams, manager of the Kelso Roanery, reads "Appetite for America: The Union Pacific, which built the Kelso Depot in 1924, was in fierce competition with Santa Fe's Harvey Houses.

Read all about it!

Rival Rails: The Race to Build America’s Greatest Transcontinental Railroad by Walter R. Bonsen
Hardcover at $28.00

Appetite for America: Fred Harvey and the Business of Civilizing the Wild West by Stephen Fried
Paperback at $18.00

The threat of being eaten by their female mate and their constant wandering equates to a short life for male tarantulas. Seven years is considered old for a male tarantula in the wild. The females, however, can live up to 35 years and longer.

Under the appropriate conditions, these arachnids that make an appearance in the fall can, sometimes, come out en masse, numbering in the thousands. Even in the lean years, the odds are good that you will spot a male tarantula from September through November along the preserve roads.

Unfortunately, roads and tarantulas don’t mix. Hundreds of tarantulas are killed every year by motorists, making it more difficult for the biologists to protect and conserve them. There are no easy solutions, but slowing down below posted speed limits and avoiding driving over objects in the road can give male tarantulas and other wildlife a better chance of not getting struck by a vehicle.

Male tarantulas and other wildlife can’t always adapt to human activities. Give ‘em a brake!

A blister beetle munches on wild heliotrope.
Backcountry Guidelines & Regulations

Backcountry camping—backpacking, roadside camping, and horsepacking—requires careful planning in order to ensure a safe and rewarding experience. Visitors should adhere to National Park Service regulations and are further encouraged to follow Leave No Trace guidelines to minimize their impact on the fragile desert environment.

Leave No Trace information is rooted in scientific studies and common sense. The message is framed under seven Leave No Trace Principles presented below with accompanying regulations and guidelines specific to Mojave National Preserve:

1. Plan Ahead and Prepare
   • There is no permit or registration system for backcountry camping at Mojave National Preserve; be sure to notify others of your travel itinerary.
   • Few established trails exist; carry a good map and familiarize yourself with desert travel and survival skills before beginning your trip.

2. Travel and Camp on Durable Surfaces
   • Reuse existing campsites (required for roadside camping—see below).
   • Do not camp in a dry wash—flash floods develop quickly in the desert.
   • Campsites must be more than 200 yards from any water source.
   • Camp is not permitted: within 1/4 mile of any paved road; within 1/2 mile of Fort Piute or Kelso Depot; within 1 mile north (i.e., the crest of the dunes) or 1/4 mile south of the Kelso Dunes access road.
   - Disturbing, defacing, or collecting plants, animals, rocks, and historic or archaeological objects is prohibited. As part of our national heritage, these resources should be left as they are found for all to enjoy. Metal detectors are not allowed.

3. Dispose of Waste Properly
   • Store all food and garbage in a manner that will prevent access by wildlife. Carry plastic bags and pack out all trash.
   • Bury human waste in catholes 6-8 inches deep, at least 200 feet from water, camp, and trails. Pack out all toilet paper and hygiene products.

4. Leave What You Find
   • Disturbing, defacing, or collecting plants, animals, rocks, and historic or archaeological objects is prohibited. As part of our national heritage, these resources should be left as they are found for all to enjoy. Metal detectors are not allowed.

5. Minimize Campfire Impacts
   • Campfires are allowed in established fire rings only, or with use of a portable firepan (be sure to pack out ashes). Do not make camp in a dry wash—flash floods develop quickly in the desert.
   • Camp is not permitted: within 1/4 mile of any paved road; within 1/2 mile of Fort Piute or Kelso Depot; within 1 mile north (i.e., the crest of the dunes) or 1/4 mile south of the Kelso Dunes access road.

6. Respect Wildlife

7. Be Considerate of Other Visitors

Roadside camping and hiking opportunities abound at the 1.6 million acre Mojave National Preserve. If you visit in the spring, you may see Joshua trees in bloom.

Nearby Camping Areas

Afton Canyon
25 miles southwest of Baker on I-15, has a BLM campground with tables and fire rings for $6 per night.
- Commercial camping is also available at Baker, Barstow, Needles, and Hesperia, Calif.

Near Kelbaker Road:
Rainy Day Mine Site
- 15.2 miles southeast of Baker on Kelbaker Road, then 0.3 miles northeast on the unsigned and very sandy road to the Rainy Day Mine. Four-wheel drive recommended; no RVs.
- Granite Pass
- 6.1 miles north of I-15 on Kelbaker Road, just north of Granite Pass, then west on one of several access roads. Campsites are located just north of the granite spires. High clearance vehicle recommended; no RVs.
Kelso Dunes Mine
- 4 miles west of Kelbaker Road on the unpaved Kelso Dunes Road. One campsite is located south of the road, 1/2 mile past the marked trailhead. Several others are available 1/2 mile beyond, near a dump of trees. Except at these sites, roadside camping is prohibited along Kelso Dunes Road (including at the trailhead).

Near Cima Road:
Sunrise Rock
12 miles south of I-15 on the east side of Cima Road. Trailhead for Tootomba Peak Trail is nearby on the opposite side of Cima Road.

Near Black Canyon Road:
Black Canyon Road
5.2 miles south of Hole-in-the-Wall Information Center on the east side of Black Canyon Road, near rock piles.

Near Ivanpah and Cedar Canyon Roads:
Caruthers Canyon
5.5 miles west of Ivanpah Road on New York Mountains Road, then 1.5 to 2.7 miles north to campsite. High clearance and four-wheel drive recommended; no RVs.

Campgrounds

Hole-in-the-Wall Campground
Facilities: vault toilets, trash receptacles, potable water, fire rings, picnic tables, dump station; no utility hookups.
- Fees: $12 per site per night. $6 for America the Beautiful Senior Access Pass holders.
- Reservations: not accepted; campsites available on a first-come, first-served basis.
- At 4,400 feet in elevation, Hole-in-the-Wall Campground is surrounded by sculptured volcanic rock walls and makes a great basecamp for hikers (see p.7) and for exploring nearby Mitchell Caverns in the Providence Mountains State Recreation Area. Thirty-five campfires accommodate RVs and tents; two walk-in sites are also available.

Mid Hills Campground
Facilities: vault toilets, trash receptacles, potable water, fire rings, picnic tables; no dump station or utility hookups.
- Fees: $12 per site per night. $6 for America the Beautiful Senior Access Pass holders.
- Reservations: not accepted; campsites available on a first-come, first-served basis.
- The Hackberry Fire swept through the Mid Hills area in June 2005, burning much of the vegetation. About half of the 26 campfires were left unharmed, however—they remain surrounded by prairie pine and juniper trees. At 5,600 feet in elevation, Mid Hills is much cooler than the desert floor below. The access road is unpaved and is not recommended for motorhomes or trailers.

Black Canyon Equestrian & Group Campground
Facilities: corrals, vault toilets, trash receptacles, potable water, fire ring, grill, picnic shelter with tables.
- Fees: $25 per group per night.
- Reservations: required; call 760 928-2572 or 760 252-6104
- Located across the road from Hole-in-the-Wall Information Center. Horses and riders are welcome at Mojave National Preserve! Permits required for large groups (see p.2 for permit information).
Hikers at Mojave National Preserve can enjoy a variety of challenges, with sweeping views, solitude, and nearly 800,000 acres of designated Wilderness.

Although there are few established hiking trails in Mojave National Preserve, abandoned dirt roads, washes, and ridge lines offer an abundance of cross-country hiking opportunities. Numbers on map show general locations of trails and routes listed below.

All trails and routes listed below are shown on the National Geographic Trails Illustrated topographic map for Mojave National Preserve. This and other maps are available for purchase at the Kelso Depot Visitor Center and the Hole-in-the-Wall Information Center.

**Developed Trails**

1) Lake Tuendae Nature Trail
Trailhead: Zzyzx parking area, 5 miles south of I-15 on Zzyzx Road. Enjoy an easy, self-guided, 1½-mile stroll around Lake Tuendae. Wayside exhibits along the trail reveal the rich cultural and natural history of this oasis on the preserve’s western boundary.

2) Sutontia Peak Trail
Trailhead: 12 miles south of I-15, or 5 miles north of Cima, Calif. on Cima Road. Explore the world’s densest Joshua tree forest en route to a rocky peak with expansive views of Cima Dome and beyond. 4 miles round-trip.

3) Hole-in-the-Wall Nature Trail
Trailhead: Hole-in-the-Wall Information Center and Campground, 20 miles north of I-40 on Essex and Black Canyon roads. Learn to identify desert plants on this easy, ½-mile round-trip hike. Trailheads at Hole-in-the-Wall Information Center and Campground.

4) Rings Loop Trail
Trailhead: Hole-in-the-Wall Information Center parking area, 20 miles north of I-40 on Essex and Black Canyon roads. Discover how Hole-in-the-Wall got its name as you ascend through narrow Banshee Canyon with the help of metal rings mounted in the rock. The 1½-mile round-trip hike connects to the Mid Hills to Hole-in-the-Wall Trail (see below).

5) Mid Hills to Hole-in-the-Wall Trail
Trailheads: Entrance to Mid Hills Campground, and about 1 mile west of Black Canyon Road on the south end of Wild Horse Canyon Road. Hike 8 miles, one-way, through a maze of washes decorated with barrel and cholla cacti, then through the Hackberry Fire burned area. Total elevation gain is 1,200 feet. Watch carefully for trail route markers.

6) Barber Peak Loop Trail
Trailhead: Parking area for walk-in tent sites at Hole-in-the-Wall Campground. The preserve’s newest trail, this 6-mile loop encircles Barber Peak just west of Hole-in-the-Wall Campground, passes the Opaque Cliffs, and returns to Hole-in-the-Wall via Banshee Canyon.

**Recommended Routes**

Warning: the routes described below are not established trails; trailheads might be unidentifiable or nonexistent. Check a detailed map and consult a park ranger for route information. Maps and guidebooks are available at information centers.

7) Kelso Dunes
Start: 3 miles west of Kelbaker Road on the well-graded, but unpaved Kelso Dunes Road. Hikers at sunrise and sunset are treated to both cooler temperatures and the rose-colored glow of the dunes. The roughly 3-mile round-trip hike might take several hours as you slog through the sand, then slide down the slopes.

8) Quail Basin
Start: 12.5 miles north of I-40 on Kelbaker Road, then 1 mile east on an unmarked dirt road. Park at junction with closed dirt road hounding south. High clearance and four-wheel drive recommended. Follow the route to the south to a road that loops around a small valley. After walking the loop, return via the same route. The 6.5-mile round-trip route leads past jumbled rocks into a small valley of Mojave yucca and juniper sur-rounded by granite outcroppings.

9) Keystone Canyon
Start: 18 miles south of Nipton Road on Kanipah Road, then 2.5 miles west on an unmarked dirt road. Bear left at the first fork, right at the second, then continue to a parking area. Four-wheel drive recommended. Hike the deteriorating closed road into Keystone Canyon, ascending the New York Mountains. Continue cross-country to the top of the ridge for spectacular views. Hike is 3 miles one-way.

10) Caruthers Canyon
Start: Primitive campsites in Caruthers Canyon, 5.5 miles west of Kanipah Road on New York Mountains Road, then 2.7 miles north on unsigned road. High clearance and four-wheel drive recommended. Hike 3 miles one-way through a rocky basin to an abandoned gold-mining area. Do not enter mine shafts or climb on abandoned structures; they are unstable and extremely dangerous.

11) Castle Peaks Corridor
Start: 4.9 miles east of Kanipah Road on signed Hart Mine Road; left at fork, then 0.9 miles, left at fork, then 3.4 miles, crossing an earthen berm; left at fork, then 1 mile more to where road ends. High clearance and four-wheel drive recommended. For excellent views of the Castle Peak spires, walk 4 miles one-way up the closed road to the ridgtop and beyond into a small canyon.

12) Plute Creek
Start: 9.5 miles east of the junction of Landar Valley and Cedar Canyon roads on a dirt utility road, then 0.5 miles north. High clearance and four-wheel drive recommended. Hike 6.5 miles round-trip through colorful Flute Gorge and explore the ruins of Fort Flute, built and manned in the 1860s to protect mail and travelers on the Mojave Road. A perennial stream near the fort, rare in the Mojave, supports riparian plants and animals. Return to your vehicle via an unused trace of the Mojave Road.

Visitors to Mojave's Hole-in-the-Wall Campground often include a tour of Mitchell Caverns as part of their activities… but no more. State budget problems have forced the shutdown of this beloved desert attraction.

In the future of Mitchell Caverns remains uncertain. Mitchell Caverns was initially developed as a privately operated tourist attraction by Jack and Isla Mitchell in the early 1930s. Jack Mitchell died in 1954, and his family turned the property over to the state. Two years later, in 1956 it was added to the California State Park system.

Over the years, California State Parks has made many improvements to the caverns, including the development of a safe pathway through the caverns, a tunnel connecting the two principal caves, and installation of a lighting system. However, the caverns' remote location and lack of connection to the electrical grid have contributed to the difficulties in its operation and maintenance. With continuing weakness in the economy and ongoing fiscal issues for California State Parks, the future of Mitchell Caverns remains uncertain.

Visitors to the Hole-in-the-Wall Information Center and Campground are home to Mitchell Caverns, a California State Park located within the boundaries of Mojave National Preserve. State park officials shut down operations in January 2011. State officials decided to close the park when employee retirements coincided with problems in the functioning of the water system.
