Paradise Inn—100 Years of History

Paradise Inn opened for business in 1917, providing an alternative to the rugged tent camps that existed at the time. Under the watchful eye of the National Park Service’s first director, Steven Mather, the Inn was to be a model for other parks. Mather challenged local business leaders to cooperate in the creation of the Inn. Those local leaders formed a new concession, the Rainier National Park Company. They built Paradise Inn in just under a year and with little more than $90,000.

As you walk through the Inn, notice the massive network of Alaskan yellow cedar beams above your head. Architects from the Tacoma firm of Heath, Grove, and Bell used timber from the park in their design. They salvaged cedar trees just below Narada Falls from Silver Forest, which was damaged by fire in 1885. The wood for the historic tables and chairs seen throughout the Inn also came from Silver Forest. Carpenter Hans Francke used the same salvaged cedar to hand-hew the clock and the piano.

Why would the National Park Service cut down trees for the sake of a tourist hotel? It’s hard to imagine such a thing happening in our time. Today, we understand how vital standing dead trees are to the environment as potential habitat for forest wildlife. To today’s eyes, it seems anachronistic to cut down a living tree to build a new concession, the Rainier National Park Company. They built Paradise Inn in just under a year and with little more than $90,000.

Please stop by to celebrate 100 years of history.

The Return of the Pacific Fisher

The fisher is a small, reclusive predator of the weasel family that thrives in mature forests. Along with wolves, wolverines, and lynx, fishers were eliminated from Mount Rainier early in the last century. Historically a common species in Washington, fishers were over-trapped for their highly valuable fur. Even after decades of absence from the ecosystem, fisher habitat and their prey-base remains intact and abundant, making them exceptional candidates for a population restoration project.

In the first phase of this state-wide restoration project, 90 fishers were released on the Olympic Peninsula in 2015. Historically a common species in Washington, fishers were over-trapped for their highly valuable fur. Even after decades of absence from the ecosystem, fisher habitat and their prey-base remains intact and abundant, making them exceptional candidates for a population restoration project.

Rehabilitating the Paradise Inn Annex

The Paradise Inn is the largest lodging facility located within Mount Rainier National Park. It was built using massive timbers and glacial boulders to blend the building with its natural surroundings and, therefore, the building is a contributing feature to the park’s National Historic Landmark District designation.

Beginning July 24, 2017, the Inn’s Annex will undergo renovation through the remainder of the summer season. The Inn will remain open through the summer season including overnight lodging at a reduced capacity, and access to the lobby, food services, gift shop, and evening ranger-led programs. Visitor parking will be reduced in the Paradise area throughout the construction period for contractor staging and safe access to the construction site. All traditional Paradise area services, activities, facilities, and trails are available and not affected by the renovation project.

During renovation character defining features of the building exterior will be rehabilitated, including the use of the existing Annex foundation stones as a veneer to replicate the historic appearance of the building. Interior improvements include energy efficiency upgrades, sound dampening between guest rooms, new finishes and details that are historically compatible, and fire, life, and safety system updates.

The rehabilitation will correct deficiencies, resulting in a structure that is safe, stable, and serves visitors better.

The Paradise Inn is the largest lodging facility located within Mount Rainier National Park. It was built using massive timbers and glacial boulders to blend the building with its natural surroundings and, therefore, the building is a contributing feature to the park’s National Historic Landmark District designation.

Construction Zone Safety

Paving operations are currently underway in the park. For your safety and the safety of crews, stay behind pilot cars and do not cross over construction areas or hot pavement to reach trailheads, viewpoints, etc. See page 8 for more on road work.
The Many Sides of Mount Rainier

At 14,410 feet high, Mount Rainier is the tallest peak in the Cascade Range and an icon of the Pacific Northwest. While the mountain’s well-known profile is visible for many miles in any direction, its alpine, glacier-clad slopes occupy only a third of Mount Rainier National Park. There are as many different sides of the park as there are views of Mount Rainier. Take the time to explore the other two-thirds of the park, and discover what lies within the shadow of the great mountain that local Native Americans call “Tahoma.”

Northwest Side: Carbon River and Mowich Lake
Located on the “quiet side” of the park, the Carbon River valley showcases ancient forests, deep valleys and waterfalls, and a dynamic, flood-prone river that flows from the Carbon Glacier, the lowest-elevation glacier in the continental U.S. Or follow State Route 165 to Mowich Lake, the park’s largest and deepest lake. Look for colorful subalpine wildflowers along its shores. From the picnic area at road’s end, trails lead to subalpine lakes, flower-strewn meadows, and amazing views of the park’s wilderness from the Tolmie Peak fire lookout.

Southwest Side: Longmire
Deep in the valley of the Nisqually River, the village of Longmire preserves the history of the park’s first settlement and headquarters. The Longmire Museum is the starting point for the self-guided walking tour of the Longmire Historic District, where you can get a taste of early National Park Service rustic architecture. Follow the Trail of the Shadows to learn about the park’s first homestead and resort, next to Longmire Meadow’s mineral springs. Between Longmire and Nisqually Entrance, walk the Twin Firs Trail to view lowland old-growth forest; picnic at Kautz Creek where you can view the aftermath of the 1947 mudflow; or drive to the end of the Westside Road to see the dramatic results of flooding and rockfall. Many of the pullouts between Longmire and Paradise have great views of lava layers, glaciers, and deep glacial canyons.

South Side: Paradise
The Jackson Visitor Center and historic Paradise Inn are the hubs of activity at the most popular (and crowded) destination in the park. A network of hiking trails provides access to outstanding wildflower meadows, broad views of Mount Rainier and its glaciers, and routes for skilled climbers attempting to reach the mountain’s summit. Photographers appreciate the high-country scenery at Inspiration Point and Reflection Lakes. Hikers looking for less-crowded trails might try the Lakes Trail, Mazama Ridge, and Snow Lake Trail, located just east of Paradise.

Parking In Paradise

If you are visiting Paradise on a nice day be prepared for heavy traffic, busy parking lots, and pedestrians on the roadway. Due to the popularity of the Paradise area, you are asked to park your vehicle in certain lots depending on the intent of your visit and the type of vehicle you are driving. Please drive courteously and help improve traffic flow by following these guidelines:

• Parking in the upper Paradise lot, adjacent to the Jackson Visitor Center, is intended for short-term visitors and is limited to two hours. This lot is generally full by 11:00 am. Disabled visitors with a valid disabled parking permit may park in the upper lot with no time restriction; disabled-accessible trailheads are available near the visitor center and the Paradise Inn. Paradise Inn overnight guests may also park in the upper lot during their stay.

• Parking can be difficult to find on sunny summer weekends at Paradise, Sunrise, Grove of the Patriarchs, and at trailheads between Longmire and Paradise. To avoid congestion, visit these areas on weekdays, arrive early, and carpool.

• Parking in the lower Paradise lot is intended for visitors staying longer than two hours, for those hiking in the Paradise area, and for backcountry campers and climbers with a valid backcountry permit. When the upper Paradise lot is full, short-term visitors may also use the lower lot.

• Additional parking for long-term and overnight visitors is available along the one-way Paradise Valley Road, east of the upper Paradise lot.

Park roads are winding, road shoulders are narrow, and the speed limit is 35 mph in most areas. Watch for pedestrians, sightseers, bicyclists, and wildlife. Please be courteous and use pullouts to allow faster drivers to pass you safely.

• Motorhomes, RVs, and vehicles towing trailers must park along the Paradise Valley Road, east of the upper Paradise lot.

• Plan for road construction delays up to 30 minutes each way between Longmire and Paradise.

Enjoy hiking among ancient trees and past numerous waterfalls on the Eastside Trail.

Take an easy hike to spectacular Silver Falls near Ohanapeosh Campground.

Walk across Longmire’s historic wooden suspension bridge.

Emergency: Dial 911 from any phone located in the park.
Follow these simple guidelines to avoid becoming a victim of future car break-ins.

- Do not leave any valuables in your vehicle, even for a short time.
- Do not leave bags, packs, or purses, that look like they could contain valuable items in your vehicle.
- If storing items in the trunk of your car, do so before arriving at your destination. You could be watched at trailheads and parking lots.
- Immediately report all suspicious activity you observe at or around parking lots or along roads to a park ranger.

Fishing & Boating
A license is not required for fishing. Some lakes and streams are closed to fishing and Ohanapecosh River is fly fishing only. Check at a visitor center for more information.

Motorized boating is prohibited in the park. No-motorized boating is permitted on all lakes except Frozen, Reflection, Ghost, Shadow, and Tipsoo lakes.

Fires in the Park
Make fires only in a fire grill. Collecting firewood is prohibited. See page 8 for firewood sales in the park.

Pets and Service Animals
Leashed pets are permitted only in picnic areas, campgrounds, and parking lots and on roads currently open to public vehicles. During hot weather do not leave pets in vehicles.

Don’t Be A Victim!
Burglaries have recently occurred at numerous trailheads and parking areas in the park. Those responsible for the crimes were investigated, arrested by Mount Rainier rangers and National Park Service special agents, and convicted in court. However, these convictions will not necessarily end the problem of car burglaries in the park.

Keep Wildlife Wild
- Please do not feed the wildlife.
- Store your food in an animal-proof container or inside your car.
- Do not leave food, beverages, pet food, or toiletries unattended for any length of time.
- Clean up picnic areas after you eat.

Human food puts animals at risk and some die as a result. For example birds, like jays or ravens are effective nest predators—eating the eggs or young of other birds. By feeding jays or ravens, visitors contribute to the death of songbirds in the same area. Feeding wildlife harms them in many ways. Beggar squirrels, foxes, deer, and jays learn to approach people and busy areas. They often get hit and killed by cars. Animals that become accustomed to humans and human food may also pursue and injure visitors. Biologists and rangers must intervene, with killing the animal as the last resort.

If you are near a river and notice a rapid rise in water level, feel a prolonged shaking of the ground, and/ or hear a roaring sound coming from underground—often described as the sound made by a fast-moving freight train— move quickly to higher ground—200 feet above river level should be safe.

Detailed information is available at park visitor centers or from scientists at the U.S.G.S. Cascades Volcano Observatory, 1300 SE Cardinal Court, Building 10, Suite 100, Vancouver, WA 98661, vulcan.wr.usgs.gov.

Firewood: Buy It Where You Burn It
Forest fires from the transportation of invasive insects and diseases in firewood. New infestations of tree-killing insects and diseases often are first found in campgrounds and parks.

Buy firewood near where you will burn it—that means the wood was likely cut within 50 miles of where you will have your fire. Never bring wood from home, even if you think the firewood looks fine. Aged or seasoned wood is still not safe.

More information is available online at www.dontmovefirewood.org.

Mount Rainier National Park
Established in 1899 to preserve the natural and cultural resources of this area and to provide for public benefit and enjoyment. This information will help you learn more about the park, and protect yourself and the park.

Accessibility
Most restrooms, visitor centers, picnic areas, amphitheaters, and designated campsites are accessible or accessible with help by wheelchair. Accessible lodging is available inside the park and in local communities.

The park brochure is available in braille at visitor centers and entrance stations.

At the Sunrise and Paradise visitor centers, the audiovisual programs are captioned; audio described tours of the exhibits are available; and the exhibits are accessible by wheelchair. Additionally, assistive listening devices are available for the park film at the Paradise Visitor Center.

The Kautz Creek Boardwalk Nature Trail is accessible in summer. An accessible trail leads to the base of Paradise Meadows; a portion of the trail is accessible to those who use wheelchairs.

Bikes in the Park
Bicycle only on roads, not on trails. Mountain bikes are permitted on Westside Road and the Carbon River Road, but not on trails.

You Can Make A Difference at Mount Rainier

By Laurie B. Ward, Washington’s National Park Fund Executive Director

Do you love national parks? Would you like to give back to make them stronger?

Washington’s National Park Fund serves as the park’s official philanthropic partner. The Fund, a 501(c)(3) nonprofit organization, accepts charitable gifts that are then given to the park for projects focusing on these four main areas:

- Improving Visitors’ Experiences by maintaining trails, supporting the park’s Search and Rescue program, and improving campgrounds
- Bringing more Youth and Families—many of whom might otherwise never visit—into the park
- Funding necessary Science and Research on glaciers, rivers, flora, and fauna
- Strengthening Mount Rainier’s Volunteerism and Stewardship activities

The Fund provides support for nearly 2,000 volunteers whose efforts are valued at $1.8 million! Whether you include Mount Rainier in your will, donate when you check-out of the National Park Inn or Paradise Inn, or purchase a Washington National Parks license plate for your vehicle, it all adds up and can have a major impact on this beloved place.

Please consider giving back to Mount Rainier National Park through Washington’s National Park Fund. For more information please go to the Fund’s website wnpf.org or email them at fund@wnpf.org.

Drop-in Volunteer Trail Crew Opportunity

Want to help out your national park as a volunteer? Drop-in trail maintenance volunteer opportunities are available every weekend at Paradise and Sunrise! Meet a crew leader at the flag pole in front of the Paradise or Sunrise Visitor Center at 9am, any Friday, Saturday, or Sunday from July 1 to September 3. Bring water, snacks, and weather-appropriate clothing; we’ll provide gloves and tools. Suitable for ages 16 and up.

Your Photos Discover Climate Change Effects

By Dr. Janneke Hille Ris Lambers, Elli J. Theobald and Aenna Wilson, MeadowWatch, Univ. of Washington

In the summer, many people enjoy the wildflowers that bloom in profusion in the meadows, while just a few months earlier up to 20 feet of snow covered the summer’s display. Not surprisingly, the winter wonderland strongly influences wildflowers. Specifically, snow controls when avalanche lilies, lupines, and all flowers blossom. When snow melts earlier, flowers bloom earlier and when snow melts later, flowers bloom later.

This leads to a critical question: as average temperatures increase with climate change, how will the wildflowers so many of us enjoy be affected? This is a difficult question to answer without a lot of information—and you can help! You can contribute to research at the University of Washington by sharing your wildflower photos. Each of your pictures is an ‘observation’ of when and where wildflowers bloom. Photos contributed this summer will be particularly useful if the warmer spring we’re having leads to an earlier than average snowmelt on Mount Rainier. These data can help uncover how climate change affects the timing of the seasons.

Just take photos of wildflowers (close enough to identify the species) in Mount Rainier National Park! Make sure your photos are date-stamped and geo-tagged (most smartphones automatically enable this feature), and visit www.meadowatch.org for instructions on how to contribute your photos to our project. Thanks for your help!

Ranger-led Programs

Join a park ranger for a talk, guided walk, or evening program. These free programs explore the park’s natural and cultural history. Find out who else has come to Mount Rainier and why. Discover what this mountain really is and what it may become. Meet some of the park’s inhabitants—from owls to elk—and find out why they are here. Check at a visitor center for program times and locations. See page 8 for visitor center locations and hours.

Hey Kids!

Ask for a Junior Ranger Activity Book. It’s FREE at all park visitor centers. Complete it to learn lots of cool stuff about your park and earn a badge and certificate.

Citizen Ranger Quests

Has your inner Junior Ranger ever really gone away? Try out a Quest! They are designed for older children (12 and up) and adults. Quest topics are diverse and vary from history to science to stewardship. Some Quests take place indoors while others help you explore outdoors. Completion times for the different Quests vary from about thirty minutes to two hours. Information on Quests is available at visitor centers.

Shadows of the Past Living History Lantern Tour

Saturday, August 19

One night only! Meet the people who explored, settled, climbed, and protected Mount Rainier more than 100 years ago. The free lantern tours begin in front of the National Park Inn at Longmire, rain or shine, and depart every 20 minutes from 8:30 pm until 9:30 pm.

Tours last 90 minutes. Bring a flashlight and a warm jacket. Wear sturdy shoes.

Your Visitor Fees at Work

Mount Rainier became the fifth national park in 1899, and was the first to admit vehicles for a fee at the Nisqually Entrance in 1907. Eighty years later, the cost for a one week visit to the park was raised from two dollars to five dollars per vehicle. With changing times and the increased costs of running the park fees are now twenty-five dollars per vehicle.

Your entrance and camping fees benefit the park tremendously. By law, eighty percent of these recreation fees are retained at the park, with twenty percent made available to national park units without fee programs. This funding is used exclusively on projects or services that directly benefit visitors.

Visitor fees are the primary fund source for the electrical and telecommunication utilities being installed in the Nisqually-Paradise Road. Every year, visitor fees are used to support trail, campground, and picnic area repairs and improvements, restore subalpine meadows, upgrade aging interpretive exhibits, improve accessibility, reduce hazards, and provide information through fee rangers, social media, and publications like this one!

By paying entrance and camping fees you help care for the park. Watch for evidence of your fees at work during your visit and thank you for your support of Mount Rainier National Park!

Experience Mount Rainier as a Volunteer Ranger

As you visit Mount Rainier, keep your eyes open for people wearing hats, shirts, and jackets with a “volunteer” logo. You’ll see volunteers working in the visitor centers and assisting visitors in the meadows. Even more are busy behind the scenes, organizing the park’s collection of historic photos and taking care of plants in our greenhouse.

Last year, almost 2,000 people worked in partnership with the National Park Service to protect the natural and cultural resources of Mount Rainier and serve its visitors. These invaluable partners help us accomplish far more than we could have alone.

Have you ever dreamed of being a park ranger? You still can—for a day, for a summer, or on winter weekends as your schedule permits. Opportunities abound. Ask how you can become part of our team!

www.nps.gov/mora/getinvolved/volunteer.htm

Hiking on Late-Season Snow

Last winter’s snowfall was heavier than usual, followed by a cool, wet spring season. Hence, the deep mantle of snow covering the slopes of Mount Rainier will take longer than usual to melt this year. Some hiking trails will remain snow-covered well into the summer. Visitors expecting to hike on dry trails may encounter challenging conditions and other hazards due to lingering patches of snow. Trails that would otherwise be considered easy may be too difficult or unsafe to navigate.

- Choose to turn around instead of crossing steep, snow-covered slopes. A fall could be disastrous. Comet Falls and Paradise Peak trails often have hazardous slopes. Take an ice axe if you know how to use it.
- Falling through thin snow bridges is a hazard anywhere streams remain snow-covered. Listen for the muffled sound of running water under the snow.
- Avoid stepping onto snow cornices as they may collapse under your weight.
- Falling into snow moats around trees, and adjacent to logs and rocks, can cause injury.
- Avoid getting too close.
- You may need a reliable map and compass skills to traverse snow-covered trails, which can be difficult to follow, particularly in backcountry areas. Panhandle Gap, Spray Park, and Seattle Park are frequent problem areas.
- Avoid stepping on wet, slippery rocks, especially near rivers and waterfalls. Common hazard areas are Narada Falls and Silver Falls.
- Beware of avalanches! Unstable snow may slide at any time...not just in winter!
- Before starting your hike, stop by a Wilderness Information Center or visitor center for the latest trail conditions.

Water Bottle Filling Stations

Mount Rainier National Park has free potable water available at most of the developed areas in the park. In addition to traditional water fountains, the park worked with its lodging and dining concessions partner, Rainier Guest Services (RGS), to install three water bottle filling stations that make it easier for visitors to fill oversized bottles quickly. RGS offers several types of reusable water bottles for sale at Longmire, Paradise, and Sunrise.

Hazards of the Season

A beautiful day on the mountain can turn into dangerous whiteout conditions in a matter of minutes. Knowing what to do and making the right decision can be the difference between life and death.

Winter snowpack may linger late into summer on the mountain. Snow may be found covering portions of trails into August. However, keep in mind that snow is not the only issue when it comes to safe backcountry travel.

Route-Finding Challenges

Trails may be snow-free at lower elevations but anticipate and prepare for snow at higher elevations. Conditions change rapidly during the day and footprints in the snow quickly disappear. This has left many day hikers disoriented upon their return trip, expecting to simply follow their own tracks back to the snow-free trail. This results in many lost individuals, injuries, and fatalities. When route-finding, note important landmarks. If the trail becomes difficult to follow, stop and find where you are on the map before continuing.

Be Prepared

If at any point you feel uncomfortable or unprepared, turn around. If you plan on retracing your route back to the trailhead consider using wands on snow-covered trails. Always carry a good map and compass, and actively use them on snow-covered trails. Also consider supplementing your map and compass with an external antenna GPS for best coverage beneath a forest canopy.

Consider the steep snow slopes, melt holes, thinning snow bridges, and other early season hazards that you may encounter, and be honest with yourself in assessing your skills and experience.

Plan Ahead

- Protect yourself by wearing appropriate outdoor clothing including footwear.
- Be prepared for rapidly changing weather.
- Carry the ten essentials even on a short sightseeing hike.
- Always tell someone of your travel plans so they can notify the park if you fail to return.
- If visibility is poor, do not travel at all.
- Plan your route ahead of time, have a backup plan, and never travel alone.

Snow Avalanches

The greatest danger is an avalanche that you trigger by skiing, snowboarding, snowshoeing, or climbing. Be prepared for travel in avalanche terrain. Carry a transceiver, probe, and shovel and know how to use them. Determine if the location you are traveling is avalanche prone. If in doubt, ask questions or don’t go. Unstable snow may slide at any time... not just in winter! Even small avalanches can be deadly.

Mountain Weather Changes Rapidly

A pleasant outing can quickly transform into a survival ordeal. Proper gear (adequate boots, ice axe, the ten essentials, etc.) is a must. Navigation in spring storms can be extremely difficult. If you’re ascending and clouds or fog start rolling in, turn around and head back to the trailhead. If that’s not possible, stop, dig in, and wait for better weather.

Cross Streams Safely

Many hikers underestimate the power of moving water and some consider their former successful stream crossings as a ticket to the other side. This may not be true. Use these pointers in making wise decisions when crossing streams.

- Early morning when river levels are generally at their lowest is the best time to cross.
- Look for an area with a smooth bottom and slow moving water below knee height.
- Before crossing, scout downstream for log jams, waterfalls and other hazards that could trap you. Locate a point where you can exit if you fall in.
- Use a sturdy stick to maintain two points of contact with the ground at all times.
- Unfasten the belt of your pack so you can easily discard it if necessary.
- Staring down at moving water can make you dizzy. Look forward as much as possible.

Wilderness Camping

Mount Rainier National Park offers outstanding wilderness hiking and camping opportunities. Wilderness camping permits are required for all overnight stays in the park’s backcountry. Permits and backcountry information are available at all wilderness information centers and most visitor centers. Although permits are free, there is an optional, fee-based reservation system for campers and climbers in effect May through September.

Backcountry reservations are $20 per party (1-12 people) for 1 to 14 consecutive nights. Seventy percent of all backcountry sites and zones are available for reservation. The remaining 30 percent are issued on a first-come, first-served basis the day of or one day before the trip begins. Wilderness permits must be obtained in person at the Longmire Wilderness Information Center, White River Wilderness Information Center, or the Carbon River Ranger Station. See page 8 for hours.

Climbing

Each year, approximately 10,000 people attempt to climb Mount Rainier. Nearly half reach the 14,410-foot summit.

Climbing permits are required for travel above 10,000 feet and/or on glaciers. Climbing information—including fees, routes, and conditions—is available at ranger stations and the Paradise Climbing Information Center. See page 8 for locations and hours.

The park has a new procedure for paying annual climbing fees that replaces the traditional climbing pass. Simply pay the fee through pay.gov; keep your receipt and print or save it on your phone to serve as proof of payment; and bring a picture ID. Guided climbs and climbing seminars are available through:

Alpine Ascents International (206) 378-1927
International Mountain Guides (360) 569-2609
Rainier Mountaineering, Inc. (888) 892-5462

Remember, 97% of Mount Rainier National Park is federally designated wilderness. Be prepared to experience wilderness on its own terms.
Emergency: Dial 911 from any phone located in the park

Food & Lodging

For in-park lodging reservations, call Mount Rainier Guest Services at (360) 569-2275 or go to www.mtrainierguestservices.com

National Park Inn at Longmire

Open year-round
Front Desk: 7:00 am - 10:00 pm daily
Dining Room: 7:00 am - 8:30 pm daily
Lodging, dining room
Gifts, snacks, apparel, firewood

Longmire General Store

Open year-round
July 1 - September 3 9:00 am - 8:00 pm daily
Front Desk: open 24 hours daily
Dining Room: Breakfast 7:00 am - 9:30 am
Lunch 12:00 pm - 2:00 pm
Dinner 5:30 pm - 8:00 pm
Sunday Brunch 11:30 am - 2:00 pm
Tatoosh Cafe: 9:00 am - 9:00 pm
Gift Shop: 9:00 am - 8:00 pm
Lodging, dining, gifts, apparel, ranger on duty, interpretive programs

Paradise Camp Deli and Gift Shop in the Jackson Visitor Center at Paradise

July 1 - September 4 10:00 am - 6:45 pm daily
Food, gifts, books, apparel, firewood

Sunrise Day Lodge

Snack Bar and Gift Shop

July 1 - September 4 10:00 am - 7:00 pm daily
Food and gifts. Day use only, no overnight lodging

Firewood Sales

Available through September 25 at the Longmire General Store, through September 4 at Cougar Rock, Ohanapechoc, and White River campgrounds.

Gasoline, lodging, dining, recreation equipment rentals, and other services are available in local communities. A list of these services is available at park visitor centers and on the park’s website at www.nps.gov/mora. Religious services are available in local communities. GAS IS NOT AVAILABLE IN THE PARK

Road Work Ahead:
Longmire to Paradise

Construction work on the historic Nisqually Road between Longmire and the Paradise area is scheduled to take place through early fall. Most work will occur Monday-Friday, 7:00 am-5:00 pm, but occasional evening or weekend work may be required. There will be no road work planned for holidays. Park staff will make an effort to keep the public informed of construction activities and changes through the park’s website and social media (listed on page 3).

This work continues the third year of a multi-year road construction project addressing outdated utilities and deteriorating road conditions due to abundant precipitation, structural and design deficiencies, large traffic volumes, and normal wear. The project is designed to protect the extraordinary natural and cultural resources within and adjacent to the road corridor, including rare plants and animals, archaeological resources, and the character of the historic roads.

The majority of this year’s work will be paving but there may be spots of construction along the road so always use caution and comply with construction warning signs and flaggers. Delays will be limited to no more than 30 minutes one-way through the project. Expect rough road conditions and workers and equipment on or near the road.

Always drive in your lane unless following a pilot car and stay in your vehicle while stopped. Many workers, heavy equipment, and construction vehicles will be on the road.
