Springtime in the Rockies

In the spring I have counted one hundred and thirty-six different kinds of weather inside of four and twenty hours. ~Mark Twain

Springtime in the Rocky Mountains. Now, there’s a contradiction of time and place! While officially beginning when the sun moves north across the equator, spring can be anything but conspicuous in late March. Blizzards arrive on any given day and we are hard pressed to find many real signs of winter’s end.

Yet, spring can be found. It may be as subtle as swollen buds on aspen trees. Or it may be a growing patch of thawing earth. Perhaps it’s a red-winged blackbird calling defiantly from the top of last year’s cattails in a frozen pond. Or it’s a robin huddled under a tree, looking forlorn as it waits out a snow squall.

Spring is fleeting in the high country. While March brings both the feel and look of spring to lower elevations, it is several weeks before Rocky Mountain National Park shares this countenance. Each vertical gain of 1,000 feet holds spring’s advance by as much as a week. So spring arrives two to four weeks later. It must. It is nature’s time for renewal.

Spring begins first in meadows and woodlands. Then it passes through the spruce-fir forest, and finally reaches beyond tree limit to the alpine tundra. The landscape greens, flowers, and unfolds in a kaleidoscope of color. Spring has arrived.

In June as many as a dozen species may burst their buds on a single day. No man can heed all of these anniversaries; no man can ignore all of them. ~Aldo Leopold

When the snowpack melts, the park’s streams, river, and lakes once again become haven for fish, amphibians, aquatic insects, and waterbirds. Black bears, marmots, and ground squirrels leave their winter dens. Bighorn sheep, elk, and mule deer give birth to a new generation. The park’s only reptile, the harmless garter snake, emerges from hibernation to bask in the warm sun.

Nighttime is animated with the flight of bats and the call of poor-wills, nighthawks, and owls. The sky displays spring’s new series of rising and setting constellations.

This year, take time to search for spring. Don’t despair. No matter how long winter lasts, spring will gain the upper hand. A day will come when the sun lies warm across the landscape. Birds and tiny frogs will fill the air with triumphant voices and proudly proclaim to all who will listen, “Spring is here!”

To learn more about Trail Ridge Road - See Page 8

conditions on Longs Peak can be extreme in springtime.

Park Phone Numbers and Website

Call Park Information (970) 586-1206 with your questions. We are available to assist you from 8 to 4:30 daily.

The Official Park Website is http://www.nps.gov/romo

Hearing impaired persons may call the TTY at (970) 586-1319 from 8 to 5 daily.

Dial 911 or (970) 586-1203 to report emergencies.
You Need to Know

Visitor Centers

Park visitor centers are the places to find out what you need to know. All have knowledgeable staff, printed information on many topics, and great bookstores stocked with the best books for finding that perfect trail and learning what makes Rocky Mountain such an outstanding national park. Each visitor center has its own special features.

East of the Divide – Estes Park Area

Beaver Meadows Visitor Center
Open daily 8-4:30. Starting April 26, open daily 8-5. Features spectacular free park movie, bookstore, large park orientation map, and backcountry permits in an adjacent building.

Sheep Lakes Information Station
Starting May 16, open daily 8:30-4. Good wildlife viewing can be found in Horseshoe Park.

Fall River Visitor Center
Open weekends 9-4 through April 25. Starting April 26, open daily 9-5. Features life-sized wildlife displays, a children’s discovery room with objects to touch, and a bookstore.

Alpine Visitor Center
Starting May 22, open daily (weather permitting) 10:30-4:30. Features extraordinary views of alpine tundra, tundra displays, bookstore, adjacent gift shop and snack bar. Call 586-1206 for current information.

Moraine Park Visitor Center
Open for the weekend of April 25-26, 9-4:30. Open daily starting May 2, 9-4:30. Interactive exhibits on the past and present landscape, and a bookstore.

West of the Divide – Grand Lake Area

Kawuneeche Visitor Center
Open daily 8-4:30. Starting April 26, open 8-5. Features free movies, exhibits on wonders of the park, a bookstore, and backcountry permits.

Keep Wildlife Wild
Never feed wildlife. A fine may be issued to violators. Animals can kick, bite, or gore you. They can become dependent on human food and lose the ability to feed naturally. Wildlife also carry diseases which can be transmitted to humans, like rabies and plague. Photograph animals from the roadside.

Hunting is not allowed in Rocky Mountain National Park. All firearms and weapons are prohibited unless they are being transported through the park in a vehicle. In such cases, firearms must be unloaded and rendered temporarily inoperable or packed, cased, or stored in a manner that will prevent their ready use. By definition, “unloaded” means there is no unexpended shell, cartridge, or projectile in any chamber or cylinder or in a clip or magazine. Concealed firearm permits that are valid in the state of Colorado are also valid in the park unless otherwise prohibited by posted signs at certain buildings and facilities.

Weather and Road Conditions
Spring driving conditions can change rapidly. Trail Ridge Road will open fully on May 22, if weather permits. For current park road and driving conditions, please check at park visitor centers or call (970) 586-1206. You can also check the park website, www.nps.gov/romo/planyourvisit/road_conditions.htm

Pets
Pets are prohibited in all areas of Rocky Mountain National Park not accessible by motor vehicles, including all trails and meadows. Leashed pets (6’ leash or less) are allowed in campgrounds, picnic areas and along roadsides. In spring, leashed pets are permitted on some Rocky Mountain National Park roads when those roads are closed to motor vehicles. Check with a visitor center or call 970-586-1206 for current status.

Fishing
Obtain specific park regulations at visitor centers or park entrance stations. To fish in Rocky Mountain National Park, you must have a valid Colorado state fishing license.

Lost and Found
Please turn found items in at any park visitor center. To inquire about lost items, call the Backcountry Office at 970-586-1242.

Toward a Greener Park
The park is actively engaged in green practices, including using many hybrid/alternative fueled vehicles, a bicycle for mail delivery, low-wattage compact fluorescent lights bulbs, and active recycling of office materials.

Help us limit the use of plastic water bottles! There is limited potable drinking water in the park. Please remember to bring your own reusable water containers and refill them at park visitor centers.

The picnic and restroom facilities at Hidden Valley were constructed using recycled lumber and materials. All new construction and rehabilitation projects are designed using energy-efficient LEED standards. Recycle containers are available throughout the park.
Dehydration and Safe Water
The park’s high altitude and the dry climate both work to dry out your body. Carry and drink plenty of water as you hike or travel through Rocky Mountain. Avoid drinking untreated water from streams and lakes as it may be contaminated with giardia. Giardia can cause diarrhea, cramps, bloating, and weight loss. This microscopic organism enters surface water when animals or humans defecate in or near water. To prevent giardiasis, bring water to a full rolling boil for at least 5 minutes, or use a water filtration system that eliminates the organism.

Falling Trees
are ever-present hazards when traveling or camping in the forest. Trees can fall without warning. Be particularly watchful when it’s windy, or following a snowstorm when branches are heavy with snow. Avoid parking or camping in areas where trees could fall.

Lightning
People are killed by lightning every year in Colorado. Afternoon storms are frequent and can bring an unhappy end to a hike. Watch for approaching storms and be well below treeline or back in your car before the storm hits.

Avalanches
When in snow-packed backcountry, avoid steep slopes and gullies where avalanches could occur. Open slopes of 30 to 45 degrees can be loaded with dangerous masses of snow, easily triggered by the presence of one or more backcountry travelers. Check at a park visitor center for current snow conditions, or call (970) 586-1206.
Ranger-Led Programs

All children must be accompanied by an adult.

**Ranger Program Descriptions**

**Talks & Walks**

- **Bighorn Basics - Sheep Lakes**: A popular viewing area for bighorn sheep. Meet at the Sheep Lakes Information Station in Horseshoe Park to learn about this majestic symbol of Rocky.
- **Moraine Park Nature Walk**: Enjoy an easy 1/2-mile walk through the magnificent Moraine Park landscape. Meet at the Moraine Park Visitor Center.
- **Spring Bird Walk**: Join a local expert for birding at one of the best times of the year. Bring binoculars and a field guide and meet at the Cub Lake Trailhead.
- **Skins and Skulls**: Want to pet an elk or cuddle up to a bear? Come to Beaver Meadows Visitor Center to safely feel skins and skulls while learning about park wildlife.

**Evening Programs**

Enjoy a wide variety of informative and entertaining programs. Meet in the downstairs auditorium at Beaver Meadows Visitor Center.

Enjoy an evening program the second Saturday of each month in the auditorium at the Kawuneeche Visitor Center. For a description of topics, inquire at the front desk.

**Free Park Movie**

See the stunning 20 minute park movie at the Beaver Meadows and Kawuneeche Visitor Centers during normal business hours. Available en español and English. Features spectacular aerial footage of the rugged high country of Rocky Mountain National Park, as well as wildlife and other park resources.

**Junior Rangers**

Free Junior Ranger books are available at park visitor centers for kids ages 6-12. A successfully completed book earns a badge!

You are an important part of this park. Stay in touch. Contact us anytime at: romo_junior_ranger@nps.gov

Los libros de guardaparque juveniles para niños de 6 a 12 años se pueden obtener sin costo en el centro de visitantes del parque. Si se completa el libro con éxito puede recibir una insignia!

**Heart of the Rockies**

**Teachers, Parents, Students!** Rocky Mountain National Park’s “Heart of the Rockies” education program provides an outdoor classroom to children throughout this region. Teachers who are interested in participating in this program may contact the park’s Education Specialist at (970) 586-3777, or through the website at heartoftherockies.net

**Spring RMNP 2009 - 4**
Campgrounds/Reservations
This summer two park campgrounds, Moraine Park and Aspenglen, accept peak-season reservations (May 20 through the summer). Call (877) 444-6777 to make national park camping reservations up to 6 months prior to your visit. Internet reservations can be made at www.recreation.gov.

The administrative permit fee is $20 for use from May 1 until the campground water is turned off, usually around October 31.

Opening of Glacier Basin and Timber Creek Campgrounds may be delayed this summer. Both campgrounds have many dead trees, and tree removal will delay opening and affect operation. For this reason Glacier Basin is not on the reservation system this summer, however Aspenglen will be on the reservation system for this summer only.

Longs Peak Campground is open year-round. Call 970-586-1206 or check at a visitor center for current status.

Backcountry Camping Permits
Permits are required for all backcountry overnight camping. Camping is allowed only in designated sites and areas. The administrative permit fee is $20 for use from May 1 to October 31. Permits may be obtained at the Beaver Meadows Backcountry Office or Kawuneeche Visitor Center. For further information write to: Backcountry Office, Rocky Mountain National Park, Estes Park, Colorado 80517 or phone (970) 586-1242.

Effective May 1, 2009, all backcountry camping below treeline will require carry-in, carry-out bear canisters for food storage. Pack out all garbage. Never try to retrieve anything from a bear. Report all bear incidents to a park ranger.

Sprague Lake Accessible Backcountry Campsite
Reservations and information are available through the Backcountry Office at (970) 586-1242. This site accommodates 12 campers with a maximum of 5 wheelchair users at the camp. The administrative permit fee is $20 from May 1 to October 31.

Leave No Trace
With approximately 3 million visitors every year, the wild lands of Rocky Mountain National Park are heavily used.

In hiking, camping, and all your park activities, do your part to preserve this national treasure by following the seven easy Leave No Trace principles:

Plan ahead and prepare
Travel and camp on durable surfaces
Dispose of waste properly
Leave what you find
Minimize campfire impacts
Respect wildlife
Be considerate of other visitors

This Park Paper
The park newspaper is produced by Rocky Mountain National Park in cooperation with--and funding provided by--the Rocky Mountain Nature Association. Printed on recycled paper.
Early Season Hiking Trails

With over 350 miles of trails, the park offers a vast array of choices. Many higher trails and shaded areas can hold snow well into late June. Please check at a visitor center for current conditions before hiking. Trails are listed starting with trailheads on the west side of the park, and proceeding eastward. Even for short day trips, be sure to pack gear for all types of weather (sun, rain, snow, wind). Windproof/waterproof clothing is essential gear to wear or carry.

**Pine Beetle Epidemic From Canada to Mexico**

Bark beetles are native insects that have shaped the forests of North America for thousands of years. Bark beetles range from Canada to Mexico and can be found at elevations from sea level to 11,000 feet. Rocky Mountain National Park is just one relatively small area where trees are dying from the beetle epidemic. Because the task is enormous, the park’s priorities for mitigation of the effects of beetles are focused on removing hazard trees and hazard fuels related to the protection of life and property.

The goal is to mitigate hazard tree threats in or near park facilities such as campgrounds, parking lots, housing areas and visitor centers. Temporary closures may occur until hazards are mitigated. The other goal is to continue to spray Carbaryl to protect high value trees on both east and west sides of the park. High value trees are in frontcountry locations such as campgrounds, historic landscapes, picnic areas and visitor centers. They are important for shade, visual screening, cultural significance, and outstanding visual quality. There are adverse impacts with Carbaryl spraying, and therefore, park staff are selective and limit use of this chemical. Spraying does not take place near watercourses or wetlands.

There is no effective means of controlling a large beetle outbreak in such a vast area as the park’s backcountry, which comprises about 95% of the park. Therefore, in the backcountry, bark beetle populations are allowed to fluctuate under natural processes with some limited mitigation work occurring around some designated backcountry campsites.

For several years, Rocky Mountain National Park has had a proactive bark beetle management program, spending over $800,000 on mitigation work since 2006.

The issues of beetles, the changing forests of the western United States and Canada, as well as the changing landscape of Rocky Mountain National Park are reminders to us all of nature’s ability to change beyond human control. At the same time, we have found it helpful to explore these forests to see all of the young new trees starting to grow.

Fee Demonstration Enhances Visitors’ Experiences

When you pay your park fees, you get so much more than just entrance into the park or a night of camping. You are helping improve your experience to Rocky Mountain National Park. In 2004, Congress extended the 1996 Fee Demonstration program with the Federal Lands Recreation Enhancement Act (FLREA). That act allows National Parks to retain 80 percent of collected fees for deferred maintenance and other projects to benefit visitors. The remaining 20 percent is distributed across National Park Service areas that do not charge fees to address those same goals. Here at Rocky Mountain National Park, through FLREA and other legislation, we are able to retain over 80 percent of the fees collected. Since this legislation has been enacted, Rocky Mountain National Park has completed many projects that have enhanced our visitors’ experiences, and more projects are planned. This year there are many fee projects underway; here are two you may see:

Campgrounds: Camping is a very popular activity here; in 2008, there were nearly 143,000 camper nights. A multi-year project is ongoing to completely renovate restroom facilities throughout park campgrounds. The renovated and redesigned facilities will better address visitor needs. These accessible facilities have integrated sustainable practices and designs in their construction.

Picnic Areas: Picnicking is a favorite pastime of many visitors. Currently there is a multi-year project to improve picnic areas throughout the park. These improvements will enhance visitor experiences through providing designated, improved picnic sites, with sustainable concrete picnic tables.

As you see work in Rocky Mountain National Park this year, you can feel proud knowing your fees are helping improve the park for generations to come.

RMNP On The Cutting Edge

Rocky Mountain National Park (RMNP) has a New Technology Committee (NTC). The group’s primary goal is to utilize new technology to provide interpretive, informational and inspirational content to the public. The NTC is excited about partnering with local schools to develop educational podcasts and electronic media about the park.
Getting kids outside and connected with nature is a priority of the Rocky Mountain Nature Association Field Seminars. Thanks to the Next Generation Fund, exciting new programs for children were developed in 2008, to get kids fired up to spend more time in nature and to develop a special connection with Rocky Mountain National Park.

Wilderness Explorations and Encounters (WEE!) and Art Adventures provided hands-on experiences such as outdoor navigation and artistic media to teach kids (and their parents) the natural history of RMNP. They were a hit! As one young WEE! explorer exclaimed, “I learned that animals are very important in RMNP!” Another learned “…what would make me a better fisherman.”

With funds made available through the Next Generation Fund, several new seminars will be piloted for 2009, including Estes Park Treasure Hunt, which merges GPS technology with natural history, and two seminars for kids with learning challenges—Flowers, Rocks, Animals, and More: Lake Estes and High-tech Scavenger Hunt.

Learn more about the Next Generation Fund www.nextgenerationfund.org, creating the conservationists of tomorrow…
