Spring 2015
March 22, 2015 - June 13, 2015

Enjoy Your Visit

By Katy Sykes, Information Office Manager

What pictures in your mind does the word “springtime” conjure up? Fields of flowers, baby animals, twittering birds? How about white mountains and snowfalls measured in feet? Springtime in Rocky Mountain National Park is all of these and more. Actually, springtime in Rocky can feel like any season of the year: sunny, snowy, rainy, windy, warm, and cold.

Spring days can be gorgeous with crystal blue skies and bright sunshine that pours down over the mountains. But traditionally, some of the park’s biggest snowfalls occur in March and April. Snow into early June up on the mountaintops is not uncommon. Trail Ridge Road is scheduled to open for the season on May 22 this year, but its opening is always weather-dependent and it stays open as long as weather and road conditions permit. Spring snows are usually quite wet, which is great for forest fire prevention but not always great for activities like snowshoeing, backcountry skiing, and early season hiking. Check with a ranger about current conditions.

Mountain stream and lake ice melts in the warm spring sun, so be extra careful not to fall in, as the water is very cold. Hypothermia can be deadly.

One of the harbingers of spring is the brilliant Mountain bluebird, first spotted in late February - early March. Pasqueflowers, Snow buttercups, and Easter daisies start blooming in early April. By the third week of May, fields of cheery bright-yellow Golden banner, a member of the pea family, splash the mountainsides and roadsides. In early June, look for the several species of delicate orchids that bloom in the park. Wild roses and Colorado blue columbine appear around the third week of June. Bears usually come out of winter hibernation in late March - early April. They are hungry and not much natural food is available yet. Help protect them by properly securing food items. Baby animals start showing up in May and June. As fun as they are to look at, be sure to give the new mule deer, bighorn sheep, elk, and moose moms extra space, as they can be quite protective of their precious babies.

Free Park Movie

In celebration of Rocky’s Centennial, this year both the stunning 23-minute park movie Spirit of the Mountains, and new inspirational 25-minute Centennial film are shown in Beaver Meadows Visitor Center and Kawuneeche Visitor Center through September.

Beaver Meadows has Assisted Listening Devices for audio description and amplification and induction loops for people with hearing aids. Both visitor centers have a captioned version of the park film. Beaver Meadows has the park film in Spanish. All park visitor centers are accessible.

Join the Celebration
This year marks one hundred years since Rocky was established. See the special insert to learn about 100 years of Wilderness, Wildlife, and Wonder, and the events planned to celebrate the centennial birthday.

Park News

Visitor Centers
Estes Park Area

Alpine Visitor Center
Starting May 22, open daily (weather permitting) 10:30-4:30. This highest visitor center in the National Park Service is on Trail Ridge Road at 11,796 feet. Extraordinary alpine tundra views, displays, information, a bookstore, an adjacent gift shop and cafe. Call (970) 586-1222 for Trail Ridge Road status.

Beaver Meadows Visitor Center
Through May 3, open daily 8-5. Near the Beaver Meadows Entrance on U.S. Hwy. 36 west of Estes Park. Park information, free park movie and new Centennial movie, and bookstore. Backcountry camping permits are available by following the trail just east of the visitor center to the Backcountry Office.

Fall River Visitor Center
Open weekends in May and daily starting May 18, 9-5. Near the Fall River Entrance on U.S. Hwy. 34 west of Estes Park. Features life-sized wildlife exhibits, displays and bookstore.

Sheep Lakes Information Station
Starting May 16, open daily 9-4:30 (weather permitting) in Horseshoe Park on U.S. Hwy. 34 west of Estes Park. Information and ranger programs. Horseshoe Park is a good place to look for wildlife, including bighorn sheep and elk.

Grand Lake Area

Kawuneeche Visitor Center
Open daily 8-4:30. Starting May 4, open daily 8-5. On U.S. Hwy. 34 north of Grand Lake. Park information and maps, free park movie and new Centennial movie, exhibits on how to plan your visit, bookstore, and backcountry camping permits.

Park Phone Numbers
Park Information: (970) 586-1206
Trail Ridge Road Status: (970) 586-1222
TTY for deaf, hard of hearing, speech impaired (970) 586-1319
Dial 911 to report Emergencies

Emergencies

Dial
911
Travel in groups and make noise. If approached, make loud noises. If you see a bear or mountain lion, remain that way until mid-summer. Avalanche conditions, (970) 586-1206, or stop at a visitor center, or call (970) 586-1206. Avalanche is open 8-4:30 daily and can assist with current avalanche conditions at the Colorado Avalanche Information Center website, http://avalanche.state.co.us/, at a park visitor center, or call (970) 586-1206.

Backcountry Travel
Avoid traveling alone in the backcountry. Leave detailed information about your trip itinerary with a friend so park authorities can be notified if you fail to return. Because weather in Rocky can be so changeable and conditions variable, hikers and climbers need to remain flexible. Be prepared to turn around if conditions are more difficult than anticipated. Longs Peak, a popular climb in the park, has unavoidable and treacherous ice and snow and usually remains that way until mid-summer. Camping is only allowed in designated sites and areas (see page 5).

Bicycles
Bicycling is prohibited on trails. Bicycles are permitted on all roads that are open to motor vehicles, both paved and dirt, unless otherwise posted. There are no designated bicycle lanes along roads. Park roads are narrow with few or no shoulders, so ride with care. By law, you must ride single file. Shuttle buses are not equipped to transport bicycles.

Campfires
Campfires are permitted only in campgrounds and picnic areas with fire grates. During high fire danger, campfires may be prohibited. Firewood can be purchased at campgrounds in summer. Collecting vegetation, dead or alive, is prohibited.

Cell Service Undependable
Don’t depend on a cell phone for emergency help, as many locations in this rugged park have no cell service.

Falling Trees
Falling trees are an ever-present hazard and can fall without warning. Be particularly watchful around dead trees when it’s windy, or following a snowstorm when branches are heavy with snow.

Firearms
Firearm possession in Rocky Mountain National Park is permitted for those who are legally authorized to possess firearms under federal, Colorado or local laws. However, hunting, recreational shooting, and target practice are illegal. Federal law prohibits firearms in park buildings and facilities. Those legally allowed to carry firearms must comply with all applicable state and federal firearm laws.

Fishing
Several species of trout are found in the park, including brown, brook, rainbow, and cutthroat (including the protected Colorado River and greenback). Not all park lakes have reproducing populations of fish; cold water temperatures and lack of spawning habitat prevent reproduction in most high altitude lakes. A Colorado state fishing license is required to fish in the park. The fishing brochure, including regulations, possession limits, and a list of park waters, is available at park visitor centers and on the park website, http://www.nps.gov/romo/

Fishing
Several species of trout are found in the park, including brown, brook, rainbow, and cutthroat (including the protected Colorado River and greenback). Not all park lakes have reproducing populations of fish; cold water temperatures and lack of spawning habitat prevent reproduction in most high altitude lakes. A Colorado state fishing license is required to fish in the park. The fishing brochure, including regulations, possession limits, and a list of park waters, is available at park visitor centers and on the park website, http://www.nps.gov/romo/

Rivers and Streams
Rivers and streams can be deadly. During spring runoff, waterways swell with melting snow from higher elevations. Besides being frigid, the water can be swift and strong. Powerful currents can knock a person over and quickly pull them downstream or underwater, where they may become trapped. Rocks at streamside are often slippery, and the water nearby may be deep. Always closely supervise children around any body of water, but particularly near rivers and streams.

Take Only Pictures
Regulations prohibit taking any natural features including pinecones, rocks, antlers, artifacts, or disturbing soil, rocks, or vegetation -including flowers- in the park. Use of metal detectors is prohibited.

Ticks
Spring is tick season. When you’re out in vegetated areas, particularly tall grasses, check yourself regularly for ticks. Use repellants like DEET. If a tick does imbibe itself, use tweezers and slowly pull the tick straight out. Ticks can carry diseases, including Colorado Tick Fever.

Wildlife Encounters - Bears and Mountain Lions
Seeing a bear or mountain lion is uncommon, and interactions are even more uncommon. But it’s best to keep the following in mind.

• Travel in groups and make noise as you hike closely together. Keep children close! A predator does not distinguish a running child from running prey.

• If you see a bear or mountain lion, stop, stay calm, and back away slowly. Never approach any wildlife or turn your back and run. Stand tall and look large. Raise your arms. Protect small children by picking them up.

• If approached, make loud noises, shout, clap hands, clang pots or pans, and fight back if attacked. See the Camping section on page 5 to learn how to properly store food and other scented items.
If you had arrived in Rocky Mountain National Park in 1915, the snow-capped peaks and sparkling alpine lakes might not have looked much different than they do today. But can you imagine how it sounded? Elk bugling, birds singing, wind whistling, water trickling, flowing, or gushing. There was far less noise to detract from this natural symphony. Trail Ridge Road was still two decades away. There were very few vehicles roaring through the park, and no planes whooshing overhead. The trails were uncrowded and no technological devices beeped, buzzed, or blasted annoying tones.

Chances are, on your visit to Rocky today, you are hoping to experience something unique—a peaceful escape to the serenity of the wilderness; the excitement of an encounter with wildlife; an exhilarating view of majestic scenery. The sounds of nature enhance your visit, but what’s equally important is what you don’t hear. Rocky Mountain National Park has taken specific actions to protect its natural sounds and keep noise to a minimum. For example, Rocky worked with the Federal Aviation Administration to adjust the routes and quiet the descent patterns of jets approaching Denver International Airport. The changes enacted in 2013 mean that your wilderness experience will be more tranquil than ever. Shuttle buses reduce traffic noise in busy areas of the park and improve your chances of seeing wildlife. Rocky is also the only national park in the West with a Congressional ban on commercial air tours, which means you won’t hear helicopters as you take in your scenic view. The League of Women Voters of Estes Park led the concerned citizens who lobbied for this ban in 1998. Together, they proved Margaret Meade’s famous quote: “Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it’s the only thing that ever has.”

So how will Rocky sound in another 100 years? As the population grows, it’s likely that more and more visitors will come to the park. But could changes in technology and behavior help bring the park back to its more tranquil beginnings? Improvements in commercial air flights are already quieting the park. Visitors who choose to ride shuttles and silence their devices are making a difference. Newer electric and natural gas-fueled vehicles make less noise than traditional ones. How will you reduce your own noise footprint as you visit the park? What will you hear today?

The Fragile Alpine Tundra

About one-third of Rocky is covered with fragile, exquisite alpine tundra. With care you may walk on the tundra. However, there are four Tundra Protection Areas in which you must stay on trails as you walk: the area surrounding the Alpine Visitor Center, Forest Canyon, Rock Cut, and Gore Range overlooks. All of these areas are along Trail Ridge Road.

To help protect alpine tundra
- Stay on trails where they exist.
- Never walk single file off trail.
- Step on rocks or gravel wherever possible.
- Pets are prohibited on all RMNP tundra areas.

The tiny plants thank you.

For more information about alpine tundra visit: www.nps.gov/rmnp

Junior Rangers

Become a Junior Ranger

Free Junior Ranger books are available at park visitor centers for children ages 12 and under. A successfully completed book earns a badge!

Los libros de guardaparque juveniles son para niños que tiene 12 años o menos, se pueden obtener sin costo en el centro de visitantes del parque. Si completa el libro con éxito puede recibir una insignia.

At Rocky Mountain Conservancy Nature Stores, Your Purchase Makes a Difference

The best Rocky Mountain National Park t-shirts, games, toys, books, maps, and other interesting items are here, at any of the Rocky Mountain Conservancy Nature Stores located in park visitor centers. When you make a purchase from our nonprofit organization, proceeds are returned to the park, supporting important educational and research programs. Drop by today.

At Conservancy Nature Stores, Your Purchase Makes a Difference

Visit the Conservancy’s Nature Store in any park visitor center for the best RMNP t-shirts, games, jewelry, books, maps, and other great park items. Proceeds support the park!

Many things happened in 1915.

World War I was in full swing. The House of Representatives rejected a proposal to give women the right to vote. The Kiwanis Club was founded. Pluto was photographed for the first time. The Lusitania was sunk, and Billie Holiday and Frank Sinatra were born. The first transcontinental phone call was made. Ford manufactured its one-millionth Model T, and Albert Einstein formulated the theory of relativity.

On January 26th, Rocky Mountain National Park was established.

A lot of history has passed between 1915 and today. A lot of things have changed – music, science, manufacturing, technology, politics. But some things haven’t.

Rocky Mountain National Park is still here. After almost 100 years, despite all the history, all the change, and all the progress, Rocky Mountain National Park is still important to people. Our need for mountains and wild places, beauty and escape is just as strong today as it was 100 years ago, if not more so.

Some visitors seek out the high country on a regular basis, using it as a portal through which to filter the world. Some have a memory of a snow-covered peak or a day on the trail to think back on fondly. Others will never set foot inside Rocky Mountain National Park’s boundaries, and yet find great joy in simply knowing that it exists.

The celebration of Rocky Mountain National Park’s 100th Anniversary is for everyone. It is a reminder of all that has happened here. It is a celebration of the connections that people have made with this place, the things that live here, and those who work diligently to protect it. This celebration is a challenge to us to refresh the values that Rocky Mountain National Park embodies as we progress into the next 100 years. It is a renewal of the vow that was made to protect this place, so that it can continue to shelter us and those who come after us.

You will do many things in 2015.

Let the 100th Anniversary of Rocky Mountain National Park be one that you remember.

We invite you to join us for the celebration. Read on to find out about the many ways you can get involved!

Gold never really panned out for the miners at Lulu City.

The Grand Ditch cuts across the Never Summer Mountains and can be seen from Farview Curve.

In 1910, Sprague's Lodge was built in the Glacier Basin Area. By the 30s, rates were $17.50-$40/night.

Gold never really panned out for the

Timeline of Events

10,000 BC Clovis Paleoindian hunters enter the park as the glaciers retreat.

1200-1300 Ute enter North Park and Middle Park and Rocky Mountain National Park.

1800 Arapaho make first appearance in the park.

1820 Stephen A. Long Expedition on the plains and are first non-Indians to see Longs Peak.

1843 Rufus B. Sage is first explorer to enter east side of the park and write about it.

1858 Joel Estes enters what is now Estes Park and starts a ranch.

1868 John Wesley Powell, William Byers (Rocky Mountain News), and others make the first ascent of Longs Peak.

1871 Addie Alexander is the first woman to climb Longs Peak.

1874 Hayden’s “U.S. Geological and Geographical Survey of the Territories” enters the park.

1874-1886 Grand Ditch is built to bring water from Never Summer Range across La Poudre Pass and down the Cache Le Poudre to the plains for agriculture.

1874-1902 Mining on the east side of the park (Eugenia and Meeker Mines).

1905 Stanley Hotel constructed in Estes Park.

1906 Antiquities Act passed; allows the President to create national monuments.

www.nps.gov/romo for detailed information on events
Centennials are important events. The 100th anniversary of the dedication of Rocky Mountain National Park is certainly no exception. That event took place on September 4, 1915, on an open knoll in Horseshoe Park close by today’s Lawn Lake trailhead, a two-sided banner overhead. Though the day was overcast, the crowd was large. Individuals and families came from Denver and other Front Range towns as well as from Estes Park. Enos Mills, already celebrated as “The Father of Rocky Mountain National Park,” served as master of ceremonies. “This is the proudest moment of my life,” he told the crowd. “I have lived to see the realization of a great dream come true. It means great things for Colorado and for the nation.” And indeed it most certainly has. Though the anniversary of that dedication Saturday is still a year away, a series of events are being planned that will give all of us ample opportunity both to celebrate and reflect.

Looking back one thinks of the park’s milestone events and achievements. There have been many. One thinks of the completion of Fall River Road over the Continental Divide in 1920, and its successor, Trail Ridge Road in 1932, of the Civilian Conservation Corps days of the 1930s which advanced important park projects, including trail building, by well more than a decade; and of the “holing through” of the 13-mile Alva Adams tunnel beneath the park in 1944, a key element in the Colorado—Big Thompson trans-mountain irrigation project. Other, more recent, accomplishments include the opening of the Beaver Meadows Visitors Center in 1967, a cornerstone of Mission '66 project, the last concerted attempt to refurbish and update America’s system of national parks; and the completion in 2013 of the reconstruction and relocation of portions of much-traveled Bear Lake Road.

Centennial years, rightly considered, should not simply focus on the past. They should draw our attention to the present and to the future as well. Over the past hundred years Rocky Mountain National Park has grown slightly in size and greatly in complexity. To be sure, it is rather less cluttered than it was in 1915. All of the great resort hotels (those “castles of woods”) are gone, as are many of the other inholdings once found in places like Moraine and Horseshoe Parks. The size of the ranger force and support staff of necessity has also grown (at the time of the dedication there were only three). They are needed to take care of the more than three million visitors who enter the park each year. Balancing this accessibility with the need to protect and preserve the park’s fragile ecology is, and will remain, a major challenge. Enos Mills’ dream of 1915 is, in fact, an unfinished one — it is an affirmation in progress, as all truly great dreams are.

So even as we enjoy the centennial events of the coming months let us do so with gratitude not only to those who made Rocky Mountain National Park possible but to those who labor today and will labor tomorrow to keep Enos Mills’ dream alive. The late Western writer Wallace Stegner called national parks “the best idea we ever had.” Those of us who have had the privilege of hiking the trails of Rocky Mountain National Park, lunching besides one of its supremely beautiful lakes, or fishing one of its peaceful and sequestered streams, will surely agree. Our ability to enjoy the authenticity of such experiences, not to mention the wonder of it all, is the gift of the past to the present.

Let then this celebratory centennial year also be a year of re-dedication. Let it be a year in which we reaffirm our own responsibility as present—day stewards in helping to preserve this special place, so that a hundred years hence it will be said that we in our time—to quote the Organic Act of 1916 that created the National Park Service—helped “to conserve the scenery and the natural and historic objects . . . by such means as will leave them unimpaired for the enjoyment of future generations.” Put in less lofty terms: that we too helped pass Enos Mills’ “great dream” forward into the hands of those whom we will never know.
Song of Enos
by Will LaPage
Artist-in-Residence 2008

It’s more than music that’s alive in these hills. Listen closely wherever you go, and you’re sure to catch the spirit of a man named Mills. Enos was a man for whom beauty must be shared. Enos was a man for whom wild things must be cared. Enos had a heart and Enos had a vision. Enos built a park to heal the raw divisions, to share the forest and share the streams.

Up where democracy springs to life from elegantly simple dreams, there’s a land of inspiration, a land of bold creation, a forever treasure for the world, a forever measure for our nation. High up where the glaciers melt and icy streams arise, up where finny peaks stab at emerald skies - that’s where Enos’ spirit roams, that’s where Enos’ spirit cries: Let the Rockies fuel your soul as the Rockies fill your eyes!

Across the Divide GeoTour

Do you love a treasure hunt? Are you looking for a new, fun way to discover the Wilderness, Wildlife, and Wonder of Rocky Mountain National Park and the surrounding area? Then this activity is for you!

What is a geocaching? Geocaching is a free world-wide, high-tech treasure hunt that starts with the internet and then gets people outside to hunt and explore for “caches” - usually a container and a logbook for others to find and write in. There are many of these traditional caches in Grand Lake and Estes Park that lead you to examples of the wilderness, wildlife, wonder, and history of the area. In order to follow Leave No Trace principles, traditional caches are not allowed in Rocky Mountain National Park. Instead, virtual and Earthcakes bring you to meaningful locations, spots with a great view, or spots with geological significance in the park. These caches have a question you must answer in order to “log” your visit.

What is a Geo-Tour? This Geo-Tour is a series of geocaches that takes you around Estes Park, over the Continental Divide through RMNP (when Trail Ridge Road is open), and around Grand Lake. Do part of the tour or the whole thing! Commemorative collectible coins are awarded for various levels of completion.

What do I need to participate? You’ll need:
- A GPS unit or a smartphone with a downloadable geocaching app (such as c:geo)
- The GeoTour Passport, available only at the Estes Park and Grand Lake Visitor Centers (this passport is not available at RMNP visitor centers)
- a free online account with Geocaching.com

Need more information? Visit the Estes Park or Grand Lake Visitor Centers for more information on this fun way to celebrate our Centennial and we’ll see you Across the Divide!

The Rocky Mountain Conservancy

The nonprofit Rocky Mountain Conservancy (formerly the Rocky Mountain Nature Association) was founded in 1931 to develop informational brochures for the park. Today, through the publication and sale of educational materials, the Conservancy supports the research and educational programs of Rocky Mountain National Park and its public lands partners. The Rocky Mountain Conservancy also raises funds for trails and improvement projects within Rocky Mountain National Park. The Rocky Mountain Conservancy Field Institute will be offering a special Centennial Seminar Series throughout 2014 and 2015 in order to highlight the wilderness, wildlife, and wonder of the park. Seminars are led by talented instructors and usually require some hiking, and cover a myriad of topics including wildlife biology, history, botany, and photography.

Stop by a bookstore in one of the park visitor centers to shop, pick up a seminar catalog, or learn more about becoming a member and helping to support Rocky Mountain National Park.

Traditional geocaching is not allowed in Rocky Mountain National Park.

Please practice Leave No Trace ethics and do not take items from or leave caches in the national park.

Celebrate Rocky on Social Media

Join in on the celebration conversation by finding us on your favorite social media platform. Gain access to special events, photos, videos, and more!

@Rockynps

Subscribe to our YouTube channel for exclusive videos about the park, and participate in our Centennial RMNP YouTube Project. For this project, we want you to capture the moments when you were truly in awe of Rocky Mountain National Park. YOU are a part of what makes this place so special and we want you to be the focus of these videos. Record yourself, friends, and family enjoying the park. This project is focused on the people and their emotions that are inspired by this beautiful place. Look for the finished video late summer 2015!

Like us on Facebook for a daily glimpse into the world of Rocky Mountain National Park. See beautiful photos and video, and join in a discussion about what Rocky means to you.

Minute of Wonder Weekly Video Series: Every Monday morning during the celebration year a one-minute “Minute of Wonder” video will remind you of why we are celebrating the Wilderness, Wildlife, and Wonder of Rocky Mountain National Park.

View more information on how to get involved digitally with RMNP!

100 Days Outside Challenge: Even if you can’t celebrate our Centennial with us here in the park all year long, celebrate with us from home by joining this Facebook event and sharing the beauty of nature where you live (#100DaysOutside).

Follow us on Twitter for up-to-date information about trail conditions, avalanche reports, road status, and weather.

Visit www.nps.gov/romo for more information on how to get involved digitally with RMNP!
## Rocky Mountain National Park
### Spring Centennial Calendar of Events

**For complete event details, please visit www.nps.gov/romo**

### March 2015
- **24** Centennial Speaker Series: John Fielder
  Denver Museum of Nature and Science - $15
  Denver, CO
- **28** Centennial Saturday Night
  Beaver Meadows Visitor Center, RMNP
- **30** Pioneers of the Peaks - Harry Kent
  Local Climbers Who Made History
  Estes Park Museum
  Estes Park, CO

### April 2015
- **25** Earth Day/ National Junior Ranger Day
  Beaver Meadows Visitor, RMNP
- **27** Pioneers of the Peaks - Keith Lober
  Local Climbers Who Made History
  Estes Park Museum
  Estes Park, CO

### May 2015
- **1** Wild Inspirations
  Aspen and Evergreen Gallery
  Estes Park, CO
- **18** Pioneers of the Peaks
  Local Climbers Who Made History
  Estes Park Museum
  Estes Park, CO
- **19** Enos Mills and the Campaign for Rocky Mountain National Park
  History Colorado
  Denver, CO
- **29-31** Estes Park Western Heritage Art and Artisan Show and Sale
  Estes Park, CO
- **30** Centennial Speaker Series: Jill Baron
  Beaver Meadows Visitor Center, RMNP
- **30-31** Rocky Mountain Checkwagon Cookoff
  Estes Park, CO

### June 2015
- **5** Wild Inspirations
  Aspen and Evergreen Gallery
  Estes Park, CO
- **6** Technology of Your Ancestors
  Rocky Mountain Conservancy Seminar
  $70, 970-586-3262 for information
- **6** Rocky Mountain Molecules: Chemical Storylines of Wonder
  Beaver Meadows Visitor Center, RMNP
- **6** Celebrating Rocky Invitational Art Show Opening Reception
  Cultural Arts Council, Estes Park, CO
- **6-14** Estes Institute RMNP Student Art Celebration
  Fall River Visitor Center, RMNP
- **12** RMNP Centennial Celebration Concert
  Oratorio Society of Estes Park
  Estes Park, CO
- **12-14** FACE of Fiber in the Rockies 2015
  Fiber Arts Show
  Estes Park, CO
- **12-14** Rocky Mountain High Golf
  Grand Lake Golf Course
  Grand Lake, CO
- **13** RMNP Centennial Celebration Concert
  Oratorio Society of Estes Park
  Estes Park, CO
- **13** Rocky Mountain Molecules: Chemical Storylines of Wonder
  Beaver Meadows Visitor Center, RMNP
- **13-14** The Wonder of Local Crafts
  Grand Lake, CO

### Long Term Events

- **September 4, 2014 - September 4, 2015**
  Colorado Mountain Club Hikes, Climbs, and Snowshoes in RMNP
  www.cmc.org for more details
- **September 26, 2014 - October 4, 2015**
  Climb Out! - an Exhibit
  Estes Park Museum
  Estes Park, CO
- **January 24 - May 2**
  Harold Dunning’s World View
  Loveland Museum
  Loveland, CO
- **March 21 - September 4, 2015**
  We Love RMNP Exhibit
  History Colorado
  Denver, CO
- **May 23 - September 4, 2015**
  Centennial Exhibit
  Kauffman House Museum
  Grand Lake, CO
- **June 1 - October 31, 2015**
  Celebration of RMNP
  Hot Sulphur Creative Arts Council
  Hot Sulphur Springs, CO
- **June 6 - July 23, 2015**
  Celebrating Rocky Invitational Art Show
  Cultural Arts Council
  Estes Park, CO
Camping 2015

Camping Information

Overnight stays in Rocky Mountain National Park must be in a campground (or a backcountry site); staying overnight in a car or along a road or at a trailhead is not allowed.

It is common for all park campgrounds to fill up on most summer days and fall weekends. Reservations for late-May through September can be made six months to one day in advance and are highly recommended. Make a reservation online at www.reserveamerica.com or www.recreation.gov or call 1-877-444-6777.

Fees to Camp
• When the water is off (winter), Moraine Park Loop B campground is $4.50/night.
• When the water is on (summer), all campgrounds are $20.00/site/night.
• America the Beautiful Senior and Access Pass holders receive a 50% discount on camping fees.
• Park entrance fees and camping fees may be paid in US currency by major credit or debit card, cash, or check.

Backcountry Camping

Permits are required for all overnight backcountry camping, and reservations are recommended for summer. Camping is allowed only in designated sites and areas. Backcountry permits may be obtained at the Beaver Meadows Backcountry Office or at the Kawuneeche Visitor Center.

An administrative permit fee of $26 is required for backcountry permits between May 1 and October 31. The nonrefundable, non-exchangeable fee must be paid when reservations are made. There is no backcountry permit fee in winter.

For your safety and the protection of park wildlife, backcountry campers are required to use carry in/carry out, commercially-manufactured, hard-sided, bear-resistant food storage containers in all areas of the park between May 1 and October 31.

Containers may be rented or purchased at outdoor shops in nearby communities.

For further information write to: Backcountry Office, Rocky Mountain National Park, Estes Park, Colorado 80517, or call (970) 586-1242.

Sprague Lake Accessible Backcountry Campsite

Reservations and information are available through the Backcountry Office at (970) 586-1242. This site accommodates 12 campers with a maximum of five wheelchair users at the camp. The administrative permit fee is $26 from May 1 to October 31.

Early Season Hiking Trails
Family-Friendly Trails

Early-season trails may melt out earlier than other trails. Check with a ranger about current conditions.

Mountain weather in spring can be extremely varied, and days can be warm and sunny or cold and snowy. March and April are typically the snowiest months of the year, and it’s not uncommon for snow to fall in May and even early June. Spring snows are usually much wetter. The resulting spring trail conditions can be snowy, icy, and muddy. Conditions can change quickly, especially on warm days. Crusty snow or ice in the morning may soften as the day warms up, making trails muddy. Upper trails and trails in shady areas often hold snow longer.

Be prepared with good waterproof footwear and layers of clothing, sunglasses, and a hat and gloves. It’s an in-between time, when the snow can be too wet and soft to snowshoe, but there is too much snow to hike without postholing.

Remember! Pets are prohibited on ALL Rocky Mountain National Park trails, tundra, and meadow areas.

### A Summer Trip? Planning is Essential

**It’s Busy in Summer**

Summer is a glorious time of year in Rocky, and most people visit here in summer and on fall weekends. These are the park’s busiest times. Expect congestion on roads, in parking areas, and along popular trails.

**Best tip to help:** plan ahead.

- Make reservations for camping in the park and lodging in the local areas.
- Tour and hike early and late in the day; by mid-morning, parking areas are often full.
- Carpool and/or use the free summer park shuttle buses. The shuttle schedule is on the back page.

**Planning a summer hike?** Rocky has over 350 miles of trails to take you to spectacular views, soaring mountains, rushing streams, and beautiful lakes. Many trails have already been done, but be aware that some park trails and bridges may still be damaged from the 2013 flood.

Know before you go: be prepared and informed, including checking weather and trail conditions. Many resources are readily available, including:

- **RMNP Trail Conditions Reports** at [www.nps.gov/rmnp/trail_conditions.html](http://www.nps.gov/rmnp/trail_conditions.html)
- **National Weather Service** forecasts at [www.weather.gov](http://www.weather.gov)
- **Colorado SNOTEL Sites**. There are five in the park: Bear Lake, Copeland Lake, Wild Basin (near Ouzel Falls), Willow Park, and Lake Irene. Visit [www.wcc.nrcs.usda.gov/wcc/snotel](http://www.wcc.nrcs.usda.gov/wcc/snotel)
- **Call the RMNP Information Office** 843-3311 daily for conditions, updates, and information, 970-586-1206.

**Thinking of Climbing Longs Peak?**

Training, technical skills and conditioning are needed to climb many of Rocky’s high peaks. Mountaintops can experience wintry conditions any time of year.

In general, the most snow-free and ice-free time of year to climb Longs Peak is mid-July through mid-September. However, weather and conditions vary, so it’s best to check with a ranger or online for current conditions. Longs Peak is NOT a hike! It is a climb that crosses enormous sheer vertical rock faces, often with falling rocks, requiring scrambling, where an unroped fall would likely be fatal. The route has narrow ledges, loose rock, and steep cliffs. The terrain requires good route-finding and scrambling skills. Use caution, as injuries requiring rescue are very dangerous and take many hours, if not days, to evacuate.

Don’t have summit fever? Enjoy the experience but be willing to turn around at any time.

### Trail Guide

Information to Know

Greening Your Ride at Rocky

Join Rocky Mountain National Park in our efforts to cut emissions and save fuel.
You can help our climate and air quality in Rocky by reducing vehicle idling. Remember to turn off your engine while parked, waiting at wildlife crossings, or stopping to take photos.

Take the FREE Shuttle! See page 12 for schedule

Greening Your Park

Recycling Available in Major Park Locations
Glass, plastic #1 though #7 and aluminum may be recycled in park campgrounds and at major park locations. Look for our distinctive recycling containers or ask at any visitor center or campground for their locations.

Help us reduce the use of plastic water bottles!
There is limited potable drinking water in the park. Please remember to bring your own reusuable water containers and refill them at park visitor centers.

Why Isn't Trail Ridge Road Open?
By Katy Sykes, Information Office Manager
Winds howled across the mountaintops all winter long. Imagine what they left — towering piles of drifted snow interspersed with bare tundra. Through it all runs Trail Ridge Road, the highest continuous paved highway in the U.S. At 12,183 feet, it’s Rocky’s seasonal connection between the towns of Estes Park and Grand Lake. Every spring Rocky hopes to open Trail Ridge Road by the Friday of Memorial Day Weekend, which this year is May 24. Spring opening is a difficult, lengthy process. Most years the opening day goal is met, but not always. Why? Blame weather and machines.

Plow operators begin clearing snow in mid-April. Crews from the park’s east side and west side work up the sides of the road and eventually meet at the Alpine Visitor Center.

Mountain snow happens any time of year, but spring tends to bring the deepest, wettest snow. Often plowed areas get snowed in again, or strong winds blow and drift the road so it’s covered again. This is part of the plow driver’s annual routine.

Rocky uses large rotary plows to handle the deep snow. Often two plows work together. The first rotary pioneers, or clears, one lane; the second rotary widens so two lanes are cleared. When the snow is deeper than about 5 feet, the rotary works on the deep snow in layers. Plow drivers say the rotary “ramps,” moving forward and plowing the top layer, backing up, then going back in to plow the rest down to the pavement.

So you’re driving a rotary plow through a vast tundra landscape of deep, drifted, untrammeled snow. How do you know where the road is? Your only guide is a row of poles.

These snow poles (bare logs) are placed and maintained along the outside edges of Trail Ridge Road to guide plows.

The snow is not always soft and undisturbed. Wind scours and drifts the snow into crusty, uneven piles. Rocks and sticks imbedded in the snow can cause problems. Rockslides routinely happen. Roadside signs are usually buried in drifts.

Not only the road must be cleared, but buildings including the Alpine Visitor Center and various restrooms are shoveled out, mostly by hand.

Last year Trail Ridge Road opened on May 23. The earliest the road has opened was on May 7, 2002; the latest June 26, 1943. Trail Ridge Road officially closed for the season last year on November 4, which was later than the average date of October 23.

Once Trail Ridge Road opens, it usually closes temporarily for mountaintop snowstorms, even into early June. Heavy melting on the road during the day and freezing temperatures at night may cause hazardous driving conditions. Because weather conditions may change rapidly, park visitors should be prepared to adjust travel plans accordingly and are encouraged to call the park’s Trail Ridge Road recorded status line at (970) 586-1222. Park staff update the recorded line during and after regular office hours when the road status changes.

Ride the Free Shuttle Bus

Using Rocky Mountain National Park’s free shuttle bus service enables you to access many destinations and loop hikes along the Bear Lake corridor, while enjoying the beautiful scenery without the distraction and hassle of traffic congestion and limited parking.

**Bear Lake Shuttle**
Weekends: May 23, 24, 25, 30, 31
June 6 & 7
Daily Service: June 13 - October 12
Buses operate daily between Park & Ride and Bear Lake, leaving Park & Ride every 10-15 minutes from 7 a.m. to 7 p.m.
The Bear Lake Route is based at the Park & Ride shuttle bus parking area across from the Glacier Basin Campground.

**Moraine Park Shuttle**
Weekends: May 23, 24, 25, 30, 31
June 6 & 7
Daily Service: June 13 - October 12
Buses operate daily between Park & Ride and Fern Lake Bus Stop, leaving Park & Ride every 30 minutes from 7 a.m. to 7 p.m.
The Moraine Park Route is based at the Park & Ride shuttle bus parking area across from the Glacier Basin Campground.

**Hiker Shuttle**
Daily Service: June 27 - September 13
Weekends Saturdays and Sundays
September 19 - October 11
Buses operate between the Estes Park Visitor Center and the RMNP Park & Ride. The only stop on this express route is Beaver Meadows Visitor Center.
The first bus leaves the Estes Park Visitor Center at 7:30 a.m., and the last bus leaves for Estes Park at 8 p.m.
Buses run on an hourly schedule early and late in the day, and a half-hour schedule from 11 a.m. to 6 p.m.
A park pass is required to board the Hiker Shuttle. It may be purchased at the Park & Ride.

---

**Hiker Shuttle Express Route**
Stops at Park & Ride, Beaver Meadows Visitor Center, and the Estes Park Visitor Center only

**Bear Lake Route**
**Moraine Park Route**

![Shuttle Bus Stop]

- There are no shuttle bus services on the west side of the park or across Trail Ridge Road. There are several commercial shuttle tours in the Estes area; contact the Estes Park Visitor Center for information, 800-443-7837, or visitestespark.com.
- There are no bike racks on park shuttle buses.
- Most park shuttle buses are accessible and can accommodate wheelchairs. Contact shuttle staff or rangers if accommodation is needed.
- Dogs are not allowed on park shuttle buses (except service animals that have been individually trained to perform specific tasks for the benefit of persons with disabilities).

This park newspaper is funded by the Rocky Mountain Conservancy. For more information visit RMConservancy.org.
