Pioneer Yosemite History Center
Go back to a time of horse-drawn wagons, a covered bridge, and log cabins. A visit to the Pioneer Yosemite History Center celebrates the inspiration for national parks across America and around the world. The Center is always open, and interpretive signs and brochures are available.

Evening Programs
Join pianist/singer Tom Bopp in the Wawona Hotel lobby from 5:30 p.m. to 9:30 p.m., most evenings, check at front desk. Then join pianist Tom Bopp at the Wawona Hotel Lounge from 9:00 to 11:00 p.m. most evenings.

To Get to Mariposa Grove
Allow 1-2 hours driving time to the Mariposa Grove from Yosemite Valley. Cams are prohibited beyond the parking area in the Grove, but several giant sequoias can be seen from there. Information about access for the disabled is available at the trailhead or from information handouts. The access road to the Grove may close due to snow. Trailers and motor homes are prohibited on the Mariposa Grove Road from the South Entrance to Mariposa Grove.

Walking through the Grove
The trailhead for walking up through the Grove is located at the far end of the parking area. Written translations are available at the trailhead in Spanish, German, French, and Japanese.

Yosemite's Other Sequoia Groves

Yosemite's Other Sequoia Groves

Tuolumne Grove
The Tuolumne Grove of Giant Sequoias is near Crane Flat at the intersection of the Big Oak Flat Road (Highway 120 West) and the Tioga Road. The former route of the Big Oak Flat Road leads downhill from Crane Flat into the Tuolumne Grove of Big Trees, a cluster of about 25 sequoias. Now closed to cars, this 2-mile (3.2 km) round-trip has an elevation change of 500 feet (150 meters). The downhill walk is relatively easy, though it is moderately strenuous on the uphill return. Once in the Tuolumne Grove, there is an easy half-mile, self-guiding nature trail.

Merced Grove
Yosemite's quietest stand of sequoias is the Merced Grove, accessible only on foot. It's a 4-mile roundhike into the groove from the Big Oak Flat Road (Highway 120 West). Located 2.5 miles north of Crane Flat or 4.5 miles south of the Big Oak Flat entrance, the trailhead is marked by a posted labeled B-10 and a road sign. Allow 3 hours for the round-trip hike to this group of about 20 sequoias.

Night Sky Information
November 4: Bright Jupiter and Venus can be found shining side by side just before dawn.
November 9: The golden crescent moon shines close to Jupiter before and during the dawn hours.
November 17: This is the best night to view the Leonid meteor shower. Observers may see dozens of meteors per hour, although the light of the half moon will compromise the view.
November 26: The full moon of November is called the Beaver Moon. This is the best night to view the Leonid meteor shower. Observers may see dozens of meteors per hour, although the light of the half moon will compromise the view.
November 29: Late this evening, look below the moon to the Pleiades and Cassiopeia. The stars will appear to be in a line. The Pleiades are located in the constellation of Taurus.
