# FEDERAL WILDLAND FIRE QUALIFICATIONS SUPPLEMENT

**January 2016**

# INTRODUCTION

The *Interagency Wildland Fire Qualifications System Guide* (PMS 310-1) establishes minimum requirements for training, experience, physical fitness level, and currency standards for wildland fire positions. When criteria for inclusion in the PMS 310-1 (http://www.nwcg.gov/publications/310-1) are not met for a position, wildland fire agencies have the option to establish agency-specific positions and standards for those positions based on unique missions and needs. Agencies that utilize positions not contained in the PMS 310-1, broadly referred to as Technical Specialists, typically establish minimum standards for these positions in agency-specific manuals or guides.

The federal wildland fire agencies have consolidated these other positions into a single supplement to better support their use and mobilization. The *Federal Wildland Fire Qualifications Supplement* includes federal agency-sponsored positions that are not included in the 310-1 which are frequently used on wildland fire incidents.

Positions and associated requirements listed in this supplement have been approved for inclusion by representatives from their respective agencies. This supplement lists established minimum requirements for training, experience, physical fitness level, and currency standards for all participating agencies. Where necessary, these positions include training to meet NIMS requirements.

This supplement incorporates by reference all applicable qualification and certification business practices from the PMS 310-1 and other agency guides.

# HOW TO USE THIS SUPPLEMENT

The appearance of a particular agency's emblem at the top of a qualification description page indicates acceptance and use of the position by that respective agency; absence of an emblem indicates the position is not used by that agency. When an agency has requirements for a position that differ from common requirements, the additional requirements will be listed under the section titled *Agency-Specific Requirements*. The absence of additional agency-specific requirements indicates universal acceptance by all participating agencies of the common requirements listed on the qualification description page.

When additional requirements apply for an agency, the position must be added to an incident responder's IQCS records under the respective agency set id. Position task books for all agency-endorsed positions in this supplement are available for download on the NWCG *Agency-Specific Task Books* web page at http://www.nwcg.gov/publications/position-taskbooks.

This supplement will be updated annually or as needed. Proposed changes or additions to this document or position criteria should be channeled through a respective wildland fire agency training representative for approval and inclusion.
