LYJO-C-006 Repair/Repaint Texas White House (COMPLETED)

LYJO-C-007 Replace Septic Tank, LBJ Hangar (COMPLETED)
LYJO-C-008 Fuel Tanks (COMPLETED)
LYJO-C-009 Provide Structural Fire Protection
LYJO-C-010 Provide Historic Structures Report
LYJO-C-011 Provide Archeological Assessment and Survey
LYJO-C-012 Provide Historic Preservation Guides
LYJO-C-013 Restore Junction School
LYJO-C-014 Transcribe Oral History Tapes
LYJO-C-015 Investigate Johnson's Network at the LBJ Ranch
LYJO-C-016 Study Ethnography of the LBJ Ranch
LYJO-C-017 Research LBJ Ranch Ties to Local Communities
LYJO-C-018 Study Johnson Family Cemetery
LYJO-C-019 Investigate Rebekah Johnson And Her Family
LYJO-C-020 Research LBJ's Contact With Minorities
LYJO-C-021 Research History of Local Communities
LYJO-C-022 Investigate Historic Land Use and Economy, Local Area
LYJO-C-023 Prepare Collections Management Plan
LYJO-C-024 Prepare Collection Storage Plan (COMPLETED)
LYJO-C-025 Repair J. P. Johnson Barn
LYJO-C-026 Repair And Paint Cabana and Pressure Tank Building (COMPLETED)
LYJO-C-027 Repair Sam E. Johnson Log Cabin
LYJO-C-028 Repair And Paint Secret Service Command Post (COMPLETED)
LYJO-C-029 Repair/Repaint Hay Sheds
LYJO-C-030 Rehab/Repair Cedar Guest House
LYJO-C-031 Replace Alarm System At Three Historic Structures (COMPLETED)
LYJO-C-032 Reroof Historic Structures, Johnson City Unit
LYJO-C-033 Historic Resource Study, LBJ Ranch, 1964-Present
LYJO-C-034 Replace Roof On Electric Vault Building, LBJ Ranch (COMPLETED)
LYJO-C-035 Catalog Archeological Collection
LYJO-C-036 Paint Texas White House (COMPLETED)
LYJO-C-037 Repair Fences (COMPLETED)
LYJO-C-038 Plug Abandoned Well (COMPLETED)
LYJO-C-039 Repair/Rehab Johnson And Jordan Dams
LYJO-C-040 Enclose Hangar Carport To Protect Historic Vehicles
LYJO-C-041 Repair/Repaint LBJ Boyhood Home Exterior
LYJO-C-042 Remove Wiring/Insulate Attic Of Texas White House (COMPLETED)
LYJO-C-043 Repair Park Roads
LYJO-C-044 Repair/Repaint Communications Tower
LYJO-C-045 Prepare Development Concept Plan, LBJ Ranch
LYJO-C-046 Install Fire Detection & Suppression Systems, TWH
LYJO-C-047 Convert Curatorial Documentation Photos to CD

LYJO-C-048 Rehab Three Houses in Johnson City Unit
LYJO-C-049 Provide Cultural Landscape Reports

LYJO-N-001 Natural Resources Mitigation
LYJO-N-002 Natural Resources Monitoring
LYJO-N-003 Natural Resources Protection
LYJO-N-004 Natural Resources Program, Administration
LYJO-N-005 Baseline Inventory And Monitoring
LYJO-N-006 Prepare Visitor Survey, LYJO
LYJO-N-007 Prepare Visitor Use And Economic Impacts Study
LYJO-N-008 Comprehensive Integrated Pest Management
LYJO-N-009 Provide Water Resources Management
LYJO-N-010 Provide Cultural Landscape Reports
LYJO-N-011 Provide Geographic Information System
LYJO-N-012 Prescribed Fire
LYJO-N-013 Revision of Fire Management Plan
LYJO-N-014 Equip Fire Truck (COMPLETED)
LYJO-N-015 Repair Flood Damage (COMPLETED)
LYJO-N-016 Prepare Oak Wilt Management Plan
LYJO-N-017 Prepare Limnological Study of Pedernales River
LYJO-N-018 Re-establish Native Grasses, Johnson Settlement
LYJO-N-019 Provide Natural Resources Management Specialist

Cultural Resource Documentation Checklist (B-1 & B-2)

Summary Chart For Archeological Sites (C-3)

Summary Chart For Structures (D-3)

Summary Chart For Objects (E-3)

Summary Chart For Cultural Landscapes (F-3)

# INTRODUCTION TO LYNDON B. JOHNSON NATIONAL HISTORICAL PARK

The Resources Management Plan is a strategic planning document and a key factor in proper management of cultural and natural resources in the park. The plan includes a set of project statements comprised of proposed actions for implementation as well as 5-year programming sheets for management and research actions. Project statements are determined on the basis of approved Statements for Management and consideration of previously completed research.

The plan provides continuity and serves as a manual for park and regional personnel in three ways: (1) for management activities that will help maintain natural ecological processes, (2) for the enlightened management of archeological and historic resources, and (3) a set of research recommendations and priorities that are designed to obtain additional information for management and interpretation.

## A. PURPOSE OF THE PARK

The purpose of Lyndon B. Johnson National Historical Park is to preserve and interpret historically significant properties associated with the life of Lyndon B. Johnson and his heritage. See Public Law 91-134 of December 2, 1969, which established the National Historic Site. S.2363-1980 Park's Omnibus Bill, Title VI, Lyndon B. Johnson National Historical Park amends PL91-134 by changing National Historical Site to National Historical Park, and raising the development ceiling, and authorizing acquisition of land with appropriated funds. Conversations between the National Park Service Director George Hartzog, President and Mrs. Johnson, and the National Park Service further define the purpose of the park (described later in this statement).

## B. SIGNIFICANCE OF THE PARK'S RESOURCES

Lyndon B. Johnson's life had a tremendous impact on this Nation and the world. The historic resources of the National Historical Park document the full story of his life from his grandparents' first settlement in this area, to his birth and boyhood years, to the years when the LBJ Ranch served as the Texas White House, and finally the retirement years, and burial at the Johnson Family Cemetery. Here, as in few other historic sites, one can see the lands and structures that represents the origins, ancestry, and full-life span of a major historic figure.

The National Historical Park consists of the Johnson City Unit (112.47 acres) (45.51 ha) within the legislative boundary, and 15 miles (24 km) west, the LBJ Ranch Unit (1458.57 acres) (590.27 ha) within the legislative boundary. Located in the Johnson City Unit are the Boyhood Home, where Lyndon Johnson lived during his formative years, and the Johnson Settlement area, which President

Johnson's grandfather used as headquarters for his open-range cattle business from 1867-1872. The original log house still stands as do several stone buildings constructed by later owners.

The frontier heritage, family, and community, all had a significant influence on Lyndon Johnson's development.

The LBJ Ranch Unit contains the Texas White House and associated structures for communications, transportation, and security, the operating ranch with fields and pastures, Show Barn, cattle pens, and registered Herefords, the reconstructed Birthplace House, the Junction School, and the Johnson Family Cemetery. The full impact of Lyndon Johnson's energy and power can be felt at the LBJ Ranch, scene of serious political decision-making as well as quiet times with family and friends.

In addition to the 96 historic structures maintained by the National Park Service, some 10,430 historic objects are used to furnish or interpret the various sites.

From the 1860s to the 1970s, the historic resources at the Lyndon B. Johnson National Historic Park document and communicate the heritage of the 36th President of the United States.

## C. LAND CLASSIFICATION

Lyndon B. Johnson National Historical Park is listed on the National Register of Historic Places, and as such, its 543.97 (220.31 ha) Federally-owned acres are classified as a historic zone, and are managed in compliance with the standards as outlined in Management Policies of the National Park Service (1988), which limit physical development to the minimum needed to preserve, protect, and interpret the historical, cultural, and archeological values, and which limit activities therein to sightseeing, interpretive presentations, and the study of the cultural features.

## D. INFLUENCES UPON MANAGEMENT

### 1. Legislative and Administrative Constraints

Constraint documents can be found at Park Headquarters and at the Southwest Regional Office in Santa Fe, New Mexico.

Public Law 91-134, December 2, 1969, authorized the Secretary of the Interior to acquire "by donation or by purchase with donated funds" lands for the National Historic Site. The Act authorized "to be appropriated not more than $180,000" to provide for development.

S.2363-1980 Parks Omnibus Bill Title VI Lyndon B. Johnson National Historical Park, amends PL 91-134 by changing National Historic Site to National Historical Park, raising the development ceiling to $4,100,000 and authorizing the acquisition of land by purchase with appropriated funding not to exceed $1,400,000.

All management and development decisions and actions must comply with the provisions of the Antiquities Act of 1906; the National Park Service Organic Act of 1916; the Historic Sites Act of 1936; the National Historic Preservation Act of 1966; the National Environmental Policy Act of 1969; The Endangered Species Act of 1973; the Architectural Barriers Act of 1968; and the Handicapped Rehabilitation Act of 1973. In addition, applicable guidance and procedures are provided by the most current activities standards and management policies of the National Park Service.

President and Mrs. Johnson had meetings with a number of officials during which agreements were made to guide the management development of the National Historical Park. Those officials included Secretary of the Interior Rogers C. B. Morton, National Park Service Directors George Hartzog and Ronald Walker, National Park Service Regional Directors Frank Kowski and Joseph Rumburg, and Field Assistant to the Regional Director Charlie Boatner. The most important of these agreements and understandings may be summarized as follows:

President and Mrs. Johnson, along with other members of their family and business associates, would donate buildings and land to the National Park Service for the National Historical Park in increments over the years subject to concurrence by the donors that the justifications by the National Park Service for additional acreage were valid "by the needs of history, protection, and preservation." President Johnson accepted the recommendation of the National Park Service that he donate certain lands first at the LBJ Ranch (including the Ranch House complex, fields to the north, and river bottom lands) and the Johnson Settlement area (Bruckner and Cox tracts). As part of the donation understanding Director Hartzog agreed, as suggested by President Johnson, that the President and Mrs. Johnson have lifetime estate in the "LBJ Ranch headquarters building and accessory outbuildings and improvements, together with unrestricted right of ingress and egress"; that a number of President Johnson's employees become National Park Service employees to continue operating the ranch as a "working ranch" rather than a sterile relic of the past; that the Johnsons be responsible for maintenance of the interior of the LBJ Ranch House as long as they continue to live there; that the National Park Service be responsible for exterior maintenance of the LBJ Ranch House; that the Johnsons allow tours to be conducted via bus by the Ranch House on a

mutually-agreed schedule; that good cooperative relations, including a continued sharing of personnel and equipment, as practiced by President Johnson, be maintained among all individuals, ranchers, community organizations, and local, State, and Federal Government agencies in the LBJ Ranch area.

Mrs. Johnson, her family and business associates, declared to Regional Director Joseph Rumburg their hope that they will be in a position to donate the remainder of the original portion of the LBJ Ranch and the 37-acre (15 ha) area south of the Johnson Settlement to the National Park Service in years to come.

The deeds donating the ranch lands to the National Park Service convey water rights subject to "first use" by the Grantor. Also reserved to the Grantor is "joint use" with the National Park Service "of the irrigation water line ...to Leaky Tank ...and joint use of said tank as a storage reservoir."

In December 1984, Mrs. Johnson donated 307.89 acres of the LBJ Ranch to the National Park Service. As in previous donations, Mrs. Johnson reserved the Right of Life Estate, easements for ingress and egress, irrigation pumps and lines, and the right to use "A" Storage. The Right of Joint Use was not given in this donation and is being negotiated on a case-by-case basis.

Other conditions are that any wildflower experiments in progress at Mrs. Johnson's death be allowed to continue for three years and that bus operations eventually be relocated to an area along Klein Road, north of the Junction School.

The Texas Parks and Wildlife Department, National Park Service, and President and Mrs. Johnson, agreed that the State Historical Park on the south side of the Pedernales River would include visitor orientation for both parks, as well as a variety of recreational uses. The National Park concentrates on historic preservation and interpretation with no development of recreational facilities. National Park Service buses pick up visitors at the State Historical Park Visitor Center for tours of the National Historical Park. There is coordination of park operational activities, signing, equipment use, publications, and training between the two parks.

The National Park Service has proprietary law enforcement jurisdiction. Good working relationships exist with nearby Federal, State, and local law enforcement authorities who assist whenever called upon.

2. Regional Influences

The National Historical Park is located in the scenic, rolling, wooded Hill Country of Texas. Visually, it is an enjoyable land with an agriculturally oriented economy. Some urbanization pressures are apparent, not in the small towns, but in the subdivision of ranches for speculative (and successful) "ranchettes" of five acres (2 ha) or more. The population of the Hill Country region is predominately white and agrarian, but there are groups of Blacks and Hispanics scattered in different sections. Economically the region is stable, supported by a wide, viable range of income sources. Johnson City is a small, agricultural and tourism oriented town of about 1,000 people and is the county seat of Blanco County.

The area around the LBJ Ranch Unit, located near Stonewall in Gillespie County, is now a very attractive and viable environment mostly dedicated to ranching. Large and economical farm units prevail with a scattering of small villages and single-family residential units. The State has developed the Lyndon B. Johnson State Historical Park to preserve lands south of the ranch from commercial exploitation and purchased additional lands along the Pedernales River to preclude loss of pastoral, scenic, and historical qualities, as well as to provide space for additional park facilities and public use.

The LBJ sites are popular with visitors both from within and outside the State. With implementation of the various additional proposals, the "industry" generated could become second only to agriculture in regional economic impact.

Related regional public facilities show the same trend. The LBJ Library in Austin is the most popular Presidential library. The Admiral Chester Nimitz State Historical Park in Fredericksburg, 15 miles (24 km) west of the LBJ Ranch, is also a popular attraction. Both of these sites offer complementary interpretive opportunities to the Lyndon B. Johnson National Historical Park. Pedernales Falls State Park and Blanco State Park in Blanco County, Enchanted Rock State Park and Lady Bird Johnson Municipal Park in Gillespie County offer camping and a wide variety of recreational activities.

3. Within-Park Influences

The Lyndon B. Johnson sites draw large numbers of visitors from all over the United States and the world. For 1993, 80,755 visits were recorded at

the Johnson City Unit; 104,086 visits at the LBJ Ranch. The method of computing visitation was changed in 1990 resulting in lower figures.

The greatest number of people come during the spring and summer months, but visitation occurs year-round. During spring, and to a lesser extent in the fall, school groups and other special tour groups visit the park in large numbers. Visitors from the northern states come to south Texas for the winter and visit the park in large numbers.

E. MANAGEMENT OBJECTIVES

1. To Preserve and Maintain Park Resources And Facilities
To acquire property as needed to protect the park and historic scene from adverse land uses on the park boundary.

To provide for non-intrusive development of park facilities.

To provide the research necessary to preserve, maintain, and manage park resources.

To maintain living-ranch operations.

To find appropriate uses for buildings acquired in Johnson City.

2. To Protect Visitors, Employees, And Historic and Natural Resources
To modernize fire and intrusion alarm systems in the park.
To ensure fire protection for park resources and facilities.

3. To Manage Employees And Resources In An Effective Manner
To update and develop park plans in order to address current issues.

## NATURAL RESOURCE BASELINE INFORMATION
## ABIOTIC INVENTORY AND MONITORING

A. Basic Inventory for all areas: (Meets Level II Criteria)

The park tracks unusual events through the standard 10-343 Incident Recording System. The park collects fire weather data and using Affirms, since March 1989, determines daily fire danger the year-around. Sporadic monitors of rainfall and weather have taken place since the early 1980s. Prescribed burns have been conducted to control undesirable plant species and promote desired grass growth.

USGS maps at the 1:24000 scale exist for both units of the park and are used for resource management projects in the park. A portion of these maps were last updated in 1982.

B. Geology: (Meets Level II Criteria)

Presently we have soil surveys of Blanco and Gillespie counties by the USDA Soil Conservation Service, issued 1975. The park has the flood hazard report for Lyndon B. Johnson National Historical Park, prepared by the U. S. Army Corps of Engineers in 1979. This report has information on flood plains, river channel characteristics, etc., for the Pedernales River at the LBJ Ranch. The park also has a flood plain map for the Johnson City Unit.

C. Hydrology: (Does not meet Level I Criteria)

The park at present has no water resource management plan, which would address such areas as watershed maps, the physical parameters and the inventory through description of the various hydrological areas.

D. Meteorology: (Meets Level I Criteria)

The park has an established weather station at the Johnson City Unit, where daily weather readings are taken. The information taken is used to determine daily fire danger.

E. Models: (Does not meet Level I Criteria)

No hydrologic or meteorologic models for the park exist.

## BIOLOGICAL INVENTORYING AND MONITORING

A. Historical Database: (Meets Level I Criteria)

The park tracks unusual events through the standard 10-343 Incident Recording System, to include drought, floods, fires, etc. Weather related events are documented through the weather station recording system. There is no primary bibliography of natural resource documents available.

B. Maps of Biological Inventory: (Does not meet Level I Criteria)

At present there are maps indicating vegetation types, Cultural Landscape Report Analysis of Historic Vegetation Lyndon B. Johnson National Historical Park, 1986. No maps indicating special interest plant and animal distribution exist.

C. Species: (Does not meet Level I Criteria)

A listing and status of any threatened, rare, and endangered species has not been done. A compilation of plant species has not been done. Checklists for mammals, birds, fish, amphibians, reptiles and insects need to be accomplished.

D. Populations and Populations Dynamics: (Does not meet Level I Criteria)

No extensive studies or monitoring of wildlife has been done in the park.

E. Photography: (Meets Level I Criteria)

The park has one set of high-altitude, infrared photographs, and one set of aerial, oblique photographs covering the entire park. Also available are miscellaneous aerial photographs obtained from the Agricultural Stabilization Service, Soil Conservation Service, and other agencies.

F. Community Dynamics: (Does not meet Level I Criteria)

No community dynamics data is available.

G. Models: (Does not meet Level I Criteria)

No modeling has ever been developed for any population species in the park.

## HUMAN USE (ACTIVITIES) INVENTORY AND MONITORING

A. Event Record: (Meets Level I Criteria)

Letters, memos, notes, reports, and plans exist since the establishment of the park for such things as nutria control, tree die-offs, floods, droughts, etc.

B. Maps: (Meets Level I Criteria)

The park presently has maps showing all present use areas located on USGS maps.

C. Human Activities (Meets Level I Criteria)

The park provides day-use activities only. These activities consist of primarily sight-seeing at the Johnson Settlement and Boyhood Home and conducted tours of the ranch unit.

D. Ownership: (Meets Level I Criteria)

Lands within the boundaries are owned by the United States Government, Mrs. Johnson, the LBJ Company, and private owners. Mrs. Johnson and Jewell Scott have life estate within the park. Various parcels of land will become property of the United States Government on Mrs. Johnson's passing. All land ownership is well documented.

E. Demography: (Does not meet Level I Criteria)

There are no studies that address all of the parameters outlined under this heading.

F. Domestic Animals: (Meets Level I Criteria)

Park-owned animals include two horses, ten Longhorn cows and calves, and a herd of 100 - 130 registered Hereford cattle (calves, bulls, heifers, etc.). The numbers fluctuate from year to year as new calves are born and cattle are sold. The historic Hereford herd is managed according to a herd management plan developed in cooperation with Texas A&M University.

G. Legal Matters: (Meets Level I Criteria)

Lyndon B. Johnson National Historic Site was authorized by Public Law 91-134, December 2, 1969. S.2363-1980, Park Omnibus Bill, Title VI, Lyndon B. Johnson National Historical Park, 1980, amends P.L. 91-134 by changing "National Historic Site to National Historical Park."

The organic Act of 1916 and other related regulations and policies are used to manage the daily operations at the park.

H. Educational Activities: (Meets Level I Criteria)

Presently there are no research projects being conducted at the park.

I. Regional Land Use Planning (Meets Level I Criteria)

The nearest hospital is located in Fredericksburg, Texas, 17 miles from the ranch unit and 30 miles from the Johnson City unit. The next closest hospitals are located in San Antonio and Austin, Texas, both approximately 60 miles from the Johnson City Unit and 75 miles from the Ranch Unit.

Park housing has been limited to volunteers-in-the-park because of the high rental rate of park housing. However, the park is presently planning to have required occupancy quarters for protection rangers in the near future. Adequate housing

for park employees can be found within the surrounding communities. All services and utilities can be obtained by park employees.

J. Other Social Studies: (Does not meet Level I Criteria)

At the present time an oral history project is underway with Mrs. Johnson. (See cultural resources projects sheets).

## SUMMARY OF INVENTORY AND MONITORING NEEDS

Lyndon B. Johnson National Historical Park was established in 1969. Prior to that time the two units had a long history as a ranching area. Very limited studies of the natural resources have been conducted. In recent years initial work has begun to conduct various studies; this was done with the assistance of the Cooperative Parks Studies Unit at Texas A&M (this office has since been closed). Several areas of the baseline inventory and monitoring sections were identified as needing further study to meet Level I Criteria. Areas that need study include the following; Hydrology, Hydrologic and Meteorologic Models, Maps of Biological Inventory, Species Inventories, Populations and Population Dynamics, Community Dynamics, Species Models, and Demography. Level I Criteria is the very basic standard. To have a more comprehensive Resource Management Plan, Level II Criteria needs to be met and exceeded.

## NATURAL RESOURCES MANAGEMENT OVERVIEW & NEEDS

The management of the natural environment at Lyndon B. Johnson National Historical Park is primarily concerned with the maintenance of formal and informal cultural landscapes. Virtually every acre of the park has been changed from its original, natural appearance. Overseeing these resources resembles conventional natural resources management only in that the park is dealing with plants and animals. For the most part, the desired flora and fauna are non-native species. Much of the present resource management practice extends from President Johnson's statement that he wanted "the ranch to remain a working ranch, not a sterile relic of the past." Following this guidance, so that it does not contradict National Park Service policy directives, is the primary challenge to park staff and natural resource management professionals.

In his management of the ranch, President Johnson had two main goals. The first of these was to make a profit, the second was to maintain the ranch as the showplace of modern ranching techniques and practices. These goals were attained through the introduction of exotic grasses, extensive irrigation, large-scale use of fertilizers and biocides, and complex rotation schemes in the grazing and feeding of the cattle herd. Also, other exotic plants and animals were introduced over the years. While National Park Service objectives are not exactly the same as President Johnson's, and the National

Park Service does not follow many of the practices that he used, the park does have the obligation to devise cost effective, environmentally sound measures to maintain the landscape as it was during the approved historic period, 1963-1973. The National Park Service has also assumed the obligation to carry out his wish that the ranch remain a working ranch. These two goals are not incompatible in that while operating the working ranch, the park is also maintaining the historic scene and patterns of land use.

At the present time the park is managing the formal landscapes, pastures, crop fields, and orchards for historic scene aesthetics. Also, in the case of the ranch pastures, hay fields, and cultivated fields, the park is attempting to manage them for production. That is, trying to raise a quality product in quantities sufficient for the needs of the park livestock. The primary problem is that both quality and quantity of hay and forage crops have declined because of invasion of weed species. These invasions of weed species compromises not only crop production but the historic scene, i.e., a hay field full of thistles or a coastal pasture grown up in mesquite is not historically accurate. Likewise, insect invasions can dramatically alter the historic scene. The above problems have eased somewhat in the past two years as we have had excellent help and cooperation from the Southwest Regional Office of Natural Resources Management.

Another major management concern deals with re-establishment and management of the formal landscapes in the park. These areas are the Texas White House and environs, reconstructed Birthplace, LBJ Family Cemetery, Boyhood Home, and Junction School. The park has a general Cultural Landscape Report, completed in 1986, that covers these areas. Information on specific strategies for reporting and managing these landscapes, however, is lacking. Cultural landscape reports are needed that specifically address each area and how it will be restored, managed, and maintained.

Some other concerns are care of the lawns, trees, shrubs, and integrated management of insect pests that affect them, control of termites, carpenter ants, and other insects that affect park structures, and control of fire ants, mosquitos, flies, roaches, and other noxious insects.

The following is the priority list of natural resource needs at Lyndon B. Johnson National Historical Park:

> The development of a comprehensive park-wide Integrated Pest Management Plan is a top natural resource management priority. The piecemeal program presently used by the park is expensive, labor intensive, and does not work. Pest management is typically in reaction to an immediate problem with no evident long-range solutions. A coherent, useable, and effective IPM program is necessary to deal with the ever-increasing varieties of pests found in the park. In order to develop this plan, investigation and identification of the plants, animals, and insects in the park will be necessary. This leads to another high priority area, baseline data on vegetation, invertebrate, and mammals. This data is needed not

only for establishing an IPM plan, but the Inventory and Monitoring Program as well. The IPM will assist the park by providing some of the necessary tools to return the various landscapes in the park to their appearance during the designated historic periods.

A Cultural Landscape Report needs to be developed to aid park management in the restoration, management, and maintenance of park landscapes.

Aerial photography, and computerized mapping and overlays are an integral part of the Natural Resource Management Plan proposal. A Geographic Information System (GIS) is necessary to allow the park to tie into a useable mapping system that would be used as a basis for implementation of resource management plans and long-term monitoring of the park's resources. The aerial photographs will have to be systematically updated to monitor and document changes in the park and surrounding area.

Air and Water Resource Management Plans are needed as is the implementation of monitoring programs for air and water quality. Data collected from the park's air and water resources are important not only to the park, but also to the region. Research is needed into the methods used to control erosion and water run-off so that these features can be restored to control present erosion problems.

The park needs two sociological studies. These studies would update and supplement the information in A Market Oriented Analysis of Visitors to Lyndon B. Johnson National and State Parks, by Mill and Wegner, completed in 1985.

A Visitor Use Survey for the park is needed for planning purposes and would be especially useful in planning the interpretation for the new Visitor Center. This survey would also determine the number of visitors to various areas in the park and a formula for computing park visitation.

A Regional Visitor Use and Economic Impact Study is also needed for the same reasons.

## CULTURAL RESOURCES

### A. Archeology

Park management does not have a good idea of the nature and location of archeological resources in the park because no archeological assessment or survey has been done. Park management has attempted to obtain funding and assistance for this work from the Southwestern Parks and Monuments Association, and the Cooperative Park Studies Unit at Texas A&M University, and has been

unsuccessful in both cases. This research has been programmed since 1976 and during most of this time has been within the first ten items on the parks priority list. However, the project has never gotten into the Cultural Resources Preservation Program list in the Regional Office. One archeological site has been recently surveyed in the Johnson City Unit.

B. Structures

The List of Classified Structures contains 84 entries, of these 83 meet the National Register criteria for national significance. Lyndon B. Johnson National Historical Park has been completely surveyed for structures of cultural importance, and the National Register documentation has been completed. In 1993 the park began an on-going consultation with the Southwest Regional Office and the Texas State Historic Preservation Office on the National Register eligibility of 21 recently purchased structures located in the Johnson City Unit. The consultation process has not yet been completed, however many of the structures will probably be added to the List of Classified Structures in the future.

The structures are generally well preserved and cared for. Annual inspections are carried out by knowledgeable maintenance personnel, and work projects and funding requests are based on these inspections.

C. Objects

The museum collection falls almost entirely into the archeology and history categories.

There are 7,430 objects in the museum collection that are documented to the catalog-data level.

The estimated 2,800 objects in the archeological category consist of items found during archeological investigations conducted during the restoration phase, early in the park's history. Most of these objects were found during investigations to locate the site of the Lyndon B. Johnson Birthplace Barn and structures ancillary to the Junction School. Both investigations were inconclusive, and the brief reports do not indicate that the objects are of any value, hence their low priority for cataloging.

There are 150 natural history specimens cataloged into the collection.

The objects comprising the history category range in age from the 1860s through the 1970s, and cover all object classifications, from textile and leather, through furniture to television sets, security systems, vehicles and agricultural machinery. This part of the collection is well documented and cataloged to the catalog-data

level. Approximately 200 to 300 items are acquired per year, and approximately 100 to 200 items are cataloged per year. The park's cataloging backlog has been 200 to 300 items over the past three years.

The condition of the collection, overall, is fair to good. That part of the collection that is in curatorial storage (approximately 50%) is in good to excellent condition. The part of the collection that is on exhibit in the Boyhood Home and Birthplace; or stored elsewhere, i.e., under the Hangar Carport and the warehouse in Johnson City, (approximately 50%) is fair to poor. The reason for the fair to poor condition estimate is that these objects are exhibited and stored in uncontrolled conditions, with resulting deterioration from uncontrolled temperature, humidity, and other environmental factors.

D. Cultural Landscapes

The cultural landscapes at the Lyndon B. Johnson National Historical Park are divided into two categories, formal landscaped areas, located around the principle structures, and informal landscapes, which include most of the LBJ Ranch and Johnson Settlement.

All landscapes in the park have been identified and evaluated, however, the treatment component of the documentation is missing. The condition of all park landscapes is estimated to be fair. The LBJ Ranch portion has probably changed less than the Boyhood Home and Johnson Settlement. The potential impacts for most park landscapes is low, the exception to this is the LBJ Ranch where the potential impacts from noxious weeds and insects, could have impacts ranging from moderate to severe. The park has attempted to manage these landscapes with the assistance of local county agents, the Soil Conservation Service, the National Forest Service, and other local, state, and federal agencies. In most cases these agencies have been helpful to the extent that their recommendations coincided with National Park Service natural resource management policies, rules and guidelines.

## CULTURAL CONTEXTS/THEMES AND SUPPORTING PROPERTY TYPES

The cultural context/themes for Lyndon B. Johnson National Historical Park include the obvious ones, the American Presidency, westward expansion, agriculture, and also some less obvious ones such as education, civil rights, poverty relief, the environment, and recreation.

President Johnson frequently came home to the LBJ Ranch during his tenure in office. When he was in residence, the Executive Branch was essentially removed from Washington to the Ranch, thus, the Texas White House is unique in the National Park

Service. This was made possible by modern communications and transportation. The Johnson Administration is closely associated with the areas of education, civil rights, poverty relief, the environment, and the Vietnam War. Many of the administration's programs affecting these areas were formulated at the Ranch and subsequent work such as legislation, budgets, etc., supporting them were carried out there.

The property types listed for these themes are those that supported Executive Branch activities such as security, communications and transportation.

V-D-4

Structures related to the Johnson administrations activities on behalf of poverty relief, civil rights, the natural and cultural environment, and recreation--the Texas White House, and associated structures in the core area of the LBJ Ranch. Structures associated with Executive Branch activities--Secret Service Command Post, associated security structures and apparatus; the White House Communications Buildings and associated communications apparatus; the Hangar, air strip and associated structures and apparatus; the Junction School, Cedar Guest House; and LBJ Ranch Landscape.

## CURRENT RESOURCES MANAGEMENT ACTIVITIES

### A. Archeology

The park monitors all ground-disturbing activities for evidence of archeological resources. These activities are documented using the assessment-of-affect forms and associated records such as photographs, sketches, and maps. In 1993 an archeological survey was carried out in the Johnson City Unit in conjunction with construction activities around the new Visitor Venter, and 106 clearances were obtained.

### B. Structures

The maintenance staff formally inspects each historic structure in the park on an annual basis and documents this inspection with inspection forms, photographs, sketches, and narrative reports as needed.

Throughout the year the historian, curator, maintenance, protection staff, and other park employees informally monitor the park's resources and report any problems found to park management. The information generated through these activities is used to formulate and prioritize annual work plans, budget requests, and budget allocations.

Resource management activities for 1991 included previous year projects which carried over. For example, repairs to the LBJ Birthplace; Klein's Shop; Martin Barn; S. E. Johnson Log Cabin; and LBJ Boyhood Home.

Projects initiated in 1991 included painting the LBJ Boyhood Home; repairs to the S. E. Johnson Log Cabin; cleaning, repairing and painting the Bus Barn water tank; painting east Guard Shack; replacing two septic systems at the LBJ Ranch; and filling abandoned septic tanks and cisterns park-wide. One long-term project, rehabilitation of the Texas White House, was completed in 1991. This project was started in 1986 with work on the foundation and progressed through roof repairs, paint removal, repair and replacement of deteriorated elements, and repainting. The project was completed by using both park and regional funds.

All activities involving historic structures are documented on the assessment of effect on cultural resources (XXX) form. The forms are supplemented with photographs, sketches, drawings, maps, and narrative reports as necessary to completely document each project. In 1991 35 Triple-X forms were submitted and approved. Three formal Section 106 clearances were processed in 1991 to install above-ground fuel tanks at the LBJ Ranch, for conversion of the former LBJ Memorial Hospital into a Visitor Center and Headquarters for the park, and for an amendment to the Development Concept Plan.

In 1992 31 Triple-X forms were submitted and approved, and 106 consultations continued on the new Visitor Center and various site improvements in Johnson City.

In 1993 30 Triple-X forms were submitted and approved, and the 106 consultations on the New Visitor Center and site improvements in Johnson City continued. Section 106 consultations were started on the National Register eligibility and use of 21 structures recently acquired in Johnson City.

C. Objects

The park curator monitors the condition of the park's museum collection on a continuous basis. Inspections of the furnished structures are done bi-monthly. Problems or questions are resolved either in the park or discussed with experts in the Southwest Regional Office or Harpers Ferry Center. The curatorial storage and work space will be significantly up-graded when the collection is moved to the

new Visitor Center in Johnson City. The new space is completely climate controlled, fire protected, and much larger than the present storage area.

Since 1991 there have been 20 accessions totaling 222 objects. A total of 484 objects were cataloged to the catalog-data level, and 1,389 old catalog records were updated and added to the Automated National Catalog System (ANCS).

In addition to the above, some other projects were:

Ongoing work with Mrs. Johnson on the documentation and disposition of the Texas White House furnishings.

Ongoing video documentation of the Texas White House by Mrs. Johnson. Routine cleaning and care of objects in the LBJ Boyhood Home and Birthplace.

Identifying, labeling, and filming approximately 3,000 photographs of objects in the Secret Service Command Post, Boyhood Home, Birthplace, Johnson Log Cabin, and other Ranch structures.

Completion of the Furnishings Study for the Texas White House.

Cedar Guest House inventoried and photographed.

Preparation of Curatorial Storage Plan.

West Guest House inventoried and photographed.

Video documentation of LBJ Boyhood Home, Birthplace, Hangar, S.E. Johnson Log Cabin, and Cedar Guest House.

D. Landscapes

The historic landscapes in the park are informally monitored on a daily basis. The park does not have baseline data or an on-going formal monitoring program. (Please see the natural resource section for a detailed discussion of the natural component of the park landscapes).

The built environment of park landscapes is managed in much the same way as the historic structures. Both components are managed to keep the park looking much as it did when President Johnson was alive.

Some of the landscape projects completed in 1991 were:

Installation of subsurface irrigation systems, in the formal lawns, throughout the park.

Cleaning of fence rows and repair/replacement of fences at the LBJ Ranch.

Routine care and maintenance of the 500 acres of ranch/farmland, 27 acres of formal landscape, 800 pecan, 4,600 oak and other trees, 3,166 square yards of flower beds, utility and irrigation systems that make up the historic landscape of Lyndon B. Johnson National Historical Park.

All work is documented as necessary on the assessment-of-effect form with supplemental sketches, maps, photographs, and narrative reports attached.

Phases I and II of a Cultural Landscape Inventory for the LBJ Ranch were partially completed in 1993. These need to be completed along with Phase III for the LBJ Ranch. All three phases need to be done for the Johnson City Unit.

E. Historic Research and Documentation

An Historical Resource Study of the LBJ Ranch was initiated in 1993. This will extend through 1995.

## CULTURAL RESOURCES MANAGEMENT NEEDS

A. Archeology

Lyndon B. Johnson National Historical Park needs an archeological assessment and survey. This study would enhance and facilitate park managements efforts in the preservation of historic resources and in compliance with the National Historic Preservation Act, National Park Service Policies and Guidelines.

B. Structures

Cultural resources management projects that are unfunded for 1994 are:

Reshingle LBJ Boyhood Home roof

Repair/repaint LBJ Boyhood Home

Repair/repaint Cedar Guest House

Rehab board floors S.E. Johnson Log Cabin

Repair James Polk Johnson Barn

Reshingle building, Johnson Settlement

Repair stringers, joists and floor of Sam E. Johnson Log Cabin

Repair James Polk Johnson Barn

Repair Lincoln enclosure

Repair and repaint hay sheds

In addition to the above high priority projects, there is a backlog of deferred preservation maintenance projects that are only slightly lower in priority. Present staffing and funds do not allow adequate standards to be maintained. Substantial lands and numerous structures have been added to the park since 1978, however, there have been no concomitant increase in base funding for maintenance and preservation.

C. Historic Research and Documentation

Historic structures reports are needed for all structures except the Boyhood Home, Birthplace, Sam E. Johnson Log Cabin, and the Texas White House.

Historic structures preservation guides or their equivalent are needed for all structures except the Boyhood Home.

The park's oral history collection needs to be transcribed to make the information available for research and interpretive purposes. There are approximately 350 hours of tape to be transcribed.

Other historical studies needed are:

An ethnography of the LBJ Ranch

Study of the relationships between the LBJ Ranch and locals

Study of Johnson's networks as seen from the Ranch

Study of Rebekah Baines Johnson and her family

Study of historic land use and economy of the Johnson City, Hye, Stonewall area

Local histories of Johnson City, Hye and Stonewall, Texas

Study of LBJ's early ethnic and racial contacts

The Historical Studies listed above are recommended in the research design for Lyndon B. Johnson National Historical Park completed in 1985 by Barbara Holmes. These studies are described in Project Statements C-015 through C-022.

D. Curation/Objects

The highest priority needs in this area is a new Collection Management Plan that addresses the future of the museum collection. Foremost of the problems to be addressed is preservation of the motor vehicles and farm machinery in the collection. These very important objects are presently exhibited and stored in very poor condition, and are deteriorating as a result. Other issues to be discussed are, furnishings in the Texas White House, particularly the fine arts, and the preservation and reproduction of the friendship stones.

A Collection Storage Plan will be needed when the collection is moved to the new Headquarters and Visitor Center in Johnson City.

Depending upon what is actually approved when the new General Management Plan and revised Interpretive Prospectus are written and approved, there will be a need for several exhibit plans, furnishings studies, and furnishings plans.

E. Cultural Landscapes

Cultural landscapes are more thoroughly discussed in the Natural Resources section of this plan. Some landscape projects, however, are more properly discussed here.

The cultural landscape features at the LBJ Ranch need to be inventoried and documented. These would be such things as soil erosion-control features, water-control features, irrigation systems, fences, gates and land-use patterns. The information gained would be invaluable in the park's efforts to preserve this unique landscape.

Cultural Landscape Reports are needed particularly at the LBJ Ranch and the Johnson Settlement.

A Geographic Information System (GIS) is needed to synthesize the information gathered in the studies and plans requested in this section as well as those in the Natural Resources section. A Geographic Information System would also aid in monitoring the landscapes in the park.

F. Planning Needs

Lyndon B. Johnson National Historical Park needs a General Management Plan to guide park management in developing the park and its resources.

The interpretive Prospectus needs to be revised to reflect the decisions made in the GMP.

G. Security and Fire Protection

Lyndon B. Johnson National Historical Park has sixty historic structures requiring fire protection. Thirty-three of these structures require fire detection systems, and an undetermined number should have automatic fire suppression systems.

The water system installed at the Ranch in 1983 needs to be extended down Park Road 49 to the Junction School. The historic structures along Park Road 49 have no water supply at all for fire protection.

In February 1994 the fire detection/suppression system in the Texas White House malfunctioned, dumping all the Halon. This system was installed approximately 15 years ago and has been consistently unreliable. A new detection and sprinkler system is needed.

## Problem Statement

The activities represented by this project statement are ongoing, park base funded, cultural resources management, research, and documentation. This is primarily work carried out by the Historian and Curator to document, research, and manage the museum collection and historical resources in the park. This included compliance activities and the documentation of such activities.

## Description of Recommended Project or Activity

Title : PROVIDE STRUCTURAL FIRE PROTECTION

Funding Status: Funded: 210.00 Unfunded: 600.00

Servicewide Issues : C72 (PROTECTION)
C50 (SECTY&FIRE)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number : 228

## Problem Statement

This park has approximately 60 structures that require fire protection. The park has made considerable progress in the installation of fire detection systems and the sprinkler system recently installed in the Texas White House.

Effective structural fire control depends on early detection and suppression. Local volunteer fire departments are not consistently reliable and time factors sometimes render them ineffective. Therefore, the park would like to install sprinkler systems in at least the most important structures in the park.

With the installation of the water line at the Ranch, and the fire hydrants near the Boyhood Home in Johnson City, our water supply problems are largely taken care of. The exception to this are structures located along Park Road 49; Junction School, Birthplace, Sam E. Johnson place, Cedar Guest House, and Oriole Bailey House. These resources have no effective water supply for fire fighting.

## Description of Recommended Project or Activity

Year 1: Extend water at Ranch along Park Road 49 to the Junction School. Package Number 198.

Year 2: Install fire suppression systems in structures. Package Number 228.

BUDGET AND FTEs:

FUNDED

| | Source | Activity | Fund Type | Budget ($1000s) | FTEs |

Initial Proposal: 1994

Title : PROVIDE HISTORIC STRUCTURES REPORT

Funding Status: Funded: 40.90 Unfunded: 0.00

Servicewide Issues : C52 (HSR)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number : 150

## Problem Statement

Park management needs historic structures reports for all historic structures in the park. These reports are needed to guide present and furture maintenance, preservation, and planning.

We have adequate Historic Structures Reports for the Lyndon B. Johnson Boyhood Home, and the Sam Ealy Johnson Log Cabin. At the LBJ Ranch we have a Historic Structures Report for the Texas White House in progress, and one for the Junction School. We need Historic Structures Reports for seven major structures at the LBJ Ranch: Secret Service Command Post, Hangar, Airstrip, Communitcations Building, Military Aid Trailer Complex, Show Barn, Cedar Guest House, LBJ Birthplace, and the S. E. Johnson Farmhouse. Also at the LBJ Ranch there are approximately 30 structures that need less extensive research than the major structures previously listed.

The Historic Structures Report for the Texas White House is partially completed. The Historical Data Section is finished but the Architectural Data Section has not been finished. The Architectural Research has largely been finished, and the Historic American Buildings Survey has completed drawings. However, this material is not yet ready for publication. All the data hither to collected is catalogued into the Park's Museum Collection.

## Description of Recommended Project or Activity

Complete the Texas White House Historic Structures report and Historic Structures Reports for the LBJ Ranch buildings.

BUDGET AND FTEs:

Title : PROVIDE ARCHEOLOGICAL SURVEY

Funding Status: Funded: 0.00 Unfunded: 20.00

Servicewide Issues : C01 (OVERVIEW)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 131

## Problem Statement

Park management needs an archeological survey. At present we have little information on the nature of the historic and/or prehistoric archeological resources of the park, and where they are located.

Lyndon B. Johnson NHP is scheduled to begin a GMP in 1997. The information contained in this assessment and survey will be needed as part of the planning process.

No archeological assessment or survey has ever been done for Lyndon B. Johnson National Historical Park. As a result, we have little or no information on the archeological resources. We do know that various state institutions, colleges, universities, etc., have conducted several archeological investigations in areas close to both park units.

Two archaeological excavations have been carried out in the Johnson City Unit; one at the Johnson Settlement by the University of Texas, and the second behind the Boyhood Home by the park. At the Ranch Unit excavations were carried out at the LBJ Birthplace and the Junction School.

Two very limited project-oriented surveys have been carried out in limited areas of both units.

When the assessment and survey are done the information uncovered will be extremely useful in both long and short term planning. It will also facilitate Section 106 and "XXX" clearance for individual projects. The remote sensing parts of the assessment will provide photos and current, up-to-date, maps which can be used in many different phases of park planning and management.

Description of Recommended Project or Activity

Complete the archeological assessment and survey.

Funding Status: Funded: 0.00 Unfunded: 50.00

Servicewide Issues : C06 (SITE MONIT)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number :

## Problem Statement

Park management needs ICAP information for all historic structures in the park. This information is needed to assist and direct park management in the preservation of the historic resources in the park.

There are eighty-four structures are listed on the park's List of Classified Structures.

This request also included entering the information into the ICAP database and instruction on the up-keep and use of the program.

## Description of Recommended Project or Activity

Compile information and enter into database. Train park staff in database up-keep and use.

Title : RESTORE JUNCTION SCHOOL

Funding Status: Funded: 0.00 Unfunded: 75.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number : 146

## Problem Statement

The Junction School was acquired in 1972. At that time it was being used as a residence. At the time of acquisition, modern additions were removed and minimal stabilization was done. Further stabilization was performed in 1979 when a new roof and replacement tin siding were put on, and a chimney removed. General repairs and painting were also done. The current condition of the building exterior is good.

Since 1979 no major work has been done on this structure. Restoration for visitor use and interpretation is needed.

The park intends to restore the exterior of the building to its historic appearance. The interior will be renovated for yet to be determined interpretive programs. The historic appearance of the interior is not well enough documented to restore.

## Description of Recommended Project or Activity

Restore Junction School as programmed.

BUDGET AND FTEs:

| Source | Activity | Fund Type | Budget ($1000s) | FTEs |

Title : TRANSCRIBE ORAL HISTORY TAPES

Funding Status: Funded: 0.00 Unfunded: 30.00

Servicewide Issues : C38 (SPEC STUDY)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 190

## Problem Statement

The oral history collection at Lyndon B. Johnson National Historical Park contains approximately 350 hours of taped interviews which have not been transcribed. These are interviews with friends, neighbors, and employees of the Johnson Family, from his boyhood through the presidency. If this collection were transcribed, it would make available a tremendous data base in an easily used and copied form. This would be of great advantage to anyone using the collection, as using the tapes is very time consuming. The information contained in this collection is invaluable for research, interpretation, and resource management.

Sporadic use by researchers doing HSR and other interpretive and management documents indicate the wealth of information contained in the oral interviews, but remains little used because the interviews have not been transcribed.

## Description of Recommended Project or Activity

Transcribe the oral history collection.

Title : INVESTIGATE JOHNSON'S NETWORK AT THE LBJ RANCH

Funding Status: Funded: 0.00 Unfunded: 30.00

Servicewide Issues : C38 (SPEC STUDY)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 219

## Problem Statement

If the National Park Service is to properly manage, maintain, and interpret the LBJ Ranch, a number of historic research projects need to be undertaken.

The park has historic studies that cover some facets of the LBJ Ranch story, i.e., the partially completed LBJ Ranching Study, Texas White House Historic Structures Report, etc. The activities at the ranch during the period 1960-1973, however, have not been thoroughly studied. In particular, the family's domestic life and the activities of various government agencies need to be identified in order to be interpreted.

This study of LBJ's networks is essential to the understanding of his private life as well as his political and business careers. This would include an analysis of visitors to the ranch, who they were, what their importance was, and why they were there.

This analysis of LBJ's network as seen from the LBJ Ranch is fundamental to our understanding of the events which took place at the LBJ Ranch, and the people who were involved in them. This information will be invaluable for interpretive programs.

This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

## Description of Recommended Project or Activity

Complete programmed study.

Funding Status: Funded: 0.00 Unfunded: 30.00

Servicewide Issues : C38 (SPEC STUDY)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 120

## Problem Statement

If the National Park Service is to properly manage, maintain, and interpret the LBJ Ranch, a number of historic research projects need to be undertaken.The Johnson Family Cemetery is an integral part of the interpretive story at Lyndon B. Johnson National Historical Park, about which comparatively little is known. Interpreters often find themselves in the position of being unable to answer a visitor question. Intensive genealogical research is needed to clear up some of the major blanks in knowledge of the area, and the families who are represented in the cemetery. A history of the physical development on the cemetery and important funerals is also important.This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

10-238 Package Number : 166

## Problem Statement

If the National Park Service is to properly manage and accurately interpret the various park-owned resources in Johnson City several research projects are needed.

The only study the park has that treats Rebekah Johnson is the LBJ Historic Resource Study by Edwin C. Bearss, which covers the Boyhood Home, Johnson Settlement, and the Birthplace. The studies presently planned should give us more detailed information on the family activities at the Boyhood Home and the Johnson Settlement.

Lyndon B. Johnson National Historical Park is dedicated to the interpretation of the life of Lyndon B. Johnson. An understanding of the ancestors of Johnson is important to understanding the man. The information on his father's side of the family is compiled, and is in detail. His mother's side of the family had a definite bearing on his life, but to date our historic data on Rebekah Baines Johnson and her family is very limited. Because of this our interpretation is limited, and our limited factual information makes it difficult to answer questions concerning them.

This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

## Description of Recommended Project or Activity

Complete the historic research as programmed.

10-238 Package Number : 167

## Problem Statement

If the National Park Service is to properly manage and accurately interpret the various park-owned resources in Johnson City several research projects are needed.

The only study the park has is the LBJ Historic Resource Study by Edwin C. Bearss which covers the Boyhood Home, Johnson Settlement, and the Birthplace. The studies presently planned should give us more detailed information on the family activities at the Boyhood Home and the Johnson Settlement.

The former President's contacts with minority groups during his earlier years evidently had a definite bearing on his decisions. At this time our information on his contact with minority groups as he grew up is limited; this hampers understanding and interpretation of the man and his actions. A study is needed that will cover the details of his minority contacts and motivations in this area.

This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

## Description of Recommended Project or Activity

Complete the historic research as programmed.

## Problem Statement

If the National Park Service is to properly manage and accurately interpret the various park-owned resources in Johnson City several research projects are needed.

The only study the park has is the LBJ Historic Resource Study by Edwin C. Bearss, which covers the Boyhood Home, Johnson Settlement, and the Birthplace. The studies presently planned should give us more detailed information on the family activities at the Boyhood Home and the Johnson Settlement.

Local histories of Johnson City, Stonewall, and Hye, Texas are needed. This study would be a narration of the events and people that make up the history of these communities, with the emphasis on the Johnson family, and those events and people which were to become important in Lyndon B. Johnson's life. Topics would include demography, architecture, political structure, infrastructure, stores, schools, churches, transportation systems, etc.

This study is basic to understanding Lyndon B. Johnson and the events and people who influenced his early years, later life, and political career. This information will make an invaluable contribution to our interpretive programs.

This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

## Description of Recommended Project or Activity

Complete the historic research as programmed.

Funding Status: Funded: 0.00 Unfunded: 25.00

Servicewide Issues : C38 (SPEC STUDY)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 223

## Problem Statement

If the National Park Service is to properly manage and accurately interpret the various park-owned resources in Johnson City several research projects are needed.

The only study the park has is the LBJ Historic Resource Study by Edwin C. Bearss which covers the Boyhood Home, Johnson Settlement and the Birthplace. The studies presently planned should give us more detailed information on the family activities at the Boyhood Home and the Johnson Settlement.

This study will concentrate on the Johnson Family and their historic farming and ranching activities. Throughout their history, the Johnson family has been involved with agriculture in the Hill Country region. This study will look at the relationship between this involvement, and the regional and local economy and local land use. The land use histories and agriculture technologies of the Johnson farms and ranches will be the focus of the study. However, the history of these farms and ranches can only be understood in terms of regional patterns and perspectives.

This study will greatly enhance knowledge of the history of the Johnson family and their occupation of various sites in the Texas Hill Country. The information will be invaluable for interpretive and resources management programs.

This study was recommended in the research design done for Lyndon B. Johnson National Historical Park, by Barbara Holmes, in 1985.

## Description of Recommended Project or Activity

Complete the historic research as programmed.

Title : PREPARE COLLECTIONS MANAGEMENT PLAN

Funding Status: Funded: 0.00 Unfunded: 40.00

Servicewide Issues : C41 (CMP)

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 221

## Problem Statement

The present Collection Management Plan was approved in 1978. Not only has this plan been substantially implemented, but circumstances have changed to the extent that a new plan is needed. Access, handling and inventory controls have been updated and need to be reflected as well as loan and acquisition procedures. A number of issues have surfaced in recent years which need to be addressed, such as acquisition of works of fine art located in the Texas White House. Also several issues from the old plan need to be looked at again, i.e., preservation and care of the Fiat, Amphicar, fire engine, Ford hunting car, golf carts, miniature wagon stored under the Hangar Carport, as well as the care and storage of 15-20 pieces of farm machinery. Climate control for furnished historic structures. The new plan should specifically address the vehicles stored under the Hangar Carport, the restoration of the fire truck, two golf carts, the blue Fiat, and the further care and restoration of the Amphicar and red hunting car. The plan should also reflect the need for proper storage of the friendship stones. The care and exhibit of the friendship stones, furnishing and exhibit needs, and plans for all Ranch structures must also be discussed.

Applicable 10-238 packages are:
217 Enclose Hangar Carport
218 Replicate friendship stones
183 Study of historic vehicles, LBJ Ranch
151 Historic Furnishings Plans, LBJ Ranch
174 Exhibit plans for White House Communications Buildings
176 Exhibit plans for Hangar
177 Exhibit plans for Secret Service Command Post

Description of Recommended Project or Activity

Prepare a Collections Management Plan as described above.

Title : REPAIR J. P. JOHNSON BARN

Funding Status: Funded: 0.00 Unfunded: 15.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number : 43

## Problem Statement

Restoration of the James Polk Johnson Barn was completed in 1974. Over the past three years cracks have been monitored on the northeast and east walls. The dimension of each separation has increased each year and has resulted in loose rock at the northeast corner. Inadequate drainage and extended periods of low moisture have evidently contributed to the expansion and contraction of the foundation and walls. Further separation will result in rock falling from the walls, and possibly require more extensive/expensive restoration.

## Description of Recommended Project or Activity

Repair two stone walls on the James Polk Johnson Barn and stabilize the foundation of these walls. Improve drainage around the structure.

Servicewide Issues : C55 (MAINTENANCE)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number : 39

## Problem Statement

Reroof seven historic structures in the Johnson City Unit. The seven structures are: the S.E. Johnson Log Cabin, Smoke House, Bruckner Barn, J.P. Johnson Barn, Cooler House, LBJ Boyhood Home, and the Wash House. All these structures were restored in the early 1970s. They are listed on the National Register of Historic Places. All these structures have wood shingle roofs which have started to deteriorate.

Year 1 - 5 Johnson Settlement structures

Year 2 - Boyhood Home and Wash House.

## Description of Recommended Project or Activity

Reroof the structures as soon as possible.

Title : REPAIR/REHAB JOHNSON AND JORDAN DAMS

Funding Status: Funded: 0.00 Unfunded: 65.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number :

## Problem Statement

The Johnson Dam consists of two parts, the dam itself and the low water crossing attached to the dam. The dam is in good condition, but the low water crossing (approximately 150') needs rehabilitation to restore it to its original appearance. This work includes replacing of cement spillway curbing, safety chains with pipe supports/reflectors, and flood guage marker.The Jordan Dam, located 3/4 mile downstream from the Johnson Dam is in need of rehabilitation for structural damage to the south bank. Eroding of the south bank has resulted from the several large floods of recent years.The Johnson low water crossing is part of the original entrance to the LBJ Ranch, which was used before the high water bridge near the Junction School was built. The above work would restore this historic resource to its original appearance. The Johnson and Jordan Dams are on the LYJO LCS, and are an important part of the historic LBJ Ranch scene.

## Description of Recommended Project or Activity

See Problem Statement.

Title : ENCLOSE HANGAR CARPORT TO PROTECT HISTORIC VEHICLES

Funding Status: Funded: 0.00 Unfunded: 100.00

Servicewide Issues : C47 (STORAGE)
C49 (ENVIRONMNT)

Cultural Resource Type: OBJC (Object)

N-RMAP Program codes :

10-238 Package Number : 217

## Problem Statement

In the recent past Mrs. Johnson donated to the NPS three of the vehicles traditionally stored under the Hangar Carport (the hunting car, Amphicar, and fire truck). Also stored here are three golf carts and a reproduction chuckwagon which we do not yet own, but expect Mrs. Johnson will eventually donate. All these vehicles were intimately associated with President Johnson and his activities at the Ranch. Having spent $8,000.00 on the repair/rehab of the hunting car and Amphicar, and anticipating spending an alike amount on the recently donated fire truck, we have considered various options for their display/storage. The major threats to these artifacts are environmental; i.e. heat, cold, humidity fluctuations, dust, dirt, insects, and ultraviolet light. We do no have any place to store/display the vehicles except under the open carport. The longer they remain as they are, the more they will deteriorate. We feel very strongly that they should be displayed in their traditional location, and that they should be afforded protection from the elements of deterioration as soon as possible. Failure to afford these valuable artifacts the adequate protection needed will lead not only to their eventual loss, but to the loss of the substantial investment we have already made in their restoration, upkeep, and care.This solution is fully supported by the Collection Management Plan for Lyndon B. Johnson NHP done in 1978. The park's Interpretive Prospectus says that the vehicles will be exhibited under the Hangar Carport where they were originally stored.The Hangar Carport is directly adjacent to the bus tour route and these vehicles are a favorite attraction for thousands of visitors each year.

## Description of Recommended Project or Activity

Enclose the vehicles exhibited under the carport on the south side of the LBJ Hangar to protect them from further deterioration. The plans should include climate controls and ultraviolet filtering. Care should be taken to avoid reflections in the glass. Provision should be made for pedestrian access to the space, and moving the vehicles if it should be necessary.Estimates, design, construction drawings and specifications, and Triple-X approval will be needed.

Title : REPAIR/REPAINT LBJ BOYHOOD HOME EXTERIOR

Funding Status: Funded: 22.00 Unfunded: 0.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number :

## Problem Statement

The restoration of the Boyhood Home was completed in 1974. Since that time the building has received minimal repairs. There are a number of maintenance deficiencies that need to be addressed. Parts of the building have been painted several times resulting in heavy paint build-up. Some of the wood siding and trim is rotten; shutters, screens, and windows need repair. Gutters and downspouts need painting.

## Description of Recommended Project or Activity

The paint will be striped from all exterior surfaces of the building. Siding and trim will be repaired/replaced as needed. All surfaces will be prepared, primed and painted. Shutters, screens, and windows will be repaired as necessary. Wood parts will be repaired as necessary and painted.

BUDGET AND FTEs:

Title : REPAIR PARK ROADS

Funding Status: Funded: 0.00 Unfunded: 1600.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: CULL (Cultural Landscape)

N-RMAP Program codes :

10-238 Package Number : 193

## Problem Statement

The roads to be repaired are the major part of the historic road network at the LBJ Ranch. They consist of Park Road 49, the Bailey Road, the Malchek Road, and the English Park Road, totaling approximately seven (7) miles. Major work on these roads took place in 1981 and 1986. Since that time only minor repairs have been possible due to budget restraints. The roads are deteriorating because of heavier than normal rain fall for the past several years, flooding, and heavy traffic.

## Description of Recommended Project or Activity

The park proposes that an asphalt overlay be installed as a more lasting solution than the previous chip and seal work. Also, culverts and cattlegaurds will be repaired/replaced as needed, and road shoulders will be graded.

BUDGET AND FTEs:

| FUNDED | | | | |

Initial Proposal: 1994

Title : PREPARE DEVELOPMENT CONCEPT PLAN, LBJ RANCH

Funding Status: Funded: 0.00 Unfunded: 45.00

Servicewide Issues : N24 (OTHER (NATURAL))

Cultural Resource Type:

N-RMAP Program codes :

10-238 Package Number : 227

## Problem Statement

Lyndon B. Johnson National Historical Park has never had a General Management Plan. The Development Concept Plan for the Johnson City Unit was amended in 1992 to accommodate recent events in that Unit of the park. A similar amendment needs to be done for the LBJ Ranch Unit. As Mrs. Johnson ages (she turned 80 in December 1992) there is a need for a plan to manage visitors and resources at the Ranch after she is gone. It is difficult, if not impossible, to address planning issues such as the need for a new Interpretive Prospectus, land protection issues, use of historic structures and landscapes, museum collection policies and other such issues concerning resource management without the decisions that would be made in this document.

## Description of Recommended Project or Activity

A planning team would write the document addressing issues of concern to the park and Regional Office. This should be done soon.

Title : CONVERT CURATORIAL DOCUMENTATION PHOTOS TO PHOTO CD

Funding Status: Funded: 4.50 Unfunded: 25.00

Servicewide Issues : C46 (ACCOUNTBLY)

Cultural Resource Type: OBJC (Object)

N-RMAP Program codes :

10-238 Package Number :

## Problem Statement

The park has approximately 30,000 photographs that document the curatorial collections, the contents of the Texas White House, and other structures throughout the park. Much of this photo collection is made up of color prints taken since 1970. The older materials have started to fade and deteriorate. The other materials will also deteriorate as they get older. This photo collection is a valuable asset, and will be even more valuable in the future when the park begins to develop furnishing plans for the Texas White House and other structures at the LBJ Ranch.

Photos in the collection also document all historical structures in the park; and the Johnson family and their activities including both historic and modern photos. Conversion to CD will make the collection more accessible and useable to future researchers.

## Description of Recommended Project or Activity

The park proposes to convert the photo collection to photo compact disks for future use. In 1996 $4,500.00 was allocated to begin digitizing photographs to CD. The $25,000.00 requested will be used for image conversion. When this project is completed photos will be converted to CDs as they are taken.

Title : REHAB THREE HOUSES IN THE JOHNSON CITY UNIT

Funding Status: Funded: 300.00 Unfunded: 0.00

Servicewide Issues : C56 (REHAB, ETC.)

Cultural Resource Type: STRC (Structure)

N-RMAP Program codes :

10-238 Package Number :

## Problem Statement

In the past several years the park has purchased six houses located west of the LBJ Boyhood Home in the Johnson City Unit. These structures have been determined to be of local significance and eligible for the National Register of Historic Places.

At the present time most of these buildings are vacant and in poor condition.

## Description of Recommended Project or Activity

The park proposes to rehabilitate three of the structures for various park purposes:^IThe Cantwell House will be used as work space for protection ^Iand resources management.^IThe Moore House will be used for storage of protection and ^Iresources management equipment.^IThe Taylor House will be made into an environmental ^Ieducation center.The various uses will require extensive repairs and renovations to all three structures.

Title : PROVIDE CULTURAL LANDSCAPE INVENTORIES & REPORTS

Funding Status: Funded: 15.00 Unfunded: 70.00

Servicewide Issues : C11 (REPORT)
C17 (VEG MGT PLN)

Cultural Resource Type: COMB (Combination)

N-RMAP Program codes : V00 (Vegetation Management)

10-238 Package Number :

## Problem Statement

The Historic Vegetation Report for Lyndon B. Johnson National Historical Park, completed in 1986, recommends separate landscape restoration and management plans be prepared for the various sites in the park. This study also recommends that some means be found to propagate historically important plants for replacement purposes.

The historic landscapes for various parts of the park have changed considerably from what they were during the designated historic periods. The landscapes around the LBJ Ranch House, and the LBJ Ranch generally, are of particular concern as they are well documented during the historic period, and have changed considerably. The other sites, LBJ Boyhood Home, Birthplace, Family Cemetery, Junction School, and Johnson Settlement are not as well documented. However, plans for landscape restoration, to the extent possible, and management will still be needed.

The Historic Vegetation Report, completed in 1986, concentrated on formal landscapes and vegetation, but said little about other landscape components such as fences, gates, water improvement, drainage systems, soil conservation, and irrigation systems. These landscape features need to be identified and documented in a Cultural Landscape Inventory, particularly at the LBJ Ranch. Procedures for preservation of landscape features are also needed.

Parts I and II of a Historic Landscape Inventory were partially completed for the LBJ Ranch in 1993. This report needs to be completed, along with Phase III. A complete report for the Johnson City Unit is needed.

Lyndon B. Johnson NHP is scheduled to begin a GMP in 1997. The information contained in the cultural landscape reports will be

needed as part of the planning process.

## Description of Recommended Project or Activity

First, complete CLI's for each component landscape (6 CLI's total).

Formulate individual cultural landscape plans for various park areas to include restoration, monitoring, and maintenance components.

Formulate Cultural Landscape Inventory and document landscape components such as fences, gates, roads, irrigation and drainage systems, so later cultural landscape reports can recommend actions for their preservation.
