FOREWORD

The National Park Service, a bureau of the Department of the Interior, is responsible for administering and protecting Federally owned scenic, scientific, historic, and recreational areas of national significance that were established for the benefit and enjoyment of the people. Also administered are the National Capital Parks, a metropolitan park system comprising approximately 785 urban and rural parks located in and around Washington, D. C.

This monthly report contains data reflecting total use by the public of the national parks. Data are in thousands producing occasional inconsistencies because of rounding. Statistically, a "Visit" is the entry of any person into a national park such that he makes some use of services, conveniences, or facilities provided by the National Park Service. A "Visitor-Day" includes, in addition to the total of "Visits", the number of overnight stays in a park by persons not employed there.
