NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries. Use letter quality printers in 12 pitch. Use only 25% or greater cotton content bond paper.

Describe present and historic physical appearance.

This is a small, stone walled building, used presently as a radio repeater station and fire cache to store fire fighting equipment and supplies. The exterior is of uncoursed fieldstone and mortar. The stone used in the building came from the site. The roof is arched on five beams and covered with wood and rolled asphalt roofing. There is one door and a roof access trap door, both of wood. The interior is one room. The interior has a concrete floor with stone walls, no ceiling and exposed wood beams and roofing boards. There is one former stove pipe opening that is now used for cable support. There have been a number of changes to the building's function over the years that led to changes in physical appearance and character of the building. The most dramatic have been the closure of the windows and removal of the heating and cooking stove and other interior appointments after the conversion of the building to a radio repeater station during the early 1970s. From 1914 through 1969 the building was used as housing for crews that manned a nearby fire lookout tower. In 1969 the lookout was abandoned and removed.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

171 This building, originally built in 1914 by the United States Forest Service, is not considered to be an example of the National Park Service Rustic design philosophy as it was practiced at Rocky Mountain National Park during the early twentieth century. However, the opportunistic use of nearby stone, when combined with the arch roof, an early twentieth century vernacular roof treatment for small sheds and utility buildings, argue for this building being representative of trends in general rustic and vernacular architecture as it was practiced in much of Colorado during the World War I period. In particular, the arched or box-car roof represents an important trend in Colorado architecture during the period when the Forest Service constructed this building. Other known, contemporary examples have been recorded throughout much of the Colorado front range and piedmont from extreme southern Colorado north to Wyoming.

The building, built by the Forest Service in 1914, was acquired by the National Park Service in 1925. The Forest Service and National Park Service used the building as a seasonal housing facility for crews that manned a fire lookout tower on Twin Sisters Peak. The original lookout was used until 1949 when a replacement tower was built. That lookout remained active until 1969. The 1969 fire season was the last time Twin Sisters was used as a lookout. In 1973 the building was converted to a fire cache and radio repeater station. Since its construction the building has experienced a number of modifications. These reflect the functional changes that the building has gone through over the years. The most dramatic have been the closure of the windows and removal of the heating and cooking stove and other interior appointments after the conversion of the building to a radio repeater station as mentioned above. Despite the changes, all modifications have been in a manner consistent with the materials, character and fabric of the historic exterior and interior. Thus, it is felt that the building retains enough integrity to be considered as an important example trends in local architecture. The roof and the use of locally available stone for a rustic building above timberline, show the basic philosophy of the rustic philosophy by being built in a manner consistent with the local environment.

Verbal Boundary Description

The property boundary is defined as a circle 50 feet in diameter centered on UTM point 13/456020/4459780.

— See continuation sheet

Boundary Justification

The boundary as described encompasses the resource and a small area of its natural setting. It does not include a large buffer zone or unnecessary lands.

Amended Items in Nomination:

Significant Date:

The block for Significant Dates is amended to read: 1914 and 1925. These dates reflect the resource's date of construction and the date of its NPS acquisition. The original dates provided (1949, 1969, and 1973) are deleted since they fall outside of the period of significance. In addition, 1949 refers to the nearby fire tower structure and not the nominated lookout building.
