SUMMARY

This Saint Croix bibliography, compiled at Acadia National Park by Pat Bernier in March 1995, supplemented by a search of Cultural Resource Division files at NARO, is based on a search of the following:

- Acadia National Park, Bar Harbor, Maine
 - Files
 - ACADBIB Resource management bibliography
 - Planning files
 - Library and library vertical
 - Chief of Interpretation files
 - Maintenance files
 - Isleford library index
- Acadia University, Nova Scotia (through Internet)
- URSUS
 - University of Maine System
 - Maine State Library and Law Library
 - Bangor Public Library
 - Portland Public Library
- Maine CAT (on CD-ROM)
- St. Croix Public Library, St. Stephen, New Brunswick
- Center of Acadian Studies, Moncton, New Brunswick
- Heritage Canada
- Parks Canada
- Historic sites in Moncton, New Brunswick
- National Archaeological Database (NADB)
- Center for Advanced Spatial Technologies (CAST), University of Arkansas
- Departmental Consulting Archeologists/Archeological Assistance Division, NPS
- Aquatic Science and Fisheries Abstract (ASFA), Hosted by Fishery and Ocean (FAO), Cambridge Scientific Abstracts, Bethesda, Maryland
- AQUAREF, Environment Canada, Ecosystem Science and Evaluation Directorate, WATDOC, Ottawa, Ontario
- NARO, Boston

Crist, Thomas A. J. "Biocultural response to scurvy: an example from Ste. Croix Island, New France, 1604-1605." *Archaeological perspectives on American pasts: 1995 Conference on historical and underwater archaeology*, 68. photocopy. 28th Annual Meeting. : Society for Historical Archaeology. Abstract only.

Abstract here printed in full ; Physical location of work in Acadia: planning files.

The first problem-oriented archaeological investigation of a North American historical site took place in 1796 at Ste. Croix Island, Maine in order to establish the official boundary between the United States and Canada. It was at this obscure site in 1604 that an expedition including Samuel de Champlain founded the first permanent French settlement in the New World. In his memoirs Champlain documented the deaths of 35 of his comrades during the winter of 1604-1605, ascribing their expiration to the effects of scurvy, the scourge of sailors throughout the Age of Discovery. Although a widespread dietary disorder, little osteological evidence of scurvy has been observed in human remains from historic period sites. This paper presents the results of the paleopathological analysis of 23 of the 35 colonists who died at Ste. Croix Island in 1604 and 1605, and includes new data on potentially diagnostic indicators of scurvy in dry bone. Synthesizing information from historical accounts, archaeological data, and osteological evidence, this study describes the biocultural responses made by past peoples to a pervasive nutritional disorder still prevalent yet generally unrecognized in modern society.

Copy is barely legible at best ; note on first page: Original in Nalligan's

file--NER w/maps ; a readable copy of this report is located in ACAD planning office filed under Archaeological investigations and correspondence.

Summarizes archeological excavation on Saint Croix Island during May and June 1950 ; sections include Pre-excavation research, Sources of information concerning the original settlement, Maps and geological information, Purpose of preliminary archeological explorations, Description of preliminary explorations, Excavation records, Archeological features, Important artifacts, Conclusions and interpretations, Recommendations for further research and archeological exploration.

Excavations.

Archaeological survey report; examination and evaluation of sixteen proposed construction localities; Acadia National Park and St. Croix National Monument, Paul Y. Inashima. 37 pages. Rockville, Maryland: United States. National Park Service. Denver Service Center. Eastern Team. Applied Archaeology Center, 1988.

Physical location of work in Acadia: Natural Resource, see also Maintenance Microfiche ; includes bibliography.

From May 16 through 20, 1988, a three person crew from The American University Cooperative Park Studies Unit performed a preliminary archaeological reconnaissance of sixteen construction locales. These locales were situated within Acadia National Park and within St. Croix Island National Monument. This survey was largely confined to an examination of existing and proposed roadway, amounting to some 28,638.79 feet of road corridor. Both surface inspection and subsurface testing were employed. The fieldwork was hampered throughout by a virtually continuous rain from the start to the end of the project. No significant cultural resources were identified within the proposed construction zones.

History--Maine--St. Croix

Archaeology--Maine--St. Croix.

A conservation survey of metal artifacts from St. Croix Island National Monument, Edward McManus. : United States. National Park Service., 5 May 1980. Unpublished report ; Physical location of work is in Cultural Resource files at NARO.

The purpose of this survey is to determine the present condition of metal artifacts which were excavated on St. Croix Island National Monument by an archaeological team from Temple University in 1969. The objects are presently stored in metal specimen cabinets in building 28, at the Charlestown Navy Yard, in Boston, Massachusetts.

Archaeology--Maine--St. Croix

History--Maine--St. Croix.

Preliminary historical report; St. Croix Island, Edward M. Riley. 74 pages. Boston, Massachuset: United States. National Park Service. North Atlantic Region, September 1949.

Physical location of work in Acadia: Maintenance Microfiche ; unpublished work ; includes appendix.

The purpose of this preliminary historical report on St. Croix Island, Maine, is to provide an organized and integrated collection of facts relating to the history of the island and description of the physical structure of the Sieur de Monts' colony of 1604-1605. The report is designed to serve as an aid to the archaeologist in planning his program and interpreting whatever remains are discovered in the course of an archaeological excavation on the island.

History--Maine--St. Croix.

United States. Joint resolution redesignating the St. Croix Island National Monument in the state of Maine as the "St. Croix Island International Historic Site". Washington, D.C.: Government Printing Office, 1984.

Physical location of work: University of Maine in Orono under Government Document, call#: GS 4.110:98-422.

Historic site--International cooperation.

United States. Department of the Interior; Canada. Department of the Environment, and New Brunswick. Historical Resources Administration. Memorandum of understanding; St. Croix Island International Historic Site. United States. Department of the Interior, Canada. Department of the environment, New Brunswick. Historical Resources Administration, 9 September 1982.

Physical location of work in Acadia: Planning under Parks Canada; see also Chief of Interpretation files under St. Croix ; text in French and English.

Identifies St. Croix Island's common heritage to U.S and Canada: U.S. and Canada agree to develop interpretive and visitor use facilities on mainland sites in each respective country. U.S. and Canada agree to protect and interpret the resources on St. Croix Island. The U.S. and Canada agree to support change of the Island's designation from a National Monument to International Historic Site.

Maine--St. Croix Island--Memorandum of understanding

Historic site--International cooperation.

United States. National Park Service. Saint Croix Island; Ile Sainte Croix. Washington, D.C.: United States. National Park Service, 1973.

Physical location of work in Acadia: Planning ; text in French and English.

Unigrid brochure of the first attempts at colonization of North America.

Historic site--International cooperation

History--Maine--St. Croix

History--Canada--St. Croix.

United States. National Park Service; Canada. Parks Canada, and New Brunswick.

Historical Resources Administration. St. Croix Island; a proposal for international commemoration. United States. National Park Service; Canada. Parks Canada; New Brunswick. Historical Resources Administration, November 1980.

Physical location of work in Acadia: Planning under planning, visitor center ; 4 page newsletter ; includes maps and an aerial photo.

Contents include: purpose of information pamphlet, historical significance, present situation, future development proposals, areas of international cooperation, areas of Canada-New Brunswick cooperation, what happens after the December 1980 open houses?

Historic site--International cooperation.

St. Croix Island open houses; summary of public comments and suggestions,

_____. 10 pages. : United States. National Park Service; Canada. Parks Canada; New Brunswick. Historical Resources Administration, June 1981.

Physical location of work in Acadia: Planning under Parks Canada, see also Maintenance Microfiche.

Compilation of comments following the St. Croix open houses upon the proposals for the future international commemoration and development of the island.

Historic site--International cooperation.

5 Interpretation

Kent, Alan E. et al. Interpretive prospectus; St. Croix Island National Monument. United States. National Park Service, October 1970.

Physical location of work in Acadia: Planning under interpretation, interpretive prospectus ; see also Library Vertical #1 and Maintenance Microfiche.

This Prospectus, prepared by a Canadian-U.S. planning team, suggests a joint development of the interpretive program for St. Croix Island. Contents includes: objectives of the interpretive program, the themes, a word about the Prospectus and the Master Plan of 1966, the Canadian contribution, a word on French and English, the developments on shore, the Island developments, publications-sales, school services and interpretive outreach, research needs, collections statement, staffing, cost estimates, and priorities.

Historic site--International cooperation

Historic sites--Interpretation.

St. Croix Island Master Plan; Interpretive Musings, Principal Interpretive Planner Alan E. Kent. 9 pages. : United States. National Park Service. Eastern Service Center, October 1971.

Physical location of work in Acadia: Planning under master plan ; unpublished work ; this is the interpretive section for the 1972 Master Plan ; corresponding memorandum included.

Contents include: interpretive objective, interpretive themes, interpretive development concept, and interpretive developments.

Historic sites--Interpretation

Historic site--International cooperation.

A cultural and archaeological interpretation of the French settlement on St. Croix Island, 1604, Dorothy D. Merrick. Photocopy of title page and contents. , 11 May 1962.

Physical location of work is in Cultural Resource files at NARO.

Contents of Chapter I listed as including: Historical background; Previous voyages; The settlement of St. Croix; Subsequent history; French cultural background; Interpretation; Conclusion.

Archaeology--Maine--St. Croix

Historic sites--Maine--St. Croix Island--History.

Preliminary plan : visitor center; St. Croix Island National Monument. Gustavson/Lopenske. Denver, Colorado: United States. National Park Service. Denver Service Center, June 1972.

Physical location of work in Acadia; Planning under planning, visitor center.

Contents include: sheet 1 is titled preliminary site study, sheet 2 shows sections of visitor center, sheet 3 shows floor plan, roof plan for visitor center.

Maine--St. Croix Island--Visitor center.

Rick, John H., Department of Indian Affairs and Northern Development, National and Historic Parks Branch, Canada, to Frederick Ley, Landscape Architect, National Park Service, Washington Planning and Service Center, Arlington, Virginia, 28 December 1967.

Physical location of work in Acadia: Planning under interpretation, interpretive prospectus ; attached to the one page letter is a four page text titled "The thematic role of St. Croix Island".

Discusses the major theme to be considered for St. Croix Island.

Ley, Frederick

Historic sites--St. Croix Island--Interpretation.

Ridlington, Steve, Environment Canada, Canadian Parks Service, Fort Beausejour, National Historic Site, to Deb Wade, chief interpreter, Acadia National Park, 25 April 1991.

Physical location of work in Acadia: Chief of Interpretation files under St. Croix ; attached to the fax cover sheet is a 7 page document titled "Themes and objectives".

Formal document generated to date directing interpretive initiatives from "our point of view". Contents include: board recommendation; background: historical, the site, national significance; statement of themes; statement of objectives; establishment of fiscal parameters; priority within the national system; and an appendix: St. Croix Island, a proposal for international cooperation.

Historic site--International cooperation

Historic sites--St. Croix Island--Interpretation.

Stoughton, Cecil W. Descriptive plaque on St. Croix Island, a National Monument located between the and Canada, United States. National Park Service. August 1968.

Physical location of work in Acadia: Chief of Interpretation files under St. Croix ; negative # 68-STCR-1040-S-frame 2.

Text on the plaque: "To commemorate the discovery and occupation of the island by DeMonts and Champlain who naming it L'Isle Sainte Croix founded here 26 June 1604 the French colony of Acadia then the only settlement of Europeans north of Florida this tablet is erected by residents of the St. Croix valley 1904".

Maine--St. Croix Island--Descriptive plaque.

Red Beach Cove photos; St. Croix Island National Monument, United States. National Park Service. United States. National Park Service,

Physical location of work in Acadia: Chief of Interpretation files under St. Croix ; untitled photos showing Red Beach Cove shelter and interpretive sign inside the shelter.

United States. National Park Service. Saint Croix Island; Ile Sainte Croix.
Washington, D.C.: United States. National Park Service, 1973.
Physical location of work in Acadia: Planning ; text in French and English.

6 Land Acquisition

Cotter, John L., Regional Archeologist, NER, to Acting Regional Director, 11 September 1957. Official Reports and Correspondence: St. Croix Island, Maine, Division of Archeology, NER.

Physical location of work in Acadia: planning files under Archaeological investigations and correspondence.

Subject: Observations on St. Croix Island and Acadia ; deals with August 30, 1957, visit to Saint Croix Island ; plans of acquiring ownership of entire island ; site visit to Jesuit Mission location of 1613 ; visit to Islesford Museum.

Historic site--Maine--St. Croix Island--Planning

Historic sites--St. Croix Island--Interpretation

Maine--St. Croix river light station.

Field trip report; Acadia and St. Croix Island, January 11-14, 1972, Leslie L. Fugedy. 8 pages. : United States. National Park Service. WASO., 24 January 1972.

Physical location of work in Acadia: Planning under historic structures ; unpublished work ; memorandum attached ; prepared for the Director of the Northeast Region.

The purpose of the trip to Whitlock Mills Lighthouse, located 5 miles north from St. Croix Island National Monument, was to evaluate Whitlock Mills Coast Guard Lighthouse Facilities and make recommendations whether or not it is feasible for the National Park Service to take over the facilities from the Coast Guard permanently.

Historic sites--Planning.

St. Croix Island National Monument; cultural resources survey of mainland tracts, august 23-31, 1976, Ronald W. Johnson, and Merrill Wilson. 46 pages. Denver, Colorado: United States. National Park Service. Denver Service Center. Division of Quality Control and Compliance, 1976.

Physical location of work in Acadia: Maintenance Microfiche ; Also located in NARO Cultural resource Division ; includes bibliography, photographs, and maps.

Contents include: overview, historical evaluation of Red Beach Plaster Co., historical evaluation of Maine Red Granite Co., architectural evaluation of tract 1 and tract 2, and recommendations.

St. Croix Island--Cultural resources survey.

Mainland area; St. Croix National Monument; cultural resource inventory, Donald L. Bressler. : United States. National Park Service. Denver Service Center, 1976.

Physical location of work in Acadia: Natural Resource, see also Maintenance Microfiche ; unpublished work ; memorandum attached.

Archaeological reconnaissance of St. Croix Island. The report summarizes the

results of staff archaeologist Loendorf's examination of the mainland area.
Archaeology--Canada--St. Croix.

St. Croix Island International Historic Site. United States. National Park Service. Denver Service Center. Denver, Colorado: United States. National Park Service. Division of Land Acquisition, May 1974.
Physical location of work in Acadia: Planning Map file, see also Planning under land protection, land status map.
The map shows federal and private land, site boundary, tract numbers and their owners, and tract boundaries.
Maine--St. Croix Island--Land status.

Land acquisition plan; St. Croix Island National Monument, United States. National Park Service. North Atlantic Region. : United States. National Park Service. North Atlantic Region, 16 January 1980.

Physical location of work in Acadia: Planning under land protection, land acquisition plan 1980 ; unpublished work ; includes appendices.
Contents include: background, land acquisition strategy, public involvement and appendices (copy of the act to authorize the establishment of the St. Croix Island National Monument in the state of Maine, revised land acquisition policy for the National Park Service, cultural resources survey map for St. Croix Island National Monument).

Maine--St. Croix Island--Land acquisition plan.

7 Legislation

Legislative support data; St. Croix Island National Monument, Judy Hart. : United States. National Park Service. North Atlantic Regional Office, June 1981.

Physical location of work in Acadia: Planning under legislative history ; includes colored photographs ; report submitted to WASO from NARO's office of legislation ; unpublished work.

Legislation proposed for St. Croix Island National Monument would change its name to St. Croix International Historic Site which would formalize an ongoing cooperative relationship over the site between the U.S. National Park Service, Parks Canada, and the New Brunswick Historical Resources Administration.

Contents includes: statement of proposal, proposal justification, previous legislation, National Park System Plan Statement, statement on special problems, land acquisition summary, current staffing, position of state and local governments toward proposal, proposed or existing agreements, National Historic landmark designation, current and past visitation, visitation forecast, existing fee schedule, proposed fee schedule, environmental impact statement, and planning reports.

16 Site Investigations and Surveys

Photographic report of conditions, St. Croix Island, Roy E. Appleman. 28 Photocopy of typescript and photographs. Richmond, Virginia: Region One, NPS, 14 October 1949.

Copy located in ACAD SACR files.

Contains 54 photographs of St. Croix Island and vicinity, seven taken by Regional Archeologist J. C. Harrington on September 16, 1949; forty-seven by Regional Historian Roy E. Appleman on August 21, 1949. Some images were made from lighthouse tower, no longer standing.

St. Croix Island--Site investigations.

Archaeological survey report; examination and evaluation of sixteen proposed construction localities; Acadia National Park and St. Croix National Monument, Paul Y. Inashima. 37 pages. Rockville, Maryland: United States. National Park Service. Denver Service Center. Eastern Team. Applied Archaeology Center, 1988.

Physical location of work in Acadia: Natural Resource, see also Maintenance Microfiche ; includes bibliography.

From May 16 through 20, 1988, a three person crew from The American University Cooperative Park Studies Unit performed a preliminary archaeological reconnaissance of sixteen construction locales. These locales were situated within Acadia National Park and within St. Croix Island National Monument. This survey was largely confined to an examination of existing and proposed roadway, amounting to some 28,638.79 feet of road corridor. Both surface inspection and subsurface testing were employed. The fieldwork was hampered throughout by a virtually continuous rain from the start to the end of the project. No significant cultural resources were identified within the proposed construction zones.

Crist, Thomas A. J. "Biocultural response to scurvy: an example from Ste. Croix Island, New France, 1604-1605." *Archaeological perspectives on American pasts: 1995 Conference on historical and underwater archaeology*, 68. photocopy. 28th Annual Meeting. : Society for Historical Archaeology. Abstract only.

Abstract here printed in full ; Physical location of work in Acadia: planning files.

The first problem-oriented archaeological investigation of a North American historical site took place in 1796 at Ste. Croix Island, Maine in order to establish the official boundary between the United States and Canada. It was at this obscure site in 1604 that an expedition including Samuel de Champlain founded the first permanent French settlement in the New World. In his memoirs Champlain documented the deaths of 35 of his comrades during the winter of 1604-1605, ascribing their expiration to the effects of scurvy, the scourge of sailors throughout the Age of Discovery. Although a widespread dietary disorder, little osteological evidence of scurvy has been observed in human remains from historic period sites. This paper presents the results of the paleopathological analysis of 23 of the 35 colonists who died at Ste. Croix Island in 1604 and 1605, and includes new data on potentially diagnostic indicators of scurvy in dry bone.

Synthesizing information from historical accounts, archaeological data, and osteological evidence, this study describes the biocultural responses made by past peoples to a pervasive nutritional disorder still prevalent yet generally unrecognized in modern society.

Archaeological survey report; examination and evaluation of sixteen proposed construction localities; Acadia National Park and St. Croix National Monument, Paul Y. Inashima. 37 pages. Rockville, Maryland: United States. National Park Service. Denver Service Center. Eastern Team. Applied Archaeology Center, 1988.

Physical location of work in Acadia: Natural Resource, see also Maintenance Microfiche ; includes bibliography.

From May 16 through 20, 1988, a three person crew from The American University Cooperative Park Studies Unit performed a preliminary archaeological reconnaissance of sixteen construction locales. These locales were situated within Acadia National Park and within St. Croix Island National Monument. This survey was largely confined to an examination of existing and proposed roadway, amounting to some 28,638.79 feet of road corridor. Both surface inspection and subsurface testing were employed. The fieldwork was hampered throughout by a virtually continuous rain from the start to the end of the project. No significant cultural resources were identified within the proposed construction zones.
