

Soldier's Cave

Sequoia and Kings Canyon National Parks, California
Plan View, showing passages as polygons colored to illustrate relative elevations.

Surveyed by the National Park Service
and the Western Region
of the National Speleological Society
1997 to 1999

Soldiers Cave length:
2,405 meters or 7,889 feet

Soldiers Cave depth:
96.5 meters or 316.5 feet

Passage elevations are based upon survey
elevations. Divisions between layers (colors)
were chosen based upon levels within the cave.
Level elevations are relative to station A1,
zero datum.

Upper levels are shown in preference to
lower levels. Bedrock pillars on upper levels
are shown as transparent and thus often
reveal lower level passages.
