

Full Species List of Birds

Shenandoah National Park has 196 resident and transient bird species. About half of these species, including 18 warbler species, breed in the park. Approximately 30 species are year-round residents. These include often-seen birds such as tufted titmice (*Baeolophus bicolor*), red-tailed hawks (*Buteo jamaicensis*), Carolina chickadees (*Poecile carolinensis*), wild turkeys (*Meleagris gallopavo*), and barred owls (*Strix varia*). The Park includes a wide variety of forest plant communities, and provides essential habitat for neotropical migratory bird migration and nesting. Certain areas, such as Big Meadows, support species that can be found nowhere else in the park.

Habitat degradation and forest fragmentation are the primary threats to most of the park's bird species. These threats are of particular concern for migratory species. Their breeding habitat and migratory stop-over grounds are degraded when mature deciduous forests are lost and remaining forests are fragmented and isolated. The profound changes in forest composition and structure brought about by invasive insect infestations, such as the loss of hemlock groves due to the hemlock wooly adelgid (*Adelges tsugae*), can also impact bird species composition and distribution within the park. Similarly, forest changes resulting from climate change are likely to impact bird populations.

This checklist was compiled on March 10, 2015 using data exported from the National Park Service NPSpecies database. The database can be accessed at <https://irma.nps.gov/NPSpecies/>. Here you will find search tools that make it possible to create updated or customized lists. This checklist and others are found at <https://irma.nps.gov/NPSpecies/Search/SpeciesList/SHEN>. Please be advised that Latin scientific names often change as a result of new research; therefore, scientific names used here may not reflect the most current accepted nomenclature.

Cardinalis cardinalis

Regulus satrapa

Strix varia

Bombycilla cedrorum

Species List for Shenandoah National Park (SHEN)

This represents information currently in the NPSpecies data system at the date and time the list was generated. Records are continually being added or updated by National Park Service staff. There is a key with definitions at the bottom of the report. To report an error or make a suggestion, go to <https://irma.nps.gov/npspecies/suggest>.

<i>Troglodytes troglodytes</i>	Winter Wren	P	R	N	B	MF; All		
<i>Turdus migratorius</i>	American Robin	P	C	N	B	PW; All	G5	VA: S5
<i>Tyrannus tyrannus</i>	Eastern Kingbird	P	O	N	B	FE, SS; Sp, Su, Fa	G5	VA: S5
<i>Vermivora chrysoptera</i>	Golden-winged Warbler	P	Uc	N	M	MF, SS; Sp, Su	G4	VA: S3B
<i>Vermivora cyanoptera</i>	Blue-winged Warbler	P	Uc	N	M	FE; Sp, Su	G5	VA: S3B
<i>Vireo flavifrons</i>	Yellow-throated Vireo	P	Uc	N	B	FE; Sp, Su, Fa	G5	VA: S4
<i>Vireo gilvus</i>	Warbling Vireo	P	R	N	M	PW; Sp, Su, Fa	G5	VA: S4
<i>Vireo griseus</i>	White-eyed Vireo	P	Uc	N	B	SS; Sp, Su, Fa	G5	VA: S5
<i>Vireo olivaceus</i>	Red-eyed Vireo	P	C	N	B	MF; Sp, Su, Fa	G5	VA: S5
<i>Vireo philadelphicus</i>	Philadelphia Vireo	P	R	N	M	PW; Sp, Fa	G5	VA: SNA
<i>Vireo solitarius</i>	Solitary Vireo, Blue-headed	P	C	N	B	MF; Sp, Su, Fa	G5	VA: S4
<i>Zenaidura macroura</i>	Mourning Dove	P	C	N	B	PW; All	G5	VA: S5
<i>Zonotrichia albicollis</i>	White-throated Sparrow	P	O	N	R	PW; Sp, Fa, Wi	G5	VA: SNRN
<i>Zonotrichia leucophrys</i>	White-crowned Sparrow	P	C	N	R	SS	G5	VA: S4N
Report Species Count: 196

Species List for Shenandoah National Park (SHEN)

This represents information currently in the NPSpecies data system at the date and time the list was generated. Records are continually being added or updated by National Park Service staff. There is a key with definitions at the bottom of the report. To report an error or make a suggestion, go to <https://irma.nps.gov/npspecies/suggest>.

	Code	Term	Definition
Occurrence (Occ)	P	Present	Species occurs in park; current, reliable evidence available.
	PP	Probably Present	High confidence species occurs in park but current, verified evidence needed.
	Un	Unconfirmed	Species is attributed to park but evidence is weak or absent.
	NP	Not In Park	Species is not known to occur in park.
Occurrence Tags	A	Adjacent	Species is known to occur in areas near to or contiguous with park boundaries.
	FR	False Report	Species was reported to occur within the park, but current evidence indicates the report was based on misidentification, a taxonomic concept no longer accepted, or other similar problem of error or interpretation.
	H	Historical	Species' historical occurrence in park is documented. Assigned based on judgment as opposed to determination based on age of the most recent evidence.
Abundance (Abd)	A	Abundant	Animals: May be seen daily, in suitable habitat and season, and counted in relatively large numbers. Plants, Chromista, Protozoa, and Fungi: Large number of individuals; wide ecological amplitude or occurring in habitats covering a large portion of the park
	C	Common	Animals: May be seen daily, in suitable habitat and season, but not in large numbers. Plants, Chromista, Protozoa, and Fungi: Large numbers of individuals predictably occurring in commonly encountered habitats but not those covering a large portion of the park
	Uc	Uncommon	Animals: Likely to be seen monthly in appropriate habitat and season. May be locally common. Plants, Chromista, Protozoa, and Fungi: Few to moderate numbers of individuals; occurring either sporadically in commonly encountered habitats or in uncommon habitats
	R	Rare	Animals: Present, but usually seen only a few times each year. Plants, Chromista, Protozoa, and Fungi: Few individuals, usually restricted to small areas of rare habitat
	O	Occasional	Animals: Occurs in the park at least once every few years, varying in numbers, but not necessarily every year. Plants, Chromista, Protozoa, and Fungi: Abundance variable from year to year (e.g., desert plants)
	U	Unknown	Abundance unknown
Nativeness (Nat)	N	Native	Species naturally occurring in park or region.
	Nn	Non-native	Species occurring on park lands as a result of deliberate or accidental human activities.
	U	Unknown	Nativeness status is unknown or ambiguous.
Nativeness Tags	R	Restoration	Also refers to reintroductions. Native species that has been extirpated or substantially diminished from the park as a result of human-induced change, and that has been or is in the process of being restored.
	C	Cultivated	Species has been introduced or is maintained as part of the park's mission, significance, or cultural landscape (e.g., orchards, crops, fields)
	I	Invasive	Non-native species whose introduction is likely to cause economic or environmental harm.

Species List for Shenandoah National Park (SHEN)

This represents information currently in the NPSpecies data system at the date and time the list was generated. Records are continually being added or updated by National Park Service staff. There is a key with definitions at the bottom of the report. To report an error or make a suggestion, go to <https://irma.nps.gov/npspecies/suggest>.

Nativeness Tags	N	Noxious	Designation by a governmental authority. Species grows aggressively and has broad environmental tolerance that allows it to establish in many locations.
Management Tags	EC	Exploitation Concern	Species is considered a target for collection, poaching, commercial harvesting, or other non-permitted or exploitative activities.
	MP	Management Priority	Species warrants particular management attention as determined by park management staff.
Seasonality Tags	B	Breeder	Population reproduces in the park.
	R	Resident	A significant population is maintained in the park but does not breed within park boundaries.
	M	Migratory	Species occurs in the park only while in transition between breeding and wintering grounds.
	S	Summer	Typically spending only summer months in the park.
	W	Winter	Typically spending only winter months in the park.
	V	Vagrant	Park is outside of species' usual range.

ParkTags	Code	Term	Definition
Vegetation Life Form	Form		
	Tr	Tree	Tree
	Sh	Shrub	Shrub
	Vi	Vine	Vine
	He	Herb	Herb
	Gr	Graminoid	Graminoid (grass)
	Fe	Fern	Fern
	Ly	Lycopod	Lycopod
Habitat	Hab		
	AQ	Aquatic	Within rivers, streams and ponds
	CU	Cultural	Planted by humans, either by pre-park residents or park employees/contractors
	FE	Forest Edge	Forest borders and field margins
	ME	Meadow	Meadows, fields, lawns, forest clearings, and ruderal habitats
	MF	Mesic forest	Mesic and dry-mesic forests; represents a majority of park's forested area
	RO	Rock outcrop	Exposed and shaded outcrops, boulder fields, talus slopes, and rocky barrens
	SS	Shrub/Scrub	Second growth forest and habitats dominated by shrubs
	WL	Wetland	Riparian areas, seeps, springs, fens, swamps, and wetland hummocks
	XF	Xeric forest	Dry forests, including heath woodlands and shrublands
Seasons when the species is most easily encountered.	PW	Park wide	Park wide
	Seas		
	Sp	Spring	Spring (Mar, Apr, May)
	Su	Summer	Summer (Jun, Jul, Aug)
	Fa	Fall	Fall (Sept, Oct)
