NATIONAL PARK SERVICE BENCHMARK POSITION DESCRIPTION

Library Technician GS-1411-06

Introduction

This position is located in a library in a National Park Service organization. The purpose of the position is to provide technical support to the library in one or more functional areas.

Technician work is typically associated with and supportive of a professional field; work may involve substantial elements of the work of the professional field, but requires less than full knowledge of the field involved. This position is intended to report to a specialist or resources manager in the same or a related field. If the incumbent is not supervised by a professional specialist (i.e., an archivist, librarian, or curator), then technical direction must be obtained from a specialist in a central office or center.

The incumbent performs primarily routine functions, but with more independence than positions performing similar work at the GS-5 level.

Major Duties (80-100%)

Enters new books and other materials into the library following precedents and established procedures. Prepares new materials for the reference files. While standard methods, practices, and procedures are available to reference, the incumbent is frequently required to use judgment to make adjustments.

Performs "copy cataloging" by searching available electronic library catalogs (OCLC and/or other catalogs on the Internet) for records matching library materials, evaluating records, and selecting the best one when duplicates are found. Modifies cataloging copy when record for exact edition is unavailable. When copy cataloging cannot be obtained, and there is no professional librarian in the organizational unit to do the work, incumbent performs "original cataloging" using guidelines provided by the NPS Library Program. Original classification using the Library of Congress (LC) or Dewey Decimal classification (DDC) system may require support by a professional librarian in a center or support office library. (Non-book materials may be organized using a locally derived arrangement scheme that is less complex than LC or DDC, but these system designs should adhere to principles disseminated by the NPS Library Program.)

If a card catalog is in use, incumbent prepares and files catalog cards. If the library software in use does not support card printing, incumbent is responsible to update computer-generated indexes (e.g., author, title, subject, and shelf list) maintained in a "binder" catalog. Periodically generates updated author/title/subject/shelf list indices

if program does not support production of card sets. Produces label sets and affixes labels to spines, circulation cards, and book pockets.

Responds to internal and external reference requests. Researches unusual requests, seeking assistance as necessary.

Performs periodic inventory of collections (at least every two years) using shelf list (cards or printout, depending on system). Annotates cards or database records, as appropriate, for any missing items and brings these to the attention of the supervisor. Determines whether to replace items not found.

Processes new materials and maintains order on the shelves and in the files.

Updates and maintains circulation records including borrower records, overdue material records, and interlibrary loans. Utilizes either manual or automated circulation system.

If there is no higher-graded library staff member on site, incumbent orders books requested by division chiefs. Reviews publisher catalogs and makes recommendations for purchase to division chiefs.

Provides shelf maintenance for any special collections (e.g., rare books and National Park Reports) which require special handling and which may utilize a classification and cataloging procedure unique to the collection and/or library.

Coordinates and maintains serial and periodical records. Manages the serials database management system, and may serve as the liaison with the library's subscription agency.

Coordinates the interlibrary loan function.

Completes special projects as assigned by the librarian.

Performs a variety of clerical operations in support of the library. This may include, for example, establishing and maintaining all office files and records; receiving, controlling, and taking action on incoming correspondence; inventorying and ordering supplies; and managing library equipment, including computer hardware, software, and databases.

Factor 1. Knowledge Required by the Position Level 1-4; 550 points

Knowledge of library regulations, procedures, and policies related to one or more library functions in order to perform a variety of routine technical tasks in support of the library.

Basic knowledge of the classification system used by the library (e.g., Dewey Decimal,

Library of Congress, etc.), including system variations, in order to file and retrieve materials.

Knowledge of all the library collections, and familiarity with the bibliographic record format and use of the card catalog and/or the online catalog.

Knowledge of the latest cataloging practices and rules for bibliographic entries in order to select good catalog copy and/or perform original cataloging.

Knowledge of basic reference techniques and tools in order to locate information from a variety of sources. This includes utilizing computer searching techniques.

Basic knowledge of the American Library Association standards for interlibrary loan operations, knowledge of potential sources of library materials, and an understanding of the rules and procedures of the libraries from which materials are borrowed.

Ability to communicate information in a clear and concise manner.

Knowledge of computer operation, including knowledge of several software programs utilized by the library (e.g., word processing, database management, and search programs).

Factor 2. Supervisory Controls Level 2-3; 275 points

The supervisor defines objectives, priorities, and deadlines for assignments, and provides assistance on the more complex assignments. The incumbent is given latitude for planning and accomplishing work and is expected to exercise initiative and judgment. Completed work is reviewed for appropriateness and technical soundness. Methods are not typically reviewed in detail.

Factor 3. Guidelines Level 3-2; 125 points

Available guidelines include reference materials, precedents, and accepted techniques and methodology. Guidelines apply to most situations, but the incumbent must use judgment to select the most appropriate guide from several alternatives and to make minor deviations to meet specific situations, as appropriate.

Factor 4. Complexity Level 4-2; 75 points

Duties involve a variety of related technical assignments that support the operation and maintenance of the organization's library. Decisions regarding what needs to be done involve various choices requiring the incumbent to recognize the existence of and differences among a few easily recognizable situations.

Factor 5. Scope and Effect Level 5-2; 75 points

The incumbent performs routine library tasks and portions of larger projects. The work performed affects the availability of material for staff and visitors.

Factor 6. Personal Contacts Level 6-2; 25 points

Contacts are with co-workers and at times employees of other parks and central offices as well as with the general public.

Factor 7. Purpose of Contacts Level 7-1; 20 points

The purpose of contacts is to obtain, relay, and exchange information.

Factor 8. Physical Demands Level 8-2; 20 points

The work is partially sedentary, involving prolonged periods of time operating a computer workstation, standing, walking, and bending. Heavy items (e.g., boxes up to 50 pounds) must be lifted or moved on a routine basis, and shifting of books and files across multiple shelves and file drawers is periodically required.

Factor 9. Work Environment Level 9-1; 5 points

Most of the work is performed in a library, which may or may be adequately lighted, heated, and cooled.

POSITION EVALUATION STATEMENT

Title, Series, and Grade: Library Technician, GS-1411-06

Standard Used: Library Technician Series, GS-1411, 10/93

EVALUATION FACTORS	POINTS ASSIGNED	FACTOR LEVEL	COMMENTS
1. Knowledge Required	550	1-4	Broad knowledge of a body of library regulations, procedures, and policies related to one or more library functions or specializations.
2. Supervisory Controls	275	2-3	Supervisor outlines objectives, priorities, and deadlines and provides guidance for unique situations; incumbent independently plans and carries out steps and uses established techniques to resolve problems; work is reviewed for appropriateness, technical soundness, and conformity to policy.
3. Guidelines	125	3-2	Incumbent must choose the most appropriate from several guidelines; makes minor deviations.
4. Complexity	75	4-2	Work involves performing related technical tasks of limited scope or difficulty; employee selects from among clearly recognizable alternatives; actions taken are similar, although the specific pattern of actions may differ (e.g., reference sources checked).
5. Scope and Effect	75	5-2	Work involves performing a range of library support tasks that are covered by

			well-defined procedures and regulations; work products affect the accuracy and reliability of the work of other technicians and professionals, and the accurate and timely provision of requested information to clientele.
6. Personal Contacts	--	2	Contacts with general public in moderately structured setting.
7. Purpose of Contacts	45	A	Exchange information.
8. Physical Demands	20	8-2	Prolonged standing, bending, lifting
9. Work Environment	5	9-1	Library and office setting.
