NEZ PERCE IN YELLOWSTONE, 1877

Introduction/Explanation...

... This is a work in progress, by no means a finished product...

... It attempts to give a brief time-line of happenings in and around Yellowstone during the Nez Perce retreat...

... The main participants are indicated by letters (S, R, H, etc.) and titles (S. G. Fisher, Helena Party, etc.) to make it easier to follow a particular person or group from day to day...

... Sometimes different paragraphs retell almost the same story, but usually there are additional facts and/or emphasis. Sometimes different dates are given for the same incident; readers should decide which date/time makes more sense to them...

... When choosing selections I included some comments/perspectives about incidents not mentioned in this paper. I just hope readers are familiar with the basic story and won't be too confused by this...

... Entries are often abbreviated, but I tried to leave in everything pertinent to exact locations in Yellowstone. I have left some things in even though they may not be totally relevant to the main story, I just found them interesting. I hope you do too...

... I didn't say much about atrocities at Big Hole -- they are well covered elsewhere, and it depresses me to dwell on them...

... A lot of interesting people show up in these pages- many of them I'd like to be able to drink a Rainier Ale with while listening to their story. I am especially envious of Lucullus McWhorter for the time he was able to spend with Yellow Wolf and his companions... but if wishes were horses, beggars would ride...

... Let me know of any specific dates, times, places and people you find in sources I haven't found... this is an ongoing interest and project...

... Many, many thanks to Pat Brown for getting me started in computer word processing, a subject I've avoided many years. Pat's patience, poise, energy and enthusiasm kept me on track when I was tempted to shoot my wife's computer... THANKS...

... The labor of the Indian camp while in a dangerous country, was pretty well divided between the women and the men. The latter having the fighting to do, the hunting and scouting and the constant watching; the driving horses to grass and bringing them in at night. While the women do the packing and driving the horses by day, the putting up and taking down lodges and poles, the gathering wood and digging roots and the pounding seeds for food and making moccasins. ... probably the way it was in Yellowstone in 1877...)

CANYON CREEK BATTLE

Thursday

S – S. G. Fisher: “NO BREAKFAST... GOT STARTED EARLY, I RIDING A MULE AS MY HORSE HAS ENTIRELY GIVEN OUT...

(...across the Yellowstone... very deep ford... water running over my mule's back
... The command halted on the bank of the river, while we went ahead a short distance, stopped and made fires to dry our clothing...

... an Indian scout... came galloping up to tell us that the enemy ... (was) coming up the river toward us...

... I ordered my boys to saddle and pack up at once... we rode at a good gait for about five miles across an open country...

... Upon reaching the rise of the table-land, bordering the valley, about 2 p.m., the Indians opened fire on us from the tops of the hills...

... just at this time a portion of Gen. Sturgis' cavalry came up and, instead of charging which should have been done, dismounted about 500 yards from the enemy's lines, deploying right and left, and opened a very rapid fire...

... The Indians fought entirely on horseback, firing mostly from their animals and at long range, doing but little harm...

... During this time the enemy's herd passed slowly across our front in the direction of the canyon, evidently being driven by the squaws and children, the warriors keeping between us and the horses and holding us in check...

... As soon as their herd had entered the canyon the Indians got in among the rocks and cottonwood timber that skirted the creek, dismounting and concealing their horses in the ravines and washes close by...

... here the hardest fighting was done...

... Probably not more than 200 soldiers were engaged at any one time, the greater portion of the command being held back on the bench as a reserve or to guard the ammunition train...

... The Indians were driven very slowly from point to point up the gulch...

... As it was now nearly or quite sundown, we all went down to where the soldiers were camped and there learned that the Crows had stolen my pack animals, clothing, bedding, etc., as well as a number of pack and saddle animals from others...

... The Crows took no part in the fight, but staid in the rear and stole everything they could get their hands on...

... The scouts generally were very much disgusted with Gen. Sturgis' management of the fight...

... The firing during the day was mostly at very long range, and, as the wind was blowing nearly a gale, it was impossible to do good shooting...

... The ground, also, was wet and it was seldom we could see where our bullets struck...)

whole hostile outfit right under us, strung along the bottom of Canyon Creek...
... At the sight of 2500 head of hostile horses the Crows went wild, charged one
corner of the rear of the herd, and cut out 300 horses, which they stampeded over
the hill and rushed back to their reservations...
... When the cavalry finally appeared... we all thought there would be a charge of
the 600 right there that would wind up the Nez Perce War...
... But there was no charge. Gen. Sturgis dismounted and deployed the troopers,
and followed up the Indians in skirmish line...
... So the battle of Canyon Creek lasted the rest of the day, the hostiles contesting
every foot of the ground while gradually drawing off up a box canyon...
... One Indian behind a point of rocks held them back for ten minutes, and when
the point was taken I counted 40 empty shells on the ground where he had been
crouching. And they were all government cartridges he had been firing at us...
... After the battle was over and darkness had come we had to cut steaks from
the horses and mules shot during the day. The meat was tough and stringy,
the poor animals had been rode and packed for months, with only what grass they
could pick up at night... it was all the food we had...”)
